Description

Taught from diverse cultural and professional backgrounds, ballet technique for dancers of today embodies the historic as well as current evolution of ballet technique. This class is a supportive and complementary skill set for various dance genres. It offers access to increased range of motion, refinement, control, accuracy, dynamic range - augmenting the ability to cover space, all while encouraging space for the unique needs of the individual dancer. While building strength and stamina, dancers are asked to investigate a holistic approach to ballet technique in an effort to prevent injury and inspire an ongoing conversation with the ever changing body.

Description
This course engages in the study of Hip Hop/Street dance including but not limited to breaking, social dances, popping, locking and house ranging from the 1970s to the present within African diasporic communities. Through understanding the dances' cultural identities, innovators and pioneers, students will then learn vocabulary, foundation, anatomy and behavior characteristics. Through movement practice, corresponding assignments via documentaries, readings, music, videos, and class discussions, students will develop a well rounded perspective on the ever evolving culture of Hip Hop/Street dance. As students progress through the course, their solid base will enable them to build a more developed, experimental and stylistic aesthetic in their own movement practice.

General

Course Long Title
Gaga for Dancers

Subject Code	Course Number
DTCH	482W

School(s)
School of Dance

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description
Gaga is the movement research developed by Ohad Naharin.
Gaga is a new way of gaining knowledge and self-awareness through your body. Gaga provides a framework for discovering and strengthening your body and adding flexibility, stamina, and agility while lightening the senses and imagination. Gaga raises awareness of physical weaknesses, awakens numb areas, exposes physical fixations, and offers ways for their elimination. The work improves instinctive movement and connects conscious and unconscious movement, and it allows for an experience of freedom and pleasure in a simple way, in a pleasant space, in

comfortable clothes, accompanied by music, each person with himself and others.
Gaga is a technique for dancers, but it is also for people without dance experience.
Gaga classes offer a creative framework for participants to connect to their bodies and imaginations, increase their physical awareness, improve their flexibility and stamina, and experience the pleasure of movement in a welcoming, accepting atmosphere.
Participants should wear comfortable clothes and be prepared to dance barefoot or in socks. It is advisable to bring a bottle of water and a towel for after class.

Description
This course is an advanced level Pilates-reformer class with a focus on mindfulness, breath-work, inclusivity, dynamic stretching and strengthening. This course requires students to have completed Pilates Reformer 1 prior to enrollment, or to have extensive Pilates experience and communication to the instructor before being able to enroll. Students in an advanced class must be knowledgeable on how to practice Pilates safely and with skill on the Balanced Body Reformers.

The central goal of the class is to empower students in the CalArts School of Dance to learn how to use Pilates as a form of effective cross-training that supports the longevity and sustainability of their careers. Throughout the semester the course will cover the "core principles" of Pilates that will help students breathe better, live with less pain, prevent and rehabilitate from injuries, improve posture and move more efficiently.

Over the course of the semester, students will learn Pilates reformer exercises that will help them increase strength and flexibility, improve alignment, increase coordination, and have a stronger overall awareness of their body and movement habits. In concert with the work on the reformer, students will learn additional techniques from The Franklin Method, Alexander Technique, and fascial work to add to their dancers tool-belt for muscle release,

more efficient stretching, strategies for warming up and cooling down, and building their personal cross training practice.

Description
'Pilates for Dancers: Movement Mastery & Injury Resilience' is a Pilates-based course designed specifically for dancers, with an in-depth focus on proper alignment and healthy biomechanics. This Pilates-based mat class will empower students in the CalArts School of Dance to learn how to use Pilates as a form of effective cross-training that supports the longevity and sustainability of their careers. Throughout the semester, the course will cover the "core principles" of Pilates that will help students prevent and rehabilitate from injuries, build stability and strength at all the joint spaces, increase healthy mobility, and become more efficient and intelligent dancers. This course requires students to attend class once in week in a dance studio for 1 hour and 15 minutes, as well as complete a 30-45 minute video module on the CalArts School of Dance Wellness Portal on a weekly basis. Mats and all necessary props for class will be provided for class each week.

Description
Mayurbhanj Chhau-a martial art form of Orissa, has highly evolved techniques of its own for which it differentiates itself from other forms of dance. These techniques of Mayurbhanj Chhau are based on various body movements. It is one of the rare dance forms which draws from a wide range of subjects-like-martial craft, mythology, history, daily activities, movements of the sub-human creature & imaginative themes. It is for this reason Mayurbhanj Chhau repertoire treasures the highest number of dance items about 200 in number which is rarely found in any other dance form of the world. The elements that the dance form highlights are:
? the complete usage of body
? very fluid usage of legs & arms
? a combination of grace & energy
? a perfect sense of body control

Description
This class is designed for individuals of all backgrounds, whether or not you have formal dance training. It focuses on using the body and voice to tell stories, express emotions, and explore physicality in new ways. Inspired by improvisational techniques from renowned Israeli dance companies like Batsheva and Vertigo, as well as immersive acting practices from "Sleep No More" (States of Tension), the course invites participants to dive into movement as a form of self-expression and creativity.

Throughout the course, participants will:
? Learn how to engage different parts of the body--bones, muscles, and skin

to create a variety of movement qualities
? Explore different levels of eye contact and gaze to enhance presence and connection
? Use the voice alongside movement to communicate emotions and ideas
? Tap into imagery to guide and inspire their movements
? Practice making spontaneous creative choices that reflect their personal expression.

This class is ideal for anyone interested in exploring movement, connecting mind and body, and unlocking their creative potential through physical storytelling. No dance experience is required--just a willingness to move and discover.

Description

The Conscious Dancer is a movement practice that supports a holistic, visceral, and embodied understanding of the body in motion. By exploring dance and physical action through the supplementation of a wide variety of modalities (somatic practices, anatomical concepts, imagery, evolutionary-based movement patterns, improvisation and community based experiences), students will come away with tools to uncover obstacles to physical, mental, emotional, and creative connectedness while building a personalized movement and grounding practice that supports a healthy nervous system and balanced, integrated whole. This is predominantly an activity course with intermittent discussion and reflection. While it is created with dancers in mind, it is by no means limited to only those with dance experience, and has a wide scope of application for all.

Course Long Title
Somatic Practices With Dance

Subject Code	Course Number
DTCH	562W

School(s)
School of Dance

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

This course will expose students to a variety of Somatic Practices, through direct experience, discussion, and ancillary materials. In the increasingly demanding field of dance, these

practices serve as a platform to support holistic growth and embodiment as both, dancers and moving, feeling, thinking human beings. Somatics also act as a road map in understanding healthy movement skills that bridge the often challenging gap between different dance forms. Subjects to be explored in this course will include; Franklin Method, Imagery for technique and performance, Qi Gong, Structural Integration, Somatic Experiencing, Feldenkrais Method, Alexander Technique, CI Training, Craniosacral therapy, Body-Mind Centering, Authentic Movement, and Continuum.

For nearly all aspiring dancers with high ambitions, it is extremely common to develop imbalanced habits of pushing beyond productivity, ironically stunting growth. The pressure and drive to achieve very specific goals often becomes too great to allow for the space to develop an internal listening process that keeps one present, authentic, and creative. Often times, burnout, injury, and even emotional distress ensue and serve as the catalyst to look for alternative routes. The incredibly expansive field of Somatic Practices has over time, become an especially popular consistency in order to effectively create or change habits. This class will focus on building a practice from which a dancer can reconnect to their body in the present moment, building on skills of intuition, grounding, and positive movement habits. The various practices and experiences themselves will help to shed a light on understanding movement and embodiment on deep and subtle levels, with specific emphasis on the application to dance training.

Subject Code **Course Number**
DTCH 570

School(s)
School of Dance

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Course open to Dance School MFA students only. In order to reshape, reimagine, and analyze movement aesthetics and techniques, Physical Practice offers four different opportunities for the MFA candidate. Students can choose either independent study, collective study within MFA in Choreography cohort, departmental technique classes, or movement-based classes within the Institute that can be made available to School of Dance students. The focus is to offer the MFA candidate agency and continued discovery in their movement practice.

Registration Restrictions
RGDANC - Dance School Only

DTCH572W - Dance Improvisation Ensemble

General

Course Long Title
Dance Improvisation Ensemble

Subject Code **Course Number**
DTCH 572W

School(s)
School of Dance

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.25

Description
This course will focus on dance improvisation in performance. Emphasis will be placed on developing individual movement vocabulary, spatial and energetic awareness, and the building of new scores. Placing the binary of "freedom and form" on a spectrum, we will engage a dynamic dialogue between the internal, external, and the in-between.

DTCH575W - Dance with Inner Noise

General

Course Long Title
Dance with Inner Noise

Subject Code **Course Number**
DTCH 575W

School(s)
School of Dance

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.25

Description
Students will begin by learning a set dance choreography as a foundational structure. They will then experiment with this choreography through the concept of "inner noise," which can be defined as their emotions, mental states, or intuition.

Gaga for Dancers

Subject Code

DTCH

Course Number

682W

School(s)

School of Dance

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

0.5

Description

Gaga is the movement research developed by Ohad Naharin.

Gaga is a new way of gaining knowledge and self-awareness through your body. Gaga provides a framework for discovering and strengthening your body and adding flexibility, stamina, and agility while lightening the senses

and imagination. Gaga raises awareness of physical weaknesses, awakens numb areas, exposes physical fixations, and offers ways for their elimination.

The work improves instinctive movement and connects conscious and unconscious movement, and it allows for an experience of freedom and pleasure in a simple way, in a pleasant space, in comfortable clothes, accompanied by music, each person with himself and others.

Gaga is a technique for dancers, but it is also for people without dance experience.

Gaga classes offer a creative framework for participants to connect to their bodies and imaginations, increase their physical awareness, improve their flexibility and stamina, and experience the pleasure of movement in a welcoming, accepting atmosphere.

Participants should wear comfortable clothes and be encouraged to dance barefoot or in socks. It is advisable to bring a bottle of water and a towel for after class.

Dance (BFA)

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

1

Description

This course is an advanced level Pilates-reformer class with a focus on mindfulness, breath-work, inclusivity, dynamic stretching and strengthening. This course requires students to have completed Pilates Reformer 1 prior to enrollment, or to have extensive Pilates experience and communication to the instructor before being able to enroll. Students in an advanced class must be knowledgeable on how to practice Pilates safely and with skill on the Balanced Body Reformers.

The central goal of the class is to empower students in the CalArts School of Dance to learn how to use Pilates as a form of effective cross-training that supports the longevity and sustainability of their careers. Throughout the semester the course will cover the "core principles" of Pilates that will help students breathe better, live with less pain, prevent and rehabilitate from injuries, improve posture and move more efficiently.

Over the course of the semester, students will learn Pilates reformer exercises that will help them increase strength and flexibility, improve alignment, increase coordination, and have a stronger overall awareness of their body and movement habits. In concert with the work on the reformer, students will learn additional techniques from The Franklin Method, Alexander Technique, and fascial work to add to their dancers tool-belt for muscle release, more efficient stretching, strategies for warming up and cooling down, and building their personal cross training practice.

School of Film/Video Department

The School of Film/Video is one of the world's foremost places for the study and practice of the art of the moving image as a personal, evolving and innovative artform.

The School supports a full array of moving image/sound approaches with the overall goal of fostering "total film/videomaker artists." The richness of the experience is predicated upon a body of motivated, intellectually curious students ready to find new forms and expressions coupled with an outstanding faculty of professional artists and technicians who share their artistry and knowledge with passion and generosity. The stimulating curriculum allows every student to expand his or her cultural experience and, in the process, develop into a better artist, with a well-informed, highly articulated personal vision.

Students in the School of Film/Video work in all modes of moving image and sound based artwork, including story- and character-based work in live-action and animated cinema; essayistic, socio-political and observational documentary projects in live-action, animation, installation and hybrid forms; and poetic, lyrical, structural and other modes of experimentation with the materials and forms of the moving image.

Master of Fine Arts - Film Directing

School

School of Film/Video

Degree

MFA - Master of Fine Arts

Program Level

Graduate

CIP Code (National ID)

50.0602

Program Description

The Film Directing Program (MFA Only)

The Film Directing Program's three year course of study is structured into 7 metier categories the faculty considers intrinsic to the exploration of narrative cinema: staging and performance, structure and form, image and sound, theory and context, critique, professional development and interdisciplinary practice.

FDP students are required to create a deep portfolio of work. Within the first year,

students make 3 to 4 shorts films in a series of structured blocks designed to immerse the student in a diverse range of filmmaking techniques and strategies.

In subsequent semesters, the program provides a rich slate of classes and workshops, independent studies, and rigorous mentorship for the students to continue developing and making films that hone an original approach to narrative filmmaking.

In addition, FDP students attend the ongoing Guest Artist Workshop. Recent guest artists have included filmmakers Nicolas Pereda, Chloe Zhao, Sean Baker, Matias Pineiro, Alfonso Cuaron, Josephine Decker, Eliza Hittman, Tenzin Phuntsog, Matthew Porterfield, Jennifer Reeder, Lucrecia Martel, Terence Nance, Bani Khoshnoudi, Catherine Hardwicke, Charles Burnett, Matthew Weiner, Pratibha Parma, James Mangold, Ramin Bahrani, John Greyson, and Effie Brown, among others.

Each student's residency culminates with an MFA thesis film that demonstrates a distinctive point of view, as well as the practical ability to lead a team of

performance and production artists toward the shared goal of a finished work and the knowledge of the historical and political context the work exists within.

In support of the development of the thesis project, students work with their mentor and committee to develop their project. Before proceeding to the thesis project, FDP students must have a Preliminary Thesis Review and obtain Project Approval in the third semester of residency. Once the thesis film is completed, each filmmaker must then pass a Graduation Review in order to graduate. In addition, they must have fulfilled all Program course requirements.

Free Form Requirements

Film Directing Program Course Requirements

The Film Directing Programs three year course of study is structured into 7 metier categories the faculty considers intrinsic to the exploration of narrative cinema. The MFA-1 and MFA-2 years include specific foundational course requirements. Students fulfill the remainder of requirements by selecting from courses in each metier category which are designed to deepen and expand the definition of narrative form. With their mentor, the student designs a pathway through these courses that best suits their development and practice.

STAGING AND PERFORMANCE - Minimum requirement 3 courses

- FFDP504 Acting 1: Required MFA 1 year
- FFDP512 Scene Study
- FFDP535 Visual Design
- FFDP513 Advanced Scene Study
- FFDP604 Advanced Acting
- FFDP616 One Act to Cinematic Event
- FFDP632 Advanced Staging

STRUCTURE AND FORM - Minimum requirement 3 courses

- FFDP520 Narrative Fundamentals: Required MFA 1 year
- FFDP521 Narrative Structure and Form
- FFDP524 Cinematic Storytelling
- FFDP523 Screenwriting: Long Forms
- FFDP625 Advanced Scripting

IMAGE AND SOUND - Minimum requirement 4 courses

- FPFV528 Cinema Production Workshop: Required MFA 1 year
- FFDP529 Post Production Cinema Workshop: Required MFA 1 year
- FFDP580 Production Sound: Required MFA 1 year
- FFDP680 Post Production Sound: Required MFA 1 year
- FFDP530 Cinematography for Directors or equivalent per mentor permission

PROCESS AND METHODOLOGY - Minimum requirement 2 courses

- FFDP682 Project Development
- FFDP672 Fictions of Completion
- FFDP675 Thesis Workshop
- FFDP677 Narrative Editing

HISTORY AND CONTEXT - Minimum requirement 4 courses

- FAIC620/621 Film History 1 and 2: Required MFA 1 year
- Special Topics: FDP Courses or equivalent per mentor permission

PROFESSIONAL DEVELOPMENT - Minimum requirement 3 courses

- FFDP540 Guest Artist Workshop: 2 Semesters Required
- FFDP690 Film School to Film World
- Credited Internships

CROSS DISCIPLINARY WORK - Minimum requirement 2 courses

- Electives chosen from outside the School of Film/Video

WINTER SESSION – 3 units (1 unit each Winter Session)

FPFV.BFA - Bachelor of Fine Arts - Film and Video

General

Program Title	School	
Bachelor of Fine Arts - Film and Video	School of Film/Video	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		50.0602

Program Description

4-Year Program The BFA program is designed to provide students with a full range of technical and practical skills, to teach them to think critically about their chosen mediums, and to guide their artistic growth as they experiment with different forms of cinematic expression. To this end, undergraduate students must successfully complete a series of required classes during each of their years in the program. Academic and artistic progress is assessed at a Mid-Residency Review during the student's third semester. All BFA Film and Video students are required to pass a Graduation Review in order to complete the Program.

Free Form Requirements

Program in Film and Video Requirements

Learning Goals

The Program in Film and Video has a required core curriculum for both undergraduate and graduate degrees.

The BFA program is designed to provide students with a full range of technical and practical skills, to teach them to think critically about their chosen mediums, and to guide their artistic growth as they experiment with different forms of cinematic expression. To this end, undergraduate students must successfully complete a series of required classes during each year in the program. Academic and artistic progress is assessed at a Mid-Residency Review during the student's 3rd 5th semester. In order to graduate, undergraduate students are again fully evaluated and must successfully complete a Graduation Review in their final semester.

Required Courses for Undergraduate Students

The following courses are required but do not constitute a student's entire program.

BFA1

- FPFV101/102* Filmmaking Fundamentals (Fall and Spring) (2 credits each)
- FPFV203 *Cinematography (Fall)* (3 credits) FPFV134 Digital Editing (Fall) (2 credits)
- FPFV285* Production Sound (Fall, 2 credits)
- FPFV286* Post Production Sound (Spring, 2 credits)
- FAIC420/421 Film History (Fall and Spring) (3 credits each)
- Winter Session (1 credit)

Recommended:

FAIC400 Film Today, FPFV424 Aesthetics of Sound and Image

BFA2

- FPFV204* Film Production Workshop (Fall, 2 credits)
- FPFV153 Cinematic Voices: In Person (Fall and Spring) (2 credits each)
- Winter Session (1 credit)

Recommended:

FAIC400 Film Today, FPFV448 Advanced Production, FPFV447 Under 15 Minutes, FSFV420J Color Correction & Grading (Spring, 2 credits)

BFA2 or BFA3 Transfer Students

- FPFV203* Cinematography (Fall, 3 credits)
- FPFV134* Digital Editing (Fall, 2 credits)
- FPFV204* Film Production Workshop (Fall, 2 credits)
- FPFV153* Cinematic Voices: In Person (Fall and Spring, 2 credits each)
- FPFV285* Production Sound (Fall, 2 credits)
- FPFV286* Post Production Sound (Spring, 2 credits)
- FAIC420 Film History (Fall and Spring, 3 credits each)
- FPFV101/102Filmmaking Fundamentals (Fall, Springoptional, 2 credits each)
- Winter Session (1 credit)

Recommended:

FPFV424 Aesthetics of Sound and Image; FAIC400 Film Today; FSFV420J Color Correction & Grading

*Satisfactory completion of these classes is a prerequisite to individual access to equipment and use of facilities for independent projects.

BFA3 and BFA4

- Undergraduate Critique (FPFV340) must be taken twice during final 2 years of residence.

The following courses may substitute for one semester of Undergraduate Critique (FPFV340).

- Under 15 Minutes (FPFV447),
- Edge of Narrative (FPFV441)
- Dangerous Filmmaking (FPFV485)

BFA3 and BFA4 level students are required to take 1 credit during each Winter Session.

A list of classes offered that satisfy this requirement will be available at registration each semester.

Final Projects

During their final two years Undergraduate Students are expected to either:

- produce a senior project (moving image project, installation, other)

Or:

- Demonstrate substantial collaborative contributions to a number of student projects in one of the following capacities:
- cinematography,
- editing,
- production,
- sound design.

All Undergraduate students are required to take ONE (FPFV450) Visiting Filmmaker Workshop during their residency.

BFA3 and BFA4 level students are required to take 1 credit during each Winter Session

History, Theory or Criticism Course Requirements:

A list of classes offered that satisfy this requirement will be available at registration each semester

- BFA1 students are required to complete at least ONE School of Film/ Video History, Theory or Criticism (HTC) course each semester for 4 semesters. (Scroll down to see courses that satisfy HTC requirements).
- BFA2 Transfer students are required to complete ONE School of Film/ Video History, Theory, or Criticism (HTC) course each semester for 3 semesters, in addition to the Film History requirement.
- BFA3 Transfer students are required to complete at least ONE School of Film/Video History, Theory or Criticism (HTC) class each semester for 2 semesters, in addition to the Film History requirement.

History, Theory or Criticism Courses (BFA/MFA) Course Options (not all courses are offered each semester/year)

- FPFV424/624 Aesthetics of Sound and Image (2 credits)
- FPFV442/624 Radicalizing Sound and Image (3 credits)
- FAIC400/600 Film Today (3 credits)
- FAIC410/610 History of Documentary Film (3 credits)
- FAIC412/612 Documentary Inquiries (3 credits)
- FAIC415/615Questions of Third Cinema (3 credits)
- FAIC430/630 History of Video Art (3 credits)
- FAIC422/622 History of Film: Women Directors (3 credits)
- FAIC450/650 Special Topics: Realist Style (3 credits)
- FAIC465/665 Chantal Akerman: An Intimate Passion (3 credits)

FPFV.MFA - Master of Fine Arts - Film and Video

General

Program Title	School	
Master of Fine Arts - Film and Video	School of Film/Video	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0602

Program Description

3-Year Program During the course of three years, graduate students are expected to achieve technical expertise, to gain historical and critical perspective in their area of focus and to produce a substantial body of work. In their first year of the curriculum, graduate students are required to take a full schedule of foundation classes including technical and production workshops as well as classes in history, theory and criticism. Students are expected to meet regularly with appropriate faculty as they begin to produce work. In their third semester, graduate students must propose and gain approval for their thesis project at a Preliminary Thesis Review. This provides the next year and a half for the production and completion of their thesis film, video or installation. All MFA Film and Video students are required to complete a first-year project, complete a thesis proposal in the second year and finally pass a Thesis Review in order to complete the Program.

Free Form Requirements

Program in Film and Video Requirements

MFA-1

- FPFV503* Cinematography (Fall, 3 credits)
- FPFV534* Digital Editing (Fall, 2 credits)
- FPFV504* Film Production Workshop (Fall, 2 credits)
- FPFV501 Filmmaking Fundamentals (Fall, 2 credits)
- FPFV553 Cinematic Voices: In-Person (Fall and Spring, 2 credits each)
- FPFV585* Production Sound (Fall, 2 credits)
- FPFV586 Post Production Sound (Spring, 2 credits)
- Winter Session (1 credit)

Recommended courses:

FPFV624 Aesthetics of Sound and Image;

FAIC620 Film History or FAIC600 Film Today for either Fall or Spring.

*Satisfactory completion of these classes are a prerequisite to individual access to equipment and use of facilities for independent projects.

MFA-2

- Film/Video theory, history, or criticism course/s
- FPFV699 Independent Study MFA-2
- Winter Session (1 credit)

MFA-3

- Film/Video theory, history, or criticism course/s
- FPFV799 Independent Study MFA-3
- Winter Session (1 credit)

Graduate Students are required to take at least one semester of Film History (FAIC620or FAIC621) and one semester of Film Today (FAIC600 - Fall or Spring).

They must also complete at least one Film/Video theory, history, or criticism class each semester for 3 semesters (in addition to Film History and Film Today); they are required to take at least one Visiting Filmmaker Workshop (FPFV650); and they are required to take one semester of Graduate Critique (FPFV625) in the second or third year. It may be repeated for credit.

History, Theory or Criticism Course Options (not all courses are offered each semester/year)

- FPFV624 Aesthetics of Sound and Image (2 credits)
- FPFV624 Radicalizing Sound and Image (3 credits)
- FAIC610 History of Documentary Film (3 credits)
- FAIC612 Documentary Inquiries (3 credits)
- FAIC615Questions of Third Cinema (3 credits)
- FAIC630 History of Video Art (3 credits)
- FAIC622 History of Film: Women Directors (3 credits)
- FAIC650 Special Topics: Realist Style (3 credits)
- FAIC665 Chantal Akerman: An Intimate Passion (3 credits)

This list may be subject to change.

FVCA.BFA - Bachelor of Fine Arts - Character Animation

General

Program Title	School
Bachelor of Fine Arts - Character Animation	School of Film/Video

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		10.0304

Program Description
4-Year Program The first year of the Program's intensive four-year curriculum is devoted to courses in life drawing, color and design, storytelling and character animation-both traditional and CG. The second year takes this work to a higher level by incorporating elements such as dialogue, sound effects and music. In the third year, students typically move to the advanced level in their coursework, which can include story classes geared toward short-form traditional animation, CG computer animation, and specialized work in painting, illustration, graphic novels and advanced visual design. In the fourth and final year, students move up to the highest level of the core classes and can customize their curriculum according to their own specific areas of interest. During the course of their studies, students develop a professional-caliber portfolio.

Character Animation

Free Form Requirements

Character Animation Program

Learning Goals for the Character Animation Program

1. Create compelling time-based and static work, including films that reveal a breadth of advanced skills in visual observation, conceptual framing, technical knowledge, and directorial vision;
2. Display strong proficiency with 2D and CG animation, as well as skillful use of animation principles;
3. Exhibit in-depth knowledge of storytelling and narrative structure;
4. Demonstrate advanced abilities in drawing and design;
5. Show evidence of understanding how to function effectively as a professional artist in a variety of work settings, along with the ability to view how skills are applicable across a range of creative areas;
6. Relate critically and creatively to one or more other artistic disciplines at CalArts, as well as to the history of animation and its artistic/ cultural contexts.

The Character Animation Program is limited to undergraduate study and offers a comprehensive four-year curriculum for traditional and CG animation artists. Required courses are:

First Year / BFA1

Fall Semester

FVCA-100 2D Character Animation I

FVCA-110 Life Drawing I

FVCA-132 Design I

FVCA-150 Story I

FVCA-160 Digital Methods I

FVCA-180 CG Foundation I

Winter Session

FVCA-151W Story I

Spring Semester

FVCA-101 2D Character Animation I

FVCA-111 Life Drawing I

FVCA-140 Perspective I

FVCA-151 Story I

FVCA-161 Digital Methods I

FVCA-181 CG Foundation I

Second year / BFA2

Fall Semester

FVCA-200 2D Character Animation II

FVCA-210 Life Drawing II

FVCA-220 Film Workshop II

FVCA-240 Animation Layout

FVCA-252 Story II: Storyboarding

FVCA-280 CG Foundation II

Winter Session

FVCA-221W Film Workshop II

Spring Semester

FVCA-201 2D Character Animation II

FVCA-211 Life Drawing II

FVCA-221 Film Workshop II

FVCA-260 Digital Methods II: Sound

Third Year / BFA3

Fall Semester

FVCA-300 2D Character Animation III

FVCA-311 - FVCA-316 Advanced Life Drawing (select one class; 1.5 units required)

FVCA-320 Film Workshop III

FVCA-334 Professional Preparation III

Winter Session

FVCA-321W Film Workshop III

Spring Semester

FVCA-301 2D Character Animation III

FVCA-311 - FVCA-316 Advanced Life Drawing (select one class; 1.5 units required)

FVCA-321 Film Workshop III

Fourth Year / BFA4

Fall Semester

FVCA-400 Character Animation IV

FVCA-311 - FVCA-316 Advanced Life Drawing (select one class; 1.5 units required)

FVCA-420 Film Workshop IV

Winter Session

FVCA-421W Film Workshop IV

Spring Semester

FVCA-401 Character Animation IV

FVCA-421 Film Workshop IV

In addition, all Character Animation students are required to take Acting for Animators (FVCA-290) once during their BFA degree.

FVEA.BFA - Bachelor of Fine Arts - Experimental Animation

General

Program Title	School	
Bachelor of Fine Arts - Experimental Animation	School of Film/Video	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		10.0304

Program Description

4-Year Program The BFA track in Experimental Animation emphasizes the creative development of a personal aesthetic in an interdisciplinary, artist-centered environment. Prior experience in animation is helpful to students entering the Program, but all students take courses in a broad range of animation approaches, which provide a foundation in animation techniques and concepts from which to expand upon. From handmade practices such as 2D drawing and working directly on film, to computer animation and pre-visualization skills-courses blend practical knowledge with creative practice and critique, allowing for a detailed examination of animation art. As mentoring is central to the CalArts experience, students work closely with a mentor from the Experimental Animation faculty and other members of the Institute's accomplished faculty as they experiment with and extend their own unique artistic visions. Visiting artists provide critiques and perspectives on current animation practices, and recruitment professionals come to campus annually to review student portfolios to offer internships and employment at leading animation studios. BFA students are especially encouraged to study abroad in one of the Program's exchange opportunities. All BFA Experimental Animation students are required to pass a Graduation Review in order to complete the Program.

Experimental Animation

Free Form Requirements

Program in Experimental Animation

The Experimental Animation Program offers both BFA and MFA degrees. The degree programs emphasize the creative development of a personal aesthetic in an artist-centered environment. A broad range of animation approaches, processes, and techniques are covered in lecture courses, seminars, workshops, visiting artist lectures, internships, and independent studies. The program supports 2D animation, stop-motion, multiplane, digital production, installation, stereoscopy, motion capture, performance animation, programming, and other approaches. Students work closely with a mentor in developing skills, course schedules, and projects, and also benefit from working among artistic peers in a studio environment. To support development of each students creative voice, we offer technical and critical skills within a wide range of production courses, as well as history and theory. Students are also required to take production courses in other Schools at CalArts (Theater, Dance, Music, and Art), in order to develop interdisciplinary approaches. Study abroad opportunities are also offered, mainly for BFA students.

Bachelor of Fine Arts Program in Experimental Animation BFA students in Experimental Animation leave the program with a well-developed artistic identity and varied abilities, and establish careers in studio production and personal practice, often forming creative partnerships with fellow students. In the program, students are provided with a comprehensive education in the history, styles, techniques, and technology of animation arts. As a culminating project they conceive, design, and produce a graduation project that reflects the students personal artistic sensibilities.

The Experimental Animation Program accepts BFA-level students in one of two ways: 1) at the BFA1 level with a four-year residency requirement or 2) at the BFA2 level as a transfer student with a three-year residency requirement. Students must attend full-time; part-time attendance is not allowed.

Learning Goals for BFA Students

Individual voice: Student's style is recognizable and compelling. This distinctive voice extends through their creative process, resulting in conceptually complex works that display competency with technical skills.

Contextual knowledge: Student is aware of and can critically discuss current developments in time-based art and is cognizant of past developments in animation and live-action media history. Student is able to demonstrate his/her understanding of the historical/cultural/social context of their work.

Interdisciplinary approaches: Student is aware of production practices in other metiers, such as art, theater, dance, and music, and has participated in one or more of these areas while at the Institute.

Technical skills: Student has a working knowledge of digital media used in animation production, and can apply that knowledge effectively in realizing projects. Student is able to use technology creatively and with an experimental attitude.

Collegiality: Student is an active participant within critiques, applying knowledge and experience effectively in their arguments and valuing other peoples opinions. Student understands the value of mentorship and works closely with faculty to achieve personal goals. Student values collaboration with others.

Professionalism: Students personal work is outstanding, fulfilling their potential as an artist. Student is able to give cogent presentations about their work and is prepared to enter the professional world. Student attends visiting artist workshops, makes contacts through internships or various projects, and participates in portfolio presentations, and they are sought after for professional opportunities.

Requirements for Student Accepted as a BFA1

BFA students accepted as a BFA1 complete a four-year residency. The first two years provide the student with an understanding of principles and techniques of animation, as well as the history of animation, digital methods, and elements of sound development. An animation project is produced in both the BFA1 and BFA2 years. The BFA3 year is left relatively open, so students can take practice-related courses in other Schools at the Institute; they must take at least three courses totaling six credits or more in another metier (Art, Theater, Dance, or Music) practice (not history or theory) during the four-year residency. A mid-residency review occurs during fall of the BFA3 year, when the student presents work they have produced within the program to their faculty committee. This review is scheduled by the student through the Film/Video office, after meeting with their mentor to assure that the required metier and critical studies courses have been taken.

BFA students are required to complete a graduation project as part of their requirements for the two-semester Undergraduate Critique course. This course is generally taken during the BFA4 year, but it can be taken during the BFA3 year. The graduation project, along with other significant work, will be presented during the student's graduation review in the last semester of residence. The student arranges this review with the Film/Video office, after getting a graduation check from their mentor and having critical studies requirements signed off by the Registrars office. The faculty committee gives permission to graduate.

Required courses:

The following courses are required for students accepted at the BFA1 level in the Experimental Animation program, but they do not constitute a students entire program. In addition to the Experimental Animation requirements below, BFA students are also required to take production courses in other metiers: 6 credits, over a four-year residency.*

Students schedule regular meetings with their mentors throughout each semester to discuss the development of work and progress through required courses.

The student will be asked to provide documentation of academic progress when they schedule mid-residency and graduation reviews. It is the students responsibility to fulfill all graduation requirements. Any requests for a substitution must be approved by the mentor before the course is taken

BFA1

Fall Semester

FVEA107 BFA Animation Workshop (4 credits)

FVEA255 Hybrid Imaging (2 credits)

FAIC170 Animation History (3 credits) Critical Studies (3 credits) Elective (3 - 6 credits recommended)

Spring Semester

Winter Session (1 credit)

FVEA108 BFA Animation Production (4 credits)

FVEA145 Motion and Meaning (2 credits)

FAIC171 Animation History (3 credits) Critical Studies (3 credits)

Elective (2 - 5 credits recommended)

BFA2

Fall Semester

FVEA202 BFA2 Concept Development (3 credits)

FVEA240 Sound for Experimental Animation I (2 credits)

FAIC420 Film History I (3 credits)

Other metier practice* (2 credits)

Critical Studies (3 credits recommended)

Elective (2-4 credits recommended)

Spring Semester

Winter Session (1 credit)

FVEA203 BFA2 Production (3 credits)

FVEA241 Sound for Experimental Animation II (2 credits)

FAIC421 Film History II (3 credits)

Critical Studies (3 - 6 credits recommended)

Elective (3- 5credits recommended)

BFA3

Fall Semester

Mid-Residency Review

FVEA482 Experimental Animation Undergrad Critique (may be taken in BFA4 year;3 credits)**

Critical Studies and electives as needed (13-17credits recommended)

Spring Semester

Winter Session (1 credit)

FVEA482 Experimental Animation Undergrad Critique. (This course must be taken twice. May be taken in BFA3 year with permission of instructor, or BFA4 year. May be taken for 3 or 6 credits, by permission of instructor)**

Other metier practice* (2 credits)

Critical Studies and electives as needed (13-16 credits recommended)

BFA4

Fall Semester

FVEA482 Experimental Animation Undergrad Critique. (This course must be taken twice. May be taken for 3 or 6 credits, by permission of instructor)** Critical Studies and electives as needed (8-14credits recommended)

Spring Semester

Winter Session (1 credit)

Graduation review/Submit Senior Project

FVEA482 Experimental Animation Undergrad Critique. (This course must be taken twice. May be taken for 3 or 6 credits, by permission of instructor)**

Critical Studies and electives as needed (9-15 credits recommended)

*over a four-year residency, BFA students must complete at least six credits in another metier practice (not history or theory): Art, Theater, Dance, or Music.

These courses must be completed at CalArts, not transferred in. They can be taken in any semester. Recommended timing for courses is indicated above. **Students complete a graduation project in FVEA482 and FVEA483. These courses can be taken in the BFA3 or BFA4 year.

Requirements for Student Accepted as a BFA2 Transfer Student

Most BFA applicants are accepted at the BFA1 level, but in some cases a student may be accepted as a BFA2 transfer student. Transfer students who begin in the BFA2 year complete a three-year residency. In this track, the first two years provide the student with an understanding of principles and techniques of animation, as well as the history of animation, digital methods, and elements of sound development. An animation project is produced in both the BFA 2, BFA3, and BFA4 years. During the BFA3 year, these students also should take practice-related courses in other Schools at the Institute; they must take at least two courses totaling four credits or more in another metier (Art, Theater, Dance, or Music) practice (not history or theory) during the three-year residency.

A mid-residency review occurs during fall of the BFA3 year, when the student presents work their has produced within the program to faculty committee. This review is scheduled by the student through the Film/Video office, after meeting with their mentor to assure that all required metier and critical studies courses have been taken.

Students are required to complete a graduation project during their BFA4 year for the Undergraduate Critique course. That project, along with other significant work, will be presented during the student's graduation review in the last semester of residence. The student arranges this review with the Film/Video office, after getting a graduation check from their mentor and having critical studies requirements signed off by the Registrars office. The faculty committee gives permission to graduate.

Required courses:

The following courses are required for students accepted at the BFA2 transfer level in the Experimental Animation program, but they do not constitute a students entire program. In addition to the Experimental Animation requirements below, BFA students are also required to take production courses in other metiers.*

Consult the online catalog for critical studies and other requirements.

Students schedule regular meetings with their mentors throughout each semester to discuss the development of work and progress through required courses. The student will be asked to provide documentation of academic progress when they schedule mid-residency and graduation reviews. It is the students responsibility to fulfill all graduation requirements.

BFA2

Fall Semester

FVEA107 BFA Animation Workshop (4 credits)

FVEA255 Hybrid Imaging (2 credits)

FAIC170 Animation History (3 credits)

FAIC420 Film History I (3 credits)

Critical Studies and electives as needed (3-6 credits recommended)

Spring Semester

Winter Session (1 credit)

FVEA108 BFA Animation Production (4 credits)

FVEA145 Motion and Meaning (2 credits)

FAIC171 Animation History (3 credits)

FAIC421 Film History II (3 credits) Critical Studies and electives as needed (2-5credits recommended)

BFA3

Fall Semester

Mid-Residency Review

FVEA202 BFA2 Concept Development (3 credits)

FVEA240 Sound for Experimental Animation I (2 credits) Other mtier practice* (2 credits)

Critical Studies and electives as needed (8-11 credits recommended)

Spring Semester

Winter Session (1 credit)

FVEA203 BFA2 Production (3 credits)

FVEA241 Sound for Experimental Animation II (2 credits) Other metier practice* (2 credits)

Critical Studies and electives as needed (8-11 credits recommended)

BFA4

Fall Semester

FVEA482 Experimental Animation Undergrad Critique. (This course must be taken twice. May be taken for 3 or 6 credits, by permission of instructor)**

Critical Studies and electives as needed (9-15 credits recommended)

Spring Semester

Winter Session (1 credit) Graduation Review/Submit Senior Project

FVEA482 Experimental Animation Undergrad Critique. (This course must be taken twice. May be taken for 3 or 6 credits, by permission of instructor)**

Critical Studies and electives as needed (8-14credits recommended)

*over a three-year residency, BFA transfer students must complete at least four credits in another metier practice (not history or theory): Art, Theater, Dance, or Music.

These courses must be completed at CalArts, not transferred in. They can be taken in any semester. Recommended timing for courses is indicated above.

FVEA.MFA - Master of Fine Arts - Experimental Animation

General

Program Title	School	
Master of Fine Arts - Experimental Animation	School of Film/Video	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	10.0304

Program Description
3-Year Program In the MFA Experimental Animation Program, students are provided with a comprehensive foundational background and are encouraged to seek out poetic, lyrical, structural and other modes of experimentation with the

materials and forms of the moving image. Students are trained to not only become makers-but also critically minded contributors to the advancement of animation history and theory. In addition to coursework in technique and theory, the EA curriculum includes training in professionalization. Students are expected to become familiar with film festivals and submission processes, attend professional gatherings and events, and become members of related organizations. Accordingly, graduates become creative leaders in the field, establishing careers in studio production, teaching and personal practice, often forming creative partnerships with fellow CalArts students. All MFA Experimental Animation students are required to complete a first-year project, complete a thesis proposal in the second year and finally pass a Thesis Review in order to complete the Program.

Experimental Animation

Free Form Requirements

Master of Fine Arts Program in Experimental Animation

Graduates of the MFA Program in Experimental Animation become creative leaders in the field, establishing careers in studio production, teaching, and personal practice, often forming creative partnerships with fellow students. In the program, students are provided with a comprehensive education in the history, styles, techniques, and technology of animation arts. As a culminating project they conceive, design, and produce a thesis that reflects the students personal artistic sensibilities. The Experimental Animation program accepts MFA-level students for a three-year residency.

Learning Goals for MFA Students

Individual voice: Student's style is unique and developed over a body of work. This distinctive voice extends through their creative process, resulting in conceptually complex works that display competency with technical skills. Students develop creative methods that serve their personal styles.

Contextual knowledge: Student can discuss current developments in time-based art as well as past developments in animation and live-action media history.

Student is able to demonstrate their advanced understanding of the historical/ cultural/social context of their work convincingly in presentations, discussions, and writing. **Interdisciplinary approaches:** Student is aware of production practices in other metiers, such as art, theater, dance, and music, and has participated in one or more of these areas while at the Institute. Student draws upon these disciplines as appropriate to expand their own creative approaches.

Technical skills: Student has an advanced knowledge of digital media used animation production, and can apply them with confidence in realizing projects. Student projects reflect the creative use of technology and an experimental attitude.

Collegiality: Student is an active participant within critiques, applying knowledge and experience effectively in their arguments and valuing other peoples opinions. Student works with others on projects. Student understands the value of mentorship and works closely with faculty to achieve personal goals. Student finds opportunity for leadership and collaboration within the program and the larger animation community.

Professionalism: Students personal work is outstanding, fulfilling their potential as an artist. Student gives cogent presentations about their work and is prepared to enter the professional world. Student attends visiting artist workshops, makes contacts through internships or various projects, and participates in portfolio presentations, and they are sought after for professional opportunities. Student is familiar with leading film festivals and has submitted their work to them as appropriate. Student attends professional gatherings and events and/or is a member of related organizations. They contribute to the advancement of animation production, history, and/or theory.

Requirements: MFA

The three-year residency MFA track in Experimental Animation provides time for students to participate in the full range of studies necessary for artistic and professional growth. MFA1 year level courses provide students with a comprehensive understanding of production techniques, including both visual and

sound elements. In seminar-type settings, students are encouraged to engage in critical discourse as a means of developing and articulating personal aesthetics. The spring semester culminates in completion of a first-year project, which is developed within supporting coursework. Through the study of animation history and continued conceptual investigation, MFA 2s further their understanding of the creative possibilities of animation and are encouraged to take courses from other metiers (Art, Dance, Theater, and Music) to develop in interdisciplinary ways.

During the MFA2 year, students develop a proposal for a thesis project that is completed in the MFA3 year, within courses and in consultation with a mentor and other faculty. This proposal is presented within a preliminary review during the spring semester of the MFA2 year. The student schedules this review with the Film/Video office after meeting with their mentor to assure that all course requirements have been met. During the preliminary review, the student receives feedback and establishes an agreement with their faculty committee on the goals of the project. The creative development of the thesis parallels studies focusing on advanced technical and conceptually oriented courses that support its production. *Students entering the MFA program who have not taken a course in animation history are advised to enroll in the Animation History class in their MFA2 year.*

During the MFA3 year, students focus mostly on producing the thesis project under the tutelage of a mentor and other faculty, while continuing to participate in supporting coursework. After checking graduation requirements with their mentor, the student schedules a graduation review with their committee during the spring semester of the MFA3 year. At this meeting, they present the completed thesis project for review by the faculty committee. MFA students are required to complete an approved thesis project in order to graduate

Required courses:

Following is information about courses that are required for the Experimental Animation MFA, but they do not constitute a students entire program. Students must take at least 60 credits at the graduate level to graduate. Consult the official curriculum online for other requirements. Students schedule regular meetings with their mentors throughout each semester to discuss the development of work and progress through required courses. The student will be asked to provide documentation of academic progress when they schedule preliminary and graduation reviews. It is the students responsibility to fulfill all graduation requirements, including at least 6 graduate-level credits of history/theory coursework in residence at CalArts. To fulfill these requirements, students take FAIC570 Seminar in Animation History, FAIC675 History of Experimental Animation, and one other history/theory course approved by mentor. Any changes to the schedule of required courses must be approved by the required course instructor and the students mentor.

MFA1

Fall Semester

FVEA504 Digital Workflow for Animators (1 credit)

FVEA525 First Year Shorts (3 credits) FVEA540 Sound for Experimental Animation I(2 credits)

Description
This course will explore the custom-made software Otro!, exclusively designed by Drew Trujillo to revolutionize sound design for live performance. Otro! captures and sonifies intricate performer movements and locations, seamlessly blending technology and artistry. It empowers directors, choreographers, cinematographers, visual designers and sound designers to push creative projects. Students interested in the intersection of movement, music, technology and live performance would be well-suited to this course.
The course will require a blend of studio practice and exploration, rehearsals, readings and will culminate in a performance.

Description

"We can never get close to the truth except through lying" -- Abbas Kiarostami

This course examines post-1980 cinema of Iran. Poetic, philosophical, and political, this cinema is venerated by film critics and audiences world-wide while often censored at home. Over the semester, we explore work by several of the great Iranian film directors of the last forty years. Enrolled students can decide how many and which filmmakers we focus on including: Abbas Kiarostami, Mohsen and Samira Makhmalbaf, Jafar Panahi, Bahman Ghobadi, Ashgar Farhadi, and Mohammad Rasoulof.

In 1979, after the revolution that precipitated the fall of the autocratic and U.S.-backed Shah, Iran became an Islamic Republic. Working under strict censorship laws in a theocratic society, Iranian filmmakers nevertheless continued to make films, and Iranian cinema flourished. In addition to films made exclusively for

domestic consumption, Iranian films also began to appear at international film festivals, receiving an overwhelmingly positive critical reception. Films from Iran have won awards at all the most important film festivals, including Venice, Berlin, Cannes, as well as at the Academy Awards.

What is it that makes these films so powerful and appealing to audiences outside Iran? Iranian cinema is known for its poetic and social realism, but also for the distinctive ways, both narratively and formally, in which it questions truth and the possibilities of representation. Depicting aspects of daily life in a country that is largely closed to international scrutiny and exploring a variety of social and ethical dilemmas (including those related to class, gender, and ethnic identity), Iranian cinema has much to teach us about the nature of truth and the paradoxes of trying to represent it. State censorship plays a role in how several Iranian filmmakers cleverly craft their stories. But above all, these cinematic and philosophical investigations into questions of truth reflect the profound entanglements and enigmas of being human.

FAIC300W - Student Initiative: Film/Video Curating

Credit Hours

Min Credit Hours:

1

Description

"Film Video Curating" is a class designed to encourage student initiative, based on a successful practice associated with the spring session of "Film Today" that has been in place- albeit informally- since 2012. Students will work with the instructor to curate the first two sessions of "Film Today" (Friday January 18 and Friday January 25) by mining into CalArts archive or researching contemporary work. "Film Today" will not start until Friday February 1st, of course, but students registered in "Film Today" will be encouraged to sit in the first two sessions, therefore providing the student curators with a welcome audience for their curatorial efforts. (It is hoped that the outreach efforts of the student curators -announcement, poster, social media-will bring an audience extending beyond the students registered in "Film Today"). Having a built-in audience will give the student curators a chance to introduce the work they have chosen, to have a discussion about it afterwards, therefore providing them with a better understanding/knowledge of how an audience may react to their personal aesthetic choices. They will also be taught the basics of publicity/outreach and will have the opportunity to write, produce and distribute program notes, to write an announcement and to make a poster -all of this under the supervision and with the help of the instructor. In turn, students enrolled in "Film

Today" will be given the opportunity, as they have in the past, to write one paper written about one of the student-curated sessions to make up for one of the papers required for "Film Today" if they elect to do so.

The instructor will meet with the students interested in the class "Film/Video Curating" by the middle/the last third of the fall semester, so they can start the discussion amongst themselves and with the instructor in the last few weeks of the fall semester and during the winter break.

As "Film Today," the class is open to students from all schools, all programs and all levels, but they need to have a personal conversation with the instructor prior to enrollment.

Description

From the beginning, women and underrepresented groups have held a strong presence within animation, yet when examining history, minimal emphasis is placed on their contributions. The truth is, throughout most of the 20th century, leading women artists established, defined and expanded the animated art form, yet very little is recorded of their work, and their films are rarely examined.

This first-of-its-kind course delves into these artists and their artistic contributions within the animated art form. Through lecture, screenings, presentations and guest speakers, students will achieve a comprehensive understanding of this previously invisible half of our collective animated past.

Students should expect to spend approx \$60 on additional materials and supplies.

Description

This is a class where theory meets practice. Animators have to design and create their characters from scratch, and whatever designs they come up with convey social and cultural meaning, whether consciously or not.

This class aims to raise awareness of these meanings through screenings, readings and discussion.

A range of animation - both historical and contemporary - will be screened, plus related visual material from the history of art and popular culture. Students will be required to read basic texts, plus further reading related to their chosen area of research. The aim is to give students a working knowledge of cultural theory related to the area of diversity and representation. Students will be expected to participate in critique and discussion in class and in written work, as well as create original designs for characters that reflect their research.

Films that will be examined include He Named Me Malala, Persepolis, The Breadwinner, Coco, and more.

Students should expect to spend up to \$40 on additional course supplies.

Description
Political cartooning is a vital element of a free press in a democracy and contributes to the critique of the modern political landscape. Through an examination of the history of political cartooning in the United States, as well as specific cartoonists who have elevated the use of visual language and metaphors in their work, students will gain an understanding of this important medium and its contributions to democracy.

Additionally, students will learn how to create cartoons that comment on social and political issues, whether in multi-panel format, animation, live-sketching or the traditional one-panel format. Students will be encouraged to use their skills in storytelling and design to produce strong visual statements, as well as apply their research in order to write knowledgeably about this subject.

Description
Seminar in Black Experimental Film/Video
This seminar is designed to facilitate a creative and rigorous conversation around Blackness and the audiovisual, particularly in experimental film/animation, documentary/non-fiction, and video art. Particular attention will be paid to work that is oriented around imagined futurity, resourceful fugitivity, and what is potentially reparative in the everyday. How can filmic media avoid the spectacularization of Black suffering? What does it mean to contend with trauma without reinscribing it into the visual medium? How do we open up pathways to radical methodologies? How can we elevate an ethic of care in Black cultural production? This course is neither a survey of Black film/video nor an introduction to recent Black Diasporic humanities scholarship. The films herein aren't necessarily answers to the aforementioned questions, but rather points of entry into these considerations. Imagining Fugitivity and Futurity in Film/Video is a space to think with and through contemporary film/video and scholarship that opens up new possibilities to think and create.

Description
Course receives Critical Studies credit in the Arts in Context (AIC) category. A writing class for animators that avoids traditional gag-oriented animation writing. Screenwriting basics such as format, structure, action, conflict, story and character will be addressed at length. Long and short character-driven narratives will be explored with the ultimate goal of screenplay literacy and completion of a script. Each student will write a screenplay, guided by the instructor and augmented by class discussion and critique.

Description

This course covers the history of character animation, mainly focusing on the American studio system. It focuses on studio and individual styles, as well as the influences of technological development, other arts, and historical events (including political and sociological shifts). Students will be exposed to a wide range of examples through screenings in each class and they will engage in critical discussion in class and within course papers. A flipbook project demonstrates the student's

knowledge of basic animation principles. Course receives Critical Studies credit in the Arts in Context (AIC) category.

Description

A beloved CalArts tradition "Film Today," offered by the Program of Film and Video, is open to the entire Institute, to graduate and undergraduate students in all programs, for Critical Studies credits. Opening a window into the world as well as into our own subjectivity, the art of the moving image is changing rapidly. This course is taught by scholars and/or professionals active in the field, who closely follow these changes. It

is designed to offer a context and critical tools for a better understanding and appreciation of the moving image in its different manifestations. We will show narrative features from all over the world, crafted within different cultural, racial and sexual communities - as well as cutting-edge documentaries, essay films, experimental works and hybrid creations at the boundaries of several art practices. Lectures and active discussions will provide a context and build bridges between your respective métiers and the aesthetics of the moving image. Your contribution to the discussion as well as your weekly papers (1 to 12 pages, 12 point font) are an essential component of this exciting, necessary conversation of our times. This course is available for online registration. It will also be open by Permission of Instructor at Advising Day for additional enrollment. Attendance to this class is mandatory. May be repeated for credit.

Description

This course will investigate a broad range of media art and documentary projects, with attention to the performative act of witnessing, the creative address of media archives by artists, and the aspiration to negotiate new social relations with collaborators and audiences. Drawing from work in film, video, and new media, this course will explore time-based projects informed by documentary gestures such as journaling, cinema-verite recording, surveillance, re-performance, and non-linear structuring of information. Narrative and performative projects resulting from creative detours in documentary exercises will also be screened. The course will additionally examine collections of work from specific historical moments that aspired to strategic cultural interventions, including a range of provocative work across genre on incarceration in the U.S., samizdat and media arts projects produced during late 1980s, dramatic cultural shifts in east central Europe, and collective experiments with new technologies and audiences from the U.S. in the 1960s/early 70s. Media projects from Chile, Nunavut, and South East Asia address generational loss or repression of archived information and reinvigorate dialogues across the distance of time. Offered by Program in Film and Video.

Description

This is a course in documentary theory / studies through the lens of films made in or about Palestine and Israel. We may also include works from other zones of conflict chosen by the students. Issues of politics and form, ethics and aesthetics are central to all nonfiction film. In the context of ongoing and seemingly intractable political conflict, this is even more the case. We will examine the work of numerous filmmakers including Avi Mograbi, Raed Andoni, Kamal Aljafari,

Ra'anan Alexandrowicz, Palestinian-Israeli collaborative teams, and many more. Questions of reception, political impact and censorship will also be addressed.

Course includes weekly discussion posts on readings, an analytical paper, research paper and a visual project. Students will be able to critically analyze nonfiction film and to eloquently articulate the aesthetic approaches of a given documentary as well as ethical issues raised or addressed by documentary film.

Description

This course in the history and theory of nonfiction film examines the use of (re-) enactment as a tool in documentary. Although not always explicitly acknowledged, enacting or reenacting scenes has been common in documentary film since its origins. While sometimes serving primarily as illustration of past (or even contemporary) events, in other cases such scenes are "performative" in the sense that they intend to do something either to the subjects or to the audience. We will read work on "performativity" and reenactment in nonfiction film (by Bill Nichols, Jonathan Kahana, Ivone Margulies and others) and also explore some trauma theory literature. When and why is reenactment considered an important or revelatory strategy? What exactly qualifies as "enactment" or "reenactment," and how is it different from docudrama? How can/ should it be ethically framed? Why is it so often used in films that grapple with portrayals of violence and trauma? We will screen earlier films such as The Silent Village (1943), The War Game (1966), scenes from Shoah (1985) and some of the following: S-21: The Khmer Rouge Killing Machine (Cambodia 2003), The Act of Killing (Indonesia 2012), Ghost Hunting (Palestine/Israel 2017) and Four Daughters (Morocco 2023). Filmmakers who regularly use reenactment such as Zacharias Kunuk or Errol Morris may also be studied. Students will be expected to read and report on weekly articles, rewatch films at home, and write an academic research paper. Creative projects are optional/additional. This course is best suited for students with some background in nonfiction and an interest in critical writing.

Description

The concept of 'Third Cinema', coined in Latin America by filmmakers Fernando Solanas and Octavio Getino, implies a critical reappraisal of the national or cultural specificity, post-colonial identity, the dialectical connection between domination/subordination, centre/periphery and resistance/hegemony. While First Cinema is Hollywood, Second Cinema is Western 'auteur' cinema, Third Cinema is resolutely non-capitalist and non-Western. We will look at films from Africa, the Arab World, East India, Latin America, Taiwan...but also films that assert a cultural/political resistance within Western industrialized countries, such as African American cinema, the Black British workshops and the 'Beur' films in France. Offered by Program in Film and Video. May be repeated for credit.

Description

Course open to BFA3 and BFA4 students across the institute. This course will also have spaces available to enroll at Course Advising Day. This course will examine narrative films from Czechoslovakia [now Czech Republic and Slovakia] and Hungary from post-WWII to the present, including the remarkably inventive and often banned films of the 1960s Czech New Wave ("diamonds of the everyday"); the often dark and experimental "documentary fictions" of 1970s-80s Hungary; and probing work of the transitional period (1988-91) including samizdat media and video art from societies experiencing dramatic cultural and political changes. The ongoing impact of surrealism (and animation) in the region, ethnic tensions reflected in art and media before and during the wars in Yugoslavia (1990s), the austere realism of the "hard to live in" post-socialist society reflected in New Romanian Cinema (2000s), and work from other

countries that contribute insights to contemporary directions in the "former East" will also be explored.

Description

A History of Film is a two semester survey of cinema from its origins in the late 19th century to the present day. The course emphasizes the development of cinema aesthetics through the study of works by major filmmakers and national cinemas. The Fall semester covers the period from 1895 to 1950, focusing on both the evolution of narrative filmmaking and challenges to that style. The Spring semester is concerned with work from 1950 to today, with particular attention paid to the impact of neo-realism and the proliferation of new national cinemas and alternative approaches. The course is designed as a yearlong sequence and is best experienced that way, but students can begin the sequence in Spring, take a single semester, or repeat semesters to see alternate programming. Auditing is encouraged depending on class size. The class consists of lectures and screenings; after each session a voluntary (but highly recommended) discussion group meets to talk about that week's films. Requirements include strict regular attendance, weekly readings, weekly short papers and a final research project. Offered by Program in Film and Video. Required of PFV BFA1 and EA BFA2. May be repeated for credit. Please note that the first two class sessions are foundational for the course and that intensive reading and writing assignments begin immediately; you are discouraged from adding late.

Course Long Title

History of Film: Women Directors

Subject Code	Course Number
FAIC	422

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

Women have been routinely excluded from filmic participation and from the cinematic canon on multiple levels. BFI's famous "50 best films of all time" list (<https://www.bfi.org.uk/news/50-greatest-films-all-time>) includes only one female director. This course is designed to repair decades of erasure, by presenting superb films directed by women, from 1920's- the present. Weekly screenings will include works by Lotte Reiniger, Dorothy Arzner, Agnes Varda, Julie Dash, the instructor (Nina Menkes) and many more. We will focus on issues of representation, the way male dominance is coded cinematically, questions of form-can we use the master's tools to dismantle the master's house? What does it mean to speak from the dominant position versus from a marginal position both cinematically and narratively? The accumulated impact of screenings, and related readings, week after week, of powerful work by female directors will serve to undercut the oppressive impression many of us carry that most "important" or "classic" films are directed by men. Readings will focus on feminist film theory.

Description

This course will provide a forum to view and discuss films and readings which problematize traditional constructions of gender and sexuality on multiple levels. The selected works also have a special emphasis on trajectories of violence and destruction that involve sexuality, with an emphasis on works in which the knife, so to speak, is pointed in the 'wrong direction'. Offered by Program in Film and Video.

FAIC425 - History of Sound in Animation

General

Course Long Title

History of Sound in Animation

Subject Code	Course Number
FAIC	425

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Animation sound uses a combination of dialogue, effects, and music to complement moving images. A fair amount has been written about the use of music in animation, but very little has been written about the overall role of sound in animation. Or, how the technological development of sound recording has influenced the evolution of the animated film. Or, how the creative language of sound for hand-crafted images has developed.

This class will, in some ways, be an experiment in correcting and expanding the historical record, and creating a coherent narrative of the sometimes uneasy alliance between picture and sound in animation. As technology has changed, each studio and filmmaker has adapted more or less independently.

Description

Cinema of Exile: Perspectives on Palestine and Israel

The course addresses the experience of exile and displacement understood both as a physical and psychic condition, as expressed in films and texts from Palestine and Israel. Through screening a variety of documentary, narrative and experimental films, the course provides an opportunity for an expanded perspective on the region and its history, one that goes far beyond the usual news reports and headlines. This is primarily a screening class, but students will also be encouraged to make work (media or written) that relates to the subject matter. The instructor recently returned from one year in the region as a MENA (Middle East and North Africa) Fulbright Fellow. This course is open to the institute, available for online registration and also open by Permission of the Instructor at Advising Day. Critical Studies credit.

Description

This course will survey video art and alternative media practice following the introduction of portable video recording equipment in the late 1960s. This term the course will also specifically integrate video art from various Latin American and Caribbean cultural scenes in conjunction with the Getty-sponsored LA/LA exhibitions held in various museums and galleries throughout the southern California. Guest speakers will include two Getty video curators and LA/LA artists. From both North American and Latin American video scenes we will examine early video projects responding to a radical late 60s shift in cultural strategies where perceptual process and performance were often valorized over art product, where artists explored properties of the electronic signal, and how media consumers and grassroots documentarians were approached as potential producers in efforts to democratize telecommunications. We will examine video work from the 1980s through mid 90s that registered theoretical shifts from post-minimalism to post-modernism together with the impact of new subjectivities. And an examination of the impact of digital and new technologies in the mid 1990s will set the stage for "new media" and the net cultural environment. Readings will focus on critical texts by curators and critics and writings by artists. Students will keep a weekly journal and also complete a short written assignment. The course is open to both BFAs and MFAs, and fulfills Critical Studies criteria. Permission of instructor required.

3

Description

Fourteen Questions to Jean-Luc Godard. There will be additional spaces available at Course Advising Day.

Since 1960 till his death in 2022, Jean-Luc Godard directed more than 100 features, shorts, series, essay films, television programs, etc. It would be futile to try and teach such complex and abundant oeuvre in one, even two semesters. The course will be articulated around points of entry to the work, formulated as questions to Godard.

The questions will be chosen among the following ones: How and why did you start making films? / What is a woman? / What is a young girl? / What is an actress? / What is love? / What are the ethics of political representation? / How to represent contemporary youth? / What is a cultural icon? / What is your relationship to the history of cinema? / What is autobiography? / What is montage? / What is language? / What is the relationship between sound and image? / What is an image?

Description

Now that the cinematic present is dominated by previews for video games and theme park rides, and the cinematic past threatens to congeal into AFI's greatest hits lists, it is particularly important to examine under-appreciated, even disreputable films that have gotten lost in the shuffle. 'Cinema Against the Grain' presents (mostly) independent films in historical context and deals with the themes and formal strategies of works that have thus far been refused a secure place in the canon. Screenings include films directed by Oscar Michaeux, Rowland Brown, James Bidgood, Fred Halsted, Doris Wishman and others. The requirements for the course are a paper per week, attendance at lectures and readings from photocopied articles and books on reserve. Offered by Program in Film and Video.

Description

This course focuses on building connections with alumni from the Experimental Animation program. We start by examining the histories and qualities that makes CalArts Experimental Animation the unique place that it is. After they graduate, many students from this program go into the film and art world, some as teachers, others in creative practice. This course locates those individuals who graduated and now serve as inspiration to our current students and and to practitioners outside of our program . Students in the course will engage with notable alumni and produce an online "up close" look at a selection of representatives of the EA Program, interviewing them based on questions that class participants determined. All creative decisions will be made by the students enrolled in the course.

Description

Course available by permission of instructor only.

Jean-Luc Godard once said, "as long as I'm alive, [the cinema] shall live." No other film director has identified himself so intimately and passionately with the cinema and its history. And no other director has created so many new cinematic forms and connections between images, as his motto demands: "An image is not strong because it is brutal or fantastic, but because the association of ideas is distant and true." We can certainly learn something from Godard about images and sounds and montage. To create cinema, you have to know what it is.

The course will concentrate on his lesser-known films, from Le petit soldat to Helas pour moi and Eloge de l'amour. The primary text will be Everything is Cinema: The Working Life of Jean-Luc Godard by Richard Brody. Brody's accounts of Godard's films are often reductionist, but this failing has the virtue of demystifying the films, which can seem daunting and obscure on a first or second viewing. Students will be required to watch Godard's other films and write short papers on five of them.

Description

An investigation into the formal means that narrative filmmakers (from the Italian neo-realists to the LA Rebellion, Renoir to Cassavetes) have used to achieve a heightened sense of "reality" in their work. Topics include the incorporation of documentary technique into fictional films, "improvisation," performance styles and the relationship between these "naturalist" filmmakers and the mainstream cinema. The class consists of a lecture, a screening and discussion each week. Students are required to participate in discussions, write a weekly journal entry, read weekly critical and theoretical texts, and complete a final project (either a research paper or an original creative work accompanied by a paper contextualizing it in the content of the course). Please note early start time: do not enroll for the course if you cannot commit to prompt weekly attendance.

Min Credit Hours:

3

Description

This is a critical examination of first-person films drawn from personal experience, literature and history, as well as a practicum for students' own autobiographical work. We will be concerned with a wide variety of autobiographical sources including memoir, testimony, diary and historical record as we consider strategies for using one's own experience to tell cinematic stories. Works considered will be fictional, documentary, personal and hybrids of these, and will offer an opportunity to trace the shifting qualities of a story as it travels from one form to another, and raises questions of reference, location, time, audience, structure and authenticity. Students will complete several short video sketches and a final project consisting of a research paper or autobiographical work.

Description

Rock & Roll & Movies is a history of Popular Music from 1955 to the present, as seen through its representation in cinema. We will see key works in the history of Rock & Roll movies and read a number of the important critical texts on the music. Issues covered will include the role of race and class in popular music, the paradox of 'radical' culture distributed through corporate capital, amateurism, 'authenticity' as a cultural value, and the interplay of history

and pop culture. Adding the class late is highly discouraged - the course builds from the first lecture and work begins immediately, so it is very difficult to move forward if you miss the early classes.

Description

Course available by Permission of Instructor only. The current age of Trump, Brexit, and climate disaster have brought discourses of the apocalypse into the U.S. and global mainstream. To some, we have entered a dystopic shadowland of alternative facts and fascist demagoguery. To others, this is America at last showing its true colors, the 'banality of evil' normalizing alt-right populism. In the face of this, the writer Junot Diaz has called for us to fight despair by using 'radical hope' as a weapon. Some have done just that: Black Lives Matter, the

Occupy movement, the Women's Marches and the Standing Rock Sioux have led broad waves of resistance, but the struggle is long and complex.

Can radical hope be a weapon of cinema? How might we dream futures and parallel worlds that articulate resistance, remedy and revolution? Is imagining utopia a call to action or a fool's paradise? "Utopia and Its Shadowlands" is an investigation of utopic and dystopic art and cinema, as well as a practicum for students' own work investigating the dreamlands and purgatories of the impossible. This is not science fiction in the strict sense of the genre; rather, we will look at manifestoes and movements, at imagined and prophetic futures, at parallel worlds, and at transformations and elevations of this world. Most importantly, we will study cinemas of resistance as models for filmmaking today, including anti-colonial, feminist, queer, satirical and underground works from Chris Marker to Kidlat Tahimik, Lizzie Borden to Apichatpong Weerasethakul, Ben Rivers to Ciro Guerra, and filmmaking collectives such as The Black Audio Film Collective, the Anti-Banality Union and Groupe Dziga Vertov.

In addition to screenings, discussion and readings, students will complete two short photo/video sketches and a final project consisting of either a short film/video work or a critical, academic essay.

Description
POLITICS, PARANOIA AND PORN 'STACHES: '70s
GENRE REVISIONISM

Course available by permission of instructor only.
The "New Hollywood" of 1967-1975 was an endlessly rich and eccentric period of American filmmaking. A generation of young filmmakers took advantage of the freedoms afforded by the desperation of the failing studio system and the collapse of the Production Code to make a body of work that

managed to be both personal and occasionally quite popular. This class will explore this era through its genre filmmaking: many of the major films of the Hollywood Renaissance are self-conscious attempts to rethink genre, employing the Western, the road movie, the horror film, the musical and the gangster film to explore and embody the divisions and conflicts of a particularly charged, divisive era.

The class will be taught as a seminar, with short contextual lectures introducing screenings, followed by discussion.

The readings will include historical/critical assessments of the films discussed, contemporary criticism and accounts of the history and politics of the era. Auditing is encouraged depending on class size.
The class consists of brief lectures, screenings and discussions.

Requirements include strict regular attendance, weekly readings, weekly journals, a final project, and active participation in class discussions.

Students will demonstrate their developing ideas both in weekly journal writing and in class discussions that will take in both the critical/theoretical readings and the films screened in class. They will develop an original research topic to be completed either as a research paper or a creative work accompanied by a short paper.

3

Description
This course is available for online registration. It will also be open by Permission of Instructor at Advising Day for additional enrollment. When Chantal Akerman (1950-2015) committed suicide, she left behind a prolific and singular oeuvre. A truly independent filmmaker, she used to write or co-write all her screenplays, and her films outline an autobiography of sorts. She worked in a variety of formats, exploring both

documentary, fiction and the personal essay form - in most than 60 works: 18 features, countless shorts and featurettes, and a dozen multiple-screen installations that were often variations of her single-channel films - always mixing high art with popular culture, minimalist rigor with physical exuberance. Through this multiplicity of formats, though, a unique tone, the specific quality of the gaze, an inimitable mastery of the mise en scène constituted a style that can be immediately spotted.

Her presence in her films was the index of a new way of performing femininity, as well as queerness and the anguish felt by the children of Holocaust survivors. Hers was an unclassifiable body willfully exploding the boundaries of sex, race, ethnicity, genre, language, and geography - or, at the border of the image, at the border between documentary and fiction (to allude to the title of one of her installations), as an inimitable voice, talking and singing, the thinly melodious voice of a child, later made husky by the smoke of a thousand cigarettes.

Many of her films are about a girl/a woman whose desires, passions, longings, and obsession with an unspoken past are too big to be contained. Women run away, cut classes, hitch-hike, sleeplessly walk the streets at night, love two people at the same time, strive to marry the wrong person, stalk female ex-lovers, commit murders, travel throughout Europe, go to America, to Eastern Europe, to Asia, illegally cross borders - in situations that go from the banal to the surreal. The excess contained in Akerman's signature frontal shots pours out in language, in pleasure.

Having been a friend of Akerman's, co-curated two major retrospectives of her work, edited a dossier on her legacy shortly after her death, and written a number of articles about her, I have access to DVDs and VHS not commercially available and will contextualize them, as well as more "mainstream" examples of her work, within a discussion of - gender politics - queer theory - the ethics of representation of the Shoah and the question of "the witness" - questions of mise en scène and cinematic representation (composition of shots, editing, off-screen space, relationship between image and sound). Requirements: One 4-5 page paper mid-semester; one 10-12 page term paper.

Description

This course is by Permission of Instructor Only. This thematically organized trip through the history of experimental animation will look at work from pre-cinema to the present day, with an eye towards connecting disparate time periods, traditions, and techniques by finding and exploring some common threads. In our class attempt to define what "experimental animation" is, we will arrive at a more complex understanding of the concept of animation itself. By the end of the semester, students will have been exposed to a radically diverse selection of work, and ideally come away from the experience with a rich, impressionistic understanding of the history, scope, and possibilities in experimental animation. Each class session will include screenings of multiple works, as well as contextualizing and supplemental information. Discussion will be greatly encouraged in class.

Description

"We can never get close to the truth except through lying" -- Abbas Kiarostami

This course examines post-1980 cinema of Iran. Poetic, philosophical, and political, this cinema is venerated by film critics and audiences world-wide while often censored at home. Over the semester, we explore work by several of the great Iranian film directors of the last forty years. Enrolled students can decide how many and which filmmakers we focus on including: Abbas Kiarostami, Mohsen and Samira Makhmalbaf, Jafar Panahi, Bahman Ghobadi, Ashgar Farhadi, and Mohammad Rasoulof.

In 1979, after the revolution that precipitated the fall of the autocratic and U.S.-backed Shah, Iran became an Islamic Republic. Working under strict censorship laws in a theocratic society, Iranian filmmakers nevertheless continued to make films, and Iranian cinema flourished. In addition to films made exclusively for domestic consumption, Iranian films also began to appear at international film festivals, receiving an overwhelmingly positive critical reception. Films from Iran have won awards at all the most important film festivals, including Venice, Berlin, Cannes, as well as at the Academy Awards.

What is it that makes these films so powerful and appealing to audiences outside Iran? Iranian cinema is known for its poetic and social realism, but also for the distinctive ways, both narratively and formally, in which it questions truth and the possibilities of representation. Depicting aspects of daily life in a country that is largely closed to international scrutiny and exploring a variety of social and ethical dilemmas (including those related to class, gender, and ethnic identity), Iranian cinema has much to teach us about the nature of truth and the paradoxes of trying to represent it. State censorship plays a role in how several Iranian filmmakers cleverly craft their stories. But above all, these cinematic and philosophical investigations into questions of truth reflect the profound entanglements and enigmas of being human.

Description

From the beginning, women and underrepresented groups have held a strong presence within animation, yet when examining history, minimal emphasis is placed on their contributions. The truth is, throughout most of the 20th century, leading women artists established, defined and expanded the animated art form, yet very little is recorded of their work, and their films are rarely examined.

This first-of-its-kind course delves into these artists and their artistic contributions within the animated art form. Through lecture, screenings, presentations and guest speakers, students will achieve a comprehensive understanding of this previously invisible half of our collective animated past.

Students should expect to spend approx \$60 on additional materials and supplies.

Description

This is a class where theory meets practice. Animators have to design and create their characters from scratch, and whatever designs they come up with convey social and cultural meaning, whether consciously or not. This class aims to raise awareness of these meanings through screenings, readings and discussion.

A range of animation - both historical and contemporary - will be screened, plus related visual material from the history of art and popular culture. Students will be required to read basic texts, plus further reading related to their chosen area of research. The aim is to give students a working knowledge of cultural theory related to the area of diversity and representation. Students will be expected to participate in critique and discussion in class and in written work, as well as create original designs for characters that reflect their research.

Films that will be examined include He Named Me Malala, Persepolis, The Breadwinner, Coco, and more.

Students should expect to spend up to \$40 on additional course supplies.

Description

Political cartooning is a vital element of a free press in a democracy and contributes to the critique of the modern political landscape. Through an examination of the history of political cartooning in the United States, as well as specific cartoonists who have elevated the use of visual language and metaphors in their work, students will gain an understanding of this important medium and its contributions to democracy.

Additionally, students will learn how to create cartoons that comment on social and political issues, whether in multi-panel format, animation, live-sketching or the traditional one-panel format. Students will be encouraged to use their skills in storytelling and design to produce strong visual statements, as well as apply their research in order to write knowledgeably about this subject.

Description

Seminar in Black Experimental Film/Video
This seminar is designed to facilitate a creative and rigorous conversation around Blackness and the audiovisual, particularly in experimental film/animation, documentary/non-fiction, and video art. Particular attention will be paid to work that is oriented around imagined futurity, resourceful fugitivity, and what is potentially reparative in the everyday. How can filmic media avoid the spectacularization of Black suffering? What does it mean to contend with trauma without reinscribing it into the visual medium? How do we open up pathways to radical methodologies? How can we elevate an ethic of care in Black cultural production? This course is neither a survey of Black film/video nor an introduction to recent Black Diasporic humanities scholarship. The films herein aren't necessarily answers to the aforementioned questions, but rather points of entry into these considerations. Imagining Fugitivity and Futurity in Film/Video is a space to think with and through contemporary film/video and scholarship that opens up new possibilities to think and create.

Description

A beloved CalArts tradition "Film Today," offered by the Program of Film and Video, is open to the entire Institute, to graduate student and undergraduate students in all programs, for Critical Studies credits. Opening a window into the world as well as into our own subjectivity, the art of the moving image is changing rapidly. This course is taught by scholars and/or professionals active in the field, who closely follow these changes. It is designed to offer a context and critical tools for a better understanding of the moving image in its different manifestations. We will show narrative features from all over the world, crafted within different cultural, racial and sexual communities - as well as cutting-edge documentaries, essay films, experimental works and hybrid creations at the boundaries of several art practices. Lectures and active discussions will provide a context and build bridges between your respective métiers and the aesthetics of the moving image. Your contribution to the discussion as well as your weekly papers (1 to 12 pages, 12 point font) are an essential component of this exciting, necessary conversation of our times. This course is available for online registration. It will also be open by Permission of Instructor at Advising Day for additional enrollment. Attendance to this class is mandatory. May be repeated for credit.

Description

This course will investigate a broad range of media art and documentary projects, with attention to the performative act of witnessing, the creative address of media archives by artists, and the aspiration to negotiate new social relations with collaborators and audiences. Drawing from work in film, video, and new media, this course will explore time-based projects informed by documentary gestures such as journaling, cinema-verite recording, surveillance, re-performance, and non-linear structuring of information. Narrative and performative projects resulting from creative detours in documentary exercises will also be screened. The course will additionally examine collections of work from specific historical moments that aspired to strategic cultural interventions, including a range of provocative work across genre on incarceration in the U.S., samizdat and media arts projects produced during late 1980s, dramatic cultural shifts in east central Europe, and collective experiments with new technologies and audiences from the U.S. in the 1960s/early 70s. Media projects from Chile, Nunavut, and South East Asia address generational loss or repression of archived information and reinvigorate dialogues across the distance of time. Offered by Program in Film and Video.

Description

This is a course in documentary theory / studies through the lens of films made in or about Palestine and Israel. We may also include works from other zones of conflict chosen by the students. Issues of politics and form, ethics and aesthetics are central to all nonfiction film. In the context of ongoing and seemingly intractable political conflict, this is even more the case. We will examine the work of numerous filmmakers including Avi Mograbi, Raed Andoni, Kamal Aljafari, Ra'anan Alexandrowicz, Palestinian-Israeli collaborative teams, and many more. Questions of reception, political impact and censorship will also be addressed.

Course includes weekly discussion posts on readings, an analytical paper, research paper and a visual project. Students will be able to critically analyze nonfiction film and to eloquently articulate the aesthetic approaches of a given documentary as well as ethical issues raised or addressed by documentary film.

Description

This course in the history and theory of nonfiction film examines the use of (re-) enactment as a tool in documentary. Although not always explicitly acknowledged, enacting or reenacting scenes has been common in documentary film since its origins. While sometimes serving primarily as illustration of past (or even contemporary) events, in other cases such scenes are "performative" in the sense that they intend to do something either to the subjects or to the audience. We will read work on "performativity" and reenactment in nonfiction film (by Bill Nichols, Jonathan Kahana, Ivone Margulies and others) and also explore some trauma theory literature. When and why is reenactment considered an important or revelatory strategy? What exactly qualifies as "enactment" or "reenactment," and how is it different from docudrama? How can/ should it be ethically framed? Why is it so often used in films that grapple with portrayals of violence and trauma? We will screen earlier films such as *The Silent Village* (1943), *The War Game* (1966), scenes from *Shoah* (1985) and some of the following: *S-21: The Khmer Rouge*

Killing Machine (Cambodia 2003), The Act of Killing (Indonesia 2012), Ghost Hunting (Palestine/Israel 2017) and Four Daughters (Morocco 2023). Filmmakers who regularly use reenactment such as Zacharias Kunuk or Errol Morris may also be studied. Students will be expected to read and report on weekly articles, rewatch films at home, and write an academic research paper. Creative projects are optional/additional. This course is best suited for students with some background in nonfiction and an interest in critical writing.

3

Description

The concept of 'Third Cinema', coined in Latin America by filmmakers Fernando Solanas and Octavio Getino, implies a critical reappraisal of the national or cultural specificity, post-colonial identity, the dialectical connection between domination/subordination, centre/periphery and resistance/hegemony. While First Cinema is Hollywood, Second Cinema is Western 'auteur' cinema, Third Cinema is resolutely non-capitalist and non-Western. We will look at films from Africa, the Arab World, East India, Latin America, Taiwan...but also films that assert a cultural/political resistance within Western industrialized countries, such as African American cinema, the Black British workshops and the 'Beur' films in France. Offered by Program in Film and Video. May be repeated for credit.

Description

This course will also have spaces available to enroll at Course Advising Day.

This course will examine narrative films from Czechoslovakia [now Czech Republic and Slovakia] and Hungary from post-WWII to the present, including the remarkably inventive and often banned films of the 1960s Czech New Wave ("diamonds of the everyday"); the often dark and experimental "documentary fictions" of 1970s-80s Hungary; and probing work of the transitional period (1988-91) including samizdat media and video art from societies experiencing dramatic cultural and political changes. The ongoing impact of surrealism (and animation) in the region, ethnic tensions reflected in art and media before and during the wars in Yugoslavia (1990s), the austere realism of the "hard to live in" post-socialist society reflected in New Romanian Cinema (2000s), and work from other countries that contribute insights to contemporary directions in the "former East" will also be explored.

Description

A History of Film is a two semester survey of cinema from its origins in the late 19th century to the present day. The course emphasizes the development of cinema aesthetics through the study of works by major filmmakers and national cinemas. The Fall semester covers the period from 1895 to 1950, focusing on both the evolution of narrative filmmaking and challenges to that style. The Spring semester is concerned with work from 1950 to today, with particular attention paid to the impact of neo-realism and the proliferation of new national cinemas and alternative approaches. The course is designed as a yearlong sequence and is best experienced that way, but students can begin the sequence in Spring, take a single semester, or repeat semesters to see alternate programming. Auditing is encouraged depending on class size. The class consists of lectures and screenings; after each session a voluntary (but highly recommended) discussion group meets to talk about that week's films. Requirements include strict regular attendance, weekly readings, weekly short papers and a final research project. Offered by Program in Film and Video. Required of FDP MFA1; PFV MFAs must take FAIC620 or FAIC621 for one semester. May be repeated for credit. Please note that the first two class sessions are foundational for the course and that intensive reading and writing assignments begin immediately; you are discouraged from adding late.

Description

Women have been routinely excluded from filmic participation and from the cinematic canon on multiple levels. BFI's famous "50 best films of all time" list (<https://www.bfi.org.uk/news/50-greatest-films-all-time>) includes only one female director. This course is designed to repair decades of erasure, by presenting superb films directed by women, from 1920's- the present. Weekly screenings will

include works by Lotte Reiniger, Dorothy Arzner, Agnes Varda, Julie Dash, the instructor (Nina Menkes) and many more. We will focus on issues of representation, the way male dominance is coded cinematically, questions of form-can we use the master's tools to dismantle the master's house? What does it mean to speak from the dominant position versus from a marginal position both cinematically and narratively? The accumulated impact of screenings, and related readings, week after week, of powerful work by female directors will serve to undercut the oppressive impression many of us carry that most "important" or "classic" films are directed by men. Readings will focus on feminist film theory.

FAIC624 - Sexuality, Gender, Destruction in Cinema

Min Credit Hours:

3

Description

This course will provide a forum to view and discuss films and readings which problematize traditional constructions of gender and sexuality on multiple levels. The selected works also have a special emphasis on trajectories of violence and destruction that involve sexuality, with an emphasis on works in which the knife, so to speak, is pointed in the 'wrong direction'. Offered by Program in Film and Video.

FAIC625 - History of Sound in Animation

General

Course Long Title

History of Sound in Animation

Subject Code	Course Number
FAIC	625

School(s)
School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

Animation sound uses a combination of dialogue, effects, and music to complement moving images. A fair amount has been written about the use of music in animation, but very little has been written about the overall role of sound in animation. Or, how the technological development of sound recording has influenced the evolution of the animated film. Or, how the creative language of sound for hand-crafted images has developed.

This class will, in some ways, be an experiment in correcting and expanding the historical record, and creating a coherent narrative of the sometimes uneasy alliance between picture and sound in animation. As technology has changed, each studio and filmmaker has adapted more or less independently.

Description

Cinema of Exile: Perspectives on Palestine and Israel

The course addresses the experience of exile and displacement understood both as a physical and psychic condition, as expressed in films and texts from Palestine and Israel. Through screening a variety of documentary, narrative and experimental films, the course provides an opportunity for an expanded perspective on the region and its history, one that goes far beyond the usual news reports and headlines. This is primarily a screening class, but students will also be encouraged to make work (media or written) that relates to the subject matter. The instructor recently returned from one year in the region as a MENA (Middle East and North Africa) Fulbright Fellow. This course is open to the institute, available for online registration and also open by Permission of the Instructor at Advising Day. Critical Studies credit.

Description

Course available by permission of instructor only.

The course will view films and read texts that center on the prostitution, 'the world's oldest profession'. Prostitution has been a subject of singular fascination since biblical times. We will

consider the construction of prostitution in a range of cinema, including mainstream work, alternative experimental fiction, as well as documentary films. Our investigation will necessarily intersect with questions of the representation of sexuality, and exploitation in a more global sense. Offered by Program in Film and Video.

Description

This course will survey video art and alternative media practice following the introduction of portable video recording equipment in the late 1960s. This term the course will also specifically integrate video art from various Latin American and Caribbean cultural scenes in conjunction with the Getty-sponsored LA/LA exhibitions held in various museums and galleries throughout the southern California. Guest speakers will include two Getty video curators and LA/LA artists. From both North American and Latin American video scenes we will examine early video projects responding to a radical late 60s shift in cultural strategies where perceptual process and performance were often valorized over art product, where artists explored properties of the electronic signal, and how media consumers and grassroots documentarians were approached as

potential producers in efforts to democratize telecommunications. We will examine video work from the 1980s through mid 90s that registered theoretical shifts from post-minimalism to post-modernism together with the impact of new subjectivities. And an examination of the impact of digital and new technologies in the mid 1990s will set the stage for "new media" and the net cultural environment. Readings will focus on critical texts by curators and critics and writings by artists. Students will keep a weekly journal and also complete a short written assignment. The course is open to both BFAs and MFAs, and fulfills Critical Studies criteria. Permission of instructor required.

FAIC632 - Women in Cinema: Femininity/Performance

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

3

Description

This seminar is an attempt to reflect critically on our past/recent/or current experience of the Covid 19 pandemic, and acquire critical tools to think about life, filmmaking, writing and art making in a situation of confinement or quarantine. Even though the confinement might be over - at least in California - it has profoundly affected our memory, our sense of the self and the other. We will discuss the concepts of door, window, perspective, vista, entrance and exit, the intimate, the blocked gaze (analyzing the role of the off-screen space); as well as the relationship between the inside and the outside, between seeing and hearing; surveillance, autonomy and freedom; architecture, memory, gender, and subjectivity.

Description

Fourteen Questions to Jean-Luc Godard. There will be additional spaces available at Course Advising Day.

Since 1960 till his death in 2022, Jean-Luc Godard directed more than 100 features, shorts, series, essay films, television programs, etc. It would be futile to try and teach such complex and abundant oeuvre in one, even two semesters. The course will be articulated around points of entry to the work, formulated as questions to Godard.

The questions will be chosen among the following ones: How and why did you start making films? / What is a woman? / What is a young girl? / What is an actress? / What is love? / What are the ethics of political representation? / How to represent contemporary youth? / What is a cultural icon? / What is your relationship to the history of cinema? / What is autobiography? / What is montage? / What is language? / What is the relationship between sound and image? / What is an image?

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

Now that the cinematic present is dominated by previews for video games and theme park rides, and the cinematic past threatens to congeal into AFI's greatest hits lists, it is particularly important to examine under-appreciated, even disreputable films that have gotten lost in the shuffle. 'Cinema Against the Grain' presents (mostly) independent films in historical context and deals with the themes and formal strategies of works that have thus far been refused a secure place in the canon. Screenings include films directed by Oscar Michaeux, Rowland Brown, James Bidgood, Fred Halsted, Doris Wishman and others. The requirements for the course are a paper per week, attendance at lectures and readings from photocopied articles and books on reserve. Offered by Program in Film and Video.

Description

This course focuses on building connections with alumni from the Experimental Animation program. We start by examining the histories and qualities that makes CalArts Experimental Animation the unique place that it is. After they graduate, many students from this program go into the film and art world, some as teachers, others in creative practice. This course locates those individuals who graduated and now serve as inspiration to our current students and and to practitioners outside

of our program . Students in the course will engage with notable alumni and produce an online "up close" look at a selection of representatives of the EA Program, interviewing them based on questions that class participants determined. All creative decisions will be made by the students enrolled in the course.

Credit Hours

Min Credit Hours:

3

Description

An investigation into the formal means that narrative filmmakers (from the Italian neo-realists to the LA Rebellion, Renoir to Cassavetes) have used to achieve a heightened sense of "reality" in their work. Topics include the incorporation of documentary technique into fictional films, "improvisation," performance styles and the relationship between these "naturalist" filmmakers and the mainstream cinema. The class consists of a lecture, a screening and discussion each week. Students are required to participate in discussions, write a weekly journal entry, read weekly critical and theoretical texts, and complete a final project (either a research paper or an original creative work accompanied by a paper contextualizing it in the content of the course). Please note early start time: do not enroll for the course if you cannot commit to prompt weekly attendance.

Spc Topics: Curious Art of Autobiography

Subject Code	Course Number
FAIC	651

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

3

Description

This is a critical examination of first-person films drawn from personal experience, literature and history, as well as a practicum for students' own autobiographical work. We will be concerned with a wide variety of autobiographical sources including memoir, testimony, diary and historical record as we consider strategies for using one's

own experience to tell cinematic stories. Works considered will be fictional, documentary, personal and hybrids of these, and will offer an opportunity to trace the shifting qualities of a story as it travels from one form to another, and raises questions of reference, location, time, audience, structure and authenticity. Students will complete several short video sketches and a final project consisting of a research paper or autobiographical work.

Min Credit Hours:
3

Description

Course available by Permission of Instructor only. The current age of Trump, Brexit, and climate disaster have brought discourses of the apocalypse into the U.S. and global mainstream. To some, we have entered a dystopic shadowland of alternative facts and fascist demagoguery. To others, this is America at last showing its true colors, the 'banality of evil' normalizing alt-right populism. In the face of this, the writer Junot Díaz has called for us to fight despair by using 'radical hope' as a weapon. Some have done just that: Black Lives Matter, the Occupy movement, the Women's Marches and the Standing Rock Sioux have led broad waves of resistance, but the struggle is long and complex.

Can radical hope be a weapon of cinema? How might we dream futures and parallel worlds that articulate resistance, remedy and revolution? Is imagining utopia a call to action or a fool's paradise? "Utopia and Its Shadowlands" is an investigation of utopic and dystopic art and cinema, as well as a practicum for students' own work investigating the dreamlands and purgatories of the impossible. This is not science fiction in the strict sense of the genre; rather, we will look at manifestoes and movements, at imagined and prophetic futures, at parallel worlds, and at transformations and elevations of this world. Most importantly, we will study cinemas of resistance as models for filmmaking today, including anti-colonial, feminist, queer, satirical and underground works from Chris Marker to Kidlat Tahimik, Lizzie Borden to Apitchatpong Weerasethakul, Ben Rivers to Ciro Guerra, and filmmaking collectives such as The Black Audio Film Collective, the Anti-Banality Union and Groupe Dziga Vertov.

In addition to screenings, discussion and

readings, students will complete two short photo/video sketches and a final project consisting of either a short film/video work or a critical, academic essay.

Description

POLITICS, PARANOIA AND PORN 'STACHES: '70s
GENRE REVISIONISM

Course available by permission of instructor only.

The "New Hollywood" of 1967-1975 was an endlessly rich and eccentric period of American filmmaking. A generation of young filmmakers took advantage of the freedoms afforded by the desperation of the failing studio system and the collapse of the Production Code to make a body of work that managed to be both personal and occasionally quite popular. This class will explore this era through its genre filmmaking: many of the major films of the Hollywood Renaissance are self-conscious attempts to rethink genre, employing the Western, the road movie, the horror film, the musical and the gangster film to explore and embody the divisions and conflicts of a particularly charged, divisive era.

The class will be taught as a seminar, with short contextual lectures introducing screenings, followed by discussion.

The readings will include historical/critical assessments of the films discussed, contemporary criticism and accounts of the history and politics of the era. Auditing is encouraged depending on class size.

The class consists of brief lectures, screenings and discussions.

Requirements include strict regular attendance, weekly readings, weekly journals, a final project, and active participation in class discussions.

Students will demonstrate their developing ideas both in weekly journal writing and in class

discussions that will take in both the critical/theoretical readings and the films screened in class. They will develop an original research topic to be completed either as a research paper or a creative work accompanied by a short paper.

Fulfills the FDP History and Context requirement.

Min Credit Hours:

3

Description

This course is available for online registration. It will also be open by Permission of Instructor at Advising Day for additional enrollment. When Chantal Akerman (1950-2015) committed suicide, she left behind a prolific and singular oeuvre. A truly independent filmmaker, she used to write or co-write all her screenplays, and her films outline an autobiography of sorts. She worked in a variety of formats, exploring both documentary, fiction and the personal essay form - in most than 60 works: 18 features, countless shorts and featurettes, and a dozen multiple-screen installations that were often variations of her single-channel films - always mixing high art with popular culture, minimalist rigor with physical exuberance. Through this multiplicity of formats, though, a unique tone, the specific quality of the gaze, an inimitable mastery of the mise en scène constituted a style that can be immediately spotted.

Her presence in her films was the index of a new way of performing femininity, as well as queerness and the anguish felt by the children of Holocaust survivors. Hers was an unclassifiable body willfully exploding the boundaries of sex, race, ethnicity, genre, language, and geography - or, at the border of the image, at the border between documentary and fiction (to allude to the title of one of her installations), as an inimitable voice, talking and singing, the thinly melodious voice of a child, later made husky by the smoke of a thousand cigarettes.

Many of her films are about a girl/a woman whose

desires, passions, longings, and obsession with an unspoken past are too big to be contained. Women run away, cut classes, hitch-hike, sleeplessly walk the streets at night, love two people at the same time, strive to marry the wrong person, stalk female ex-lovers, commit murders, travel throughout Europe, go to America, to Eastern Europe, to Asia, illegally cross borders - in situations that go from the banal to the surreal. The excess contained in Akerman's signature frontal shots pours out in language, in pleasure.

Having been a friend of Akerman's, co-curated two major retrospectives of her work, edited a dossier on her legacy shortly after her death, and written a number of articles about her, I have access to DVDs and VHS not commercially available and will contextualize them, as well as more "mainstream" examples of her work, within a discussion of - gender politics - queer theory - the ethics of representation of the Shoah and the question of "the witness" - questions of mise en scène and cinematic representation (composition of shots, editing, off-screen space, relationship between image and sound). Requirements: One 4-5 page paper mid-semester; one 10-12 page term paper.

Description

This thematically organized trip through the history of experimental animation will look at work from pre-cinema to the present day, with an eye towards connecting disparate time periods, traditions, and techniques by finding and exploring some common threads. In our class attempt to define what "experimental animation" is, we will arrive at a more complex understanding of the concept of animation itself. By the end of the semester, students will have been exposed to a radically diverse selection of work, and ideally come away from the experience with a rich, impressionistic understanding of the history, scope, and possibilities in experimental animation. Each class session will include screenings of multiple works, as well as contextualizing and supplemental information. Discussion will be greatly encouraged in class.

General

Course Long Title
Scene Study

Subject Code	Course Number
FFDP	412

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
The collaborative work between an actor and director is critical to dramatic narrative storytelling. Many essential fundamentals are shared between the two disciplines including, but not limited to, basic story/text analysis,

research skills, the art of rehearsal, and a shared vocabulary centered on action-intention. Students will participate as both actors and directors throughout the course of the workshop; fundamentals will be developed through scene work both improvised and scripted, and by breaking down material on paper, on stage and through critical analysis of film clips. Performance in class work encourages the director to challenge their vulnerability and willingness to risk. Scene study teaches the director to evaluate the events materializing in front of them and make effective adjustments to the scene while working on the floor.

School(s)	Program(s)
School of Film/Video	Film and Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
This course is available by Permission of Instructor only on Advising Day.

The entire sky is a grand narrative filled with stories enacted by protagonists and antagonists portraying legendary tropes and mythologies. This course explores story structure through experiences of , and exposure to, the history of astronomy including how the constellations were named and placed in the heavens. Students will invent cinematic story ideas through the process of looking at the canvas of stars in the night sky. Additionally this process will examine the basic concepts of cinematography such as depth of field, lens perspectives, exposure and aesthetics of composition while gazing through a telescope or capturing nighttime images on field trips. A creative project is required for completion of the course. Field trips will be a regular part of the class programming.

Min Credit Hours:
3

Description

This is a course aimed to deepen filmmakers' knowledge on the concepts and uses of the various elements of cinematography; both technical and conceptual. The class will focus on directorial decisions regarding framing, camera movement, depth of field, lighting styles and a variety of other formal choices concerning image-making and how they shape the discourse of each individual work. We will mainly work with digital cameras and formats with the objective of investigating their specificity. The class will also address the interconnectedness of pre-production, production and post-production in digital cinematography, and the ways in which our various uses of technology inform our aesthetics as makers. We will discuss set protocols and center our assignments on the creative advantages of working with limited resources. Finally, we will discuss different modes and models of production, and the ways that each implements and affects the development of concept, process, and politics.

Credit Hours

Min Credit Hours:

3

Description

Course available by permission of instructor only.

This workshop explores the aesthetics and methodologies of complex and non-traditional approaches to narrative staging. The class consists of in-class shoots that should expand the student's recent directing and shooting methods, several field trips beyond the studio, and hands-on experimentation with techniques such as off-screen space, layered and limited space, kinetic ensemble staging, the moving master, live locations, direct address, and use of multiple cameras. We will look specifically at issues of framing, composition, blocking, and in particular, staging of the camera and the dramatic moment. Assignments include a small research project, in-class exercises, and a short work that reflects engagement in advanced staging techniques.

Course Number

435

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

This directing workshop draws on ideas and investigations about filmmaking that were introduced in first year, asking you to consider how concept relates to image and meaning. Our main task will be a hands-on investigation of visual strategies for narrative directing, specifically focused on the translation from concept to cinema. In a series of labs and workshops, students will experiment with text analysis, visual design, mise-en-scene, staging, composition, movement, angle, focal length, rhythm, continuity, coverage and most of all, visual meanings. Students will prepare a portfolio of visual designs for a series of scenes, and act as a key collaborator in the design, production and editing of one scene, to

be shot in class. Undergraduates must have previously taken a foundational production workshop course in order to enroll.

FFDP440 - Guest Artist Workshop

Course Long Title

Editing Aesthetics

Subject Code

FFDP

Course Number

445

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

Editing Aesthetics looks at the post-production process as an aesthetic practice. We examine different examples of picture and sound editing strategies and discuss their potential to produce meaning in film. Through analyzing different films and readings the class focuses on editing as a generative practice - a phase where films are created too. We discuss key concepts such as time, space, rhythm, structure, meaning, dialectics, sequencing, continuity, fragmentation, immersiveness, among others. Conversations about

the history and politics of editing in film will be a crucial part of the class, as well as the ethics of representation on screen. Rather than workshopping a single project in the class, students will be asked to complete several editing assignments that will culminate in a final short film piece. This piece should investigate one or multiple editing techniques or theoretical approaches to editing sound and picture.

Description

What's So Funny?

Film Comedy: Aesthetic, Moral, and Political Dimensions.

Since the early days of cinema, comedy has been a constant shaping presence of the art form. Harnessing the prowess of jokes, and always in search of humorous outcomes, filmmakers have adopted and expanded on long standing comedic traditions: sketch comedy, screwball comedy, slapstick comedy, parody, satire, black humor, farce, among others. Performative figures such as the clown, the trickster or the joker have found new solace in film.

These are some of the key elements and modalities of comedy that will comprise the focus of this seminar. We will read some of the most influential theories and critical accounts in relation to humor and comedy, but our main focus will always fall back to the films selected for his class. We will watch and discuss a variety of film comedies, both in short and long form, covering a diverse set of references across different periods of time and transnational contexts. Our goal is to come as close as possible to the inner workings of a perennial art form, while paying close attention to the socio-historical contexts from which these works emerged. What are the stakes of comedy, socially, politically and ethically speaking?

Ambiguity, paradox and incongruity are often invoked and played out through comedy. The nonsensical, the absurd, and even the grotesque are comedy's currency, with the carnivalesque as one of its most transgressive modes. As such, comedy enriches our understanding of human complexities, and might even lead to radical transformation.

The course will be divided into two parts. First we will explore a variety of examples addressing the formal and socio-cultural elements of the artistic form (performance, verbal and visual gags, narrative structure, visual style, etc.), students are expected to cover assigned weekly readings and films and take part in in-class discussion analyzing these materials. Towards the second half of the semester we will aim at putting these features into practice; students will workshop their ideas aimed at producing and presenting short comedic pieces of their own.

Description

Heroics and Villainy: The Majesty of Good vs. Evil

This is a course that explores heroics & villainy in storytelling as filtered through cinematic tropes. It is a journey into the origins and creation of mythic archetypes that have populated narrative forms from primitive storytelling to the silver screen. The majesty of any hero is only as good as the villain that opposes him. And is the image of villain devoid of heroic impulse? Is a sympathetic villain the antithesis to the antihero? What characteristics form our notions of heroism? What has led a person to engage in villainy? Why do we romanticize the hero and vilify the villain? What is the difference between heroes & villains and protagonist & antagonist? Through lectures and discussions, examination of film clips and storytelling exercises, we will find our way to answering why strong drama is grounded in conflict, how tropes emerge from contemporary issues influencing the cinema of its time and discover cultural impulses that lead to celebration of these characters. Throughout the

class scripted scenes will be used to diagnose and "act" the complex architecture of hero, villain. This will be a class geared to practical application by allowing students to enact the elements of heroism or villainy in scenes realized through some rehearsal, and through coursework culminating in either a 5 page script or short film, capturing each students personal version of heroism or villainy.

Additional course fees \$75.00

Special Topics: Love Stories

Subject Code	Course Number
FFDP	457
School(s)	Program(s)
School of Film/Video	Film Directing

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This class will focus on stories of love as told on film; love is a word that means everything and nothing at all. Love is politic, desire, obsession, belief; it is a paradox, one that continually contradicts its expectations. The class will examine how one describes the indescribable, films unique ability to speak to the ineffable. Most of all, love is dynamic, and requires a description of the exchange between people. It is seen in the most unlikely of gestures and exchanges. The class will focus on the ways a filmmaker depicts the substance of human relations, and how one articulates such moments. It will also focus on the dynamics and politics of human interactions, and the exchange of love and sex, especially as depicted in film. The class will be small and seminar based; students will be responsible for presentations throughout, organized around discussion topics. Films watched and discussed will draw on both fiction and documentary work; screenings will be supplemented with reading and writing exercises throughout, as well as work from other mediums.

FFDP	458
School(s)	
School of Film/Video	

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
Course available by permission of instructor only. This course proposes a broad reading of the coming of age story, framing it not just as a specific moment of adolescent development, but as a narrative of personal transformation most often concerned with transgression and epiphany. Through an examination of classic, independent and avant-garde examples of this vast genre, we will investigate thematic questions of sex and sexuality, the body, spiritual awakening, ethics, race, gender, nationality and community, autobiography, anger and violence. We will also be concerned with a range of production issues that arise in the making of such films, such as working with child actors, staging sex scenes, visual and dramatic treatments of rites of passage, and the presence of nostalgia and episodic structure in writing coming of age stories. Assignments include several short personal writings or cinematic essays, and either a one-hour seminar based on a germane topic or a substantial, relevant artistic work.

Credit Hours

Min Credit Hours:
2

Description
This class focuses on a non-traditional process to explore alternative, non-linear methods of cinema production; through filming, writing, editing, rehearsals and staging, each filmmaker will give themselves space to experiment and expand their projects while developing an individual process of making. The class will look at the way one can expand a film through an iterative process; assignments will include research, filming and writing meant to allow students to discover their projects through direct engagement with their materials, as well as help them assemble a process that best suits their work. It also looks at the way that documentary and narrative practices can speak to each other. The aim of the class is for students to discover their own processes when producing their work and feel encouraged to challenge the conventional, linear mode of dramatic production. The class aims to help students search for the most congruent production method, visual language, sound aesthetic, and narrative

structure that correlates with their content.

The course will incorporate screenings and discussions that present a variety of narrative and forms from filmmakers across the world. This course also centers its discussion on the idea of completion: when is a film a film? How does your work across time speak to your identity as a maker?

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

3

Description

This is a hybrid studio/discussion class focusing on experimental improvisation and non-traditional directing methods to create persona based performance. Some questions we will be asking: How does a performer create a persona out of their personal experience? What is the difference between persona and character? How do we "direct" ourselves as solo performers? What are ways to access different points of performative inspirational diamonds? How do we sift through the unnecessary sludge so that the necessary may speak? Is directing performing?

In class improvisation, assignments around persona, and improvisation will be accompanied of study of film/video and performance work as well as artists who work in persona.

In class film and video viewing and discussion of persona and directing:
Fires In the Mirror, PeeWee's Big Adventure, The Double Life of Veronique, Vertigo, Showgirls, Do The Right Thing

Artists/Personas:

Grace Jones, Klaus Nomi, Muhammad Ali, Andy Kauffman, Carmelita Tropicana, Vaginal Creme Davis, Christeene, Hillary Clinton

Description

This seminar is a creative and practical environment designed to facilitate the completion of the student's thesis project. While much of the work will center around group critiques and discussions of the editing of each student's individual film, the class will also include discussions about sound design, sound mixing, post-production, festival/exhibition preparation and materials, and professional life after graduation.

Students will complete their thesis films and develop their skills in critical discussion and debate about creative work. They will move towards developing their own process as art makers through working on their own film and witnessing the completion of major works by their peers.

Students are to show work in the workshop AT LEAST twice. The course will be graded on attendance and participation; students are expected to be critical, active members of the workshop discussion. The course is predominantly a discussion among the students as makers; faculty are there to facilitate that discussion.

Description
Originality is every artist's aspiration--and often the greatest obstacle. In this course, working with self-originated material is strictly forbidden. Free from the pressure of creating something from nothing, students will instead discover how to apply their creativity through the process of making. Using a constraint-based approach, students will refine their skills in filmic interpretation, technical craftsmanship, creative problem-solving, and collaboration. They will work individually and in groups to challenge conventional notions of authorship, emphasizing interpretation, transformation, and invention. Students will make work based on a series of constraints, working within specific parameters, some set collectively by the group and some assigned by the instructor. Sources for the work will include non film materials, such as poetry, research, interviews, music, painting (etc) and/or be drawn from locations and objects. The workshop fosters a generative environment where students learn to see the creative process not as a solitary struggle but as an open playground for filmmaking. By embracing limitations as opportunities, students will engage with art as a game--one in which the artist defines the rules that shape the final work. Ultimately, this course encourages a critical distance between artist and artwork, reinforcing filmmaking's most essential function: casting a new perspective on the world around us.

Description

Course open to MFA1 Film Directing students only, by Permission of Instructor only.

This course is taught by core FDP faculty as a hands-on, exploratory introduction to narrative filmmaking. Over the semester, students move through five modular block sessions, each several weeks long. In each

block, they will complete a cinematic assignment, including a 52 second silent "Lumiere" film, a cinematic landscape project, an observation exercise, a collaborative narrative work, and the depiction of an event that provokes an emotional and visceral response. The final "block" is the completion of a 3-5 minute film, which each student prepares and completes independently. The course explores different methods and approaches towards making narrative work, positing the idea that process and form are inextricably linked. Its intention is to begin the dialogue about form focused on critique and exploration of the student's own voice, method and body of work.

Description
Narrative Structure and Form
Course open to MFA1 Film Directing students only, by Permission of Instructor only.

This course is an examination of narrative film structure and form. The course examines the construction of narrative works ranging from dramatic narrative to epic, episodic and anecdotal forms. These lectures will draw on the practical ideas introduced in your production classes, and ask you to interrogate your assumptions about construction of events in time, and the making of images and meaning. It is meant to question such basic assumptions as cinema and narrative, while developing an understanding of the material and language of both. Assignments will include analysis, writing and shooting assignments.

Description
This course is available by Permission of Instructor only on Advising Day.

The entire sky is a grand narrative filled with stories enacted by protagonists and antagonists portraying legendary tropes and mythologies. This course explores story structure through experiences of , and exposure to, the history of astronomy including how the constellations were named and placed in the heavens. Students will invent cinematic story ideas through the process of looking at the canvas of stars in the night sky. Additionally this process will examine the basic concepts of cinematography such as depth of field, lens perspectives, exposure and aesthetics of composition while gazing through a telescope or capturing nighttime images on field trips. A creative project is required for completion of the course. Field trips will be a regular part of the class programming.

Description
A filmmaker's foundation with technical theory and practice for post-production, required for all FFDP MFA 1. This is a practical course designed to take the student through the post-production process toward the completion of a finished work. This class is designed for students in the process of finishing their first year projects and will include group critique sessions. A wide range of topics covered include codecs, data management, best practices for Premiere, mastering, encoding for distribution as well as color theory and grading. Students will complete several small exercises to help practice and integrate material covered in class.

Students will be required to: complete their first year films, i.e., sound-designed, mixed(*optional, highly encouraged), color graded and submission materials authored, as well as participate fully in class critiques.

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description
This is a course aimed to deepen filmmakers' knowledge on the concepts and uses of the various elements of cinematography; both technical and conceptual. The class will focus on directorial decisions regarding framing, camera movement, depth of field, lighting styles and a variety of other formal choices concerning image-making and how they shape the discourse of each individual work. We will mainly work with digital cameras and formats with the objective of investigating their specificity. The class will also address the interconnectedness of pre-production, production and post-production in digital cinematography, and the ways in which our various uses of technology inform our aesthetics as makers. We will discuss set protocols and center our assignments on the creative advantages of working with limited resources. Finally, we will discuss different modes and models of production, and the ways that each implements and affects the development of concept, process, and politics.

Description
Course available by Permission of Instructor only.

This course will provide a foundation for working in a digital environment applied to filmmaking. The fundamentals of non-linear editing will be practiced, and editing theory will be discussed. Students will learn contemporary practices and technologies used in the post-production process of filmmaking, focusing on the "digital pipeline" from camera file ingesting, digital editing, to multi-venue delivery methods.

FFDP535 - Visual Design

General

Course Long Title
Visual Design

Subject Code Course Number
FFDP 535

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
This directing workshop draws on ideas and investigations about filmmaking that were introduced in first year, asking you to consider how concept relates to image and meaning. Our main task will be a hands-on investigation of visual strategies for narrative directing, specifically focused on the translation from concept to cinema. In a series of labs and workshops, students will experiment with text analysis, visual design, mise-en-scene, staging, composition, movement, angle, focal length, rhythm, continuity, coverage and most of all, visual meanings. Students will prepare a portfolio of visual designs for a series of scenes, and act as a key collaborator in the design, production and editing of one scene, to be shot in class.

Cinema Production Workshop

Subject Code Course Number
FFDP 578

School(s) Program(s)
School of Film/Video Film Directing

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
An introduction to cinema production techniques. This course integrates with Narrative Fundamentals; both are required of MFA 1 FDP students and are an essential part of their entering curriculum. Cinema Production Workshop focuses on the fundamental concepts of cinematography and film production within the context of small and highly collaborative crews. We will touch upon basic ideas of camera use, lighting, grip and gaffing demands, digital workflows, and production methodologies. The course will also discuss various modes and models of production, and the ways that each implements and affects the development of content, process, and politics. We will focus on practice through experimentation.

The objective of the class is to create a project based/personal methodology through technical aspects of cinematography. Filmmakers will be able to create a production discourse through content and form.

Symposium: Film Directing Program

Subject Code

FFDP

Course Number

600

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

0.5

Description

Symposium is designed for all levels of the FDP program; it is a common place for the entire student and faculty community to discuss the shifting landscape of making and thinking about narrative practice in film. It contemplates the breadth of methodologies taught in the program through interactions with visiting filmmakers and the faculty in focused discussion around their ways of conceiving, making, producing and distributing work.

Supplementing these conversations will be program-wide dialogues about the role of the maker, the politics of making, and the way that the recent constraints of the pandemic have altered ideas of making and exhibiting. In addition, as a multinational community of makers we hope to discuss how citizenship, race and identity affect our diverse and complex experiences and the systems we operate within.

The class is conceived as a community dialogue; while it will be facilitated by the faculty, students are equal co participants and expected to be part of developing this evolving dialogue.

Description

In this special topics course, students will have the opportunity to present, cook, and share their personal recipes with their peers in class. Although, this is not a traditional cooking class or a seminar focused on food in film. Rather, this exploration of the connection between food and cinema takes place within the broader context of art creation, filmmaking practices, and methodology. Specifically, the goal of this course is to use food as a starting point for reimagining cinema. We will challenge the conventional notion of the proximal senses, often given a humble role in tradition. This will serve as a platform to engage in a thoughtful discussion about why we create, and, for the purposes of this discussion, how the act of cooking and eating, as an aesthetic and multi-sensory experience, can prompt us to not only reconsider the ethics of food but also to rethink the very foundations of the cinematic experience on a broader scale. The course will examine the process of how a maker imagines, seeks and articulates a certain flavor in their imagemaking. The impetus for this course is to set up a "Filmmaker's Table" where participants come together to prepare and share a meal, while meditating on various aspects of their very own filmmaking process with PLEASURE.

Description

During this course we will run a writer's room, cast, rehearse, shoot and edit 8 episodes x 5min.

We will investigate how narrative sea-changes from the "elevator pitch" to "breaking story" in the writers room, then again during rehearsals, production, and finally in the cutting room.

This class will be intensive; students must be prepared to be fully present for the work.

Each student must prepare in advance an idea to pitch for the series. Everyone will contribute as writer, director, actor, cinematographer, editor.

Class is an advanced Film Directing class; MFA students outside School of FV should contact instructor for permission to ask to enroll. Writing and Production experience required.

Description

Screenwriting: NarrativeRumble-Eclectic
Approaches to Storytelling

This course is a series of eclectic, short term

(maximum 2 to 3 weeks) writing workshops taught by a rotation of different artists. The instructors use a variety of themes and prompt to spark adventurous storytelling. While the emphasis is cinema, the course will allow students to unleash their ideas in a variety of narrative expressions not limited to words, but perhaps drawn or photographed (still or moving images). Specific themes for each session are yet to be finalized but the following list offers a sense of the potential. Screaming in Your Dreams: The Horror, Suspense, Thriller Genre and its application to heightened emotional expression. Love, Hate and Other Stories: Mine the depth of human emotions by sitting in memories of heartbreak, passion or lust (real or imagined). Students will grapple with filial, paternal or maternal love, celebrity worship and many other forms of intense emotions. Threading Stories from Historical Dress and Fashion: Utilizing the forms of fashion silhouettes from a variety of eras, students will develop characters and their backstories or histories from the shapes of celebrated clothing and accessories. Cheap and Cheesy: By making "terrible" scripts, we learn what elements are needed to create emotionally true, sophisticated, or dynamically inventive ones. Students examine cheesy 1-hour movie of the week scripts, telenovelas and American Soap operas among other genre driven "product" in order to tease out personal, original work.

FFDP632 - Advanced Staging

General

Advanced Staging

Subject Code Course Number
FFDP 632

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

Course available by permission of instructor only. This workshop explores the aesthetics and methodologies of complex and non-traditional approaches to narrative staging. The class consists of in-class shoots that should expand the student's recent directing and shooting methods, several field trips beyond the studio, and hands-on experimentation with techniques such as off-screen space, layered and limited space, kinetic ensemble staging, the moving master, live locations, direct address, and use of multiple cameras. We will look specifically at issues of framing, composition, blocking, and in

particular, staging of the camera and the dramatic moment. Assignments include a small research project, in-class exercises, and a short work that reflects engagement in advanced staging techniques.

FFDP645 - Editing Aesthetics

General

Course Long Title
Editing Aesthetics

Subject Code	Course Number
FFDP	645

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Editing Aesthetics looks at the post-production process as an aesthetic practice. We examine different examples of picture and sound editing strategies and discuss their potential to produce meaning in film. Through analyzing different films and readings the class focuses on editing as a generative practice - a phase where films are created too. We discuss key concepts such as time, space, rhythm, structure, meaning, dialectics, sequencing, continuity, fragmentation, immersiveness, among others. Conversations about the history and politics of editing in film will be a crucial part of the class, as well as the ethics of representation on screen. Rather than workshoping a single project in the class, students will be asked to complete several editing assignments that will culminate in a final short film piece. This piece should investigate one or multiple editing techniques or theoretical approaches to editing sound and picture.

Description

What's So Funny?

Film Comedy: Aesthetic, Moral, and Political Dimensions.

Since the early days of cinema, comedy has been a constant shaping presence of the art form. Harnessing the prowess of jokes, and always in search of humorous outcomes, filmmakers have adopted and expanded on long standing comedic traditions: sketch comedy, screwball comedy, slapstick comedy, parody, satire, black humor, farce, among others. Performative figures such as the clown, the trickster or the joker have found new solace in film.

These are some of the key elements and modalities of comedy that will comprise the focus of this seminar. We will read some of the most influential theories and critical accounts in relation to humor and comedy, but our main focus will always fall back to the films selected for his class. We will watch and discuss a variety of film comedies, both in short and long form, covering a diverse set of references across different periods of time and transnational contexts. Our goal is to come as close as possible to the inner workings of a perennial art form, while paying close attention to the socio-historical contexts from which these works emerged. What are the stakes of comedy, socially, politically and ethically speaking?

Ambiguity, paradox and incongruity are often invoked and played out through comedy. The nonsensical, the absurd, and even the grotesque are comedy's currency, with the carnivalesque as one of its most transgressive modes. As such, comedy enriches our understanding of human complexities, and might even lead to radical transformation.

The course will be divided into two parts. First we will explore a variety of examples addressing the formal and socio-cultural elements of the artistic form (performance, verbal and visual gags, narrative structure, visual style, etc.), students are expected to cover assigned weekly readings and films and take part in in-class discussion analyzing these materials. Towards the second half of the semester we will aim at putting these features into practice; students will workshop their ideas aimed at producing and presenting short comedic pieces of their own.

Description

Heroics and Villainy: The Majesty of Good vs. Evil

This is a course that explores heroics & villainy in storytelling as filtered through cinematic tropes. It is a journey into the origins and creation of mythic archetypes that have populated narrative forms from primitive storytelling to the silver screen. The majesty of any hero is only as good as the villain that opposes him. And is the image of villain devoid of heroic impulse? Is a sympathetic villain the antithesis to the antihero? What characteristics form our notions of heroism? What has led a person to engage in villainy? Why do we romanticize the hero and vilify the villain? What is the difference between heroes & villains and protagonist & antagonist? Through lectures and discussions, examination of film clips and storytelling exercises, we will find our way to answering why strong drama is grounded in conflict, how tropes emerge from contemporary issues influencing the cinema of its time and discover cultural impulses that lead to celebration of these characters. Throughout the class scripted scenes will be used to diagnose and "act" the complex architecture of hero, villain. This will be a class geared to practical application by allowing students to enact the elements of heroism or villainy in scenes realized through some rehearsal, and through coursework culminating in either a 5 page script or short film, capturing each students personal version of heroism or villainy.

Additional course fees \$75.00

Description

This class will focus on stories of love as told on film; love is a word that means everything and nothing at all. Love is politic, desire, obsession, belief; it is a paradox, one that continually contradicts its expectations. The class will examine how one describes the indescribable, films unique ability to speak to the ineffable. Most of all, love is dynamic, and requires a description of the exchange between people. It is seen in the most unlikely of gestures and exchanges. The class will focus on the ways a filmmaker depicts the substance of human relations, and how one articulates such moments. It will also focus on the dynamics and politics of human interactions, and the exchange of love and sex, especially as depicted in film. The class will be small and seminar based; students will be responsible for presentations throughout, organized around discussion topics. Films watched and discussed will draw on both fiction and documentary work; screenings will be supplemented with reading and writing exercises throughout, as well as work from other mediums.

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

3

Description

Course available by permission of instructor only.

This course proposes a broad reading of the coming of age story, framing it not just as a specific moment of adolescent development, but as a narrative of personal transformation most often concerned with transgression and epiphany. Through an examination of classic, independent and avant-garde examples of this vast genre, we will investigate thematic questions of sex and sexuality, the body, spiritual awakening, ethics, race, gender, nationality and community, autobiography, anger and violence. We will also be concerned with a range of production issues that arise in the making of such films, such as working with child actors, staging sex scenes,

visual and dramatic treatments of rites of passage, and the presence of nostalgia and episodic structure in writing coming of age stories. Assignments include several short personal writings or cinematic essays, and either a one-hour seminar based on a germane topic or a substantial, relevant artistic work.

Credit Hours

Min Credit Hours:

2

Description

This class focuses on a non-traditional process to explore alternative, non-linear methods of cinema production; through filming, writing, editing, rehearsals and staging, each filmmaker will give themselves space to experiment and expand their projects while developing an individual process of making. The class will look at the way one can expand a film through an iterative process; assignments will include research, filming and writing meant to allow students to discover their projects through direct engagement with their materials, as well as help them assemble a process that best suits their work. It also looks at the way that documentary and narrative practices can speak to each other.

The aim of the class is for students to discover their own processes when producing their work and feel encouraged to challenge the conventional, linear mode of dramatic production. The class aims to help students search for the most congruent production method, visual language, sound aesthetic, and narrative structure that correlates with their content.

The course will incorporate screenings and discussions that present a variety of narrative and forms from filmmakers across the world. This course also centers its discussion on the idea of completion: when is a film a film? How does your work across time speak to your identity as a maker?

Min Credit Hours:

3

Description

This is a hybrid studio/discussion class focusing on experimental improvisation and non-traditional directing methods to create persona based performance. Some questions we will be asking: How does a performer create a persona out of their personal experience? What is the difference between persona and character? How do we "direct" ourselves as solo performers? What are ways to access different points of performative inspirational diamonds? How do we sift through the unnecessary sludge so that the necessary may speak? Is directing performing?

In class improvisation, assignments around persona, and improvisation will be accompanied of study of film/video and performance work as well as artists who work in persona.

In class film and video viewing and discussion of persona and directing:
Fires In the Mirror, PeeWee's Big Adventure, The Double Life of Veronique, Vertigo, Showgirls, Do The Right Thing

Artists/Personas:

Grace Jones, Klaus Nomi, Muhammad Ali, Andy Kauffman, Carmelita Tropicana, Vaginal Creme Davis, Christeene, Hillary Clinton

Description

This seminar is a creative and practical environment designed to facilitate the completion of the student's thesis project. While much of the work will center around group critiques and discussions of the editing of each student's individual film, the class will also include discussions about sound design, sound mixing,

post-production, festival/exhibition preparation and materials, and professional life after graduation.

Students will complete their thesis films and develop their skills in critical discussion and debate about creative work. They will move towards developing their own process as art makers through working on their own film and witnessing the completion of major works by their peers.

Students are to show work in the workshop AT LEAST twice. The course will be graded on attendance and participation; students are expected to be critical, active members of the workshop discussion. The course is predominantly a discussion among the students as makers; faculty are there to facilitate that discussion.

FPFV203 - Creative Cinematography

General

Course Long Title
Creative Cinematography

Subject Code	Course Number
FPFV	203

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This course is designed for students to explore cinematic language and the artistic possibilities of the moving image. Students will be evaluated on their mastery of core concepts of camera functions and image construction - including lighting, composition, focus and movement. The cameras used for class will be the Sony A7S and Canon XC15, however an emphasis on understanding universal concepts of depth of focus, light metering, lens choice and movement will be prioritized over camera-specific knowledge. The aim of the class is to understand how technical choices impact the interpretation of images, and to exercise intentional, artistic choices from behind the camera.

FPFV

Course Number

204

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

Course available by Permission of Instructor only. Students will learn the basics of 16mm film production and will gain access to Bolex and Arriflex film cameras as well. They will also learn the basics of light readings, exposure, and will be introduced to some of the hand-made potentials of emulsion based filmmaking and direct film techniques. The class will include telecine and some phases of post-production. Each student will shoot 100' of film and complete a one-minute project with a digital finish. In this way students will become familiar with analog film equipment and techniques and how they are integrated into the digital workflow. Students will also collaborate on a class 16mm synch-sound film which will also finish on digital. Some lab time is required. Required of all PPFV BFA 2s.

Registration Restrictions

Credit Hours

Min Credit Hours:

2

Description

In this course, you will learn the 16mm editorial process from cutting on a flatbed viewer to finishing an answer print. You will shoot a two minute film or expand on your one-minute film from the fall semester. The course will be taken

concurrently with Editing on Avid, emphasizing a hybrid approach to finishing a film print, working between analogue and digital formats. You will also be simultaneously enrolled in the Post-Production Sound class, where you'll design a soundtrack for your one-minute film using Protools. At the end of the course, we will create a composite film print using your picture and soundtrack elements generated throughout the semester.

Description

TOGETHER AT LAST is designed for students who took FPFV203/503 Cinematography, FPFV134/534 Digital Editing and FPFV285/585 Production Sound remotely during the pandemic. The course will go over essential hands-on skills and introduce students to campus facilities and equipment that were not available during our remote year. This will include the shooting studios, editing suites and a variety of equipment. Team taught by three faculty members, the students will work in small crews to produce a short remake that will include shooting in the studios and on location and give students the opportunity to each edit their own version of the collaborative film.

Color Correction and Grading

Subject Code

FPFV

Course Number

220

School(s)

School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This is a practice based workshop class designed to introduce students to the manipulation of color in digital video. We will approach color correction and grading in through hands on experience with the understanding that the concepts behind the theory and technology of color are most useful and comprehensible through their application in filmmaking. Primarily using the tools in DaVinci Resolve, and with reference to cinematic examples, we will explore technical and theoretical fundamentals, differences between color correction and color grading, working with documentary and narrative, video and film, live action and animation, and explore common and advanced problems, considerations, and techniques in the color process. This course will include a variety of short assignments and two longer color grading projects. No prior experience with DaVinci Resolve is necessary, however students must already know the fundamentals of editing and cinematography. Additional seats are available on class sign up day.

Each student will require an external harddrive - recommended with a speed of 7200RPM (or SSD) and at least 1TB (~\$70-\$200).

General

Course Long Title
Composing in Space

Subject Code Course Number
PPFV 246

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This cinematography class is focused on solidifying the knowledge of students who have a foundation in cinematography by looking at and working with specific aspect ratios, textures and camera movements. The students will analyze and practice different techniques in film examples and then work on blocking scenes for different formats like academy, cinemascope or small screen. Throughout the class, the students will learn (using 16 mm film and digital RED cameras) to work with different lenses, and creative use of look up tables (LUTs). The students will also practice working on combining different camera formats, depending on the needs in a project for

documentary, narrative, experimental or installation projects. Because cinematography can't be separated from the essential work of lighting, we will analyze lightning practices in original locations looking at different light sources and techniques (e.g. controlling saturation, exposure, contrast ratios, and texture for fictional and documentary scenes). The class will be led through in-class lectures and hands-on demonstrations.

FPFV302 - Cinematic Lighting

General

Course Long Title
Cinematic Lighting

Subject Code Course Number
FPFV 302

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
A workshop that will look at essential working elements of lighting for motion pictures. Starting by analyzing different lighting styles in film history, this course will then cover a range of lighting practices in original locations and in studio, looking at different light sources and techniques. The student will be guided through the conceptual process of designing a lighting plan, selecting units and rigs for single and multi-camera shoots. Through a series of in-class lectures, workshops, and practical lighting assignments, the student will gain a strong working knowledge of specific aesthetics with variables in controlling the various properties of light (direction, exposure, color, saturation, contrast ratios, and texture). Special emphasis is placed on lighting for story and emotional impact, with a focus on Genre and Period lighting.

FPFV303 - Looking at the Sky

General

Course Long Title
Looking at the Sky

Subject Code Course Number
FPFV 303

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Urbanization and its overabundance of artificial light has left us blind to the wonders of the night sky, something our ancestors both took for granted and were profoundly influenced by. This course aims at regaining that awareness.

The entire sky then becomes a grand narrative filled with stories enacted by protagonists and antagonists portraying legendary tropes and mythologies. The

course explores story structure through exposure to the history and practice of astronomy including how the constellations were named and placed in the heavens as well as the basic scientific models and theories that underpin modern astronomy. Students will invent cinematic story ideas through the process of looking at the canvas of stars in the night sky. Additionally, this process will examine the basic concepts of cinematography such as depth of field, lens perspectives, exposure and aesthetics of composition while gazing through a telescope or capturing nighttime images on field trips employing the basics of astrophotography and astrovideography. A creative project is required for completion of the course. Field trips will be a regular part of the class programming. The primary focus of the course will be observational and experiential.

FPFV306 - Bad Sound: Non-Traditional Ways

General

Course Long Title
Bad Sound: Non-Traditional Ways

Subject Code Course Number
FPFV 306

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Bad Sound: Non-Traditional Ways to Create Sounds for Images

Erasing notions of hi-fidelity sound, this class acknowledges that the right sound for a film might be the result of an aleatory accident, ill-conceived experiment or unpolished performance. As such we will explore DIY and open source tools for making, recording and manipulating sound for image. Spanning both digital and analog domains students will engage to cannibalize free sound libraries, resuscitate (and reimagine) obsolete media, misuse recording equipment, improvise musical instruments, as well as lightly bend/hack circuits and software.

FPFV307 - Adv Creative Cinematography

General

Course Long Title
Adv Creative Cinematography

Subject Code Course Number
FPFV 307

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

In this workshop class we expand your knowledge from the fundamentals of cinematography, toward harnessing the technical tools of the craft for creating impactful images in advanced productions, while strengthening your unique voice as an artist. You will gain fluency working with RED cameras and introduced to other professional Digital Cine cameras while creating work collaboratively. We will explore aesthetic and blocking concepts working with specific formats, optics, textures and camera movements, and refine lighting techniques. Projects you shoot inside and outside the class will hone your understanding of the cinematographer's role from pre-production through post, including the creative use of look up tables (LUTs) and color grading. Practical work includes designing dynamic blocking and camera moves, shooting with multiple cameras and on-set DIT look management. Visits to vendors (and possible rental of ARRI Alexa and high-end optics for in-class shoots) will extend our knowledge beyond the technical realm of CalArts.

Prerequisites: FPFV-246 Intermediate Cinematography, and a solid understanding of exposure, fundamentals of lighting, grip and electric, and safety on set

Registration Restrictions

Course Long Title
Opening the Film & Video Vault

Subject Code	Course Number
FPFV	320

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This is an intensive film and video viewing course focusing on major works from the history of avant-garde, or experimental, film. The majority of titles will be selected from CalArts' film and video archive, including special film prints that have not been or rarely have been shown on campus. We will watch several long-form films and videos that depend on extended duration and sustained concentration, but important short work will also be shown. If possible, additional titles will be rented to extend an appreciation of an filmmaker's work or milieu. Artists being considered include Vito Acconci, Chantal Akerman, Thom Andersen, Stan Brakhage, Betzy Bromberg, Charles Burnett, Nathaniel Dorksy, Kevin Jerome Everson, Hollis Frampton, Su Friedrich, Ken Jacobs, Kurt Kren, Gunvor Nelson, Carolee Schneemann, Harry Smith, Michael Snow, Phil Solomon, Joyce Wieland and Frederick Wiseman. Students will be asked to keep a weekly journal and write one seven-page paper.

Course Long Title
Moving Image and Creative Curating

Subject Code	Course Number
FPFV	330

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This is a course on curating film, video, performance and installation; how creative programming can integrate and amplify individual works within larger contexts and help build

communities for the experience and appreciation of this kind of art.

The course is only available by permission of instructor.

Students will explore and discuss the practice of curating moving image art works, either within a theatrical, gallery or other public setting.

We will explore the concept and practice of exhibiting (or sharing) film, video and other projectable media in all kinds of settings as this has been done over the past century as well as in the myriad ways moving imagery is part of contemporary culture.

Students will be asked to write a research paper and curate a program for the class. In addition to gaining knowledge and first-hand experience in curating, they will learn to publicize an event, prepare program notes and present programs to audiences.

General

Course Long Title
Writing About Film

Subject Code	Course Number
FPFV	405

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

Course available by Permission of Instructor only.

The class will teach students how to write about film (as well as video and other media using the moving image) in a variety of forms, genres, and contexts: writing about one's work, about the work of peers, reviews of films seen in commercial theater, critical essays, academic papers, filmmaker's interviews, press releases, grant proposals etc.

Examples of writing about film will be handed out and discussed. Sequences of classical, contemporary, foreign and experimental film and videos will be screened in class and analyzed using the proper descriptive and critical vocabulary. Major critical approaches to film and video will also be discussed. In addition each student is expected to complete a full-length critical essay on a topic decided after discussion with the instructor. Through-out the semester students will bring samples of their writing in class and will get feedback from the instructor and from their peers.

* Open to the Institute but you must have completed a minimum of one short film or video (under 30 minutes) to be eligible.

*Priority given to Film/Video students.

Subject Code	Course Number
FPFV	410A

School(s)	Program(s)
School of Film/Video	Film and Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
This project-based class will investigate a wide range of themes and possibilities suggested by the particularities of our hyper-connected world in relation to documentary production, including, but not limited to identity, virtuality, privacy, security, fragility, collaboration and storytelling. Our lived reality is deeply entangled in experiences had through images on screens, and the line between what happens on and off the screen has become increasingly blurred. As our world feels more and more like both a video game and a reality television show, can we analyze the effects that these online environments have on our movements in physical space, our notions of reality, and our mental wellbeing? We will look critically at a variety of apps and platforms and work both with and against them to

engage with the formal, aesthetic, political, social and economic issues that they suggest. We will study a wide range of artists' responses to these phenomenon and students will create individual projects designed to bring these issues into sharper focus.

FPFV411 - Memories, Dreamscapes, and the Archive

Memories, Dreamscapes, and the Archive

Subject Code	Course Number
FPFV	411

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This course will explore the intimate use of memories and dreamscapes within the art of moving images to employ radical re-examinations of identity, culture, and history. We will analyze experimental methods used to decolonize the archive within film and video, serving as a medium for constructing, deconstructing, and reconstructing individual and collective realities. Often blurring the line between truth and fiction, our selection of boundary-pushing films and videos poses the question of what is real and imagined, where the dream begins and ends, and who has the right to dictate one's truth. While the course is rooted in a Black feminist framework, a range of films are viewed and considered through the lens of gender and sexuality, collective memory, and alternative histories. This seminar will guide us on a multidimensional journey and excavation that redefines, shifts and challenges traditional narrative forms and archival practices.

Description
Shadowlands: Haunted Media, Spectral images

From the beginning, film and photography have been characterized by their ability to record the world as it appears - and yet coincidentally spurred a fascination with unseen worlds, even seeming to offer proof of them. In this class we will examine the technical and aesthetic entanglement of the cinematic and the uncanny. Through in-class

workshops in 16mm, screenings, readings and performances we shall investigate the aesthetics of mysterious terrain where the familiar becomes unfamiliar, and vice versa.

The class is structured around five topics of inquiry: Shadows, Manifestations, Exorcisms, Second Sight, and Specters. A week devoted to aesthetics, readings, discussion and screenings will alternate with a week devoted to workshop investigations.

Students will be required to make five short projects which may take the form of films, photographs, performances, constructions or texts.

Description
In this course, students will learn editing techniques and methodology using Avid Media Composer through lectures and hands on exercises. Topics will include: media organization, ingesting, transcoding, three point editing, trimming, sound editing, working with effects, color correction, titles, output, compression, and delivery, as well as techniques specific to digital to 16mm workflow, such as creating handles and pull lists. In addition, editing theory, history, and aesthetics will be covered. This class provides students with the knowledge to edit 16mm footage from a telecine in Avid and then go back to a 16mm film print. Students who are interested in taking Finishing on 16mm film may take this class before or at the same time as Finishing on 16mm. However, students who seek a basic introduction to Avid but are not working on 16mm are welcome in the class. Students must have an external hard drive.

Description
Family portraits, letters, home-videos, notes, diaries, and small objects and accessories are often key to tracing hidden secrets and desires within one’s own family. Beyond this, by examining family archives we can gain a deeper understanding of regional and national histories. This seminar pays attention to filmmakers from different latitudes whose work draws from family archives—or, at times, found archives. Considering Lourdes Portillo, Natalia Almada, Naomi Kawase, Sergio Oksman, Joao Moreira Salles, Chantal Akerman, Karim Anouz, and Juan Carlos Sulfo, to mention but a few, we will explore how their use of archival materials pushes them to experiment with the documentary form. In this interdisciplinary course, we will also examine the ways in which their use of family archives not only shapes the stories they tell, but constitutes them as persons and artists. Finally, we will delve into the porous quality of personal histories and how they permeate into other, larger political narratives. Students will keep a journal on weekly discussions and produce a paper or short cinematic piece that reflects that topics discussed in class.

Description
This course examines influential women and non-binary filmmakers who advocate for experimental forms in their moving image work and writing. We will focus primarily on a non-narrative avant-garde and on artists that argue for the importance of form, the embodied and sensual depiction of experience, or a subversion of a normative politics of representation. Beginning with Germaine Dulac, the 1920s feminist surrealist who was an important advocate for the avant-garde, we will look at films and writings by/about some of the major figures including Maya Deren, Joyce Wieland, Barbara Hammer, Chick Strand, Rose Lowder. In the last third of the class we will look at recent makers who might

include Cauleen Smith, Hito Steyerl, Ja'Tovia Gary, Dani and Sheila ReStack. We will collectively reflect on the role of the avant-garde in the past and present and ask whether a non-narrative avant-garde can still play an important political and ideological role.

This course is to provide Graduate Students with an opportunity to gain valuable teaching experience. Each student will prepare a two-hour teaching presentation and each week a different student will perform/teach their presentation. The course will pursue both innovative and creative ways of disseminating information and ideas. Students will be encouraged to consider the research they are currently undertaking for their thesis projects, but presentations will not only be limited to such research. Research in general is an essential element of this course. The demands for research and alternatives will be extensive. The final hour of each class will be used for general group critique of the teaching and presentation techniques. Graduate students only.

Description

This class will explore the aesthetic and political openings provided by incorporating multiple languages in film and moving image media. While the use of different spoken languages and dialects will be the starting point, the class will also encompass broader notions, like cinematic languages (classical narrative, modernist, documentary, avant-garde) and other practices we may explore (music, body language, computer code, etc.).

If language is the most common way in which we engage with the world and describe it, then using multiple languages may expand our experience of it and question our basic assumptions. Through this inquiry, the students will build a more perceptive and involved practice and understanding of cinematic form and practice.

These ideas will be approached through screenings, lectures/discussions, exercises and critique, with an emphasis on how this interrogation of language can take different forms and potentially inform the students' artistic practice. Students will make a final project or write a critical paper engaging with the course's themes.

Description

This class is an in-depth study of movement and composition through both sound and image. The potential for movement is one of the main distinguishing features of time-based practices, perhaps most of all in filmmaking. To explore this we will consider the way movement is perceived through the senses and encourage creative uses of camera movement, sound and blocking through class exercises and assignments. In workshops you will be introduced to various production techniques and equipment related to camera movement and sound. The class will also have a screening and discussion component, where student projects and a diverse range of audio-visual pieces will be viewed and discussed. Areas covered will include movement and perception, embodied camera, choreographed camera movement, movement and sound, movement and machine, movement and architecture.

Description

The 'I' is the moment of failure in every narrative effort to give an account of oneself. - Judith Butler

We now see subjectivities and truths as plural not only among subjects, but within a given subject, the self that is divided, and even in part unknown to itself. - Maureen Turim

Who and what is the "I" that claims to see and speak through constructed images in first-person films? Is "I" one or multiple, an authentic 'performance' or a simulated projection, an entrenched monologue or an active dialogue? Is this "I" best expressed literally or figuratively; verbally or visually; through exposition or through lyrical association and juxtaposition?

This course examines the theory and practice of first-person filmmaking in both historical and contemporary practice. Beginning with a

theoretical examination of the first-person filmmaking that flourished starting in the late 1960s (mostly white and male) and was reignited by women and minority makers the 1980s and '90s, the latter half of the course will focus on films from 2010s and 20s emerging from this tradition. We will examine a variety of films in which the filmmaker leaves or interrogates their corporeal trace on the medium, whether through embodied presence, personified voice, or gestural camera movements. First-person films raise a number of issues about 'voice' in film; about the nature and performance of 'self;' about the desire to be seen and to authentically see; and about the power and politics of representation. From the naïve to the self-reflexive or strategic "I," and with poetic or political intention, first-person cinema offers a range of affective potential and epistemological complexity. Acknowledging the position from which they speak, or interrogating conventional boundaries between private and public, first-person filmmakers frequently reflect on the filmmaking process to explore strategies of representation and to acknowledge the labor that comprises their process.

We will look at a broad selection of work that is geographically, politically, ethnically and gender-diverse. Students will be responsible for researching the work of given filmmakers and presenting to the class so as to expand our range over the fourteen weeks of the semester. Filmmakers examined include Jon Jost, Kazuo Hara, Marlon Riggs, Marlon Fuentes, Marilu Mallet, and well as many working in the short form. Recent films of the last five years include work by Khalik Allah, Carolina Moscosa, Madsen Minax, Jason Lord, and Jean-Baptiste de Laubier (contemporary filmmakers may shift depending on class interests and knowledge).

Credit Hours

Min Credit Hours:
2

Description

Course available by permission of instructor only.

The objectives of this course are to learn how to work with the moving image and sound in the form of video installation. We will focus on creating understanding through intentional relations between content, space and scale. We will contemplate the essential component of video (time), the definitive condition of installation (space), and how to work with them to create kinesthetic insight: understanding on the level of the body. Beginning with an overview of the unique properties of video/film installation, the projected image, and multi-channel works, we will study how framing and duration contribute to the form and experience of the installation. There are screenings and assigned readings with written responses. Each student will produce and exhibit one video installation which they will work on for the majority of the semester. Each student will have one individual meeting. Students will be given substantial time to present content and ideas, pose questions, and receive thoughtful feedback.

*Students with a current project in mind are encouraged to enroll.

Open to Institute with priority given to Film Students.

Description

Of course, the politique des auteurs is the application to the cinema of a notion that is widely accepted in the individual arts. -André Bazin, 1957

Coined as an expression in English by critic Andrew Sarris in the 1960s, "Auteur Theory" and auteur studies have been alternately defended, qualified or reviled in cinema studies. Sarris based his term on the "politique des auteurs" that emerged from the writings of French film theorists Alexandre Astruc, André Bazin and filmmaker Francois Truffaut in the 1950s and which foregrounded the centrality of the director-as-auteur in defining a film's visual style and thematic concerns. At that time, both American and French auteurist approaches were largely analyses by male critics and theorists about male directors working in Euro-American cinematic traditions.

In this course on Autrice Studies we playfully deploy the feminine version of the French term 'auteur' to interrogate auteur theory in the context of women artists and directors. Here we will examine how and why cinema studies from the 1970s on challenged an auteurist approach - from genre-based, psychoanalytic/feminist and ideological perspectives. At the same time as we interrogate whether a version of "autrice" studies can be useful for exploring the work of women filmmakers and moving image artists today, we will consider whether or how gender is an important aspect of such study. Is there, as some have claimed, a feminine or feminist "écriture" that extends to visual work? Or does such an approach simply perpetuate reductive binaries and have limited strategic value?

As part of our theoretical interrogation, we will select two or three women artists of different generations (for example Chantal Akerman, Shirin Neshat, or Ja'Tovia Gary) to do an in-depth study of their work and the (auteurist or not) critical analyses written about them. The last third of the semester will consist of students doing in-depth research on a filmmaker or moving image

artist of their choosing. Possibilities abound, including feature, documentary and experimental filmmakers such as Andrea Arnold, Kathryn Bigelow, Catherine Breillat, Jane Campion, Claire Denis, Cheryl Dunye, Ava Duvernay, Kitty Green, Lucretia Martel, Nina Menkes, Sally Potter, Kelly Reichardt, Trinh T. Minh-ha, Athina Rachel Tsangari, Li Yu. Final projects will be an article or video essay that can be submitted to a journal.

Description

This course offers filmmakers an introduction to color correction and grading for digital footage, using Davinci Resolve as the primary tool. Students will learn foundational concepts in color science and theory, engaging in activities such as image evaluation, contrast and color adjustments, secondary corrections, creating visual styles ("looks"), and shot matching. The curriculum also covers working with modern high-resolution camera files--including 4K RAW, Log, and DNG formats--and explores workflows for acquisition and integration with editing software.

Through screenings, readings, and discussions, the class examines the history and impact of cinematic color. Students have the opportunity to become a "DaVinci Resolve Certified User" or "DaVinci Resolve Certified Colorist" by taking the optional Blackmagic Design certification exam. The course is designed to equip you with the necessary color grading skills to complete your film projects. Participants will work on their own projects as well as examples provided by the instructor.

Enrollment is limited to 14 students. Preference is given to upper-level PFV students, but others are welcome to enroll.

"We spend a long time thinking about how to create an image where the image refuses the expectations or refuses the pleasures of what an image is. And I think that's partly the essayistic. To me, the essayistic is not about a particular generic fascination for voiceover or montage, the essayistic is dissatisfaction, it's discontent with the duties of an image and the obligations of a sound." --Kodwo Eshun, The Otolith Group

This production class will explore the essay ~film. Film critic Alexandre Astruc created the term camera-stylo in 1948 to suggest a new means of writing through cinema in which the camera would serve as a pen, creating arguments, meditations and inquiries. Essay films are neither straight documentaries nor fictional narratives but are usually a hybrid of different

forms. This class will include screenings, readings and lively discussion. Students will produce three short videos over the course to the semester in response to directives provided by the instructor. Priority give to MFA students and upper level undergraduates.

Description

The Feminist Moving Image Across Discipline is a new course that will consider work across disciplines of several women and feminist filmmakers and moving-image practitioners, covering a wide range of practices and forms-film-editing, diary-writing, experimental documentary, art installation, figurative painting, critical scholarship, screenplay, short story, dance and theatrical performance, and narrative cinema, to name a few-from the 1920s to the present day.

When grounded in filmmaking, can a political vision be found in the interdisciplinary artist who moves from form to form? What common threads can be found in these geographically and historically disparate figures' strategies of archival collage, reappearance, repetition, dislocation, wandering, staging, and reenactment? We will also periodically return to questions around the boundaries of artistry and language: How is "women" still a demanding category, today? How does an artistic medium become a "discipline"? Is activism a medium an artist could move into? Is acting a form, like painting, that an artist could reject? And we will also look for connections in intertexts, reading excerpts from socialist Flora Tristan's diary, as referenced in Claudia von Alemann's *Blind Spot* (1981), for instance; or Etel Adnan's poetry and writing, which served as inspiration for filmmaker Jocelyne Saab's Beirut trilogy.

Other practitioners we may look at include Esfir Shub, Maya Deren, Madeline Anderson, Marguerite Duras, Marjorie Keller, Assia Djebar, Zeinabu irene Davis, Alanis Obomsawin, Chantal Akerman, Joyce Wieland, Barbara Loden, Yvonne Rainer, Kathleen Collins, Maria Lassnig, Theresa Hak Kyung Cha, Trinh T. Minh-ha, Qiu Miaojin, Cecilia Vicuña; and more contemporary makers like Moyra Davey, Larissa Sansour, Iva Radivojevic, Sílvia das Fadas, and Steffani Jemison (or others to be determined). Guest speakers will help us make embodied connections to contemporary practice, and we may also make one or two visits to off-campus venues to watch films relevant to our conversations.

Description

This class is a workshop extension of FPFV-442-01/642-01, Radicalizing Sound and Image. In a smaller workshop setting and with the aim of making a radically innovative final film project, students will explore and research experimental work made in mediums other than their own, i.e. music, photography, painting, literature, poetry. Students will be encouraged to discover parallel inspirations, illuminating ideas, unexpected roadmaps and innovative methodologies by examining artworks other than film. They will be urged to explore and identify unconventional structures and alternative approaches to both form and content in

order to discover different strategies for making their own radical moving image work. To begin, students will be assigned research projects that they will present to the class. As the semester progresses, students will develop their ideas with the aim of completing a film (or at least having one well on its way) by the end of the semester. Works in progress will be critiqued. Graduate students may use this class to further develop their thesis projects. There will be required readings. It is recommended, but not required, that students have either previously taken FPFV-442-01/642-01 or are concurrently enrolled.

Description

Adaptation is the process of change by which an organism becomes better suited to its environment. It is coincidentally, the term used to describe the process by which one art form - traditionally the written word - is modified and transformed into a play, a movie or a film. Moving image works can in turn be adapted to other media forms. Through workshops and case studies this class will explore the complex journey of ideas inspired by texts, stories, biographies, images and objects, as they are reshaped from one medium to another.

The class will commence with a series of exercises to generate ideas and methodologies. Short assignments will be supplemented with screenings, readings and analysis. In the second half of the semester students will apply the techniques learned to create unique and individual works. The final project may take the form of a text, a moving image work, an object, or a performance.

This class is designed for the student who is ready to experiment, take risks and playfully engage with the process of adaptation.

FPFV458 - A Practical Theory of Art Making**General****Course Long Title**

A Practical Theory of Art Making

Subject Code	Course Number
FPFV	458

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours**Min Credit Hours:**

2

Description

A discussion course that will end with a manifesto on art making written by the class. Topics will include finding and developing ideas, structuring work, choosing the right medium, the personal becoming universal, integrity, and political and social models. Students will be encouraged to make work that'll help define the manifesto.

FPFV459 - Participatory Filmmaking**General****Course Long Title**

Participatory Filmmaking

Subject Code

FPFV

Course Number

459

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

2

Description

This course will explore filmmaking practices which rely upon and are motivated by long-term community involvement and activism. Students will watch films and engage with contemporary fiction and non-fiction filmmakers in conversations around social impact, ethics and representation. Many of the films will incorporate participatory elements of shared authorship by veteran filmmakers and first-time filmmakers. As we examine these films, students will also be required to conduct field research with a community partner throughout the semester. Research can be in the form of social activism, mentoring, volunteering, or some other form of direct action and/or active dialogue. Students will be provided a list of local organizations and nonprofits as potential collaborators.

FPFV460 - Shooting Landscapes**General****Course Long Title**

Shooting Landscapes

FPFV	461

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

3

Description

Metacinematic gestures have been present since the earliest years of film. Like metafiction in literature, metacinema refers to films that make the audience aware of the filmmaking or viewing processes. Such films interrogate the medium and its history by rendering visible production practices, referencing the history and culture of cinema, or breaking conventions that encourage us to uncritically accept a film's diegetic world. Metacinema can be found in comedy, horror, musicals, socio-political films, experimental films, and documentary. First-person diary films are often inherently metacinematic as are essay films and video essays.

This seminar explores metacinema in various guises, genres, and geo-political contexts - from fiction and documentary features to experimental films, from feminist and Brechtian counter-cinemas to Iranian international festival favorites. We focus on films that have critical and political aims and that problematize or illuminate the paradoxes of cinematic representation. Works by Robert Frank, William Greaves, Jon Jost, Laura Mulvey and Peter Wollen, Abbas Kiarostami, Kitty Green, Joanna Hogg will be included as well as a number of experimental shorts. The class assumes some knowledge of film theory; readings will be provided for those who need them. Weekly reading, short papers and monthly presentations are required, but final projects can be in writing, film, performance or digital media.

Description

Advanced Narrative Production and directing the Camera Workshop

Advanced Narrative Production (producing the 4 minute film, one day shoot) students will be placed into 2 teams of 6 and rotate production roles: director, assistant director, cinematographer, gaffer, and sound mix-boom operator. The class is divided into 3 parts: Pre-production, Production, and Post- Production. During the first 3 weeks students must complete their scripts and produce their films. During the lab period, students will engage in intensive production of coverage so as to prepare them for some of the problematic areas of camera coverage they may encounter on set. Students will learn set protocol and learn each position. Directors will have an opportunity to hone their directing and directing the camera skills. When in the director position, students will prepare a production dossier (including cast, location, directing notes, script breakdown, floor plans and shot list, and storyboards, director's tech scout with DP, and design), produce and cast their own films, complete a tech scout, and shoot their film. After a shoot, the class reconvenes to give a written assessment of their performance. The goal of this class is collaboration as well as building confidence in set protocol and skillfully and efficiently thinking on one's feet in order to achieve the impossible in a short shoot. Students are assigned randomly to their groups and have a chance to gain production experience in each role. Students are encouraged to focus on the role they are in while they are in that role.

Description

WHERE DOES GRIEF GO?

A brief glimpse of beauty, / A daydream of wayward lives and / extraordinary experiments / A taste of memory in the flesh.

The voice of Andre 3000 will be our guide as he sings a mournful dirge for his parents and we consider the following question: What happens at the intersection between theory, criticism, and poetry? The melancholic strum of Alice Coltrane's harp and Magdalene Odundo's sublime ceramic sculptures will draw us forward and backward. The

tenor of Christina Sharpe's voice will anchor us as she tactfully considers if a photograph is a vessel. "What is or should or could a vessel be in times of refusal and resistance?" As Andre 3000 hums, we'll be swept into what Kamau Brathwaite calls the "psychic night", an infinite vista where language and fantasy coalesce into a familiar memorial expanse. There are multiple ends of the world depicted here, as well as multiple beginnings. Where do these moments reside and how will they transform over time? The class is a testament to life's banal impressions and nostalgic echoes, to love's chaotic pendulum, and death's immersive blueness, to cosmic, lived, and imaginary experiences; to "all breeds of knowledge" as Rickey Laurentiss so tenderly put it. The real phenomena of loss is both the inventory of what no longer exists and the impossible measure of what survives.

The course will explore the boundaries of experimental storytelling and the possibilities of language by surfing between poetic and theoretical modalities, articulated by Denise Ferreira Da Silva as "different yet inseparable fields of personal expression." Each week we'll study a different network of ideas by which convention has been re-ordered through expressive (and often defiant) approaches to form, style, rhythm, and delivery. During the semester students will be encouraged to reflect on their relationship to these forms of writing, discuss ideas with the class, and craft their own myths, essays, and songs. Assignments include regular writing in response to course materials, a critical review and/or presentation of a related artwork, proposal for an experiment/artistic project related to central course concepts.

Description
Aliens On Screen: Cosmopolitics and Extraterrestrials in Sci-Fi Cinema.

Aliens loom large on the horizon of our imagination. In culture, aliens manifest in multimedial forms: TV shows, video games, comic books, literature, and of course films. Although

aliens seem as common and as regular a presence as the celestial bodies of the Solar System, they still inspire a sense of awe and mystery like few other figures in popular culture. Whether imbued with a sense of cosmic horror, or representing a chance for earthlings to leapfrog as a species, the trajectories that aliens follow onscreen tend to gravitate towards an amplified field of human passions and emotions.

This class proposes a critical reflection on what aliens onscreen represent for the present, past, and future of the human species. Following philosopher Peter Szendy's notion of cosmopolitics, we will unravel the convoluted relations that weave together extraterrestrials and the ontology of the human condition, as depicted in these movies, while further complicating them beyond national, global, and geocentric narratives.

From the humanoid-insect-like Selenite in Georges Méliès A Trip to the Moon (1902), all the way to the multi-species populated galaxy portrayed in Men in Black: International (2019), aliens perform a critical role in shaping humanity's attitudes towards its place in the universe. Most often these films convey incisive questions about personal identity; shine sharp critiques on power dynamics; and shape the ways in which to envision possible forms of social organization.

This class will do a concise but thorough revision of some of the most influential films in the history of this sub-genre, while paying close attention to lesser known productions from the transnational arena. Come join the flight onto a cinematic exploration out-of-this-world!

Description
"Media are our infrastructures of being, the habitats and materials through which we act and are..."At some level, expression and existence merge.: (John Durham Peters, The Marvelous Clouds).

In this course students will plumb the reaches of their own archive of collected

material (photography, text, film and video), creating works that encourage a heightened awareness of the means through which we absorb and share expressions of ourselves and our world. Engaging with a wide range of forms (collage, writing, photography, drawing, collecting) this course explores how cultivating creative and personal practices outside of filmmaking can both enrich and relieve the cinematic imagination. In workshop settings, we look at what happens as hand speaks to eye, and how such primary gestures have evolved into a fugitive complex of remote cause and effect. Through screenings, readings, discussion and in-class collaborative exercises, we will consider the notions of speculative representations, media as self-portraiture, and forms that both trouble and harmonize inner and outer worlds. Students will complete a fully realized work at the course conclusion.

Constructing Alternative Realities

Subject Code	Course Number
FPFV	468

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Constructing Alternative Realities is a class that will begin by studying composition and characteristics of the film frame. How do time, space, rhythm, movement and sound contribute as key constituents? In this regard, the class will be a study in visual literacy. All films and videos construct alternative realities, but this class will concentrate on creating realities other than the physical world we know and inhabit. The emphasis, instead, will be on the portrayal of other dimensions: memory, trance, the mirror, illusion, the dreamscape, the hallucinatory, the haptic, the window. How can one create moving images that speak of other planes? What is abstraction? How does one create immersive screen experiences which are convincing, evocative, mysterious and strange?

Students will be asked to present analysis of film frames and scenes to identify key visual and aural components. There will be short assignments to shoot various types of images. In addition, students will be required to make a film that contains an alternative reality as a key element. The class is both a study in composition as well as a workshop/seminar in exploring ways to create alternative visions.

Description
FPFV- The starting point of this discipline is the intention to create a working screenwriting practice dictated by the needs of each story being told and that rejects the "one size fits all" formulaic school of screenwriting. There is no magic bullet (or formula), but there is an enlightening, fun and fulfilling way to tease the story into being and into filmic form and that is the practice this class cultivates. Each story has its own unique organic flow and the instructor will guide the student in discovering it. The class takes a two-pronged approach to screenwriting and structuring both fictional & documentary stories utilizing the construction of a solid narrative combined with the creation of compelling characters who propel the narrative forward. The class is not a lecture class, it is primarily a workshop - the practice is created by writing, not talking about writing. The student will receive highly individualized instruction in a group setting. With the guidance of the instructor and open class discussion, each student will write a first- draft feature-length screenplay over the course of the semester (or more, if the student takes the class again). With discipline, the writer can finish a completed screenplay. Writing begins immediately. Additionally, we will explore what makes movies work (or not) by viewing and analyzing films that are examples of great or not-so-great screenwriting. Priority given to upper level PFV students, but those who feel strongly called to the discipline of screenwriting can make a case for early entry.

Description

Alternative Screenwriting for Short Films and Documentaries

In the first part of the course we will analyze different short films ("An Andalusian Dog", "Blackrider", "At Land", "The Street and the Ball") and their original screenplays discovering how the scripts help the filmmaker focus the story, and how it acts as a blueprint for the creative team. The students will then delve into how to develop an idea into a story (linear or non-linear, documentary, visual, etc.) that will be the basis for their script. Writing a script for a short film, documentary or experimental fictional short form needs specific attention to exposition and timing. Therefore the students will learn how to structure their film idea by defining their unique point of view while considering what the audience will experience on the screen. How does one write a script for a documentary? Aren't they real stories about real people? In the course we will also look at how researching and defining scenes pre-shooting can help construct a film out of real experiences. This course will provide some methodologies and techniques that combine experimentation with practical application, assisting the students in defining and developing their own perspectives while thinking about how they transmit their film ideas to an audience.

2

Description

This seminar takes a transnational approach to exploring the history of cinema, video, documentary, and experimental film by examining the contributions of women, queer, and trans* filmmakers, directors, actors, and film collectives in a global context; and by charting key interventions in contemporary theories of gender and sexuality, feminist-film theory, and critical philosophy. Using CalArts's own history of feminist collaboration-the film and installation, "Womanhouse"-as a starting point, the course covers debates in feminist movements, paying attention to the relationship between feminism, diaspora, and nationalism; and arguments about the race, color, class, and sexual dimensions of gender in the building of feminist analysis and community. Through the lens offered by readings in postcolonial studies and critical

race studies, poetry and translation, Native and queer theory, political theory, psychoanalysis, poststructuralism, and affect and emotion studies; and by studying such themes as authorship, form and aesthetics, spectatorship and audiences, media industries, media production, and local, national, and world cinemas, members of the course will interpret the work of renowned and unsung women and feminist cinema workers.

This course also investigates a range of interrelated questions around the social, cultural, economic, and industrial factors that have shaped the films and workers under discussion, to include Anna May Wong, Dorothy Arzner, Martha Rosler, Susan Stryker, Julie Dash, Zeinabu irene Davis, Shirley Clarke, Elaine May, Sara Gómez, Pratibha Parmar, Penelope Spheeris, Cecilia Mangini, Cheryl Dunye, Tracey Moffatt, Agnès Varda, Sally Potter, Mira Nair, Trinh T. Minh-ha, Chick Strand, Chantal Akerman, Kira Muratova, Barbara Hammer, Jill Godmilow, Anne Charlotte Robertson, Helke Misselwitz, Shanta Apte, Jackie Raynal, Carole Roussopoulos and Delphine Seyrig, Margaret Tait, Shirin Neshat, Sarah Polley, Deborah Stratman; French, Italian, British, Korean, Greek, and Latin American feminist-film collectives; and contemporary practitioners Madeline Hunt-Erich, Maryam Tafakory, Sasha Wortzel, and Tourmaline. How does highlighting the experiences of such directors and participants in the film world cause us to rewrite dominant film histories? Creative, collaborative, and interdisciplinary responses to assignments encouraged. Assignments will include independent presentations; keeping a weekly screening-response journal, to be submitted in intervals; and turning in one final creative project or academic paper.

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
PrePro: Creative Approaches to Pre-Production

Pre-production is an essential step in the creation of a film. Whether it is a fictional narrative with crew and actors, a non fiction project, or a more poetic or structural experimental film, video or installation, all projects benefit from a creative approach to

planning.

To harness and guide students through the solid planning of their film projects, this class will consist of research, readings, presentations, and a series of pre-production exercises. Exercises will be project-specific and customized for each student's individual project. We will integrate writing (research, treatments etc.) and previsualization modes (mood boards, character design, storyboarding) as well as the logistical steps involved in the making of a film.

In the first week of classes you will be expected to come prepared with an idea about the project you'd like to develop. The goal will be to have all the necessary tools to dive right into the production of your project by the end of the semester.

Description
Cinema of Resistance: Political Filmmaking, Revolutionary Movements, Art, and Social Change

"(W)hat we call the political is society itself, it is the form of history itself. film and revolution, or film and arts, or politics and arts, are inseparable." - filmmaker Masao Adachi in 2006

In this course we will view works that explore what the revolutionary potential of the film medium is and has been, at what point the camera becomes a tool for effecting social change, and how cinema has existed as both a means and a site of resistance.

Drawing upon the rich history of political filmmaking and the myriad approaches to the form, works shown will be from a broad range including films by individual makers, collectives, and groups; and films from various revolutionary and historic moments, as well as contemporary struggles.

A number of important feature-length narrative films will be presented but the course will primarily focus on non-fiction films, personal filmmaking, essay films, and works that engage testimony and shared memory. We will also critically engage with contemporary advocacy

documentaries, agitprop, activist videos, the recent use of live internet streaming in political protest (such as Occupy, Standing Rock, Ferguson), to explore how marginalized groups and marginalized voices use moving images as a way to affect social change. Contemporary artists and filmmakers will join the class via skype, and in person for in-depth discussion.

Through screenings, readings, class discussion and self-reflective writing exercises, students will develop a deeper understanding of social issues and their formal realization in film; the various modes of exposition in cinema and their subsequent political values; and the many ways films have defined events in the world and shaped our memory of them.

Description

Site Specific: Moving Images in the Cinema, the White Cube, and Online

The present moment for exhibiting moving images is a fluid one. Artists who may have traditionally exhibited in a gallery are finding their way into cinemas, while filmmakers are finding new opportunities in the gallery or "white cube" space. The default space for viewing has shifted from the traditionally communal space of a cinema to viewing works online. Moving image work can now be thought of as site-specific; and "cinema" is no longer a physical space, but a distinct mode of attention.

Each kind of exhibition platform has its own particular conditions that shape the production of work and how viewers engage with it. For artists developing their practice, one needs a more engaged consideration of the contexts and conditions in which the work will be screened or exhibited. In this course students will gain a knowledge and fluency in the theoretical and practical aspects that define an ever-evolving media exhibition environment.

What kinds of pressures come to bear on artworks in such socially dynamic spaces and can they maintain an original autonomy in definition and intention in such a fluid environment?

We will take a critical look at some of the antagonizing issues of politic, cultural and

social friction that exert themselves around works made in social spaces such as the white cube, cinema, online or public sites.

Through screenings, discussions with invited artists, supported readings, as well as presentations by curators, we will look at the effects site has on the content and perception of the moving image artwork. In one or more field trips we will acquaint ourselves with the primary experience how this affects the politic and perception of a work.

During the first half of the course, students will be introduced to the technical developments and social history of moving-image exhibition spaces that have defined and influenced reception of the work. These spaces include galleries, cinemas, the internet, as well as projection in public spaces, broadcast television, and VR. Discussions will be supplemented by readings exploring relevant contemporary conceptual issues. The second half of the course will focus on practical issues facing students as artists working with moving image media including an examination of the world of film festivals; the roles of film curators, programmers and distributors; online distribution and various other exhibition platforms. Numerous works will be screened along with visits from artists and curators throughout the course.

Description

Archives and the Archive

The word "archive/s" holds a strange power these days. It is at once the title of organizations that preserve, arrange and provide access to historical materials, those collections of materials themselves, a synonym for memory, and a highfalutin word to legitimize your group of stuff (as if it needed anyone's legitimization!). - Dorothy Berry

In this project-based class we will engage with a range of definitions for the archive and for archives. Institutional archives are repositories of historical materials, organized in ways that in themselves produce meaning. They aim to preserve documents and objects, films and photographs with deliberation. They are also sites of power which can both amplify and suppress versions of the past. Personal archives can be albums of snapshots, folders of certificates, diplomas, deeds and postcards, film reels, broken pots and bits of embroidery. The body has been called an archive as it bears the marks, sensations and memory of its (one's) history. "The archive" is also used as a metaphor for memory. What does alternately contracting

and expanding the definition of an archive/the archive tell us about history, memory and historiography? We will encounter work by artists who engage with archives, both in practice and in concept. We will also consider some fundamental issues surrounding archives: What constitutes an archive? Why do we create archives? What role do archives play in the writing of history? What are the power relationships visible (and invisible) in archives? What is of archival value? How do archivists decide what should be included and what excluded? How does an archival context create meaning? How do developments in technology affect archival practices? How do they redefine what an archive is? Are archives places of memory or forgetting? Related to these questions are those regarding image appropriation. How have artists historically worked with recycled images, both archival and "found"? What issues arise with appropriation? What happens to the meaning of an image when it is taken out one context and placed in another? Is it meaningful to distinguish between archival and found imagery? Why or why not? Activities will include readings, screenings and discussions. Students will be asked to visit a brick and mortar archive and to make a final project in response to the topics covered in class.

PFV484 - Cinema and Representation: Latin America

Course Long Title

Cinema and Representation: Latin America

Subject Code	Course Number
PFV	484

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This class centers on the ways in which the idea of Latin America has been constructed through cinema, from the first productions that took place in the region (ca. 1930s) to our days. Looking at a wide range of cinematic practices from both "Latin American" filmmakers, as well as "foreign" ones, this course asks: What is "Latin America"? What do we mean by "Latin American" cinema? Is there a "good" way to represent Latin America? Intended as a kaleidoscopic approach to the region where themes are privileged over chronologies, this survey course examines some of the discourses (cinematic, political, social, and so on) surrounding the region, as well as their ideological implications. Thus, one central question undergirding this class regards what is at stake in representation-representing oneself, representing the other, representing a region, a place. To delve further into these questions, screenings will be placed in conversation with companion readings written by key thinkers in the interdisciplinary fields of Film and Media Studies, Visual Culture Studies, Postcolonial Studies, Gender and Queer Studies, Urban Studies, among others. Ultimately, this course's overall aim is to complicate dominant ideas about what representation can and should do by looking at an idiosyncratic range of "Latin American" cinematic

productions. No specialty experience is required and a number of places will be held open for Course Advising Day.

Description
A production workshop. The course is called "dangerous" because we will be delving deep within ourselves to look at our maybe not-so-comfortable family relationships and ourselves from a deeply interior perspective. Each student will produce a work or works dealing with: 1)MOTHER; 2)FATHER ; 3)SEX ; 4)MYSELF. As a sub-plot, the class is also open to students whose "dangerous" topics involve international issues -- questions of exile, displacement and disconnection. Grading: To receive a HP a student must complete Three out of Four short films on the topics above OR--a longer work on one of the topics, or any combination thereof. As time permits, we will also be viewing films that deal with these topics.

Additional seats may be available on Course Advising Day

Description

Surveying the Black Futurist Movement is positioned at the intersection of various African American traditions including music, performance, poetry, and filmmaking. The course will vacillate between sound and cinema as we investigate the language and function of abstraction. Derived from an expanded meditation on Afrofuturism, conceptual art, and various aesthetic methods, this class will interrogate the radical and imaginative innovations of Black artists. The ideas explored by these auteurs, writers, and musicians rely on looking beyond traditional interpretations of time and space, fact and fiction, history and myth. Our listening will follow the moods of Alice Coltrane, Erykah Badu and Sun Ra. Our screenings will analyze the intentions of Bill Gunn, George Clinton, and Rickey Laurentiis. We will discuss a variety of questions, debate our own theories, and engage with artists, filmmakers, and critics.

Description

A practical course designed to take the student through the post-production process toward the completion of a finished work. This class is designed for students in the process of finishing their thesis or senior projects and will include group as well as one-on-one meetings.

Through continued exploration of software introduced in CalArts Film/Video introductory courses such as FPFV134 Digital Editing in addition to more advanced workflows in various software and analog-to-digital techniques, its purpose will be to aid the student in finding and applying the optimal methodology and technological procedure in the finishing of their project.

Student will have access to the advanced post-production facilities in the Digital Editing and Post area such as the Ultra Studio 4K w/ Resolve suite as well as a ful array of software

in the individual Editing Suites to include Adobe CC, Davinci, Audacity, Avid, and DCP creation.

Participants will be required to bring current work in progress. Additional lab time will be required for anyone seeking independent access to advanced post-production suites. * Prerequisite: FPFV205 or FPFV305, FPFV126 and FPFV134. * Required for advanced editing suite access. * Recommended for PFV MFA2/3 students and PFV BFA3/4 students. * Permission of instructor required. * May be repeated for credit.

General

Course Long Title
Cinematic Lighting

Subject Code 502
Course Number

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours: 3

Description
A workshop that will look at essential working elements of lighting for motion pictures. Starting by analyzing different lighting styles in film history, this course will then cover a range of lighting practices in original locations and in studio, looking at different light sources and techniques. The student will be guided through the conceptual process of designing a lighting plan, selecting units and rigs for single and multi-camera shoots. Through a series of in-class lectures, workshops, and practical lighting assignments, the student will gain a strong working knowledge of specific aesthetics with variables in controlling the various properties of light (direction, exposure, color, saturation, contrast ratios, and texture). Special emphasis is placed on lighting for story and emotional impact, with a focus on Genre and Period lighting.

General

Course Long Title
Cinematography

Subject Code 503
Course Number

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours: 3

Description

This course is designed for students to explore cinematic language and the artistic possibilities of the moving image. Students will be evaluated on their mastery of core concepts of camera functions and image construction - including lighting, composition, focus and movement. The cameras used for class will be the Sony A7S and Canon XC15, however an emphasis on understanding universal concepts of depth of focus, light metering, lens choice and movement will be prioritized over camera-specific knowledge. The aim of the class is to understand how technical choices impact the interpretation of images, and to exercise intentional, artistic choices from behind the camera.

Credit Hours**Min Credit Hours:**

2

Description

Course available by Permission of Instructor only. Students will learn the basics of 16mm film production and will gain access to Bolex and Arriflex film cameras. They will also learn the basics of light readings, exposure, and will be introduced to some of the hand-made potentials of emulsion based filmmaking and direct film techniques. The class will include telecine and some phases of post-production. Students will also become familiar with analogue film equipment. Each student will shoot 100' of film and complete a one-minute project with a digital finish. Students will also collaborate on a class 16mm synch-sound film which will also finish on digital. Some lab time is required. Required of all PFV MFA 1s.

Credit Hours**Min Credit Hours:**

2

Description

In this course, you will learn the 16mm editorial process from cutting on a flatbed viewer to finishing an answer print. You will shoot a two minute film or expand on your one-minute film from the fall semester. The course will be taken concurrently with Editing on Avid, emphasizing a hybrid approach to finishing a film print, working between analogue and digital formats. You will also be simultaneously enrolled in the Post-Production Sound class, where you'll design a soundtrack for your one-minute film using Protools. At the end of the course, we will create a composite film print using your picture and soundtrack elements generated throughout the semester.

Description

TOGETHER AT LAST is designed for students who took FPFV203/503 Cinematography, FPFV134/534 Digital Editing and FPFV285/585 Production Sound remotely during the pandemic. The course will go over essential hands-on skills and introduce students to campus facilities and equipment that were not available during our remote year. This will include the shooting studios, editing suites and a variety of equipment. Team taught by three faculty

members, the students will work in small crews to produce a short remake that will include shooting in the studios and on location and give students the opportunity to each edit their own version of the collaborative film.

Description

In this course, students will learn editing techniques and methodology using Avid Media Composer through lectures and hands on exercises. Topics will include: media organization, ingesting, transcoding, three point editing, trimming, sound editing, working with effects,

color correction, titles, output, compression, and delivery, as well as techniques specific to digital to 16mm workflow, such as creating handles and pull lists. In addition, editing theory, history, and aesthetics will be covered. This class provides students with the knowledge to edit 16mm footage from a telecine in Avid and then go back to a 16mm film print. Students who are interested in taking Finishing on 16mm film may take this class before or at the same time as Finishing on 16mm. However, students who seek a basic introduction to Avid but are not working on 16mm are welcome in the class. Students must have an external hard drive.

2

Description

This is an intensive film and video viewing course focusing on major works from the history of avant-garde, or experimental, film. The majority of titles will be selected from CalArts' film and video archive, including special film prints that have not been or rarely have been shown on campus. We will watch several long-form films and videos that depend on extended duration and sustained concentration, but important short work will also be shown. If possible, additional titles will be rented to extend an appreciation of an filmmaker's work or milieu. Artists being considered include Vito Acconci, Chantal Akerman, Thom Andersen, Stan Brakhage, Betzy Bromberg, Charles Burnett, Nathaniel Dorksy, Kevin Jerome Everson, Hollis Frampton, Su Friedrich, Ken Jacobs, Kurt Kren, Gunvor Nelson, Carolee Schneemann, Harry Smith, Michael Snow, Phil Solomon, Joyce Wieland and Frederick Wiseman. Students will be asked to keep a weekly journal and write one seven-page paper.

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

3

Description

This is a practice based workshop class designed to introduce students to the manipulation of color in digital video. We will approach color correction and grading in through hands on experience with the understanding that the concepts behind the theory and technology of color are most useful and comprehensible through their application in filmmaking. Primarily using the tools in DaVinci Resolve, and with reference to cinematic examples, we will explore technical and theoretical fundamentals, differences between color correction and color grading, working with documentary and narrative, video and film, live action and animation, and explore common and advanced problems, considerations, and techniques in the color process. This course will include a variety of short assignments and two longer color grading projects. No prior experience with DaVinci Resolve is necessary, however students must already know the fundamentals of editing and cinematography. Additional seats are available on class sign up day.

Each student will require an external harddrive - recommended with a speed of 7200RPM (or SSD) and at least 1TB (~\$70-\$200).

Credit Hours

Min Credit Hours:

2

Description

This is a course on curating film, video, performance and installation; how creative programming can integrate and amplify individual works within larger contexts and help build communities for the experience and appreciation of this kind of art.

The course is only available by permission of instructor.

Students will explore and discuss the practice of curating moving image art works, either within a theatrical, gallery or other public setting.

We will explore the concept and practice of exhibiting (or sharing) film, video and other projectable media in all kinds of settings as this has been done over the past century as well as in the myriad ways moving imagery is part of contemporary culture.

Students will be asked to write a research paper and curate a program for the class. In addition to gaining knowledge and first-hand experience in curating, they will learn to publicize an event, prepare program notes and present programs to audiences.

Min Credit Hours:
3

Description
This cinematography class is focused on solidifying the knowledge of students who have a foundation in cinematography by looking at and working with specific aspect ratios, textures and camera movements. The students will analyze and practice different techniques in film examples and then work on blocking scenes for different formats like academy, cinemascope or small screen. Throughout the class, the students will learn (using 16 mm film and digital RED cameras) to work with different lenses, and creative use of look up tables (LUTs). The students will also practice working on combining different camera formats, depending on the needs in a project for documentary, narrative, experimental or installation projects. Because cinematography can't be separated from the essential work of lighting, we will analyze lightning practices in original locations looking at different light sources and techniques (e.g. controlling saturation, exposure, contrast ratios, and texture

for fictional and documentary scenes). The class will be led through in-class lectures and hands-on demonstrations.

Registration Restrictions

Credit Hours

Min Credit Hours:
3

Description
Course available by Permission of Instructor only.
The class will teach students how to write about

film (as well as video and other media using the moving image) in a variety of forms, genres, and contexts: writing about one's work, about the work of peers, reviews of films seen in commercial theater, critical essays, academic papers, filmmaker's interviews, press releases, grant proposals etc.

Examples of writing about film will be handed out and discussed. Sequences of classical, contemporary, foreign and experimental film and videos will be screened in class and analyzed using the proper descriptive and critical vocabulary. Major critical approaches to film and video will also be discussed. In addition each student is expected to complete a full-length critical essay on a topic decided after discussion with the instructor. Through-out the semester students will bring samples of their writing in class and will get feedback from the instructor and from their peers.

* Open to the Institute but you must have completed a minimum of one short film or video (under 30 minutes) to be eligible.
*Priority given to Film/Video students.

Description
Bad Sound: Non-Traditional Ways to Create Sounds for Images

Erasing notions of hi-fidelity sound, this class acknowledges that the right sound for a film might be the result of an aleatory accident, ill-conceived experiment or unpolished performance. As such we will explore DIY and open source tools for making, recording and manipulating sound for image. Spanning both digital and analog domains students will engage to cannibalize free sound libraries, resuscitate (and reimagine) obsolete media, misuse recording equipment, improvise musical instruments, as well as lightly bend/hack circuits and software.

Credit Hours

Min Credit Hours:
3

Description
In this workshop class we expand your knowledge from the fundamentals of cinematography, toward harnessing the technical tools of the craft for creating impactful images in advanced productions, while strengthening your unique voice as an artist. You will gain fluency working with RED cameras and introduced to other professional Digital Cine cameras while creating work collaboratively. We will explore aesthetic and blocking concepts working with specific formats, optics, textures and camera movements, and refine lighting techniques. Projects you shoot inside and outside the class will hone your understanding of the cinematographer's role from pre-production through post, including the creative use of look up tables (LUTs) and color grading. Practical work includes designing dynamic blocking and camera moves, shooting with multiple cameras and on-set DIT look management. Visits to vendors (and possible rental of ARRI Alexa and high-end optics for in-class shoots) will extend our knowledge beyond the technical realm of CalArts.

Prerequisites: FPFV-546 Intermediate Cinematography, and a solid understanding of exposure, fundamentals of lighting, grip and electric, and safety on set

FPFV609 - Optical Printing

Min Credit Hours:

2

Description

This project-based class will investigate a wide range of themes and possibilities suggested by the particularities of our hyper-connected world in relation to documentary production, including, but not limited to identity, virtuality, privacy, security, fragility, collaboration and storytelling. Our lived reality is deeply entangled in experiences had through images on screens, and the line between what happens on and off the screen has become increasingly blurred. As our world feels more and more like both a video game and a reality television show, can we analyze the effects that these online environments have on our movements in physical space, our notions of reality, and our mental wellbeing? We will look critically at a variety of apps and platforms and work both with and against them to engage with the formal, aesthetic, political, social and economic issues that they suggest. We will study a wide range of artists' responses to these phenomenon and students will create individual projects designed to bring these issues into sharper focus.

Credit Hours

Min Credit Hours:

3

Description

This course will explore the intimate use of memories and dreamscapes within the art of moving images to employ radical re-examinations of identity, culture, and history. We will analyze experimental methods used to decolonize the archive within film and video, serving as a medium for constructing, deconstructing, and reconstructing individual and collective realities. Often blurring the line between truth and fiction, our selection of boundary-pushing films and videos poses the question of what is real and imagined, where the dream begins and ends, and who has the right to dictate one's truth. While the course is rooted in a Black feminist framework, a range of films are viewed and considered through the lens of gender and sexuality, collective memory, and alternative histories. This seminar will guide us on a multidimensional journey and excavation that redefines, shifts and challenges traditional narrative forms and archival practices.

Description

Shadowlands: Haunted Media, Spectral images

From the beginning, film and photography have been characterized by their ability to record the world as it appears - and yet coincidentally spurred a fascination with unseen worlds, even seeming to offer proof of them. In this class we will examine the technical and aesthetic entanglement of the cinematic and the uncanny. Through in-class workshops in 16mm, screenings, readings and performances we shall investigate the aesthetics of mysterious terrain where the familiar becomes unfamiliar, and vice versa.

The class is structured around five topics of inquiry: Shadows, Manifestations, Exorcisms, Second Sight, and Specters. A week devoted to aesthetics, readings, discussion and screenings will alternate with a week devoted to workshop investigations.

Students will be required to make five short projects which may take the form of films, photographs, performances, constructions or texts.

School(s)	School of Film/Video
Academic Level	GR - Graduate

Credit Hours

Min Credit Hours:
3

Description
Family portraits, letters, home-videos, notes, diaries, and small objects and accessories are often key to tracing hidden secrets and desires within one's own family. Beyond this, by examining family archives we can gain a deeper understanding of regional and national histories. This seminar pays attention to filmmakers from different latitudes whose work draws from family archives or, at times, found archives. Considering Lourdes Portillo, Natalia Almada, Naomi Kawase, Sergio Oksman, Joao Moreira Salles, Chantal Akerman, Karim Anouz, and Juan Carlos Ruflo, to mention but

a few, we will explore how their use of archival materials pushes them to experiment with the documentary form. In this interdisciplinary course, we will also examine the ways in which their use of family archives not only shapes the stories they tell, but constitutes them as persons and artists. Finally, we will delve into the porous quality of personal histories and how they permeate into other, larger political narratives. Students will keep a journal on weekly discussions and produce a paper or short cinematic piece that reflects that topics discussed in class.

Description

This course examines influential women and non-binary filmmakers who advocate for experimental forms in their moving image work and writing. We will focus primarily on a non-narrative avant-garde and on artists that argue for the importance of form, the embodied and sensual depiction of experience, or a subversion of a normative politics of representation. Beginning with Germaine Dulac, the 1920s feminist surrealist who was an important advocate for the avant-garde, we will look at films and writings by/about some of the major figures including Maya Deren, Joyce Wieland, Barbara Hammer, Chick Strand, Rose Lowder. In the last third of the class we will look at recent makers who might include Cauleen Smith, Hito Steyerl, Ja'Tovia Gary, Dani and Sheila ReStack. We will collectively reflect on the role of the avant-garde in the past and present and ask whether a non-narrative avant-garde can still play an important political and ideological role.

Description

Course available by Permission of Instructor only.

This course is to provide Graduate Students with an opportunity to gain valuable teaching experience. Each student will prepare a two-hour teaching presentation and each week a different student will perform/teach their presentation. The course will pursue both innovative and creative ways of disseminating information and ideas. Students will be encouraged to consider the research they are currently undertaking for their thesis projects, but presentations will not only be limited to such research. Research in general is an essential element of this course. The demands for research and alternatives will be extensive. The final hour of each class will be used for general group critique of the teaching and presentation techniques. Graduate Students only.

Description

This class will explore the aesthetic and political openings provided by incorporating multiple languages in film and moving image media. While the use of different spoken languages and dialects will be the starting point, the class will also encompass broader notions, like cinematic languages (classical narrative, modernist, documentary, avant-garde) and other practices we may explore (music, body language, computer code, etc.).

If language is the most common way in which we engage with the world and describe it, then using multiple languages may expand our experience of it and question our basic assumptions. Through this inquiry, the students will build a more perceptive and involved practice and understanding of cinematic form and practice.

These ideas will be approached through screenings, lectures/discussions, exercises and critique, with an emphasis on how this interrogation of language can take different forms and potentially inform

the students' artistic practice. Students will make a final project or write a critical paper engaging with the course's themes.

Description

This class is an in-depth study of movement and composition through both sound and image. The potential for movement is one of the main distinguishing features of time-based practices, perhaps most of all in filmmaking. To explore this we will consider the way movement is perceived through the senses and encourage creative uses of camera movement, sound and blocking through class exercises and assignments. In workshops you will be introduced to various production techniques and equipment related to camera movement and sound. The class will also have a screening and discussion component, where student projects and a diverse range of audio-visual pieces will be viewed and discussed. Areas covered will include movement and perception, embodied camera, choreographed camera movement, movement and sound, movement and machine, movement and architecture.

Description

The 'I' is the moment of failure in every narrative effort to give an account of oneself. - Judith Butler

We now see subjectivities and truths as plural not only among subjects, but within a given subject, the self that is divided, and even in part unknown to itself. - Maureen Turim

Who and what is the "I" that claims to see and speak through constructed images in first-person films? Is "I" one or multiple, an authentic 'performance' or a simulated projection, an entrenched monologue or an active dialogue? Is this "I" best expressed literally or figuratively; verbally or visually; through exposition or through lyrical association and juxtaposition?

This course examines the theory and practice of first-person filmmaking in both historical and contemporary practice. Beginning with a theoretical examination of the first-person filmmaking that flourished starting in the late 1960s (mostly white and male) and was reignited by women and minority makers the 1980s and '90s, the latter half of the course will focus on films from 2010s and 20s emerging from this tradition. We will examine a variety of films in which the filmmaker leaves or interrogates their corporeal trace on the medium, whether through embodied presence, personified voice, or gestural camera movements. First-person films raise a number of issues about 'voice' in film; about the nature and performance of 'self;' about the desire to be seen and to authentically see; and about the power and politics of representation. From the naïve to the self-reflexive or strategic "I," and with poetic or political intention, first-person cinema offers a range of affective potential and epistemological complexity. Acknowledging the position from which they speak, or interrogating conventional boundaries between private and public, first-person filmmakers frequently reflect on the

filmmaking process to explore strategies of representation and to acknowledge the labor that comprises their process.

We will look at a broad selection of work that is geographically, politically, ethnically and gender-diverse. Students will be responsible for researching the work of given filmmakers and presenting to the class so as to expand our range over the fourteen weeks of the semester. Filmmakers examined include Jon Jost, Kazuo Hara, Marlon Riggs, Marlon Fuentes, Marilu Mallet, and well as many working in the short form. Recent films of the last five years include work by Khalik Allah, Carolina Moscosa, Madsen Minax, Jason Lord, and Jean-Baptiste de Laubier (contemporary filmmakers may shift depending on class interests and knowledge).

2

Description

Course available by permission of instructor only.

The objectives of this course are to learn how to work with the moving image and sound in the form of video installation. We will focus on creating understanding through intentional relations between content, space and scale. We will contemplate the essential component of video (time), the definitive condition of installation (space), and how to work with them to create kinesthetic insight: understanding on the level of the body. Beginning with an overview of the unique properties of video/film installation, the projected image, and multi-channel works, we will study how framing and duration contribute to the form and experience of the installation. There are screenings and assigned readings with written responses. Each student will produce and exhibit one video installation which they will work on for the majority of the semester. Each student will have one individual meeting. Students will be given substantial time to present content and ideas, pose questions, and receive thoughtful feedback.

*Students with a current project in mind are encouraged to enroll.

Open to Institute with priority given to Film Students.

Description

Of course, the *politique des auteurs* is the application to the cinema of a notion that is widely accepted in the individual arts. -André Bazin, 1957

Coined as an expression in English by critic Andrew Sarris in the 1960s, "Auteur Theory" and auteur studies have been alternately defended, qualified or reviled in cinema studies. Sarris

based his term on the "*politique des auteurs*" that emerged from the writings of French film theorists Alexandre Astruc, André Bazin and filmmaker Francois Truffaut in the 1950s and which foregrounded the centrality of the director-as-auteur in defining a film's visual style and thematic concerns. At that time, both American and French auteurist approaches were largely analyses by male critics and theorists about male directors working in Euro-American cinematic traditions.

In this course on Autrice Studies we playfully deploy the feminine version of the French term 'auteur' to interrogate auteur theory in the context of women artists and directors. Here we will examine how and why cinema studies from the 1970s on challenged an auteurist approach - from genre-based, psychoanalytic/feminist and ideological perspectives. At the same time as we interrogate whether a version of "autrice" studies can be useful for exploring the work of women filmmakers and moving image artists today, we will consider whether or how gender is an important aspect of such study. Is there, as some have claimed, a feminine or feminist "écriture" that extends to visual work? Or does such an approach simply perpetuate reductive binaries and have limited strategic value?

As part of our theoretical interrogation, we will select two or three women artists of different generations (for example Chantal Akerman, Shirin Neshat, or Ja'Tovia Gary) to do an in-depth study of their work and the (auteurist or not) critical analyses written about them. The last third of the semester will consist of students doing in-depth research on a filmmaker or moving image artist of their choosing. Possibilities abound, including feature, documentary and experimental filmmakers such as Andrea Arnold, Kathryn Bigelow, Catherine Breillat, Jane Campion, Claire Denis, Cheryl Dunye, Ava Duvernay, Kitty Green, Lucretia Martel, Nina Menkes, Sally Potter, Kelly Reichardt, Trinh T. Minh-ha, Athina Rachel Tsangari, Li Yu. Final projects will be an article or video essay that can be submitted to a journal.

Description

This course offers filmmakers an introduction to color correction and grading for digital footage, using DaVinci Resolve as the primary tool. Students will learn foundational concepts in color science and theory, engaging in activities such as image evaluation, contrast and color adjustments, secondary corrections, creating visual styles ("looks"), and shot matching. The curriculum also covers working with modern high-resolution camera file--including 4K RAW, Log, and DNG formats--and explores workflows for acquisition and integration with editing software.

Through screenings, readings, and discussions, the class examines the history and impact of cinematic color. Students have the opportunity to become a "DaVinci Resolve Certified User" or "DaVinci Resolve Certified Colorist" by taking the optional Blackmagic Design certification exam. The course is designed to equip you with the necessary color grading skills to complete your film projects. Participants will work on their own projects as well as examples provided by the instructor.

Enrollment is limited to 14 students. Preference is given to upper-level PFV students, but others are welcome to enroll.

Description

Permission of Instructor required. This production class will explore the essay-film. Film critic Alexandre Astruc created the term camera-stylo in 1948 to suggest a new means of writing through cinema, in which the camera would serve as a pen, creating arguments, meditation and inquiries. Film essays are neither straight documentaries nor fictional narratives but are usually a hybrid of different forms and tend to be driven by theme rather than plot. We will screen film essays and read written essays paired to compliment the films. We will consider how these media can inform each other. Students will produce three short videos over the course to the semester in response to course directives. Priority give to MFA studnets and upper level undergraduates.

Description

The Feminist Moving Image Across Discipline is a new course that will consider work across disciplines of several women and feminist filmmakers and moving-image practitioners, covering a wide range of practices and forms-film-editing, diary-writing, experimental documentary, art installation, figurative painting, critical scholarship, screenplay, short story, dance and theatrical performance, and narrative cinema, to name a few-from the 1920s to the present day.

When grounded in filmmaking, can a political vision be found in the interdisciplinary artist who moves from form to form? What common threads can be found in these geographically and historically disparate figures' strategies of archival collage, reappearance, repetition, dislocation, wandering, staging, and reenactment? We will also periodically return to questions around the boundaries of artistry and language: How is "women" still a demanding category, today? How does an artistic medium become a "discipline"? Is activism a medium an artist could move into? Is acting a form, like painting, that an artist could reject? And we will also look for connections in intertexts, reading excerpts from socialist Flora Tristan's diary, as referenced in Claudia von Alemann's *Blind Spot* (1981), for instance; or Etel Adnan's poetry and writing, which served as inspiration for filmmaker Jocelyne Saab's Beirut trilogy.

Other practitioners we may look at include Esfir Shub, Maya Deren, Madeline Anderson, Marguerite Duras, Marjorie Keller, Assia Djebar, Zeinabu irene Davis, Alanis Obomsawin, Chantal Akerman, Joyce Wieland, Barbara Loden, Yvonne Rainer, Kathleen Collins, Maria Lassnig, Theresa Hak Kyung Cha, Trinh T. Minh-ha, Qiu Miaojin, Cecilia Vicuña; and more contemporary makers like Moyra Davey, Larissa Sansour, Iva Radivojevic, Silvia das Fadas, and Steffani Jemison (or others to be determined). Guest speakers will help us make embodied connections to contemporary practice, and we may also make one or two visits to off-campus venues to watch films relevant to our conversations.

2

Description

This class is a workshop extension of FPFV-442-01/642-01, Radicalizing Sound and Image. In a smaller workshop setting and with the aim of making a radically innovative final film project, students will explore and research experimental work made in mediums other than their own, i.e. music, photography, painting, literature, poetry. Students will be encouraged to discover parallel inspirations, illuminating ideas, unexpected roadmaps and innovative methodologies by examining artworks other than film. They will be urged to explore and identify unconventional structures and alternative approaches to both form and content in order to discover different strategies for making their own radical moving image work. To begin, students will be assigned research projects that they will present to the class. As the semester progresses, students will develop their ideas with the aim of completing a film (or at least having one well on its way) by the end of the semester. Works in progress will be critiqued. Graduate students may use this class to further develop their thesis projects. There will be required readings. It is recommended, but not required

that students have either previously taken FPFV-442-01/642-01 or are concurrently enrolled.

Course Long Title
Adaptations

Subject Code Course Number
FPFV 657

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Adaptation is the process of change by which an organism becomes better suited to its environment. It is coincidentally, the term used to describe the process by which one art form - traditionally the written word - is modified and transformed into a play, a movie or a film. Moving image

works can in turn be adapted to other media forms. Through workshops and case studies this class will explore the complex journey of ideas inspired by texts, stories, biographies, images and objects, as they are reshaped from one medium to another.

The class will commence with a series of exercises to generate ideas and methodologies. Short assignments will be supplemented with screenings, readings and analysis. In the second half of the semester students will apply the techniques learned to create unique and individual works. The final project may take the form of a text, a moving image work, an object, or a performance.

This class is designed for the student who is ready to experiment, take risks and playfully engage with the process of adaptation.

3

Description

Metacinematic gestures have been present since the earliest years of film. Like metafiction in literature, metacinema refers to films that make the audience aware of the filmmaking or viewing processes. Such films interrogate the medium and its history by rendering visible production practices, referencing the history and culture of cinema, or breaking conventions that encourage us to uncritically accept a film's diegetic world. Metacinema can be found in comedy, horror, musicals, socio-political films, experimental films, and documentary. First-person diary films are often inherently metacinematic as are essay films and video essays.

This seminar explores metacinema in various guises, genres, and geo-political contexts - from fiction and documentary features to experimental films, from feminist and Brechtian counter-cinemas to Iranian international festival favorites. We focus on films that have critical and political aims and that problematize or illuminate the paradoxes of cinematic representation. Works by Robert Frank, William Greaves, Jon Jost, Laura Mulvey and Peter Wollen, Abbas Kiarostami, Kitty Green, Joanna Hogg will be included as well as a number of experimental shorts. The class assumes some knowledge of film theory; readings will be provided for those who need them. Weekly reading, short papers and monthly presentations are required, but final projects can be in writing, film, performance or digital media.

Description

Advanced Narrative Production and directing the Camera Workshop

Advanced Narrative Production (producing the 4 minute film, one day shoot) students will be placed into 2 teams of 6 and rotate production roles: director, assistant director, cinematographer, gaffer, and sound mix-boom operator. The class is divided into 3 parts: Pre-production, Production, and Post- Production. During the first 3 weeks students must complete their scripts and produce their films. During the lab period, students will engage in

intensive production of coverage so as to prepare them for some of the problematic areas of camera coverage they may encounter on set. Students will learn set protocol and learn each position. Directors will have an opportunity to hone their directing and directing the camera skills. When in the director position, students will prepare a production dossier (including cast, location, directing notes, script breakdown, floor plans and shot list, and storyboards, director's tech scout with DP, and design), produce and cast their own films, complete a tech scout, and shoot their film. After a shoot, the class reconvenes to give a written assessment of their performance. The goal of this class is collaboration as well as building confidence in set protocol and skillfully and efficiently thinking on one's feet in order to achieve the impossible in a short shoot. Students are assigned randomly to their groups and have a chance to gain production experience in each role. Students are encouraged to focus on the role they are in while they are in that role.

Description

WHERE DOES GRIEF GO?

A brief glimpse of beauty, / A daydream of wayward lives and / extraordinary experiments / A taste of memory in the flesh.

The voice of Andre 3000 will be our guide as he sings a mournful dirge for his parents and we consider the following question: What happens at the intersection between theory, criticism, and poetry? The melancholic strum of Alice Coltrane's harp and Magdalene Odundo's sublime ceramic sculptures will draw us forward and backward. The tenor of Christina Sharpe's voice will anchor us as she tactfully considers if a photograph is a vessel. "What is or should or could a vessel be in times of refusal and resistance?" As Andre 3000 hums, we'll be swept into what Kamau Brathwaite calls the "psychic night", an infinite vista where language and fantasy coalesce into a familiar memorial expanse. There are multiple ends of the world depicted here, as well as multiple beginnings. Where do these moments reside and how

will they transform over time? The class is a testament to life's banal impressions and nostalgic echoes, to love's chaotic pendulum, and death's immersive blueness, to cosmic, lived, and imaginary experiences; to "all breeds of knowledge" as Rickey Laurentiss so tenderly put it. The real phenomena of loss is both the inventory of what no longer exists and the impossible measure of what survives.

The course will explore the boundaries of experimental storytelling and the possibilities of language by surfing between poetic and theoretical modalities, articulated by Denise Ferreira Da Silva as "different yet inseparable fields of personal expression." Each week we'll study a different network of ideas by which convention has been re-ordered through expressive (and often defiant) approaches to form, style, rhythm, and delivery. During the semester students will be encouraged to reflect on their relationship to these forms of writing, discuss ideas with the class, and craft their own myths, essays, and songs. Assignments include regular writing in response to course materials, a critical review and/or presentation of a related artwork, proposal for an experiment/artistic project related to central course concepts.

Description

Aliens On Screen: Cosmopolitics and Extraterrestrials in Sci-Fi Cinema.

Aliens loom large on the horizon of our imagination. In culture, aliens manifest in multimedial forms: TV shows, video games, comic books, literature, and of course films. Although aliens seem as common and as regular a presence as the celestial bodies of the Solar System, they still inspire a sense of awe and mystery like few other figures in popular culture. Whether imbued with a sense of cosmic horror, or representing a chance for earthlings to leapfrog as a species, the trajectories that aliens follow onscreen tend to gravitate towards an amplified field of human passions and emotions.

This class proposes a critical reflection on what aliens onscreen represent for the present, past, and future of the human species. Following philosopher Peter Szendy's notion of cosmopolitics, we will unravel the convoluted relations that weave together extraterrestrials and the ontology of the human condition, as depicted in these movies, while further complicating them beyond national, global, and geocentric narratives.

From the humanoid-insect-like Selenite in Georges Méliès A Trip to the Moon (1902), all the way to the multi-species populated galaxy portrayed in Men in Black: International (2019), aliens perform a critical role in shaping humanity's attitudes towards its place in the universe. Most often these films convey incisive questions about personal identity; shine sharp critiques on power dynamics; and shape the ways in which to envision possible forms of social organization.

This class will do a concise but thorough revision of some of the most influential films in the history of this sub-genre, while paying close attention to lesser known productions from the transnational arena. Come join the flight onto a cinematic exploration out-of-this-world!

Description

"Media are our infrastructures of being, the habitats and materials through which we act and are..."At some level, expression and existence merge.: (John Durham Peters, The Marvelous Clouds).

In this course students will plumb the reaches of their own archive of collected material (photography, text, film and video), creating works that encourage a heightened awareness of the means through which we absorb and share expressions of ourselves and our world. Engaging with a wide range of forms (collage, writing, photography, drawing, collecting) this course explores how cultivating creative and personal practices outside of filmmaking can both enrich and relieve the cinematic imagination. In workshop settings, we look at what happens as hand speaks to eye, and how such primary gestures have evolved into a fugitive complex of remote cause and effect. Through screenings, readings, discussion and in-class collaborative exercises, we will consider the notions of

speculative representations, media as self-portraiture, and forms that both trouble and harmonize inner and outer worlds. Students will complete a fully realized work a the course conclusion.

Constructing Alternative Realities

Subject Code	Course Number
FPFV	668

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Constructing Alternative Realities is a class that will begin by studying composition and characteristics of the film frame. How do time, space, rhythm, movement and sound contribute as key constituents? In this regard, the class will be a study in visual literacy. All films and videos construct alternative realities, but this class will concentrate on creating realities other than the physical world we know and inhabit. The emphasis, instead, will be on the portrayal of other dimensions: memory, trance, the mirror, illusion, the dreamscape, the hallucinatory, the haptic, the window. How can one create moving images that speak of other planes? What is abstraction? How does one create immersive screen experiences which are convincing, evocative, mysterious and strange?

Students will be asked to present analysis of film frames and scenes to identify key visual and aural components. There will be short assignments to shoot various types of images. In addition, students will be required to make a film that contains an alternative reality as a key element. The class is both a study in composition as well as a workshop/seminar in exploring ways to create alternative visions.

Description

FPFV- The starting point of this discipline is the intention to create a working screenwriting practice dictated by the needs of each story being told and that rejects the "one size fits all" formulaic school of screenwriting. There is no magic bullet (or formula), but there is an enlightening, fun and fulfilling way to tease the story into being and into filmic form and that is the practice this class cultivates. Each story has its own unique organic flow and the instructor will guide the student in discovering it. The class takes a two-pronged approach to screenwriting and structuring both fictional & documentary stories utilizing the construction of a solid narrative combined with the creation of compelling characters who propel the narrative forward. The class is not a lecture class, it is primarily a workshop - the practice is created by writing, not talking about writing. The student will receive highly individualized instruction in a group setting. With the guidance of the instructor and open class discussion, each student will write a first- draft feature-length screenplay over the course of the semester (or more, if the student takes the class again). With discipline, the writer can finish a completed screenplay. Writing begins immediately. Additionally, we will explore what makes movies work (or not) by viewing and analyzing films that are examples of great or not-so-great screenwriting. Priority given to upper level PFV students, but those who feel strongly called to the discipline of screenwriting can make a case for early entry.

Description

Alternative Screenwriting for Short Films and Documentaries

In the first part of the course we will analyze

different short films ("An Andalusian Dog", "Blackrider", "At Land", "The Street and the Ball") and their original screenplays discovering how the scripts help the filmmaker focus the story, and how it acts as a blueprint for the creative team. The students will then delve into how to develop an idea into a story (linear or non-linear, documentary, visual, etc.) that will be the basis for their script. Writing a script for a short film, documentary or experimental fictional short form needs specific attention to exposition and timing. Therefore the students will learn how to structure their film idea by defining their unique point of view while considering what the audience will experience on the screen. How does one write a script for a documentary? Aren't they real stories about real people? In the course we will also look at how researching and defining scenes pre-shooting can help construct a film out of real experiences. This course will provide some methodologies and techniques that combine experimentation with practical application, assisting the students in defining and developing their own perspectives while thinking about how they transmit their film ideas to an audience.

Credit Hours

Min Credit Hours:

2

Description

This seminar takes a transnational approach to exploring the history of cinema, video, documentary, and experimental film by examining the contributions of women, queer, and trans* filmmakers, directors, actors, and film collectives in a global context; and by charting key interventions in contemporary theories of gender and sexuality, feminist-film theory, and critical philosophy. Using CalArts's own history of feminist collaboration-the film and installation, "Womanhouse"-as a starting point, the course covers debates in feminist movements, paying attention to the relationship between feminism, diaspora, and nationalism; and arguments about the race, color, class, and sexual dimensions of gender in the building of feminist analysis and community. Through the lens offered by readings in postcolonial studies and critical race studies, poetry and translation, Native and queer theory, political theory, psychoanalysis, poststructuralism, and affect and emotion studies; and by studying such themes as authorship, form and aesthetics, spectatorship and audiences, media industries, media production, and local, national, and world cinemas, members of the course will interpret the work of renowned and unsung women and feminist cinema workers.

This course also investigates a range of interrelated questions around the social, cultural, economic, and industrial factors that

have shaped the films and workers under discussion, to include Anna May Wong, Dorothy Arzner, Martha Rosler, Susan Stryker, Julie Dash, Zeinabu irene Davis, Shirley Clarke, Elaine May, Sara Gómez, Pratibha Parmar, Penelope Spheeris, Cecilia Mangini, Cheryl Dunye, Tracey Moffatt, Agnès Varda, Sally Potter, Mira Nair, Trinh T. Minh-ha, Chick Strand, Chantal Akerman, Kira Muratova, Barbara Hammer, Jill Godmilow, Anne Charlotte Robertson, Helke Misselwitz, Shanta Apte, Jackie Raynal, Carole Roussopoulos and Delphine Seyrig, Margaret Tait, Shirin Neshat, Sarah Polley, Deborah Stratman; French, Italian, British, Korean, Greek, and Latin American feminist-film collectives; and contemporary practitioners Madeline Hunt-Erlich, Maryam Tafakory, Sasha Wortzel, and Tourmaline. How does highlighting the experiences of such directors and participants in the film world cause us to rewrite dominant film histories? Creative, collaborative, and interdisciplinary responses to assignments encouraged. Assignments will include independent presentations; keeping a weekly screening-response journal, to be submitted in intervals; and turning in one final creative project or academic paper.

Description

PrePro: Creative Approaches to Pre-Production

Pre-production is an essential step in the creation of a film. Whether it is a fictional narrative with crew and actors, a non fiction project, or a more poetic or structural experimental film, video or installation, all projects benefit from a creative approach to planning.

To harness and guide students through the solid planning of their film projects, this class will consist of research, readings, presentations, and a series of pre-production exercises. Exercises will be project-specific and customized for each student's individual project. We will integrate writing (research, treatments etc.) and previsualization modes (mood boards, character design, storyboarding) as well as the logistical steps involved in the making of a film.

In the first week of classes you will be expected to come prepared with an idea about the project you'd like to develop. The goal will be to have all the necessary tools to dive right into the production of your project by the end of the semester.

Description

Cinema of Resistance: Political Filmmaking, Revolutionary Movements, Art, and Social Change

"(W)hat we call the political is society itself, it is the form of history itself. film and revolution, or film and arts, or politics and arts, are inseparable." - filmmaker Masao Adachi in 2006

In this course we will view works that explore what the revolutionary potential of the film medium is and has been, at what point the camera becomes a tool for effecting social change, and how cinema has existed as both a means and a site of resistance.

Drawing upon the rich history of political filmmaking and the myriad approaches to the form, works shown will be from a broad range including films by individual makers, collectives, and groups; and films from various revolutionary and historic moments, as well as contemporary struggles.

A number of important feature-length narrative films will be presented but the course will primarily focus on non-fiction films, personal filmmaking, essay films, and works that engage testimony and shared memory. We will also critically engage with contemporary advocacy documentaries, agitprop, activist videos, the recent use of live internet streaming in political protest (such as Occupy, Standing Rock, Ferguson), to explore how marginalized groups and marginalized voices use moving images as a way to affect social change. Contemporary artists and filmmakers will join the class via skype, and in person for in-depth discussion.

Through screenings, readings, class discussion and self-reflective writing exercises, students will develop a deeper understanding of social issues and their formal realization in film; the various modes of exposition in cinema and their

subsequent political values; and the many ways films have defined events in the world and shaped our memory of them.

Description

Site Specific: Moving Images in the Cinema, the White Cube, and Online

The present moment for exhibiting moving images is a fluid one. Artists who may have traditionally exhibited in a gallery are finding their way into cinemas, while filmmakers are finding new opportunities in the gallery or "white cube" space. The default space for viewing has shifted from the traditionally communal space of a cinema to viewing works online. Moving image work can now be thought of as site-specific; and "cinema" is no longer a physical space, but a distinct mode of attention.

Each kind of exhibition platform has its own particular conditions that shape the production of work and how viewers engage with it. For artists developing their practice, one needs a more engaged consideration of the contexts and conditions in which the work will be screened or exhibited. In this course students will gain a knowledge and fluency in the theoretical and practical aspects that define an ever-evolving media exhibition environment.

What kinds of pressures come to bear on artworks in such socially dynamic spaces and can they maintain an original autonomy in definition and intention in such a fluid environment?

We will take a critical look at some of the antagonizing issues of politic, cultural and social friction that exert themselves around works made in social spaces such as the white cube, cinema, online or public sites.

Through screenings, discussions with invited artists, supported readings, as well as presentations by curators, we will look at the effects site has on the content and perception of the moving image artwork. In one or more field trips we will acquaint ourselves with the primary experience how this affects the politic and perception of a work.

During the first half of the course, students will be introduced to the technical developments

and social history of moving-image exhibition spaces that have defined and influenced reception of the work. These spaces include galleries, cinemas, the internet, as well as projection in public spaces, broadcast television, and VR. Discussions will be supplemented by readings exploring relevant contemporary conceptual issues. The second half of the course will focus on practical issues facing students as artists working with moving image media including an examination of the world of film festivals; the roles of film curators, programmers and distributors; online distribution and various other exhibition platforms. Numerous works will be screened along with visits from artists and curators throughout the course.

Description

Archives and the Archive

The word "archive/s" holds a strange power these days. It is at once the title of organizations that preserve, arrange and provide access to historical materials, those collections of materials themselves, a synonym for memory, and a highfalutin word to legitimize your group of stuff (as if it needed anyone's legitimization!). - Dorothy Berry

In this project-based class we will engage with a range of definitions for the archive and for archives. Institutional archives are repositories of historical materials, organized in ways that in themselves produce meaning. They aim to preserve documents and objects, films and photographs with deliberation. They are also sites of power which can both amplify and suppress versions of the past. Personal archives can be albums of snapshots, folders of certificates, diplomas, deeds and postcards, film reels, broken pots and bits of embroidery. The body has been called an archive as it bears the marks, sensations and memory of its (one's) history. "The archive" is also used as a metaphor for memory. What does alternately contracting and expanding the definition of an archive/the archive tell us about history, memory and historiography? We will encounter work by artists who engage with archives, both in practice and in concept. We will also consider some fundamental issues surrounding archives: What constitutes an archive? Why do we create archives? What role do archives play in the writing of history? What are the power relationships visible (and invisible) in archives? What is of archival value? How do archivists decide what should be included and what excluded? How does an archival context create meaning? How do developments in technology affect archival practices? How do they redefine what an archive is? Are archives places of memory or forgetting? Related to these questions are those regarding image appropriation. How have artists historically worked with recycled images, both archival and "found"? What issues arise with appropriation? What happens to the meaning of an image when it is taken out of one context and placed in another? Is it

meaningful to distinguish between archival and found imagery? Why or why not? Activities will include readings, screenings and discussions. Students will be asked to visit a brick and mortar archive and to make a final project in response to the topics covered in class.

Credit Hours

Min Credit Hours:

3

Description

This class centers on the ways in which the idea of Latin America has been constructed through cinema, from the first productions that took place in the region (ca. 1930s) to our days. Looking at

a wide range of cinematic practices from both "Latin American" filmmakers, as well as "foreign" ones, this course asks: What is "Latin America"? What do we mean by "Latin American" cinema? Is there a "good" way to represent Latin America? Intended as a kaleidoscopic approach to the region where themes are privileged over chronologies, this survey course examines some of the discourses (cinematic, political, social, and so on) surrounding the region, as well as their ideological implications. Thus, one central question undergirding this class regards what is at stake in representation-representing oneself, representing the other, representing a region, a place. To delve further into these questions, screenings will be placed in conversation with companion readings written by key thinkers in the interdisciplinary fields of Film and Media Studies, Visual Culture Studies, Postcolonial Studies, Gender and Queer Studies, Urban Studies, among others. Ultimately, this course's overall aim is to complicate dominant ideas about what representation can and should do by looking at an idiosyncratic range of "Latin American" cinematic productions. No specialty experience is required and a number of places will be held open for Course Advising Day.

Description
Surveying the Black Futurist Movement is positioned at the intersection of various African American traditions including music, performance, poetry, and filmmaking. The course will vacillate between sound and cinema as we investigate the language and function of abstraction. Derived from an expanded meditation on Afrofuturism, conceptual art, and various aesthetic methods, this class will interrogate the radical and imaginative innovations of Black artists. The ideas explored by these auteurs, writers, and musicians rely on looking beyond traditional interpretations of time and space, fact and fiction, history and myth. Our listening will follow the moods of Alice Coltrane, Erykah Badu and Sun Ra. Our screenings will analyze the intentions of Bill Gunn, George Clinton, and Rickey Laurentiis. We will discuss a variety of questions, debate our own theories, and engage with artists, filmmakers, and critics.

Description

Urbanization and its overabundance of artificial light has left us blind to the wonders of the night sky, something our ancestors both took for granted and were profoundly influenced by. This course aims at regaining that awareness.

Once submitted, your request will be reviewed and if approved, it will be added to your schedule by the Registrar.

The entire sky then becomes a grand narrative filled with stories enacted by protagonists and antagonists portraying legendary tropes and mythologies. The course explores story structure through exposure to the history and practice of astronomy including how the constellations were named and placed in the heavens as well as the basic scientific models and theories that underpin modern astronomy. Students will invent cinematic story ideas through the process of looking at the canvas of stars in the night sky. Additionally, this process will examine the basic concepts of cinematography such as depth of field, lens perspectives, exposure and aesthetics of composition while gazing through a telescope or capturing nighttime images on field trips employing the basics of astrophotography and astrovideography. A creative project is required for completion of the course. Field trips will be a regular part of the class programming. The primary focus of the course will be observational and experiential.

Description

This is a hands-on filmmaking course for non majors . Students will learn the basic tools of film production including camera, lighting, sound and editing through hands-on production. The course will also go over safety and production protocols required to use School of FV equipment.

This course is a requirement for non majors who intend to participate further in FV live action production or project based courses. The course will grant limited access to FV equipment ONLY when a student is actively enrolled in a FV course.

Description

Close your eyes. Listen. Imagine a dark room, great acoustics and the best world wide sound art sounding around you. Let's feel how sound floods the room and guide us into an unexpected journey.

In this setup, how do you feel? What images come to your mind? What is your relationship with what you hear? And the most important question: how would you use this in your artistic creations?

Writing about our listening experience and answering this kind of questions enhances deep reflections about sound. A "diary" of every listening session will become our weekly routine.

Deep listening sessions in the Mix Theater and off-campus listening tours are some of the main methods of this course.

During these listening sessions, through lectures, we will also deeply reflect on what sound is, how we perceive it and its representation. You will be required to finish a piece (film, installation, art object, sound art) in order to put your listening experience and inspiration into practice.

Description

NOTE additional seats will be available for this course at course advising day.

Where do film ideas come from? How can we write and make short films that are not simply didactic, explanatory, or formulaic and instead start these projects from sensory experience, and observational based practices? This course takes a highly flexible, frequently collaborative approach, to the generative processes of writing and developing films. Through a cascade of short self-reflective experiential processes, we will engage in short-form "screenwriting" that includes micro-exercises in video making and sound recording with a focus on perceptual/cognitive phenomena rather than on formulaic style or techniques. Through this process oriented class, we will learn that film ideas are everywhere and that writer's block is an unproductive myth.

The title of the course includes the word "practice." By this I mean regular and consistent work, similar to how one learns a musical instrument or an athletic skill. This is also a team-based class meaning that much of the work we do in class is "circumstantially" collaborative in that we will freely work from and with other students' work. There will be in-class and out-of-class exercises that regularly require using other students' work as catalysts for your own. This is another strategy that diversifies our modes of engagement. To that end, students must complete weekly writing exercises, and/or visual or audio exercises, and/or researching material for ideas, and/or drawing/graphing --all as starting places, or what I call "disruptive nodes" for any kind of film.

This is a class in writing and development for the writer/director--the personal filmmaker. As such, we will include cinematic concerns such as cinematography, sound, blocking, and art design --aspects typically not included in screenwriting. Video sketches may be used to test out various aesthetic and conceptual ideas. In addition to half a dozen short weekly exercises, by course end, each student will have completed a final 7-10 page written document that includes a visual pre-production packet that may serve as the blueprint for a future project. This course is useful for anyone from any discipline with an interest in concept development related to the moving image and sound.

Once submitted, your request will be reviewed and if approved, it will be added to your schedule by the Registrar.

FSFV420B - World Building

General

Course Long Title
World Building

Subject Code Course Number
FSFV 420B

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
The term "world building" has often been used to describe the art direction decisions of video game designers or large studio film productions in the science-fiction/fantasy genres, but more recently this term is being used by individual artists making personal work in animation, comic art, and gallery installation. In this class, we will look at the process of creating short films, animated and live-action, as the building of a world governed by aesthetic "rules" determined by the artist from the onset. These rules may be dictated by constraints in software, available materials, time, but all these limitations will be consciously considered for the sake of conveying a more coherent vision. Questions posed to the class might be: How could the palette of the film be limited to 2 or 3 dominant colors? What effect does CG work that rejects the time consuming labor of photorealism create? How might sound be used to project a world extending far beyond the camera frame? Could the entirety of the narrative be expressed in a single shot composition?

We will explore world building in the manner that it is more dominantly discussed within science-fiction media (William Gibson, Jean "Moebius" Giraud), as well as utopic/dystopic visions imagined by feminist, queer and minority artists/art movements (Afrofuturism, Margaret Atwood, Jacolby Satterwhite, and more). We will discuss "internal logic" in contemporary narrative animated shorts, and also the idiosyncratic visual guidelines found in various works of outsider art.

These discussions will frame the way the class engages several practical demonstrations on producing and integrating animated and live-action assets. Students will be encouraged to use traditional hand-drawn media, Adobe After Effects, Flash, Photoshop, Premiere, and Cinema 4D with an emphasis on experimental ways to misuse, mask and mix these softwares to express singular aesthetics. This class is intended for animators and non-animators alike, so technical comprehension of a specific program is not compulsory.

Students will be assessed based on two individual projects - ideally one minute-long films - that will be workshoped repeatedly as an exercise to reduce aesthetic elements to the leanest amount necessary to express a coherent vision. Weekly class-wide critique sessions of works in progress are essential for this course. The purpose is to teach each artist how to articulate exactly why certain details in a film aren't working or why a certain world seems unbelievable rather than a vague "feeling" of incoherence.

FSFV420J - Color Correction and Grading

General

Course Long Title

Color Correction and Grading

Subject Code	Course Number
FSFV	420J

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

This is a practice based workshop class designed to introduce students to the manipulation of color in digital video. We will approach color correction and grading in through hands on experience with the understanding that the concepts behind the theory and technology of color are most useful and comprehensible through their application in filmmaking. Primarily using the tools in DaVinci Resolve, and with reference to cinematic examples, we will explore technical and theoretical fundamentals, differences between color correction and color grading, working with documentary and narrative, video and film, live action and animation, and explore common and advanced problems, considerations, and techniques in the color process. This course will include a variety of short assignments and two longer color grading projects. No prior experience with DaVinci Resolve is necessary, however students must already know the fundamentals of editing and cinematography. Additional seats are available on class sign up day.

Each student will require an external harddrive - recommended with a speed of 7200RPM (or SSD) and at least 1TB (~\$70-\$200).

Course Long Title

Decolonial Impressions

Subject Code	Course Number
FSFV	421C

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

The word 'decolonization' has found various definitions and meanings in the film world today-but what does the word really entail, and can cinema truly be decolonized? Can we successfully break away from the systems and structures that govern the moving image, or is it, ultimately, a utopian desire? Through screenings, readings, critical reflections, and discussions, we will delve into questions of representation, erasure and authorship. The students will all draw their own manifestos and toolkits for decolonial filmmaking, and then create a film using that text as a reference. The class will look at how mythologies, family archives, folklores, and imagined histories can aid us in our practice. Colonialism is not a thing of the past-and in our pursuit to create decolonial work, our first step must be to acknowledge its persisting existence.

FSFV421D - Hold the Line : Straight Ahead Animation

General

Course Long Title

Hold the Line : Straight Ahead Animation

Subject Code	Course Number
FSFV	421D

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Hold the Line is a workshop designed to explore the practice of straight-ahead animation as a powerful conceptual tool. This class encourages students to engage in prolonged improvisation, embrace spontaneity, intuition, and a sense of flow. Students will learn about, and experiment with, different methods of straight ahead animation, culminating in a final film. No previous experience or prerequisites required.

Each module incorporates various readings, in-class screening and workshops through which students will examine the output of artists who have engaged in durational and improvisational practices. Some of the works that will be explored include experimental film like Tehching Hsieh's 'One Year Performance (Time Clock Piece)', the pencil animations of Bruce Bickford, the paintings of Agnes Martin, the conceptual art of Lee Lozano, and the piano improvisations of Keith Jarrett.

This course is ideal for students who are interested in probing the intersection between personal expression and experimental film. By eliminating any narrative or structural constraints, and placing an emphasis on duration and experimentation, students will develop their own unique visual language and symbolism to gain a deeper understanding of their own filmmaking practices.

FSFV421E - Experimental Game Design

General

Course Long Title
Experimental Game Design

Subject Code Course Number
FSFV 421E

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1.5

Description

Experimental Game Design is an introductory course aimed at assisting students in exploring their unique artistic language in game-making, gaming concepts, psychology, aesthetics, and beyond. The definition of "games" is broad and inclusive, encompassing traditional gaming mediums, such as video and physical games, alongside non-traditional ones interwoven with game elements, such as interactive film, performance, books, and other art forms. Through lectures, activities, and self-guided projects, students will develop their personal artistic styles, fields of interest, and thematic concerns. At the conclusion of the course, students will have created playful and playable works, and will have

experienced integrating concepts of game design into their own practice. The course will emphasize how game and play can serve as a fresh and unique perspective to enrich their future creative path.

FSFV421F - Collaboration and Control

General

Course Long Title
Collaboration and Control

Subject Code Course Number
FSFV 421F

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1.5

Description

This class will focus on maintaining individuality while working without absolute creative control. The class is designed to reflect a director-client relationship and other collaborative partnerships with uneven power dynamics. Students will learn to protect and champion their ideas and garner an increased sense of value and appreciation in their preferred artform. These lessons will be learned mostly through practice and then supported by critique and discussion. This is a 7 week class. Each student will be expected to complete three "micro films" (15-30 seconds). Two of the films will have their own unique set of restrictions set in pre-determined hierarchical systems that allow students to exercise their skills as both director and directed. The third film is a personal project with parameters set by the student at the start of the semester. All films should be working with similar aesthetics and methods in hopes that students will gain a firmer grasp of their own artistic practice in a restricted environment. Assignments are specific to this class. Project turnaround will be quick, so students should be comfortable with their preferred software and equipment.

Description

What does it mean to consider the gaze of the non-human, or to prioritize an anti-human gaze? This workshop and screening course will unpack the ways the camera has been mobilized by the human at the exclusion of the "more-than-human" (a term that turns away from anthropocentrism and proposes complex entanglements and reparative attention across species and beings). We will inhabit the gap between theory and practice in filmmaking and use thinkers in queer ecology, geography, and language studies to guide us as we explore submerged spaces, puncturing the homogeneity of authoritarian noise. To set the terms for the course, we will look at how the camera operates in a hierarchy that first privileges the white, male, able-bodied, upper class heterosexual human, followed by those who fall outside those categories, then animals, plants, fungi, microbes, non-living objects, and abstract concepts. We will interrogate representations of our ongoing contribution to the Anthropocene. Next, we will search for horizontal affinities in the wild. In an age of environmental crisis, conversations are developing around the ways in which we understand and represent the more-than-human world-- what do these representations have to do with how we conceive of ourselves, and how can we speculate on a comprehensible future? Art historian T.J. Demos describes the "aesthetics of the Anthropocene" as abstract visual pleasure that exceeds human comprehension. We will call for the development of creative alternatives for representations of nature that are based in relationality between humans and objects, and recognize and explore artistic methods to center the active participation of nonhuman forces in events.

The focus of More-Than-Human Animacy and the Moving Image will primarily revolve around viewing and making experimental documentary, multi-media installation and sound projects. Students should expect readings, in-class and assigned screenings, and weekly writing assignments. A midterm and final moving-image or spatialized sound project will be required. The course will culminate not in an answer to the questions we ask, but to encourage students to think critically and make imaginatively.

Description

The Production Technician Course - formerly Video Studio TA Class - is taught in conjunction with the Post Production Student Technician Course and Sound Student Technician Course. An objective of these courses is to expand the knowledge-base of the student body in the more technical aspects of filmmaking. Another objective of this group of courses is to give students the opportunity to assist others as a Student Technician. By assisting others, students will gain a hands-on understanding of contemporary Production, Post Production, and Sound paradigms

and procedures. While successful completion of these courses does qualify you to work as a Student Technician in the respective area of the course, it does not guarantee employment. This course is designed to create a knowledge base both specific to the functions of the CalArts production studios and usable in any film or electronic motion imaging production environment that will allow the student to function as an independent filmmaker and proactively solve problems encountered during production.

Description
Only students from the School of Dance and the School of Film/Video are eligible to enroll.

CineDance is a production-oriented course that motivates the creative collaboration between choreographers and filmmakers. Dance and Film/Video students will work in pairs to produce two One-week Films and one Final Film project.

This course focuses on exploring the shared languages of dance and film- movement, space and time- and the compositional strategies common to both. Learning from each other's artistic processes, students will build the foundation of a movement-based filmmaking process that pushes the boundaries of dance films and narrative films, alike. Students will learn how to compose cinematic scenes that communicate stories through the movement of the bodies inside the frame, as well as the movement of the frame itself. Emphasis will be put on storyboarding movement sequences, encouraging students to indulge in composing choreographies that can only be possible on the cinematic screen.

For the production of their film projects, all students will be expected to participate as filmmakers and performers and will develop skills and knowledge across the two disciplines.

Hot Sad White Guys: Race, Sexuality,Film

Subject Code	Course Number
FSFV	444

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
Sad Hot White Guys is a screening/discussion course exploring gender, race, and sexuality through archetypal media representations of white men. From military propaganda to the politics of pretty, Beau Travail to the white guy of the month on Tiktok; we're bringing a queer gaze to the socio-political implications of hypermasculine white figures in media to expand our definitions and representations of masculinity. Student work will include weekly writing, essays, and film/video projects.

MILITARY PROPOGANDA. SENSUAL OPTIMIZATION. GENDER ENVY. This course aims to connect films and writings across genres under the umbrella of a certain kind of racial and gendered beautification. From the intentionally homoerotic Beau Travail and Beach Rats to the laughably macho Top Gun and Rambo and perfectly calibrated sensitivity of Paul Mescal in Aftersun, these works rely on the figure of the "movie star", a traditionally or untraditionally attractive white man who broods and/or shoots his way into the viewer's heart. At one extreme, these uncanny beauties, arguably fascist in their perfection (shockingly muscular, shimmering from sweat, and threatening in presence) exact copious amounts of violence (revenge fantasies, military operations, both if we're lucky) on "deserving victims". At the other extreme, a lithe, lean sad boy self-flagellates through an emotional repression of his own design. Across genres (action, coming of age, etc.) these dynamics of violence and emotional inaccessibility craft a distinct archetype in cinema. The Sad Hot White Guy.

While these tropes have historically been observed as subliminal homoerotic exercises or straight pornographic male fantasies, I posit that through a femme, Queer, and Black gaze, these films occupy a space in media of simultaneous threat and aspiration. They're military and patriarchal propaganda. They're indulgence. They're camp. They're dogma, but they're also kind of fun! They invite us to stare, gawk, even be, but never touch or understand. In its exaggerated perfection, this archetype becomes an Other that marginalized viewers can inhabit and claim as their own.

FSFV445 - Making Music Videos

General

Course Long Title
Making Music Videos

Subject Code	Course Number
FSFV	445

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
Students in this class will complete a number of collaborative music video production projects in groups that include students from the schools of music, dance, film/video and experimental animation.

Music videos can be a wonderful tool for

filmmakers to explore and expand on their art of image-making through rhythm and gesture, and for musicians to explore how their sonic compositions can be enlivened by moving images that respond to what they hear.

In this production class, we will start by looking at music videos to develop a critical sense of the conventions and challenges of the media, in order to confront, interrogate and re-envision them. Students will be encouraged to conceive of music video both as an aesthetic entity as well as an opportunity to govern the narrative of the song, and to push their audio-visual ideas further through the elaboration of technique, language and experimentation.

Considering narrative as our first approach, we will explore how meaning is conveyed, either as a reflection of or in contrast to the lyrics and narrative content of the song, taking in mind various levels of representation: literal, poetic, metaphorical, and surreal.

We will also explore Visual Music and consider how tempo, rhythm, phrasing, tonality and structure can create a dialogue with the rhythmic and structural components of the moving image by controlling both the editing and the movement inside and outside the frame. The possibility of synesthesia and abstraction within music video practice will allow students to research deeply and boundlessly into movement and editing in both the audio and visual realm, gaining tools they can later apply to their own filmmaking, composition and choreography.

The class will put a strong emphasis on pre-production, creative development, and treatment crafting, with talks by visiting music video artists who will elaborate on industry practice. We will look at music video treatments from various artists to demonstrate how directors have planned for their shoots through animatics, references and mood-boards. We will also host technical workshops that demonstrate ways of shooting live music and how to direct play-backs and/or live performances in unconventional ways.

After working on different groups through the thematic exercises, each collaborative group (which will include musicians, dancers and film-makers) will create their own music video project, starting with the development of a treatment, through planning, shooting and editing their project.

This class is open to BFA 2/3/4 students in the Schools of Music, Dance and Film/Video and Experimental Animation.

Description

Are you graduating and finishing a project? Do you want to do the sound design of your film / installation but it's been too long since you used Pro Tools the last time? Do you have a significant project that is awaiting you to finally do the sound design? This is a class for you.

This class will open with a quick review of Pro Tools, addressing doubts and questions you may have and demonstrating new techniques. After that, we will talk about the different approaches to tackle sound design for the projects we have in the group. With workshops inspired by and for the class projects, we will work on how sound is a key element to achieve and communicate what you want.

Towards the end, the format of the course will shift to individual and group critiques. And if your project is ready, we will prepare it for mixing! *Students preparing and/or in post production their thesis are encouraged to enroll.

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
In this class students will build an analog voltage controlled sound synthesizer from scratch using a do-it-yourself kit. Over the course of the semester, we will collaboratively construct the 9 modules that constitute this system employing standard safe use practices for working with lead-based solder. We will explore the electronics behind each circuit, learn the principles of synthesis, and discover the fundamental building blocks of sound along the way. We will also discuss ways of working with moving images that run parallel to the processes that govern sound synthesis. Ultimately, we will build and learn how to play our own instrument, one that can theoretically make any sound, articulate any voice.

Students will have solo and small-group assignments, with a final project that uses the synthesizer to create an original soundtrack for a film, video, or expanded cinema performance. Previous foundational sound production experience needed.

Description

This course will introduce students from across the Institute to the basic principles of observational life drawing. We will focus on drawing many forms of animate and inanimate subject matter, including human models. There are no prerequisites, and we welcome students who have no prior experience with life drawing.

We will begin by building a basic understanding of light and shadow, progress to applying this understanding to basic shapes, and then to the human form. Students can expect to explore their artistic skills, and express the world around them through the techniques taught in class. The skills practiced in this class will be applicable across a range of métiers at CalArts.

Description

This is a hands-on filmmaking course for non majors . Students will learn the basic tools of film production including camera, lighting, sound and editing through hands-on production. The course will also go over safety and production protocols required to use School of FV equipment.

This course is a requirement for non majors who intend to participate further in FV live action production or project based courses. The course will grant limited access to FV equipment ONLY when a student is actively enrolled in a FV course.

Description

Close your eyes. Listen. Imagine a dark room, great acoustics and the best world wide sound art sounding around you. Let's feel how sound floods the room and guide us into an unexpected journey. In this setup, how do you feel? What images come to your mind? What is your relationship with what you hear? And the most important question: how would you use this in your artistic creations? Writing about our listening experience and answering this kind of questions enhances deep reflections about sound. A "diary" of every listening session will become our weekly routine.

Deep listening sessions in the Mix Theater and off-campus listening tours are some of the main methods of this course.

During these listening sessions, through lectures, we will also deeply reflect on what sound is, how we perceive it and its representation. You will be required to finish a piece (film, installation, art object, sound art) in order to put your listening experience and inspiration into practice.

Description

NOTE additional seats will be available for this course at course advising day.

Where do film ideas come from? How can we write and make short films that are not simply didactic, explanatory, or formulaic and instead start these projects from sensory experience, and observational based practices? This course takes a highly flexible, frequently collaborative approach, to the generative processes of writing and developing films. Through a cascade of short self-reflective experiential processes, we will engage in short-form "screenwriting" that includes micro-exercises in video making and sound recording with a focus on perceptual/cognitive phenomena rather than on formulaic style or techniques. Through this process oriented class, we will learn that film ideas are everywhere and that writer's block is an unproductive myth.

The title of the course includes the word

"practice." By this I mean regular and consistent work, similar to how one learns a musical instrument or an athletic skill. This is also a team-based class meaning that much of the work we do in class is "circumstantially" collaborative in that we will freely work from and with other students' work. There will be in-class and out-of-class exercises that regularly require using other students' work as catalysts for your own. This is another strategy that diversifies our modes of engagement. To that end, students must complete weekly writing exercises, and/or visual or audio exercises, and/or researching material for ideas, and/or drawing/graphing --all as starting places, or what I call "disruptive nodes" for any kind of film.

This is a class in writing and development for the writer/director--the personal filmmaker. As such, we will include cinematic concerns such as cinematography, sound, blocking, and art design -- aspects typically not included in screenwriting. Video sketches may be used to test out various aesthetic and conceptual ideas. In addition to half a dozen short weekly exercises, by course end, each student will have completed a final 7-10 page written document that includes a visual pre-production packet that may serve as the blueprint for a future project. This course is useful for anyone from any discipline with an interest in concept development related to the moving image and sound.

Description
For graduate students with an interest in developing their own courses/curricula in an experimental laboratory context for a possible career or side-hustle in education. This course takes an expansive view toward adaptive and innovative learning environments as realms of creative exploration and experimentation.

Students will have an opportunity to develop and test their own and their peers' course ideas, as well as more broad integrative curriculum ideas in a supportive laboratory environment. This course could serve a variety of goals: academic job talk prep (an added plus for a candidate with a well

formed class), Post Graduate Teaching Fellowship proposals, Winter Session course proposals, as well as seeds to develop truly innovative curricula in what may very well be a radically different academic landscape post COVID19. This is not a course in how to teach courses that already exist in a curriculum. Our goal will be to develop personal and unique learning situations that embrace a diversity of teaching and learning modes as we integrate a broad range of active tools available to teachers and learners in 2021 and beyond.

The best courses are active experiments in discovery and growth around a particular idea or a cluster of ideas. The challenge then, is in designing curricula that stay flexible and alive while maintaining its intended trajectory. What is the balance between anarchy and control -- both being necessary in the right balance to create the richest learning situations. Many of the educational structures we have existed in tend to induce prejudice toward what "can and cannot be done," and what "should and should not be done" in a course. We must disrupt our conditioned ways of learning as we discuss strategies to become effective peer leaders in the classroom; in other words, understanding and valuing ourselves in the role of teachers as co-learners.

There are always administrative/institutional pressures that come to bear on any course. I will lead discussions on the complexities and potentials of these administrative structures and how they rarely, if one knows how to understand them, prevent the implementation of innovation and non-standard teaching practices. Productive transgression is often a good thing. Explaining that to administrators is a skill to learn. This means we will discuss how to work within the realities of existing structures and also how to be a part of the innovation needed to bring these institutions toward a more productive flexibility.

Course Long Title

World Building

Subject Code

FSFV

Course Number

620B

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

3

Description

The term "world building" has often been used to describe the art direction decisions of video game designers or large studio film productions in the science-fiction/fantasy genres, but more recently this term is being used by individual artists making personal work in animation, comic art, and gallery installation. In this class, we will look at the process of creating short films, animated and live-action, as the building of a world governed by aesthetic "rules" determined by the artist from the onset. These rules may be dictated by constraints in software, available materials, time, but all these limitations will be consciously considered for the sake of conveying a more coherent vision. Questions posed to the class might be: How could the palette of the film be limited to 2 or 3 dominant colors? What effect does CG work that rejects the time consuming labor of photorealism create? How might sound be used to project a world extending far beyond the camera frame? Could the entirety of the narrative be expressed in a single shot composition?

We will explore world building in the manner that it is more dominantly discussed within science-fiction media (William Gibson, Jean "Moebius" Giraud), as well as utopic/dystopic visions imagined by feminist, queer and minority artists/art movements (Afrofuturism, Margaret Atwood, Jacolby Satterwhite, and more). We will discuss "internal logic" in contemporary narrative animated shorts, and also the idiosyncratic visual guidelines found in various works of outsider art.

These discussions will frame the way the class engages several practical demonstrations on producing and integrating animated and live-action assets. Students will be encouraged to use traditional hand-drawn media, Adobe After Effects, Flash, Photoshop, Premiere, and Cinema 4D with an emphasis on experimental ways to misuse, mask and mix these softwares to express singular aesthetics. This class is intended for animators and non-animators alike, so technical comprehension of a specific program is not compulsory.

Students will be assessed based on two individual projects - ideally one minute-long films - that will be workshopped repeatedly as an exercise to reduce aesthetic elements to the leanest amount necessary to express a coherent vision. Weekly class-wide critique sessions of works in progress are essential for this course. The purpose is to teach each artist how to articulate exactly why certain details in a film aren't working or why a certain world seems unbelievable rather than a vague "feeling" of incoherence.

FSFV620J - Color Correction and Grading

Course Long Title

Color Correction and Grading

Subject Code	Course Number
FSFV	620J

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description
This is a practice based workshop class designed to introduce students to the manipulation of color in digital video. We will approach color correction and grading in through hands on experience with the understanding that the concepts behind the theory and technology of color are most useful and comprehensible through their application in filmmaking. Primarily using the tools in DaVinci Resolve, and with reference to cinematic examples, we will explore technical and theoretical fundamentals, differences between color correction and color grading, working with documentary and narrative, video and film, live action and animation, and explore common and advanced problems, considerations, and techniques in the color process. This course will include a variety of short assignments and two longer color grading projects. No prior experience with DaVinci Resolve is necessary, however students must already know the fundamentals of editing and cinematography. Additional seats are available on class sign up day.

Each student will require an external harddrive - recommended with a speed of 7200RPM (or SSD) and at least 1TB (~\$70-\$200).

Course Long Title

Decolonial Impressions

Subject Code	Course Number
FSFV	621C

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
The word 'decolonization' has found various definitions and meanings in the film world today-but what does the word really entail, and can cinema truly be decolonized? Can we successfully break away from the systems and structures that govern the moving image, or is it, ultimately, a utopian desire? Through screenings, readings, critical reflections, and discussions, we will delve into questions of representation, erasure and authorship. The students will all draw their own manifestos and toolkits for decolonial filmmaking, and then create a film using that text as a reference. The class will look at how mythologies, family archives, folklores, and imagined histories can aid us in our practice. Colonialism is not a thing of the past-and in our pursuit to create decolonial work, our first step must be to acknowledge its persisting existence.

FSFV621D - Hold the Line : Straight Ahead Animation

General

Course Long Title

Hold the Line : Straight Ahead Animation

Subject Code	Course Number
FSFV	621D

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Hold the Line is a workshop designed to explore the practice of straight-ahead animation as a powerful conceptual tool. This class encourages students to engage in prolonged improvisation, embrace spontaneity, intuition, and a sense of flow. Students will learn about, and experiment with, different methods of straight ahead animation, culminating in a final film. No previous experience or prerequisites required.

Each module incorporates various readings, in-class screening and workshops through which students will examine the output of artists who have engaged in durational and improvisational practices. Some of the works that will be explored include experimental film like Tehching Hsieh's 'One Year Performance (Time Clock Piece)'; the pencil animations of Bruce Bickford, the paintings of Agnes Martin, the conceptual art of Lee Lozano, and the piano improvisations of Keith Jarrett.

This course is ideal for students who are interested in probing the intersection between personal expression and experimental film. By eliminating any narrative or structural constraints, and placing an emphasis on duration and experimentation, students will develop their own unique visual language and symbolism to gain a deeper understanding of their own filmmaking practices.

FSFV621E - Experimental Game Design

General

Course Long Title

Experimental Game Design

Subject Code Course Number
FSFV 621E

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1.5

Description

Experimental Game Design is an introductory course aimed at assisting students in exploring their unique artistic language in game-making, gaming concepts, psychology, aesthetics, and beyond. The definition of "games" is broad and inclusive, encompassing traditional gaming mediums, such as video and physical games, alongside non-traditional ones interwoven with game elements, such as interactive film, performance, books, and other art forms. Through lectures, activities, and self-guided projects, students will develop their personal artistic styles, fields of interest, and thematic concerns. At the conclusion of the course, students will have created playful and playable works, and will have experienced integrating concepts of game design into their own practice. The course will emphasize how game and play can serve as a fresh and unique perspective to enrich their future creative path.

Course Long Title

Collaboration and Control

Subject Code Course Number
FSFV 621F

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:
1.5

Description

This class will focus on maintaining individuality while working without absolute creative control. The class is designed to reflect a director-client relationship and other collaborative partnerships with uneven power dynamics. Students will learn to protect and champion their ideas and garner an increased sense of value and appreciation in their preferred artform. These lessons will be learned mostly through practice and then supported by critique and discussion. This is a 7 week class. Each student will be expected to complete three "micro films" (15-30 seconds). Two of the films will have their own unique set of restrictions set in pre-determined hierarchical systems that allow students to exercise their skills as both director and directed. The third film is a personal project with parameters set by the student at the start of the semester. All films should be working with similar aesthetics and methods in hopes that students will gain a firmer grasp of their own artistic practice in a restricted environment. Assignments are specific to this class. Project turnaround will be quick, so students should be comfortable with their preferred software and equipment.

Description

What does it mean to consider the gaze of the non-human, or to prioritize an anti-human gaze? This workshop and screening course will unpack the ways the camera has been mobilized by the human at the exclusion of the "more-than-human" (a term that turns away from anthropocentrism and proposes complex entanglements and reparative attention across species and beings). We will inhabit the gap between theory and practice in filmmaking and use thinkers in queer ecology, geography, and language studies to guide us as we explore submerged spaces, puncturing the homogeneity of authoritarian noise. To set the terms for the course, we will look at how the camera operates in a hierarchy that first privileges the white, male, able-bodied, upper class heterosexual human, followed by those who fall outside those categories, then animals, plants, fungi, microbes, non-living objects, and abstract concepts. We will interrogate representations of our ongoing contribution to the Anthropocene. Next, we will search for horizontal affinities in the wild. In an age of environmental crisis, conversations are developing around the ways in which we understand and represent the more-than-human world-- what do these representations have to do with how we conceive of ourselves, and how can we speculate on a comprehensible future? Art historian T.J. Demos

describes the "aesthetics of the Anthropocene" as abstract visual pleasure that exceeds human comprehension. We will call for the development of creative alternatives for representations of nature that are based in relationality between humans and objects, and recognize and explore artistic methods to center the active participation of nonhuman forces in events.

The focus of More-Than-Human Animacy and the Moving Image will primarily revolve around viewing and making experimental documentary, multi-media installation and sound projects. Students should expect readings, in-class and assigned screenings, and weekly writing assignments. A midterm and final moving-image or spatialized sound project will be required. The course will culminate not in an answer to the questions we ask, but to encourage students to think critically and make imaginatively.

Description
The Production Technician Course - formerly Video Studio TA Class - is taught in conjunction with the Post Production Student Technician Course and Sound Student Technician Course. An objective of these courses is to expand the knowledge-base of the student body in the more technical aspects of filmmaking. Another objective of this group of courses is to give students the opportunity to assist others as a Student Technician. By assisting others, students will gain a hands-on understanding of contemporary Production, Post Production, and Sound paradigms and procedures. While successful completion of these courses does qualify you to work as a Student Technician in the respective area of the course, it does not guarantee employment. This course is designed to create a knowledge base both specific to the functions of the CalArts production studios and usable in any film or electronic motion imaging production environment that will allow the student to function as an independent filmmaker and proactively solve problems encountered during production.

Description

Only students from the School of Dance and the School of Film/Video are eligible to enroll.

CineDance is a production-oriented course that motivates the creative collaboration between choreographers and filmmakers. Dance and Film/Video students will work in pairs to produce two One-week Films and one Final Film project.

This course focuses on exploring the shared languages of dance and film- movement, space and time- and the compositional strategies common to both. Learning from each other's artistic processes, students will build the foundation of a movement-based filmmaking process that pushes the boundaries of dance films and narrative films, alike. Students will learn how to compose cinematic scenes that communicate stories through the movement of the bodies inside the frame, as well as the movement of the frame itself. Emphasis will be put on storyboarding movement sequences, encouraging students to indulge in composing choreographies that can only be possible on the cinematic screen.

For the production of their film projects, all students will be expected to participate as filmmakers and performers and will develop skills and knowledge across the two disciplines.

Min Credit Hours:
3

Description

Sad Hot White Guys is a screening/discussion course exploring gender, race, and sexuality through archetypal media representations of white men. From military propaganda to the politics of pretty, Beau Travail to the white guy of the month on Tiktok; we're bringing a queer gaze to the socio-political implications of hypermasculine white figures in media to expand our definitions and representations of masculinity. Student work will include weekly writing, essays, and film/video projects.

MILITARY PROPOGANDA. SENSUAL OPTIMIZATION. GENDER ENVY. This course aims to connect films and writings across genres under the umbrella of a certain kind of racial and gendered

beautification. From the intentionally homoerotic Beau Travail and Beach Rats to the laughably macho Top Gun and Rambo and perfectly calibrated sensitivity of Paul Mescal in Aftersun, these works rely on the figure of the "movie star", a traditionally or untraditionally attractive white man who broods and/or shoots his way into the viewer's heart. At one extreme, these uncanny beauties, arguably fascist in their perfection (shockingly muscular, shimmering from sweat, and threatening in presence) exact copious amounts of violence (revenge fantasies, military operations, both if we're lucky) on "deserving victims". At the other extreme, a lithe, lean sad boy self-flagellates through an emotional repression of his own design. Across genres (action, coming of age, etc.) these dynamics of violence and emotional inaccessibility craft a distinct archetype in cinema. The Sad Hot White Guy.

While these tropes have historically been observed as subliminal homoerotic exercises or straight pornographic male fantasies, I posit that through a femme, Queer, and Black gaze, these films occupy a space in media of simultaneous threat and aspiration. They're military and patriarchal propaganda. They're indulgence. They're camp. They're dogma, but they're also kind of fun! They invite us to stare, gawk, even be, but never touch or understand. In its exaggerated perfection, this archetype becomes an Other that marginalized viewers can inhabit and claim as their own.

FSFV645 - Making Music Videos

General

Course Long Title

Making Music Videos

Subject Code	Course Number
FSFV	645

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

Students in this class will complete a number of collaborative music video production projects in groups that include students from the schools of music, dance, film/video and experimental animation.

Music videos can be a wonderful tool for filmmakers to explore and expand on their art of image-making through rhythm and gesture, and for musicians to explore how their sonic compositions can be enlivened by moving images that respond to what they hear.

In this production class, we will start by looking

at music videos to develop a critical sense of the conventions and challenges of the media, in order to confront, interrogate and re-envision them. Students will be encouraged to conceive of music video both as an aesthetic entity as well as an opportunity to govern the narrative of the song, and to push their audio-visual ideas further through the elaboration of technique, language and experimentation.

Considering narrative as our first approach, we will explore how meaning is conveyed, either as a reflection of or in contrast to the lyrics and narrative content of the song, taking in mind various levels of representation: literal, poetic, metaphorical, and surreal.

We will also explore Visual Music and consider how tempo, rhythm, phrasing, tonality and structure can create a dialogue with the rhythmic and structural components of the moving image by controlling both the editing and the movement inside and outside the frame. The possibility of synesthesia and abstraction within music video practice will allow students to research deeply and boundlessly into movement and editing in both the audio and visual realm, gaining tools they can later apply to their own filmmaking, composition and choreography.

The class will put a strong emphasis on pre-production, creative development, and treatment crafting, with talks by visiting music video artists who will elaborate on industry practice. We will look at music video treatments from various artists to demonstrate how directors have planned for their shoots through animatics, references and mood-boards. We will also host technical workshops that demonstrate ways of shooting live music and how to direct play-backs and/or live performances in unconventional ways.

After working on different groups through the thematic exercises, each collaborative group (which will include musicians, dancers and film-makers) will create their own music video project, starting with the development of a treatment, through planning, shooting and editing their project.

This class is open to BFA 2/3/4 students in the Schools of Music, Dance and Film/Video and Experimental Animation.

Description

Are you graduating and finishing a project? Do you want to do the sound design of your film / installation but it's been too long since you used Pro Tools the last time? Do you have a significant project that is awaiting you to finally do the sound design? This is a class for you.

This class will open with a quick review of Pro Tools, addressing doubts and questions you may have and demonstrating new techniques. After that, we will talk about the different approaches to tackle sound design for the projects we have in the group. With workshops inspired by and for the class projects, we will work on how sound is a key element to achieve and communicate what you want.

Towards the end, the format of the course will shift to individual and group critiques. And if your project is ready, we will prepare it for mixing! *Students preparing and/or in post production their thesis are encouraged to enroll.

Registration Restrictions

RGAFV - School of Film/Video Students Only

FSFV681 - Sound Editing & Mixing

General

Course Long Title

Sound Editing & Mixing

Subject Code	Course Number
FSFV	681

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Course available by Permission of Instructor only.
This course covers practical and aesthetic surround sound design and technical issues. Students will be able to see how their edits translate to a mixing facility. Covers intermediate sound design and high-end Pro Tools editing, including use of plug-ins to premix a soundtrack.

FSFV683 - This Machine Kills Fascists

General

Course Long Title
This Machine Kills Fascists

Subject Code	Course Number
FSFV	683

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
In this class students will build an analog voltage controlled sound synthesizer from scratch using a do-it-yourself kit. Over the course of the semester, we will collaboratively construct the 9 modules that constitute this system employing standard safe use practices for working with lead-based solder. We will explore the electronics behind each circuit, learn the principles of synthesis, and discover the fundamental building blocks of sound along the way. We will also discuss ways of working with moving images that run parallel to the processes that govern sound synthesis. Ultimately, we will build and learn how to play our own instrument, one that can theoretically make any sound, articulate any voice.

Students will have solo and small-group assignments, with a final project that uses the synthesizer to create an original soundtrack for a film, video, or expanded cinema performance. Previous foundational sound production experience needed.

FSFV699 - Independent Project

General

Course Long Title
Independent Project

Subject Code	Course Number
FSFV	699

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:	Max Credit Hours:
0.5	2

Description
Available by permission of instructor only.

Under the direction of a specific faculty member, students complete projects defined in a contractual agreement drawn at the beginning of each semester.

This agreement, including frequency of meetings and unit value, will be drawn up on an Independent Study Contract.

The Independent Study contract can be found here:

https://calarts.formstack.com/workflows/independent_study_project_contract

Once submitted, your request will be reviewed and if approved, it will be added to your schedule by the Registrar.

Description
The goal of this course is to help Character Animation students prepare for a career in animation, with a focus on events like CalArts Animation Portfolio Day, and other similar industry-focused career fairs. We'll discuss best practices for portfolios/reels, resumes and cover letters, and hear from industry professionals about the ever-evolving landscape of the job search. Being prepared can have a memorable impression on hiring managers, recruiters, agents or artistic leads. We will have 1:1 time to help students refine their personal voice as they prepare for applying to internships, trainee / apprenticeships, entry level or freelance jobs.

Description
This course will address composition with an emphasis on visual storytelling. Together, cinematography and composition deliver vital subtext to every shot and scene. Placement, scale, shape, movement, tonal value and contrast are some of the factors that can help a shot communicate its visual message most effectively. We will cover these vital factors to demonstrate how they can improve the clarity of your visual expression.

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

In this class, we will take everything you already know (and are currently learning) about animation and apply it to the creation of children's books. Knowledge of story, character, composition, acting and design are all necessary to make a children's book, just as they are in animation. Students will be expected to choose a story and prepare it as if they were pitching their book idea to a publisher. We will go through the entire process of creating a book to "pitch", from writing out the text to making thumbnail sketches to the finished artwork. Students will create a cover image plus two finished interior illustrations by the end of the semester. There will be lecture, group discussion, and critique for each stage of the process.

Min Credit Hours:
2

Description
This course focuses on developing individual workflows to take character and/or environment designs from concept to completion using CG rendering. Looks may focus on the photoreal to the highly stylized, as per the student's individual goals. Using examples and design assignments, students will be challenged to create their own designs and realize them using a CG platform in conjunction with traditional art-making practices. Using Maya with mental ray and V-Ray, students will leverage textures and materials to better define the look of their designs and flesh out final looks for CG or traditional animations and films.

Description

In this class, we will take everything you already know (and are currently learning) about animation and apply it to the creation of children's books. Knowledge of story, character, composition, acting and design are all necessary to make a children's book, just as they are in animation. Students will be expected to choose a story and prepare it as if they were pitching their book idea to a publisher. We will go through the entire process of creating a book to "pitch", from writing out the text to making thumbnail sketches to the finished artwork. Students will create a cover image plus two

finished interior illustrations by the end of the semester. There will be lecture group discussion and critique for each stage of the process.

Description

Course open to BFA1 Experimental Animation students only.

The Program in Experimental Animation embraces the practice of educating students in a broad animation aesthetic. Beginning in the first year, students are encouraged to expand and evolve their skills so they may bring greater expressiveness and innovation to all of their work. Over the course of the semester, students will be introduced to the major processes and additional relevant techniques inherent in the art and craft of drawn animation, multi-plane animation and stop-motion puppet animation. Through lectures and screenings, students will explore animation fundamentals including pose-to-pose, straight ahead, timing, weight, rhythm, composition, design, and performance. Classes will employ a hands-on style workshop approach in which students will be expected to actively create and critique during every class meeting as well as in individual assignments. This structure will help students acquire a direct understanding of each process, as well as the feel and character of each technique.

Description
This course studies the essence of animal movement and character. Students will present studies of their own choosing, selecting a myth or short story to analyze the function, personality, and appeal of one type of animal/non-human, including mammals, birds, reptiles, or insects, for example. What do they eat? How do their offspring look? The class will be informed by the presentations. Life drawing of one or more animals will be provided. Students will also provide historical images and videos of their selected creature, both from real life and animated. The class will discuss locomotion and the relationship between humans and the creature. Why do we fear them? Why do we love them? The final project will be a comparative study of the creature in various forms. Graduate students also create two 5-10 second animated versions. For extra credit, students can act out their creature in a short live performance. Final project is a written and drawn journal of course content, including an approximately 500 word paper and drawings inspired by student presentations.

Rigged & Blended SMALL PARTS-BIG PICTURE

Subject Code **Course Number**
FVEA 214

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

This course prepares the students' mindsets to explore rigs as a vital part of creating animated worlds, characters, and objects. Students will act out green screen performances with their bodies to study a hybrid approach to motion and choreography. Capturing motions with SLR cameras, students will map them onto 2D and 3D rigs within Aftereffects and Blender. While mastering the rigging fundamentals, students will reflect on how different bone constraints affect their choreography's forward and inverse kinematics. These principles could be applied and translated across multiple mediums, from handmade puppets, sets, and objects to 2D cutouts to digital assets, including scans and 3D sculptures and models. Over a series of lab demonstrations, workshops, individual projects, and assignments, students will explore the mechanics of locomotion rigging. Course level intermediate knowledge of Blender required.

FVEA217 - 3D Modeling for Artists

Course Long Title
3D Modeling for Artists

Subject Code	Course Number
FVEA	217

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

As a course designed for artists to intervene in the computer-generated-imaging workflow, we will explore pathways out of traditional drawing and animation histories and into coded, nodal, and other algorithmic visualization methods. This course offers a comprehensive set of tools for artists to construct computer generated models from the ground up.

The workflows taught in this course will be cumulative and complementary. They include sub-division surface modeling, 3D texturing and UV mapping, texture painting, 3D scanning and retopology, 3D sculpting, and lighting and rendering for photorealistic, procedural, and toon shading.

Students will develop the ability to operate between the programs Modo, Blender, Zbrush, and Octane, while learning key supporting technologies, such as taking photographs for reference images and photogrammetry, compositing render layers, and encoding image sequences into standard formats and moving image-wrappers.

Experimental Characters

Subject Code	Course Number
FVEA	225

School(s)
School of Film/Video

Program(s)
Experimental Animation

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

This course examines avant-garde approaches to character animation, emphasizing experimental forms, unconventional movement, and nonlinear storytelling. Through weekly lectures and discussions, we will broaden our understanding of characters by drawing on concepts rooted in a wide range of disciplines, including literature, psychology, and design. Screenings will showcase animated films that challenge traditions and push the boundaries of what a character can be. Assignments will encourage students to rigorously investigate their own characters' movement conventions and experiment with the ways physicality, rhythm, timing, and environment can be used to convey complex emotional truths.

Description

Through discussion, critique, technical workshops, and labs, in this course we will develop an understanding of the rich meaning-potential of sound, made even more powerful in its relationship to moving images. We will analyze the nature of sound perception. We will analyze the function of sound recorders and microphones. We will learn the basics of sound editing and mixing using ProTools as a dynamic and exciting audio tool. We will do this all through lecture/discussions, workshops, creative sound design assignments, readings, technical training, and lab work.

General

Course Long Title
Worldbuilding

Subject Code Course Number
FVEA 302

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

Historically, "worldbuilding" referred to the art direction choices made by video game designers and large film studios in creating science fiction and fantasy genres. Recently, however, the term has evolved, with artists using it to describe the process of crafting their own internally consistent universes. In this course, students will explore the work of contemporary artists who transcend everyday life to create rich fictions filled with interconnected characters, stories, symbols, and themes. We will examine the installations and films of artists such as Hito Steyerl, Ian Cheng, Shana Moulton, Miwa Metreyek, Nathalie Djurberg, Jacolby Satterwhite, and William Kentridge. Through a series of short assignments, students will experiment with worldbuilding techniques to design their own fictional environments and establish the logic behind them. The course will culminate in a final installation project that incorporates mixed media techniques.

Course Long Title
Exp Animation: Direct Techniques

Subject Code Course Number
FVEA 305

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

This class is Open to the Institute. Students will explore a variety of animation techniques in which media are directly manipulated, such as paint on glass, sand animation, and direct filmmaking (drawing or scratching on film, for example). The course includes screenings of animation and discussion of related works. Students experiment with the techniques to create short projects.

FVEA308 - Loop Loop

General

Course Long Title
Loop Loop

Subject Code Course Number
FVEA 308

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

Loop Loop is a course focused on looping and repetition in art, film, and animation. Each week, students will watch, discuss, and create animated work that is either thematically structured through repeating actions, words, and objects, or is the result of a specific repetitive act. We will seek to contextualize and broaden our understanding of loops by unpacking theories rooted in a range of disciplines, including philosophy, neuroscience, and design. As the class progresses, we will seek to answer questions like: What potential is there in providing information in a format that is meant to be watched multiple times in full? How can repetition change an audience's perception of time and meaning? What separates the loops that are central to organic life vs. artificial mechanization? Should we break the loop? Are we controlling the loop or is the loop controlling us?

Course Long Title
Location Animation

Subject Code
FVEA

Course Number
316

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
There are an infinite number of objects that can be brought to life through stop motion. Anywhere a camera is set up, images can be captured one frame at a time transforming familiar settings into something fantastic. By capturing the world around them through animation, students will be given new tools to creatively use in the future. This class will introduce students to the relative possibilities outside the studio, animating elements in exterior locations. Using pixilation and time-lapse photography, students will experiment with animating physical elements in their environment; animating the subtle changes of a landscape or the frenetic movement of humans. The weather, erosion, construction, demolition, humans and animals will take on a whole new dimension. The course will include screenings, guest speakers, and field trips on campus and possibly off campus.

Course Long Title
Animating Virtual Worlds in Real-Time

Subject Code
FVEA

Course Number
318

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1.5

Description

This 7-week workshop explores real-time computer graphics in Blender through unconventional processes of viewport mechanics. Through experimentation between cinema, animation, and games, we will learn how to imagine, construct, manipulate, and animate our own virtual environments into durative projects. Throughout the course, we will screen and examine experimental digital works by artists, filmmakers, and animators alike. Our survey of works in the various fields, aim to envision various ways of contextualizing machinima and 3d animation in our own studio practice.

FVEA333 - Formlessness

General

Course Long Title
Formlessness

Subject Code	Course Number
FVEA	333

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

This class is a place to explore the rethinking of boundaries, unforming set notions of the way a body, film, or artistic idea can exist, and pushing one's practice into new territories. The course is an interdisciplinary place for experimental animators to explore specific themed prompts in their animation practice, through drawn animation as well as in any other mediums of their choosing. The central touchstone of the course is the book Formless: A User's Guide, written by Rosalind Kraus and Yve-Alain Bois. We will have readings, screenings, and project prompts on subjects from this book such as Liquid Words, Abjection, Gestalt, Very Slow, Pulse, and Base Materialism. Students create works incorporating and responding to a category concept, which we then critique and further discuss as a group, generating our own catalog of Formlessness.

FVEA404 - Structure Map

General

Course Long Title
Structure Map

Subject Code Course Number
FVEA 404

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

This course aims to give concrete form to abstract ideas through the use of image map and structure map (the form of a physical book), facilitating the identification of a project's core and structure.

It can be challenging to assess the strengths and weaknesses of a concept through written (abstract) language. While many films originate from written scripts, it's essential to translate words into a comprehensive and carefully considered visual and cinematic language.

This course is designed to help students develop their ideas through the creation of image map and structure map during the early stages of production. This, in turn, will enable students to comprehend and identify the overarching structure of their films, ultimately helping them develop an original visual language.

There are no prerequisite courses for taking this class. However, this course is designed for students preparing narrative-based projects. Students should be able to follow the instructor's teaching methods, possess strong critical abilities, and be attentive listeners. Additionally, effective presentation skills for conveying one's ideas are also required in this course.

Registration Restrictions

RGFVEA - Experimental Animation Program Only

School(s)	Program(s)
School of Film/Video	Experimental Animation

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
A project-based course where students experiment on a continuous basis notions of installation practice today and how it relates to the Experimental Animation artist. Lectures and presentations of installation artists are an important component of the class. The group taking the class will be given a series of dates to consider staging concepts they would like to work with in order to gain better understanding of a more completed project. In this respect there are a number of reserved spaces to support experimentation and testing of equipment. Students may collaborate but in this course collaboration refers more to students supporting each other as the course has a rigorous schedule. It is hoped all members of the class meet their own determined dates for presentation. In this class rather than a large group shows there will be a series of exhibitions allowing for a more opportunities for students to work at the level and scale they wish.

The Animator's Hand: Physical & Virtual

Subject Code	Course Number
FVEA	412
School(s)	
School of Film/Video	

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
The Animator's Hand: The Physical and the Virtual. In our hyper-virtualized world, work with physical materials and mark-making on physical surfaces provides a welcome complement to digital means of production. In this course, pulling from the history of drawing and painting, we will develop imagery and animation, highlighting a revived sense of freedom in mark-making that physical drawing provides. We will energetically consider interrelations of form and intention, time and content. From there, we will bring imagery into the digital realm, emphasizing tools for graphics and animation from the open-source community. The course welcomes multifarious approaches and sensibilities. Open to the Institute.

414

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
Games can be fresh, contributing to the political genre. In this course, we will create politically oriented digital games without code. Given freedom from programming, and a well-structured gaming environment, we can leverage both usual and atypical approaches to game design. Game design can be organized, feral, and rich, allowing for a range of sensibilities from edgy interaction to reflective calm. Each student or team will erupt two games during the semester. We will employ the highly capable Construct 3 game engine in the creation of politically oriented games, worlds, and worlding. We'll ask questions not assuming we have the answers. For instance, in what different (novel) ways might we employ historical imagery and words? We'll view game building as the creation of a (metaphorically speaking) interactive "fabric", weaving the structure of our games, rather than "building" them. We'll also take an idea-bootstrapping approach. Historical and contemporary strategies and tactics of art making and idea generation will be presented. Methods and approaches used with include historical favorites and those almost unknown, such as dialoguing. This will be in service to games with political purpose. We'll draw inspiration from a range of political media-arts works, both present and past. Most of all, we will become a collaboration, a collaborative with room for both individual and group works.

FVEA415 - Drawn Techniques for Exp Animation I

Course Long Title
Motion Capture for Artists

Subject Code
FVEA

Course Number
419

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1.5

Description
This course will take the form of a series of lectures, screenings, and demonstrations in support of a production workshop centered on using our eight camera PhaseSpace Impulse 3D

motion capture system in concert with Autodesk's MotionBuilder and Maya software packages. The goal is to explore the potential of performance animation in extending artists direct physical gestures into expressive animation. In addition to exploring the more conventional uses of motion capture how can we reach beyond these conventions to achieve more innovative work? Some possibilities to be explored will be the incorporation of procedural animation, non-representational imagery, dense layering, and unique remapping of gestures. Students are encouraged to explore areas of personal interest and to incorporate this research into their production work.

FVEA420 - Stop Motion Animation Basics

General

Stop Motion Animation Basics

Subject Code	Course Number
FVEA	420
School(s)	Program(s)
School of Film/Video	Experimental Animation

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
Course available by Permission of Instructor only.
The Stop Motion Animation Basics course will explore the art of Stop motion through a series of workshops exploring choreography, timing, lighting and photography. Throughout the semester students will experiment with the expressive range of "frame by frame" manipulation to awaken life into inanimate objects.

The assignments will centre on the themes of metamorphosis, found image, embodying voice, the everyday object and the choreography of the camera and the body. These exercises will introduce students to animation and photographic techniques covering both 2d and 3d principles. The course encourages students to find their own language and to expand on their own distinctive voice within Stop Motion practice.

FVEA424 - Digital Drawing Den

Course Long Title
Digital Drawing Den

Subject Code	Course Number
FVEA	424
School(s)	
School of Film/Video	

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
The definition of a den is a wild animal's lair or habitation. Digital Drawing Den is for students who are ready to burrow into an independent project, for those who crave time and individual guidance on their drawn animation practice. The idea of DDD is to provide focused drawn animation time in the lab every week. Students can get specific one-on-one feedback from the teacher, such as direct drawing and motion guidance on the current project of their choice. It's also a place for non-cohort based community shared lab time. There will be end-of-day check-ins with peers, and critique amongst a group of devoted drawers. The first month of the course will focus on introducing the TVPaint program. Students will learn the interface and possibilities, through several one-week challenges. The remaining 2 months of the course are independently driven by each student, using any digital drawing program in the lab. Students can choose a drawn project they want to develop, using that full class time and guidance every week, with the goal of generating and completing the drawn content of their piece.

Description
DIMENSIONS OF DIALOGUE: POLITICS & PROTEST IN EXPERIMENTAL ANIMATION
This screening-based course will survey experimental animation approaches to politics and protest from a radically diverse array of traditions, regions, historical periods, techniques, and themes. We will explore ways that animators have fused their politics and practice throughout history from the silent era to our current moment, and become familiar with numerous ways in which artists have approached political issues and/or engaged in protest, analysis, and criticism through their animation practices. Concepts and themes to be explored will include issues of race and racism, news and media, police and government, censorship, feminism and sexism, 1960s radicalism, consumerist critique, sexuality, material and formal explorations, queer identity and expression, legacies of colonialism and

imperialism, state-sponsored propaganda, and animation produced under oppressive regimes, among other topics. Class discussion will be strongly encouraged. Assignments will include some reasonable weekly writing and readings, a modest amount of outside class viewing, and at least one research-based paper.

FVEA428 - Stop Motion Puppet Design & Fabrication

Description

This course, open to the institute, is for those wanting to make media works, including installations, performative animated video-based AR, VR, etc. In this course, students will create proposals for work that will be completed in the spring. Options for the final work will include non-interactive, interactive, participatory, and performative approaches and hybrids, and any other elements/aspects as class members invent/decide upon. In other words, the course functions to assist experimental approaches to time-based art forms. Students will learn technical options, in addition to investigation of implications for narrative, non-narrative, documentary, cinematic, non-cinematic, sound-based, and other pieces. We are not stuck in a dogma of any kind. We will examine what can be different about media works and what opportunities have not yet been explored elsewhere. Open to the Institute. For MFAs, and students at BFA3 and BFA4 year levels. For students producing advanced work, but no specific prerequisite is strictly required.

Description

Interruptions happen - augmented reality - &@!#. Like this. Like that.

We have become a culture of interruption, where ruptures in the flow of time-based experience have become the norm. Our social media can interrupt daily endeavors, while augmented reality can disrupt spatiality, beacon-ing new art practices. Yet cinema and media arts in general have not fully responded to our immersion in an interruptive reality. We will. In this course, we will examine and utilize strategies, devices, and tactics inspired by and responding to interruptions. Work may be in any medium and will likely develop across many media, traditional and non, becoming metamedia. Approaches to augmented reality and social gaming will be presented. Open to the Institute.

FVEA433 - Comics Workshop

General

Course Long Title
Comics Workshop

Subject Code Course Number
FVEA 433

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

In the Comics Workshop, students will develop a narrative piece in comics form, culminating in a self-published comic at the end of the semester. This course will be similar in style to a creative writing workshop, where individual work is shared weekly for peer feedback and continually revised and developed over the semester. It will also cover historical and contemporary comics, different formal techniques and approaches to the form, and in-class drawing and writing exercises. There will be in-class drawing and students should be comfortable with and expect to work with pencil, ink and paper.

Materials & Supplies Needed:
Bristol board pad, smooth or vellum, 14" x 17" = \$15
Staedtler white eraser \$1
Ruler \$5
Pack of index cards \$5
Pencils & Pens / Brush & Ink you like to work with \$30
Ream of blank scratch / printer paper \$5

Course Long Title
2.5D Stop Motion

Subject Code Course Number
FVEA 439

School(s) Program(s)
School of Film/Video Experimental Animation

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

This course will explore the art of limited downshooting animation through a series of workshops focused on character design, fabrication, and post-production techniques. Combining digital processes with hand-made techniques, this class helps students hone their downshooting animation skills to create stop-motion works that communicate through cut-out and multiplane layer animation.

The class will begin with the design and creation of a simple cut-out puppet, focusing on how to create moving images using cut-out puppets, various materials, light, and the camera, while working between 2D and 3D spaces.

In the latter part of the course, the focus shifts to producing a short film. Throughout the semester, students will experiment with the expressive range of cut-out techniques, exploring all stages of directing a short stop-motion work-- from the initial idea to the completion of a short animated piece.

Course Long Title
Worlding Strategies and Making Work

Subject Code Course Number
FVEA 444

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Worlding has become a rapidly developing concept and process for assisting us in the creation of work for arts: including written, performative, media-based, and other diverse forms. Worlding, simply stated is what each of us do day to day as we negotiate life and weave ourselves into it. The notion of 'world' has come to provide a new basis for art making and analysis, partly supplanting the 20th Century's notions of 'texts'. Instead of subtexts, for instance, we might consider unknown aspects of the worlds we inhabit. Students will be presented with lesser known historical and contemporary ways of understanding worlding. From this, we will, together and individually, gain new insights and means of making work, and even understanding and critiquing. Our framework is not predetermined!! Students will present ways of developing the concepts 'world' and 'worlding' while developing a 'world'. A world could be almost anything, from an instruction manual to a painting, poem, or other traditional form, to something using media in new ways. That world will launch a final project, which can be in any medium.

FVEA449 - Experimental Animation Colloquium

Course Long Title
Experimental Animation Colloquium

Subject Code Course Number
FVEA 449

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This is a class that will be rotated among Experimental Animation Faculty and is intended to be a flexible space where faculty can engage with students in a diverse range of topics and activities in a variety of formats. It may take the form of a seminar, a lecture class, a production class, a curation class, or a hybrid of any of these.

This is also a class for experimentation in teaching/learning, new current topics related to animation, or a class in one-off topics or practices by regular, adjunct, or visiting faculty. For example, this could be a production course in AI for Experimental Animation or a seminar course in Theorizing Experimental Animation. This course always rotates among faculty; it is not intended to be consecutively repeated by a single faculty member.

No Requirements

strategies for sustaining an experimental practice. Regular readings and writing assignments will give students the opportunity to deepen their understanding of individual practices and the contemporary field. May be repeated for credit.

Description
AI for Animators allows students to develop a working relationship to AI tools in their animation practice. This course introduces ways of thinking about AI that will produce a durable and critical philosophy of what these tools can be for artists. This includes working with AI for writing, previsualization, frame interpolation, motion capture, and tracking. The course will ground these contemporary tools in a history of machine learning, computer vision, and AI, as well as a broader history of artists engaging emerging technologies that fundamentally change the field.

Description
When creating an animated narrative, how does the filmmaker tell the story? How can the art design and language of the scenes push the story forward? How can the filmmaker let the audience into the emotion of the animated characters, and allow them

to experience happiness, anger, sorrow, and joy together?

The course will start out by covering the aesthetics of animation, discussing topics like Literary Design, Visual Design, Mise-en-Scene, Cinematic Storytelling, Sound Design, Editing, helping students to smoothly master techniques such as audio-visual language, the creation of timelines, and the use of moving image to convey emotions.

At the same time, the course will also attempt to inspire students to break out of a rigid narrative rules, open their minds, and seek out a unique and personalized visual language in their storytelling.

At the end of the semester, students will complete their projects with an animated clip, a filmed video, or via found footage editing.

Course Long Title

Memory Clash

Subject Code

FVEA

Course Number

459

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

In this course, students will use some old photographs from their family as a starting point. They will proceed to add collages and hand-colored and build up stories based on their personal memories. Afterwards, students could try to get images from different sources such as the Internet, magazines, social media, second-hand markets or found footage to add to their stories. These images are combined with the old photographs in the form of paintings, sketches, collages, screen printing, etc. to create a hand-made "family album" to complete the construction of their personal memories. In the second half of the semester, students continue to develop the story clues, supplement missing parts of their memories with sounds or moving image, and find out the most appropriate "language" to express themselves. Eventually, the project will be completed within an animated short film, performance or video installation.

FVEA463 - Previsualization Techniques

Course Long Title

Previsualization Techniques

Subject Code

FVEA

Course Number

463

School(s)

School of Film/Video

Program(s)

Experimental Animation

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

3

Description

The focus of Previsualization Techniques is to help students develop their ideas, style, and communication before beginning production work. We will explore how ideas are shaped and conveyed through different artistic processes and containers. An aim of the course is to find and follow one's internal compass, to better locate what individually feels most important to the artist and how to best express this through the work. There will be a range of assignments that provide approaches to organizing concepts, physical methods of thinking through ideas, and preparing materials that can best convey the idea behind a work in progress. We will look at the different ways artists conjure and communicate through choices of technique, style, medium, context, and composition. The class will involve creative workshops, screenings, film analysis, and student presentations. Students will be given

more in-depth engagement with their body of work, but also to get a better sense of their artistic identity, development, and trajectory.

FVEA473 - Puzzling

General

Course Long Title
Puzzling

Subject Code Course Number
FVEA 473

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
A puzzle is something puzzling - it expects deduction and solution, while at the same time describes a condition of open confusion. The Puzzling class uses screenings, readings, and group discussion to examine the idea of film as a puzzle. The course focuses on films that explicitly engage with puzzle structures, films that grapple with the world as a puzzle to be solved, and films that resist solution. Students will view weekly programs, engage in post-screening seminar discussions, and create several short pieces in pursuit of insights into puzzles and tests.

FVEA478 - Rules

Description

Special Permission from Instructor required (interested students must email Leighton Pierce, lpierce@calarts.edu by Sept 4th 2020). This is a required course open to BFA4 and select BFA3 Experimental Animation students. This course supports 3rd and 4th year BFA students as they develop and complete a significant project in preparation for their graduation review. It is structured as a collegial seminar, leveraging the expertise of each class member in the service of assisting the others with the fullest realization of their projects. Students share their work -- from the initial stages of development through completion -- in a series of scheduled presentations and group critiques. In addition to supporting substantial work on individual projects, this class is intended to hone every student's evaluative, critical, and communicative skills.

Enrollment:

This is a required course to be completed twice across the BFA 3rd and 4th years.
 Class size is limited to 15.
 BFA3s may request this course but priority will be given to BFA4s.
 Credits are variable from 3-6 per semester with a limit of 12 credits across both semesters.
 Special permission for registration is required to determine appropriate credit load with instructor.

General

Course Long Title
Loop Loop

Subject Code	Course Number
FVEA	508

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description
Loop Loop is a course focused on looping and repetition in art, film, and animation. Each week, students will watch, discuss, and create animated work that is either thematically structured through repeating actions, words, and objects, or is the result of a specific repetitive act. We will seek to contextualize and broaden our understanding of loops by unpacking theories rooted in a range of disciplines, including philosophy, neuroscience, and design. As the class progresses, we will seek to answer questions like: What potential is there in providing information in a format that is meant to be watched multiple times in full? How can repetition change an audience's perception of time and meaning? What separates the loops that are central to organic life vs. artificial mechanization? Should we break the loop? Are we controlling the loop or is the loop controlling us?

Registration Restrictions

Credit Hours

Min Credit Hours:
3

Description

This course studies the essence of animal movement and character. Students will present studies of their own choosing, selecting a myth or short story to analyze the function, personality, and appeal of one type of animal/non-human, including mammals, birds, reptiles, or insects, for example. What do they eat? How do their offspring look? The class will be informed by the presentations. Life drawing of one or more animals will be provided. Students will also provide historical images and videos of their selected creature, both from real life and animated. The class will discuss locomotion and the relationship between humans and the creature. Why do we fear them? Why do we love them? The final project will be a comparative study of the creature in various forms. Graduate students also create two 5-10 second animated versions. For extra credit, students can act out their creature in a short live performance. Final project is a written and drawn journal of course

content, including an approximately 500 word paper and drawings inspired by student presentations.

Min Credit Hours:
3

Description

This course prepares the students' mindsets to explore rigs as a vital part of creating animated worlds, characters, and objects. Students will act out green screen performances with their bodies to study a hybrid approach to motion and choreography. Capturing motions with SLR cameras, students will map them onto 2D and 3D rigs within Aftereffects and Blender. While mastering the rigging fundamentals, students will reflect on how different bone constraints affect their choreography's forward and inverse kinematics. These principles could be applied and translated across multiple mediums, from handmade puppets, sets, and objects to 2D cutouts to digital assets, including scans and 3D sculptures and models. Over a series of lab demonstrations, workshops, individual projects, and assignments, students will explore the mechanics of locomotion rigging. Course level intermediate knowledge of Blender required.

3D Modeling for Artists

Subject Code	Course Number
FVEA	517

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description
As a course designed for artists to intervene in the computer-generated-imaging workflow, we will explore pathways out of traditional drawing and animation histories and into coded, nodal, and other algorithmic visualization methods. This course offers a comprehensive set of tools for artists to construct computer generated models from the ground up.

The workflows taught in this course will be cumulative and complementary. They include sub-division surface modeling, 3D texturing and UV mapping, texture painting, 3D scanning and retopology, 3D sculpting, and lighting and rendering for photorealistic, procedural, and toon shading.

Students will develop the ability to operate between the programs Modo, Blender, Zbrush, and Octane, while learning key supporting technologies, such as taking photographs for reference images and photogrammetry, compositing render layers, and encoding image sequences into standard formats and moving image-wrappers.

Description

The definition of a den is a wild animal's lair or habitation. Digital Drawing Den is for students who are ready to burrow into an independent project, for those who crave time and individual guidance on their drawn animation practice. The idea of DDD is to provide focused drawn animation time in the lab every week. Students can get specific one-on-one feedback from the teacher, such as direct drawing and motion guidance on the current project of their choice. It's also a place for non-cohort based community shared lab time. There will be end-of-day check-ins with peers, and critique amongst a group of devoted drawers. The first month of the course will focus on introducing the TVPaint program. Students will learn the interface and possibilities, through several one-week challenges. The remaining 2 months of the course are independently driven by each student, using any digital drawing program in the lab. Students can choose a drawn project they want to develop, using that full class time and guidance every week, with the goal of generating and completing the drawn content of their piece.

Description
This class is a place to explore the rethinking of boundaries, unforming set notions of the way a body, film, or artistic idea can exist, and pushing one's practice into new territories. The course is an interdisciplinary place for experimental animators to explore specific themed prompts in their animation practice, through drawn animation as well as in any other mediums of their choosing. The central touchstone of the course is the book Formless: A User's Guide, written by Rosalind Kraus and Yve-Alain Bois. We will have readings, screenings, and project prompts on subjects from this book such as Liquid Words, Abjection, Gestalt, Very Slow, Pulse, and Base Materialism. Students create works incorporating and responding to a category concept, which we then critique and further discuss as a group, generating our own catalog of Formlessness.

Description

Through discussion, critique, technical workshops, and labs, in this course we will develop an understanding of the rich meaning-potential of sound, made even more powerful in its relationship to moving images. We will analyze the nature of sound perception. We will analyze the function of sound recorders and microphones. We will learn the basics of sound editing and mixing using ProTools as a dynamic and exciting audio tool. We will do this all through lecture/discussions, workshops, creative sound design assignments, readings, technical training, and lab work.

Description

MFA students know animation is a blend of creative and technical activities. From the choice of what pencil lead we use, to selecting the right "codec" to render with, technical knowledge is an important factor in successfully expressing your ideas on the screen. Building a fluent, robust knowledge of processes embedded in the marriage between contemporary image making instruments, methodologies and concepts does expands creative choices. Here in this course we shall cover instruction on

creative pathways featuring methods you may be partly familiar, explore advanced processes utilizing both analogue and digital technology and when feasible, present totally new insights that may influence development of your "First Year Shot" project. Our course work this semester studying digital cinematic possibilities and animation production utilizing current image creation through the power of Adobe Photoshop, Premiere Pro and After Effects are expected to help empower greater animated art creativity. Students must attend the first class where they will gain access to the lab and may choose to test out.

Description

Observation & Play. Additional enrollment will take place at Course Advising Day. How can we engage our exterior surroundings through our animation practice? How can observation inform our filmmaking? When does making become play? This process-driven course explores nature and exterior space through scrutiny, research, play, and (of course) animation. Students will draw inspiration from different forms of looking at the world: obsessive surveillance, relaxed observing of flow, irregular or disruptive intervention. We will reimagine how we pay attention to our external surroundings and then bring that into our animation. We will translate smell, work with light and dark, investigate mapping, bring the world into animation through chance and unusual slices of reality. We aim to witness how different tiers of attention affect our work; students should expect to be inspired to work in new ways. This class will also include reading and discussion that will help students deepen their conceptual understanding of animation and learn to interact with the world in a more meaningful way. Assignments include weekly exercises and workshops, readings, screenings, and the completion of a polished final project. A broad definition of animation is welcome in the course.

Once submitted, your request will be reviewed and if approved, it will be added to your schedule by the Registrar.

FVEA602 - Worldbuilding

General

Course Long Title
Worldbuilding

Subject Code Course Number
FVEA 602

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

Historically, "worldbuilding" referred to the art direction choices made by video game designers and large film studios in creating science fiction and fantasy genres. Recently, however, the term has evolved, with artists using it to describe the process of crafting their own internally consistent universes. In this course, students will explore the work of contemporary artists who transcend everyday life to create rich fictions filled with interconnected characters, stories, symbols, and themes. We will examine the installations and films of artists such as Hito Steyerl, Ian Cheng, Shana Moulton, Miwa Metreyek, Nathalie Djurberg, Jacoby Satterwhite, and William Kentridge. Through a series of short assignments, students will experiment with worldbuilding techniques to design their own fictional environments and establish the logic behind them. The course will culminate in a final installation project that incorporates mixed media techniques.

FVEA604 - Structure Map

General

Course Long Title
Structure Map

Subject Code	Course Number
FVEA	604

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

This course aims to give concrete form to abstract ideas through the use of image map and structure map (the form of a physical book), facilitating the identification of a project's core and structure. It can be challenging to assess the strengths and weaknesses of a concept through written (abstract) language. While many films originate from written scripts, it's essential to translate words into a comprehensive and carefully considered visual and cinematic language. This course is designed to help students develop their ideas through the creation of image map and structure map during the early stages of production. This, in turn, will enable students to comprehend and identify the overarching structure of their films, ultimately helping them develop an original visual language.

There are no prerequisite courses for taking this class. However, this course is designed for students preparing narrative-based projects. Students should be able to follow the instructor's teaching methods, possess strong critical abilities, and be attentive listeners. Additionally, effective presentation skills for conveying one's ideas are also required in this course.

Registration Restrictions
RGFVEA - Experimental Animation Program Only

No Requirements

FVEA605 - Exp Animation: Direct Techniques

General

Course Long Title
Exp Animation: Direct Techniques

Subject Code	Course Number
FVEA	605

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

This class is Open to the Institute. Students will explore a variety of animation techniques in which media are directly manipulated, such as paint on glass, sand animation, and direct filmmaking (drawing or scratching on film, for example). The course includes screenings of animation and discussion of related works. Students experiment with the techniques to create short projects.

FVEA607 - Experimental Animation Writing

General

Course Long Title
Experimental Animation Writing

Subject Code	Course Number
FVEA	607

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

This course uses writing to generate and refine ideas for short films. Students will use creative prompts and challenges that encourage play with forms of language, sound, and experimental narrative. Building on ideas and modes explored in these exercises, students will then work on developing scripts and stories through several rounds of feedback from their peers, in the style of a creative writing workshop.

Experimental Animation Installation

Subject Code

FVEA

Course Number

609

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

3

Description

A project-based course where students experiment on a continuous basis notions of installation practice today and how it relates to the Experimental Animation artist. Lectures and presentations of installation artists are an important component of the class. The group taking the class will be given a series of dates to consider staging concepts they would like to work with in order to gain better understanding of a more completed project. In this respect there are a number of reserved spaces to support experimentation and testing of equipment. Students may collaborate but in this course collaboration refers more to students supporting each other as the course has a rigorous schedule. It is hoped all members of the class meet their own determined dates for presentation. In this class rather than a large group shows there will be a series of exhibitions allowing for a more opportunities for students to work at the level and scale they wish.

Credit Hours

Min Credit Hours:

2

Description

The Animator's Hand: The Physical and the Virtual. In our hyper-virtualized world, work with physical materials and mark-making on physical surfaces provides a welcome complement to digital means of production. In this course, pulling from the history of drawing and painting, we will develop imagery and animation, highlighting a revived sense of freedom in mark-making that physical drawing provides. We will energetically consider interrelations of form and intention, time and content. From there, we will bring imagery into the digital realm, emphasizing tools for graphics and animation from the open-source community. The course welcomes multifarious approaches and sensibilities. Open to the Institute.

Description

Games can be fresh, contributing to the political genre. In this course, we will create politically oriented digital games without code. Given freedom from programming, and a well-structured gaming environment, we can leverage both usual and atypical approaches to game design. Game design can be organized, feral, and rich, allowing for a range of sensibilities from edgy interaction to

reflective calm. Each student or team will erupt two games during the semester. We will employ the highly capable Construct 3 game engine in the creation of politically oriented games, worlds, and worlding. We'll ask questions not assuming we have the answers. For instance, in what different (novel) ways might we employ historical imagery and words? We'll view game building as the creation of a (metaphorically speaking) interactive "fabric", weaving the structure of our games, rather than "building" them. We'll also take an idea-bootstrapping approach. Historical and contemporary strategies and tactics of art making and idea generation will be presented. Methods and approaches used with include historical favorites and those almost unknown, such as dialoguing. This will be in service to games with political purpose. We'll draw inspiration from a range of political media-arts works, both present and past. Most of all, we will become a collaboration, a collaborative with room for both individual and group works.

Credit Hours

Min Credit Hours:

2

Description

There are an infinite number of objects that can be brought to life through stop motion. Anywhere a camera is set up, images can be captured one frame at a time transforming familiar settings into something fantastic. By capturing the world around them through animation, students will be given new tools to creatively use in the future. This class will introduce students to the relative possibilities outside the studio, animating elements in exterior locations. Using pixilation and time-lapse photography, students will experiment with animating physical elements in their environment; animating the subtle changes of a landscape or the frenetic movement of humans. The weather, erosion, construction, demolition, humans and animals will take on a whole new dimension. The course will include screenings, guest speakers, and field trips on campus and possibly off campus.

Motion Capture for Artists

Subject Code	Course Number
FVEA	619

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1.5

Description
This course will take the form of a series of lectures, screenings, and demonstrations in support of a production workshop centered on using our eight camera PhaseSpace Impulse 3D motion capture system in concert with Autodesk's MotionBuilder and Maya software packages. The goal is to explore the potential of performance animation in extending artists direct physical gestures into expressive animation. In addition to exploring the more conventional uses of motion capture how can we reach beyond these conventions to achieve more innovative work? Some possibilities to be explored will be the incorporation of procedural animation, non-representational imagery, dense layering, and unique remapping of gestures. Students are encouraged to explore areas of personal interest and to incorporate this research into their production work.

Credit Hours

Min Credit Hours:
2

Description
DIMENSIONS OF DIALOGUE: POLITICS & PROTEST IN EXPERIMENTAL ANIMATION
This screening-based course will survey experimental animation approaches to politics and protest from a radically diverse array of traditions, regions, historical periods, techniques, and themes. We will explore ways that animators have fused their politics and practice throughout history from the silent era to our current moment, and become familiar with numerous ways in which artists have approached political issues and/or engaged in protest, analysis, and criticism through their animation practices. Concepts and themes to be explored will include issues of race and racism, news and media, police and government, censorship, feminism and sexism, 1960s radicalism, consumerist critique, sexuality, material and formal explorations, queer identity and expression, legacies of colonialism and imperialism, state-sponsored propaganda, and animation produced under oppressive regimes, among other topics. Class discussion will be strongly encouraged. Assignments will include some reasonable weekly writing and readings, a modest amount of outside class viewing, and at least one research-based paper.

Course Number

629

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

In the corporate studio setting puppets are designed and fabricated from the conscious part of the brain. Designs are often limited because of mass production or its ability to stay within the realms of the approved style guide. But what if there were no limitations? In this class we explore both the art and the craft of puppet fabrication. We discover what happens when you design from the unconscious, artistic part of the brain and let art define the puppet build. How by

lifting the conscious restraints of the mind will establish a character that is physically and emotionally in sync with its true self. We explore design approaches such as wabi sabi, rhythmic fabrication, and how designing from the meditative storytelling part of the brain unlocks great potential to create truly unique one of a kind puppets.

Students should expect to spend approx \$50-\$100 on additional course materials and project supplies.

Description

This course, open to the institute, is for those wanting to make cinematic work for the Vortex Dome, a fifty foot diameter hemispheric dome located near downtown Los Angeles. In this course, students will create proposals for work that will be completed in the spring. Individual pieces for for the dome will be integrated by class members into a unified viewing/participatory experience. Options for the final work will include non-interactive, interactive, participatory, and performative approaches and hybrids, and any other elements/aspects as class members invent/decide upon. In other words, the course functions to assist experimental approaches to time-based art forms within a visually encompassing experience. Students will learn technical options, in addition to investigation of implications for narrative, non-narrative, documentary, cinematic, non-cinematic, sound-based, and other dome-art pieces. We are not stuck in a dogma of any kind. We will examine what can be different about dome-based work and what opportunities have not yet been explored elsewhere. Open to the Institute. For MFAs, and students at BFA3 and BFA4 year levels. For students producing advanced work, but no prerequisite is strictly required. By permission of instructor.

Min Credit Hours:
3

Description
In the Comics Workshop, students will develop a narrative piece in comics form, culminating in a self-published comic at the end of the semester. This course will be similar in style to a creative writing workshop, where individual work is shared weekly for peer feedback and continually revised and developed over the semester. It will also cover historical and contemporary comics, different formal techniques and approaches to the form, and in-class drawing and writing exercises. There will be in-class drawing and students should be comfortable with and expect to work with pencil, ink and paper.

Materials & Supplies Needed:
Bristol board pad, smooth or vellum, 14" x 17" = \$15
Staedtler white eraser \$1
Ruler \$5
Pack of index cards \$5
Pencils & Pens / Brush & Ink you like to work with \$30
Ream of blank scratch / printer paper \$5

Credit Hours

Min Credit Hours:

3

Description

This course will explore the art of limited downshooting animation through a series of workshops focused on character design, fabrication, and post-production techniques. Combining digital processes with hand-made techniques, this class helps students hone their downshooting animation skills to create stop-motion works that communicate through cut-out and multiplane layer animation.

The class will begin with the design and creation of a simple cut-out puppet, focusing on how to create moving images using cut-out puppets, various materials, light, and the camera, while working between 2D and 3D spaces.

In the latter part of the course, the focus shifts to producing a short film. Throughout the semester, students will experiment with the expressive range of cut-out techniques, exploring all stages of directing a short stop-motion work--from the initial idea to the completion of a short animated piece.

Credit Hours

Min Credit Hours:

3

Description

A project-oriented animation class designed to be taught online, this class uses improvisational techniques as a vehicle to investigate the art and practice of animation. Working in TVPaint and After Effects, in this workshop class students share drawings, ideas, characters and situations to build animation sequences, create animation worlds and, on the way, to improve animation skills. (If you haven't used TVPaint before, this class will familiarize you with the program).

? The work covered will explore non-linear approaches to animation, design, layout, and sequence development through interaction and self-organizing co-creation. In this online community-building animation class, students will work with some of the content-developing principles used in improv theatre, to bounce concepts forwards in a dynamic network of interactions towards the emergence of a wider whole, a final project.

Description

"Explorations in Stereoscopic Imaging: from Wheatstone to VR".

Since 1838 when Charles Wheatstone first formulated a theory of the role of binocular vision in stereopsis, numerous techniques for the creation and display of three dimensional images have been developed. Through a series of lectures, demonstrations, and projects we will explore the theory and practical application of the art of stereoscopy leading from Wheatstone's Stereoscope up to current developments in interactive stereoscopic head mounted VR displays. Is there a medium specificity involved in the production of monographic contrasted with stereographic art? How have artists subverted the stereoscopic potential for an increased sense of realism by creating apparently impossible spaces? In what other ways may stereoscopy be used to challenge notions of representation and objectivity? The course will include hands-on experience with motion control stop motion stereography using the Mark Roberts S3 Stereoscopic Stepper, the conversion of 2D drawings to 3D drawings using Adobe Photoshop, underwater stereography using the GoPro Dual HERO 3D system, and immersive stereoscopic Virtual Reality using the HTC Vive and Oculus Rift VR systems.

1

Description
This course will take the form of a screening and discussion seminar designed to provide an overview of animation at CalArts during the formative decades of the institute. Having been a member of the CalArts community during that period, current faculty member, Michael Scroggins, will bring a unique perspective to presenting works within the cultural cross currents in which they were situated. We will examine a wide range of work from a diverse selection of artists including Adam Beckett, Lauren Companeitz, Glen Keane, Henry Selick, Christine Panushka, Joe Ranft, Kathy Rose, and many more. All students are expected to fully participate in discussions during class meetings. In addition, graduate students will be expected to engage in research outside of class, and to deliver a class presentation on an area of personal interest related to the social, political, and art movements of the period under study

Credit Hours

Min Credit Hours:
2

Description
Worlding has become a rapidly developing concept and process for assisting us in the creation of work for arts: including written, performative, media-based, and other diverse forms. Worlding, simply stated is what each of us do day to day as we negotiate life and weave ourselves into it. The notion of 'world' has come to provide a new basis for art making and analysis, partly supplanting the 20th Century's notions of 'texts'. Instead of subtexts, for instance, we might consider unknown

aspects of the worlds we inhabit. Students will be presented with lesser known historical and contemporary ways of understanding worlding. From this, we will, together and individually, gain new insights and means of making work, and even understanding and critiquing. Our framework is not predetermined!! Students will present ways of developing the concepts 'world' and 'worlding' while developing a 'world'. A world could be almost anything, from an instruction manual to a painting, poem, or other traditional form, to something using media in new ways. That world will launch a final project, which can be in any medium.

Description

In the early 20th century the term "absolute" applied to the moving image arose out of an equivalency with the term "absolute" as it is applied to music. It is its most direct definition, absolute music is non-representational, providing a direct sensual experience transcending the connotations of extra-musical elements represented in program music. We will explore the development of absolute animation through a series of readings, screenings, and discussions. This research will be integrated with the creation of a series of short exercises exploring the concepts and techniques under study. Those exercises may potentially lead to the realization of a more fully developed project.

Description

This is a class that will be rotated among Experimental Animation Faculty and is intended to be a flexible space where faculty can engage with students in a diverse range of topics and activities in a variety of formats. It may take the form of a seminar, a lecture class, a production class, a curation class, or a hybrid of any of these.

This is also a class for experimentation in teaching/learning, new current topics related to animation, or a class in one-off topics or practices by regular, adjunct, or visiting faculty. For example, this could be a production course in AI for Experimental Animation or a seminar course in Theorizing Experimental Animation. This course always rotates among faculty; it is not intended to be consecutively repeated by a single faculty member.

Description

AI for Animators allows students to develop a working relationship to AI tools in their animation practice. This course introduces ways of thinking about AI that will produce a durable and critical philosophy of what these tools can be for artists. This includes working with AI for writing, previsualization, frame interpolation, motion capture, and tracking. The course will ground these contemporary tools in a history of machine learning, computer vision, and AI, as well as a broader history of artists engaging emerging technologies that fundamentally change the field.

Description
When creating an animated narrative, how does the filmmaker tell the story? How can the art design and language of the scenes push the story forward? How can the filmmaker let the audience into the emotion of the animated characters, and allow them to experience happiness, anger, sorrow, and joy together?

The course will start out by covering the aesthetics of animation, discussing topics like Literary Design, Visual Design, Mise-en-Scene, Cinematic Storytelling, Sound Design, Editing. helping students to smoothly master techniques such as audio-visual language, the creation of timelines, and the use of moving image to convey emotions.
At the same time, the course will also attempt to inspire students to break out of a rigid narrative rules, open their minds, and seek out a unique and personalized visual language in their storytelling.
At the end of the semester, students will complete their projects with an animated clip, a filmed video, or via found footage editing.

Course Long Title
Memory Clash

Subject Code Course Number
FVEA 659

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
In this course, students will use some old photographs from their family as a starting point. They will proceed to add collages and hand-colored and build up stories based on their personal memories. Afterwards, students could try to get images from different sources such as the Internet, magazines, social media, second-hand markets or found footage to add to their stories. These images are combined with the old photographs in the form of paintings, sketches, collages, screen printing, etc. to create a hand-made "family album" to complete the construction of their personal memories.
In the second half of the semester, students continue to develop the story clues, supplement missing parts of their memories with sounds or moving image, and find out the most appropriate "language" to express themselves. Eventually, the project will be completed within an animated short film, performance or video installation.

Program(s)

Experimental Animation

Credit Hours

Min Credit Hours:

3

Description

The focus of Previsualization Techniques is to help students develop their ideas, style, and communication before beginning production work. We will explore how ideas are shaped and conveyed through different artistic processes and containers. An aim of the course is to find and follow one's internal compass, to better locate what individually feels most important to the artist and how to best express this through the work. There will be a range of assignments that provide approaches to organizing concepts, physical methods of thinking through ideas, and preparing materials that can best convey the idea behind a work in progress. We will look at the different ways artists conjure and communicate through choices of technique, style, medium, context, and composition. The class will involve creative workshops, screenings, film analysis, and student presentations. Students will be given substantial time to present ideas and receive feedback. This class is especially geared for pre-thesis students who are actively finding and honing their artistic interests, working methods, and concepts.

Registration Restrictions

RGFVEA - Experimental Animation Program Only

No Requirements

and create a visual vocabulary to improve their artistic expression. Using a clay or wire puppet and animating with DRAGONFRAME, students will receive hands on experience animating and experimenting with movement. Students will be able to test and rehearse performances for their thesis or other projects.

Description
Process is at the heart of animation practice, and the decisions artists make about tools, methods, and techniques are often a fundamental, defining aspect of their individual works or overall style. This screening-based course will survey the extensive diversity of experimental animation through the lens of technique, drawing on eclectic international examples throughout animation history. Each session will focus on a specific approach or technique, exploring how various artists have employed these methods for radically different purposes, and the ways those techniques have played an active role in the development of an artist's vision. Examples of techniques that may be covered in class include direct animation, optical printing and compositing, stop motion, pixillation and time lapse, palimpsest/destructive animation, rotoscoping, 3D/CG, loops, analog and digital glitch, chance operations, painting and drawing, and one-of-a-kind techniques unique to individual artists. Assignments will include some reasonable weekly writing, a modest amount of outside class viewing, and participation in class will be encouraged.

Course Number

665

Description
This course is by Permission of Instructor Only. A key component of a stop motion film is the quality of the animation. The success of a character's performance is not merely defined by its smoothness. The movement must communicate the physical and the emotional state of the character to the audience. This class will focus on the physical process of the "frame by frame manipulation" of a stop motion character and give students studio time to experiment with poses, timings and pacing. By testing different increment sizes and experimenting with timing and poses, students will obtain animating experience

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Named Primary Stimulus after a film by animator and historian Robert Russett, this class meets once a week, focusing on a single experimental animator or artist working with animation in each session. In class we will look at several films and related material by that week's artist, combined with some reading and discussion, as well as occasional relevant works by other artists. Although the class will not focus on having artists in person, some artists may join us as guests when possible. The goal of this class is to provide an opportunity for a deeper and more extensive exploration of the oeuvres of a diverse and thoughtfully chosen selection of significant animation artists, not only to create a space for more in-depth engagement with their body of work, but also to get a better sense of their artistic identity, development, and trajectory.

Course Long Title
Archive Fever

Subject Code	Course Number
FWNT	127A
School(s)	
School of Film/Video	

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
In this course, we will look at contemporary moving image works that deal with the use of archive in an expansive way. We will begin with Jacques Derrida's analysis of the word "archive" and its relationship with Freud's notion of death drive in his book Archive Fever, and discuss the nature and function of archive, as well as its application in film and contemporary art world. We will then discuss the different types of archive-from traditional historical archive, alternative archive, oral history, personal archive, to internet archive-and how filmmakers and artists deal with these and the complex historical, political, cultural, and personal connotations behind them with unique strategies. In addition to the screenings and discussions of films by artists and filmmakers such as Rithy Panh, HSU Che-Yu, Steve McQueen, Kevin Jerome Everson, Trinh T. Minh Ha, Lei Lei, and more, we will have a workshop session where students propose, show, or critique their own work related to the use of archive. This course will be mainly discussing moving image works, however, students with other practices are also encouraged to show their work.

Subject Code	Course Number
FWNT	127C
School(s)	
School of Film/Video	

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

This course has a simple goal: we will read the 1967 book of memes The Medium is the Massage by Marshall McLuhan and watch 1972s four part BBC video essay Ways of Seeing produced by John Berger. Despite the age of these texts, they have only gotten more potent. The ideas and provocations contained in both works foreshadow our current era defined by digital images and social media. They also benefit from being proto versions of the most popular forms of media consumed today: meme's and video essays. This winter session course will introduce students from any artistic background to the thought of McLuhan and Berger while also acting as a primer on media literacy and theory. Students will be encouraged to use ideas from the in-class discussions to create their own text, meme pack, or video essay.

FWNT127D - TheArt of the Filmed Interview/Testimony

TheArt of the Filmed Interview/Testimony

Subject Code	Course Number
FWNT	127D

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

This intensive course looks at the history and varied practices of the interview over time, focusing on varied and creative approaches taken by nonfiction and experimental filmmakers. The interview, or the construction of testimony on/for film, is ubiquitous, but its philosophical and ideological underpinnings are often unexamined. We will explore a wide range of approaches to incorporating witnesses and interviews and look at work by filmmakers as well as installation artists. These include Claude Lanzmann, Rithy Panh, Shirley Clarke, Chick Strand, Harun Farocki, Anja Salomonowitz, Avi Mograbi, Joshua Oppenheimer, Omer Fast and others. Students will produce either a research paper, a video essay, or a series of three very distinct interviews for the course.

Rhizomatic Riots:A Mutable Film Workshop

Subject Code	Course Number
FWNT	127E

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

The aim of the workshop is to indulge in expansive models of filmmaking that take from the oral traditions; to create work that strives for anti-Western hierarchies of film and opts for an anti-colonial cinema. In a tangible sense this entails a filmmaking that is more focused on the process over the product, focuses on community, prefers experimentation and play, is mutable, and that explodes outside of just the screen to create tangible change. Starting off each class we will play a variety of games, happenings and activities that take us away from thinking about film in the traditional sense - but at the same time will guide the students to think about "playing" and tapping into intuition. These activities could range from hide and seek to card games to exquisite corpse shooting with Super 8 - and are dependent on the class interests. We will also use Sylvia Wynter's essay Rethinking Aesthetics: Notes Towards A Deciphering Practice as a guide for why so called "experimental" or nontraditional films can be beneficial to not only disenfranchised, minority communities but for all of us who are striving for some sort of shift. A light reading of this, plus a diverse array of short anti-colonial films will be integral in expanding what we can do in the space. The culmination of crux of the class will see each student bring an object, photo, heirloom, archive, or anything else tangible that they have a relation/story with. Each student will present these orally to the group - telling us its (and their) story. Then based/reflecting on the item, reading, viewings and a communal workshopping with the classroom, each student will make a personal film. We will be left with these films that unravel the relation between our personal and communal tendencies, allowing us to discuss the role that film can have in community building and a cultural creolization.

Reel Intelligence: Ethical AI in Film

Subject Code	Course Number
FWNT	127F

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Artificial intelligence (AI) tools are becoming increasingly prevalent in the rapidly evolving world of film production. This Winter Session course aims to equip students with the knowledge and skills necessary to leverage these tools effectively and ethically in their artistic practice.

While we will touch on the state of AI applications for pre-production and production, our concentration will be on AI tools for post-production enhancements, including assisting with complex tasks like editing, color grading, and visual effects. The goal is to inform students about the possible ways AI can be used as a creative companion aid for their filmmaking.

However, with great power comes great responsibility. Therefore, a significant portion of the course will discuss the ethical considerations associated with using AI in filmmaking. Topics will include bias in AI algorithms, data privacy, the impact of AI on employment within the creative industries, and the potential for deepfakes and other forms of manipulation.

By the end of this course, students will not only be introduced to select AI tools for filmmaking but will also become aware of its ethical implications. This holistic approach ensures that students are prepared to navigate the future of film production responsibly and innovatively.

Kinetic Kino

Subject Code	Course Number
FWNT	127G

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
This course offers a practical and aesthetic introduction to the application of 16mm film projectors in expanded cinema performance and video installation. The workshop-based class encourages students to manipulate film projectors as performing kinetic tools to produce, modify, reconfigure moving images, and explore the projected screen as a form of material presentation. Students will receive instruction on film projector technical operation, projector looping demonstrations, and an exploration of works by relative artists such as Ken Jacobs, Guy Sherwin, Jeanne Liotta, and others. The class also encourages students to adapt pre-existing optical devices (mirror, mylar, prism) to engage with alternative qualities of the moving image. While found film materials will be provided in class, students are welcome to bring their own materials and footage for a more personalized creative experience. Throughout the curriculum, students will be required to create a project that conceives of film as a "live event" through the projection.

Course Long Title
Drawing in Blended Space

Subject Code	Course Number
FWNT	127H

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
What can drawing look like in 3D space? How can it be combined aesthetically with traditionally-modeled 3D objects? This course explores the Grease Pencil functionality of Blender and how it can be used to create detailed animation. Beginning with an introduction to Grease Pencil as a 2D animation tool, the course

will progress into advanced applications, such as using Grease Pencil to create hair that follows a character, lighting concerns, and rotoscoping 3D objects with 3D linework on a frame-by-frame basis. Each student is encouraged to apply the skills learned to a creative investigation of their own choosing, which will be presented as a culminating project. Class time will include group demonstrations, screenings, one-on-one guidance, and group feedback.

FWNT127I - Introduction to Strata-cut

General

Course Long Title
Introduction to Strata-cut

Subject Code	Course Number
FWNT	127I

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
In this course the students will be introduced to the strata-cut animation technique. The course will have a workshop quality to it, there will be four classes and three assignments in total. The first assignment will cover scaling objects and figures, the second assignment will be about moving figures side to side or up and down, and the final assignment will be a rotating figure. These three simple notions are already enough to cover all the basic concepts of strata-cut and will give the students the tools necessary to animate almost anything they'd like. We'll go over a bit of history of the technique and watch films that make an interesting use of it. Students will also be presented references that might not consist of strata-cut per se but have a somewhat similar logic to it. A previous knowledge of the concept of frames is preferable. There's no need to know Dragon Frame or any other software. Students will be asked to bring their own plastic wrap.

FWNT127J - Experimental Game Design

General

Course Long Title
Experimental Game Design

Subject Code	Course Number
FWNT	127J

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
This course is an intro level exploration of the concepts of "gameplay", focusing on how to make our works "playful" and "playable." Students will embark on their game design journey by uncovering potential gameplay elements and connections from non-game media, physical/video games and everyday life experiences.

The first half of the class is seeking and thinking gameplay. Begin with finding possible playfulness in non-game media, and then focusing on how to build a game around one core element. Finally, exploring how the fusion of gameplay mechanics with artistic and narrative elements can create captivating experiences, inspiring them to conceptualize their own game ideas.

The second half is to help students bring their ideas to life. Introducing simple game-making tools and exploring the possibilities of it. Most importantly, understanding the production process of an interactive project, how to improve the playability through testing, mock-up, and iteration.

A "playable" final project can take various forms: video/physical game, tabletop games, illustration/installation/comics, an imaginary game's manuals or trailers, and more!

By the course's conclusion, students will be empowered to discover their unique game language and apply it to their future creations.

FWNT127K - Build Your Project Using Motion Capture

General

Course Long Title
Build Your Project Using Motion Capture

Subject Code Course Number
FWNT 127K

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
This course will introduce how to utilize motion capture as a reference/base to help with students' 2D/3D/stop motion projects. The course is targeting "quick start motion capture" so only the phone will be used in the motion capture. Basic motion capture and Maya knowledge will also be introduced. Welcome students from all levels.

FWNT127L - Voltage Controlled Filmmaking

General

Course Long Title
Voltage Controlled Filmmaking

Subject Code Course Number
FWNT 127L

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
In Voltage Controlled Filmmaking, students will learn: sound synthesis and sound design basics using Film/Video's ARP 2600; video synthesis basics; and how to make the two interact, via both control voltage cross-patching and by manually composing image in response to sound and vice-versa. We'll cover such topics as oscillation, filtering, feedback, triggers & gates, luma-keying, sequencing, modulation, mixing, and wavefolding, performing and recording improvisations as a

group to familiarize ourselves with each mechanism. Through such practice, we'll learn to apply these to our work technically, conceptually, and metaphorically (e.g. narrative/aesthetic oscillation). In addition to creating new images and sounds, we will also process existing ones, including clips brought in by students, tapes found in the studio, and live audio and video. Students will leave the class having made a short video work engaging with techniques and themes explored in the course.

FWNT127M - Foley 101

General

Course Long Title
Foley 101

Subject Code	Course Number
FWNT	127M

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
Foley is the art of recording sound effects directly to image (as opposed to using a sound library) for use in post-production sound design. Foley is used mainly to clarify, clean, and accentuate the soundscape of films that sound somewhat realistic, and is used in both animation and live action. In this course, you'll learn the basics of performing Foley, such as footsteps, cloth movement, and prop handling, along with how to best capture and edit these sounds in CalArts' own recording studio, A112.

FWNT128A - Background Noise: Direct Film Techniques

General

Course Long Title
Background Noise: Direct Film Techniques

Subject Code Course Number
FWNT 128A

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
'Background Noise' is an entry-level course designed to explore the expansive universe of 16mm direct-on-film animation. Instead of looking at this technique as a means to an end, we will engage with the idea that direct-on-film (AKA 'cameraless filmmaking') can be used to supplement and expand our drawn, stop-motion or 3D animations that are anywhere from existing/ half-done to newly-conceived.

In the first week, we will look at work by filmmakers such as Len Lye, Jen Reeves, Nazli Dinel, Naomi Uman and Stan Brakhage as well as other, lesser-known animators as inspiration for how to use 16mm to create visual noise and textures.

The second week, we will look at clips from Ralph Bakshi's "Fritz the Cat", Alison de Vere's "The Black Dog" and her backgrounds in "The Yellow Submarine," as well as some lesser-known direct-on-film animators from the '60s and '70s who use lots of moving textures in their backgrounds.

We will use found and blank 16mm film as our bases. Methods will include painting, dying, collage, stamping, cut-out, hole punching, scratching and possibly bleaching. The course will also include scanning of our direct-on-film animations to use for digital compositing.

After Effects or Premiere knowledge is encouraged, but not necessary.

FWNT128B - The Big Bang

General

Course Long Title
The Big Bang

Subject Code	Course Number
FWNT	128B

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

The afterglow of the Big Bang was discovered in the 1960s while conducting experiments with radio waves. The scientists encountered a persistent background noise that seemed to come from everywhere. Initially seen as a nuisance, this "noise" was revealed to be the remnant heat from the Big Bang, providing invaluable evidence of the universe's origin. The afterglow serves as proof that the past is not only a distant memory but intricately woven into the fabric of the present, reminding us that remnants of history continue to influence our current realities. We'll explore the "noise" at the intersections of cultures--to look towards writings, archives and films that respond to specific socio-political events, and find languages of responding to our present.

We will read the writings of Stuart Hall, Trinh T. Minh-ha, Jose Luis Falconi, Eve Tuck, K Wayne Yang and Faiz Ahmed Faiz. We will listen to the radio archives such as Radio Alhara and watch films like Milisuthando (2023, Bongela), Mangoes (2000, Abidi) and works of the Black Audio Film Collective.

FWNT128C - Seeing in the Phonocene

Course Long Title
Seeing in the Phonocene

Subject Code	Course Number
FWNT	128C

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

"What does a loud -crack- outside your door sound like, and what does it sound like to your neighbor? We are constantly transformed by the sonic vibrations of our urban and natural environments. Sounds are not exclusive to the experiences in our ears--they lay a path in our subjective memory.

Taking from concepts of sound ecology and the provocation that we could live in the "Phonocene" (a vision of the future that emphasizes sound and active listening theorized by Donna Haraway), this four session course offers students the opportunity to produce a sound and image work as a collective. The students will practice deep listening and will learn to identify "the gap between our two eyes that sound accounts for" (Michel Chion). This course encourages collaboration between schools across CalArts, and for artists to take the prompt they receive as an opportunity to work in their preferred medium, or break from their comfort modes.

In the first session, we will engage in an active listening exercise, and collaborate in the creation of a sound map. Moving image and sound works will be presented as inspiration. In the second session, students will submit a sound or music piece (of field recording, instrumentation, synthetic sound, or somewhere in between) that will be exchanged with another student in class (anonymously), and used as a prompt for the creation of an audio/visual "exquisite corpse". In the third session we will share our works in progress, and work collectively to curate these works into a multichannel, sound focused installation and performance, which we will present on campus in our final session. As a description for the performance and installation, students will write a manifesto for active listening.

Examples of work we will be viewing:

- "The Diary of the Sky" - Lawrence Abu Hamdan (2024)
- "Preemptive Listening" - Aura Satz (2024)
- "Dissonant" - Manon De Boer (2010)

Examples of writing that influences the course:

- "The Gender of Sound" - Anne Carson
- Soundscape: Our Sonic Environment and the Tuning of the World - R. Murray Schafer
- Undrowned: Black Feminist Lessons from Marine Mammals Emergent Strategy Series: 2 - Alexis Pauline Gumbs
- A Worm's Eye View from a Bird's Beak - Raven Chacon

FWNT128D - Fake Game Design

General

Course Long Title
Fake Game Design

Subject Code	Course Number
FWNT	128D

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

"The course ""Fake Game"" explores how gameplay can be integrated into non-game media to create simulated game experiences, to guide audiences to observe works with a player's mindset, or to any direction that redefines the beauty of ""fake"" and ""limitation.""

Instead of focusing on traditional gaming media like video games or tabletop games, the course looks into how game-related ideas such as game psychology, aesthetics, and concepts can apply to various art formats. The course consists of themed lectures, in-class activities, and 3-4 short assignments. As a part of the course, students explore cross-media works such as playable physical works, films with game aesthetics, illusions of interaction, rules-driven creations, and beyond. For assignments, students work within limitations. For instance, achieve interactivity in non-interactive mediums to break their inherent perceptions of materials. Expand their previous practice's potential gameplay elements through assignments like "Adding a fake button to your artworks." Throughout the critique, students ""playtest"" the assignments and discuss experiences that different media can bring to artistic expression, uncover the playfulness and interactivity hidden in various ideas, and draw connections between game-thinking and their own artistic practices that enrich the possibilities and originality of their creative expression."

FWNT128E - Embracing Digital Noise

General

Course Long Title
Embracing Digital Noise

Subject Code	Course Number
FWNT	128E

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

This intensive course will be primarily a lecture and screening-based exploration of technological and digital "noise." Readings and screenings will cover the epidemic of lost focus, the predicament of misinformation and decay of verisimilitude, overstimulation in the online world, and issues of digital imaging. We will explore the previous issues largely in the context of reinterpretation, detailed critical analysis, and positive reconstruction through creative practice. Over the course of two weeks, we will investigate various modes of exploiting information over-saturation through screenings and readings of work focused on virtual information, and create a short film/video project. The short project can be an original one or one based on the appropriation of found digital material.

FWNT128F - Burnt Spinach: Visual Humor

General

Course Long Title
Burnt Spinach: Visual Humor

Subject Code	Course Number
FWNT	128F

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

This workshop is geared toward students interested in learning more about and trying their hand at visual humor, through drawing exercises and kinetic sculpture. Students are encouraged to produce iteratively, reducing preciousness and emancipating their creative spirit. While humor is intangible and ethereal, we will train ourselves to look for it in the spontaneous as we trick ourselves into generating ideas through unorthodox practices.

The course takes its title from Jean Dubuffet's quote, "If you serve someone spinach that is cooked the way it should be, no one notices or remembers that they have eaten spinach. Whereas if you burn it, it shocks their taste-buds and they become immediately aware that it is burned spinach and they gain new insights into the characteristics of spinach".

- As a cursory overview of course activity, below is a class-by-class break down:
1. Class lecture and discussion followed by novel drawing exercises (non-dominant hand, not looking at paper, exquisite corpse).
 2. Students scan their favorite drawing from these exercises, add audio and experiment with minimal animation.
 3. Preliminary screening followed by class brainstorm for kinetic sculpture ideas.
 4. Students work with motors and cardboard to create said kinetic sculptures.
 5. Class screening and exhibition.

FWNT128G - Alter Egos

General

Course Long Title
Alter Egos

Subject Code	Course Number
FWNT	128G

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Alter Egos will focus on exploring the multitude of characters that reside within us. Through drama games we will pursue this process of discovery, and through the artistic mode of filmmaking and/or performance, our alter egos will be manifested and expressed.

In the first class, the focus will be on meeting and greeting, building rapport within the group, and engaging in trust-building theater games. The project of Alter Egos and process are introduced, with examples of videos and correlated artists to provide context such as Cindy Sherman, Pippilotti Rist, and Tim Robinson among others. We will introduce the final assignment of creating a short 1-5 minute performance or film with their chosen alter ego. This will be followed by guiding students through group performance and theater techniques to generate ideas for their pieces. For homework, students are tasked with journaling and coming to the next class with an idea for a piece around their chosen character.

In Class 2, the goal is to further develop group rapport, improvisational, and imaginative skills, as students begin character work, using theater and performance to discover their alter egos. Students will then break into groups to start building pieces based on these alter ego states. Homework involves meeting

with group members to discuss and plan their piece for class.

In Class 3, the group continues developing individual and collective theater and performance skills to advance their pieces, with homework focused on working with their groups to refine their work to be performed or screened in the following class.

In Class 4 students will present their final performances of short films or live theater, followed by an appreciation circle, closing activities, and celebration.

FWNT128H - Afro-Modern Composition

General

Course Long Title
Afro-Modern Composition

Subject Code Course Number
FWNT 128H

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
This course uses graphic scoring as a way to compose music for stand-alone sonic work, film, installation, or any other time-based media. Because of the sprawling nature of the material, the course is rooted in an Afro-modernist framework, focusing on reclaiming the appropriation of Afro-diasporic artists and cultures by modernist pioneers of the 20th century. There are three goals for the program: an historical overview of afro-modernism, a practical guide for creating cohesive graphic scores, and an opportunity for the students to showcase their work. The historical overview will primarily be a survey of Afro-diasporic work of the 20th century, with readings on what exactly Afro-modernism is, and its relevance to us in the 21st century. The practical guide for graphic scoring will be based in the formal practice of graphic design, porting over language used for the organization of images and symbols, to a compositional context. The showcase will involve students recording/performing their scores, so that they can leave with documentation of their expanded practice.

FWNT128I - Coffee and Silver:Hand Processing Super8

General

Course Long Title
Coffee and Silver:Hand Processing Super8

Subject Code Course Number
FWNT 128I

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Super 8 film is a compact, portable cinematic medium ideal for spontaneous and intimate image making. With its smaller sized cameras and overall ease of use, Super 8 facilitates an easily accessible, tactile, expressive, and personal relationship with analog filmmaking.

In this hands-on, workshop style class, students will engage with Super 8, both creatively and technically. We will cover the basics of planning and shooting analog film, guiding each student through the process of preparing, shooting, and hand developing their own roll of black and white Super 8 film using a lower toxicity, "home brewed" developer called Caffinol. Students will learn how to mix and handle Caffinol using easily available household ingredients.

This course emphasizes the materiality of analog mediums, giving students a deeper understanding of the physical properties of moving images and their potential for expressive manipulation.

FWNT128J - Creative Noise: AI and the Moving Image

General

Course Long Title
Creative Noise: AI and the Moving Image

Subject Code Course Number
FWNT 128J

School(s)
School of Film/Video

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
This course invites students to explore the concept of noise in AI art and filmmaking, transforming it from a perceived technical obstacle into a catalyst for artistic innovation. Through creative experimentation, we'll investigate how noise can become a powerful resource in moving image creation.

Students will engage with AI tools like Stable Diffusion, Adobe Firefly, and Runway to understand noise's crucial role in generating images. We'll examine how AI image creation often begins with random noise--much like visual static--and, through iterative refinement, transforms it into coherent visuals guided by prompts. Through hands-on projects, participants will manipulate noise within these tools to produce unexpected and original artistic outcomes.

The course includes critical discussions on the ethical implications of using AI in creative work, addressing issues like authorship, authenticity, and potential biases. By analyzing contemporary artworks that incorporate AI and noise, students will gain insights into emerging trends in digital storytelling.

By the end of the course, students will have developed practical skills in AI moving image creation and a deeper appreciation for the role of noise in art, empowered to harness the unpredictable nature of AI-generated noise, pushing the boundaries of conventional filmmaking and shaping the future of the medium.

FWNT128K - Bela Tarr and U/Dys-topian Vision

General

Bela Tarr and U/Dys-topian Vision

Subject Code

FWNT

Course Number

128K

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

1

Description

This course will be an examination of the later work of Hungarian filmmaker Bela Tarr. A major figure in what has been called slow cinema, Tarr's films deploy extremely long takes and complex moving camerawork in order to create philosophical narratives about the breakdown of social structures or ideological belief systems. They are also philosophical meditations on our relationship to time - whether its cyclical repetition, its apocalyptic end, or its utopian potential for liberation. Boredom, hope, despair and expectation are some of the affects Tarr explores and embodies in his work. While Tarr's work suggests a dystopian vision of our social and political world, it also evokes a utopian conception of moving images' aesthetic power to reflect humanity's crises.

We will screen Satantango (1994) in its entirety as well as Damnation (1988), Werckmeister Harmonies (2000) and Turin Horse (2011). Students will be required to read one of the three books on Tarr and /or analyze his filmmaking strategies in relation to the textual source material by writer Lazlo Krasnahorkai. Readings will be provided before the class begins, and students must attend ALL class sessions.

Course Number

128L

School(s)

School of Film/Video

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

1

Description

In the Videographics Lab, it's easy to zone out and jam endlessly, vamping on a couple of techniques for hours as a tape plays through. It's a great way to gain proficiency and amass material. But what about using the lab in a more compositional way? In this workshop we will plan and execute simple but rich short films and videos that might hinge on just one or a few ideas and techniques done well.

Technical concepts we will learn to implement in our films will include color shifting, optical illusions using cameras, superimposing multiple images, keying, using noise, wavefolding, audio synthesis, and wiring feedback networks into all of the above to introduce chaotic and noisy elements.

As we get comfortable with the equipment and screen existing works, we will brainstorm and develop short films/videos. We'll think about compositional matters such as beginning and ending a piece, planning and executing deliberately timed live gestures, chance operations, and collaborating with people at different

stations. Short assignments may include still image manipulation, haiku structure, contradictory narration, political cinetracts, and more.

The class will culminate in a compilation containing multiple short works by each student, to be donated to the Film Library.

General

Course Long Title
Archive Fever

Subject Code **Course Number**
FWNT 527A

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
In this course, we will look at contemporary moving image works that deal with the use of archive in an expansive way. We will begin with Jacques Derrida's analysis of the word "archive" and its relationship with Freud's notion of death drive in his book Archive Fever, and discuss the nature and function of archive, as well as its application in film and contemporary art world. We will then discuss the different types of archive-from traditional historical archive, alternative archive, oral history, personal archive, to internet archive-and how filmmakers and artists deal with these and the complex historical, political, cultural, and personal connotations

behind them with unique strategies. In addition to the screenings and discussions of films by artists and filmmakers such as Rithy Panh, HSU Che-Yu, Steve McQueen, Kevin Jerome Everson, Trinh T. Minh Ha, Lei Lei, and more, we will have a workshop session where students propose, show, or critique their own work related to the use of archive. This course will be mainly discussing moving image works, however, students with other practices are also encouraged to show their work.

FWNT 527C

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

This course has a simple goal: we will read the 1967 book of memes The Medium is the Massage by Marshall McLuhan and watch 1972s four part BBC video essay Ways of Seeing produced by John Berger. Despite the age of these texts, they have only gotten more potent. The ideas and provocations contained in both works foreshadow our current era defined by digital images and social media. They also benefit from being proto versions of the most popular forms of media consumed today: meme's and video essays. This winter session course will introduce students from any artistic background to the thought of McLuhan and Berger while also acting as a primer on media literacy and theory. Students will be encouraged to use ideas from the in-class discussions to create their own text, meme pack, or video essay.

Credit Hours

Min Credit Hours:

1

Description

The aim of the workshop is to indulge in expansive models of filmmaking that take from the oral traditions; to create work that strives for anti-Western hierarchies of film and opts for an anti-colonial cinema. In a tangible sense this entails a

filmmaking that is more focused on the process over the product, focuses on community, prefers experimentation and play, is mutable, and that explodes outside of just the screen to create tangible change. Starting off each class we will play a variety of games, happenings and activities that take us away from thinking about film in the traditional sense - but at the same time will guide the students to think about "playing" and tapping into intuition. These activities could range from hide and seek to card games to exquisite corpse shooting with Super 8 - and are dependent on the class interests. We will also use Sylvia Wynter's essay Rethinking Aesthetics: Notes Towards A Deciphering Practice as a guide for why so called "experimental" or nontraditional films can be beneficial to not only disenfranchised, minority communities but for all of us who are striving for some sort of shift. A light reading of this, plus a diverse array of short anti-colonial films will be integral in expanding what we can do in the space. The culmination of crux of the class will see each student bring an object, photo, heirloom, archive, or anything else tangible that they have a relation/story with. Each student will present these orally to the group - telling us its (and their) story. Then based/reflecting on the item, reading, viewings and a communal workshopping with the classroom, each student will make a personal film. We will be left with these films that unravel the relation between our personal and communal tendencies, allowing us to discuss the role that film can have in community building and a cultural creolization.

FWNT527F - Reel Intelligence: Ethical AI in Film

Min Credit Hours:

1

Description

Artificial intelligence (AI) tools are becoming increasingly prevalent in the rapidly evolving world of film production. This Winter Session course aims to equip students with the knowledge and skills necessary to leverage these tools effectively and ethically in their artistic practice.

While we will touch on the state of AI applications for pre-production and production, our concentration will be on AI tools for post-production enhancements, including assisting with complex tasks like editing, color grading, and visual effects. The goal is to inform students about the possible ways AI can be used as a creative companion aid for their filmmaking.

However, with great power comes great responsibility. Therefore, a significant portion of the course will discuss the ethical considerations associated with using AI in filmmaking. Topics will include bias in AI algorithms, data privacy, the impact of AI on employment within the creative industries, and the potential for deepfakes and other forms of manipulation.

By the end of this course, students will not only be introduced to select AI tools for filmmaking but will also become aware of its ethical implications. This holistic approach ensures that students are prepared to navigate the future of film production responsibly and innovatively.

FWNT527G - Kinetic Kino

General

Course Long Title
Kinetic Kino

Subject Code	Course Number
FWNT	527G

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This course offers a practical and aesthetic introduction to the application of 16mm film projectors in expanded cinema performance and video installation. The workshop-based class encourages students to manipulate film projectors as performing kinetic tools to produce, modify, reconfigure moving images, and explore the projected screen as a form of material presentation. Students will receive instruction on film projector technical operation, projector looping demonstrations, and an exploration of works by relative artists such as Ken Jacobs, Guy Sherwin, Jeanne Liotta, and others. The class also encourages students to adapt pre-existing optical devices (mirror, mylar, prism) to engage with alternative qualities of the moving image. While found film materials will be provided in class, students are welcome to bring their own materials and footage for a more personalized creative experience. Throughout the curriculum, students will be required to create a project that conceives of film as a "live event" through the projection.

FWNT	527H

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
What can drawing look like in 3D space? How can it be combined aesthetically with traditionally-modeled 3D objects? This course explores the Grease Pencil functionality of Blender and how it can be used to create detailed animation. Beginning with an introduction to Grease Pencil as a 2D animation tool, the course will progress into advanced applications, such as using Grease Pencil to create hair that follows a character, lighting concerns, and rotoscoping 3D objects with 3D linework on a frame-by-frame basis. Each student is encouraged to apply the skills learned to a creative investigation of their own choosing, which will be presented as a culminating project. Class time will include group demonstrations, screenings, one-on-one guidance, and group feedback.

FWNT527I - Introduction to Strata-cut

General

Course Long Title
Introduction to Strata-cut

Subject Code	Course Number
FWNT	527I

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
In this course the students will be introduced to the strata-cut animation technique. The course will have a workshop quality to it, there will be four classes and three assignments in total. The first assignment will cover scaling objects and figures, the second assignment will be about moving figures side to side or up and down, and the final assignment will be a rotating figure. These three simple notions are already enough to cover all the basic concepts of strata-cut and will give the students the tools necessary to animate almost anything they'd like. We'll go over a bit of history of the technique and watch films that make an interesting use of it. Students will also be presented references that might not consist of strata-cut per se but have a somewhat similar logic to it. A previous knowledge of the concept of frames is preferable. There's no need to know Dragon Frame or any other software. Students will be asked to bring their own plastic wrap.

FWNT527J - Experimental Game Design

Course Long Title
Experimental Game Design

Subject Code	Course Number
FWNT	527J

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This course is an intro level exploration of the concepts of "gameplay", focusing on how to make our works "playful" and "playable." Students will embark on their game design journey by uncovering potential gameplay elements and connections from non-game media, physical/video games and everyday life experiences. The first half of the class is seeking and thinking gameplay. Begin with finding possible playfulness in non-game media, and then focusing on how to build a game around one core element. Finally, exploring how the fusion of gameplay mechanics with artistic and narrative elements can create captivating experiences, inspiring them to conceptualize their own game ideas. The second half is to help students bring their ideas to life. Introducing simple

game-making tools and exploring the possibilities of it. Most importantly, understanding the production process of an interactive project, how to improve the playability through testing, mock-up, and iteration.

A "playable" final project can take various forms: video/physical game, tabletop games, illustration/installation/comics, an imaginary game's manuals or trailers, and more!

By the course's conclusion, students will be empowered to discover their unique game language and apply it to their future creations.

FWNT527K - Build Your Project Using Motion Capture

General

Course Long Title

Build Your Project Using Motion Capture

Subject Code Course Number
FWNT 527K

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This course will introduce how to utilize motion capture as a reference/base to help with students' 2D/3D/stop motion projects. The course is targeting "quick start motion capture" so only the phone will be used in the motion capture. Basic motion capture and Maya knowledge will also be introduced. Welcome students from all levels.

FWNT527L - Voltage Controlled Filmmaking

General

Course Long Title

Voltage Controlled Filmmaking

Subject Code Course Number
FWNT 527L

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
In Voltage Controlled Filmmaking, students will learn: sound synthesis and sound design basics using Film/Video's ARP 2600; video synthesis basics; and how to make the two interact, via both control voltage cross-patching and by manually composing image in response to sound and vice-versa. We'll cover such topics as oscillation, filtering, feedback, triggers & gates, luma-keying, sequencing, modulation, mixing, and wavefolding, performing and recording improvisations as a group to familiarize ourselves with each mechanism. Through such practice, we'll learn to apply these to our work technically, conceptually, and metaphorically (e.g. narrative/aesthetic oscillation). In addition to creating new images and sounds, we will also process existing ones, including clips brought in by students, tapes found in the studio, and live audio and video. Students will leave the class having made a short video work engaging with techniques and themes explored in the course.

FWNT527M - Foley 101

General

Course Long Title

Foley 101

Subject Code Course Number
FWNT 527M

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
Foley is the art of recording sound effects directly to image (as opposed to using a sound library) for use in post-production sound design. Foley is used mainly to clarify, clean, and accentuate the soundscape of films that sound somewhat realistic, and is used in both animation and live action. In this course, you'll learn the basics of performing Foley, such as footsteps, cloth movement, and prop handling, along with how to best capture and edit these sounds in CalArts' own recording studio, A112.

Registration Restrictions
RGAFV - School of Film/Video Students Only

FWNT528A - Background Noise: Direct Film Techniques

General

Course Long Title

Background Noise: Direct Film Techniques

Subject Code Course Number
FWNT 528A

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
'Background Noise' is an entry-level course designed to explore the expansive universe of 16mm direct-on-film animation. Instead of looking at this technique as a means to an end, we will engage with the idea that direct-on-film (AKA 'cameraless filmmaking') can be used to supplement and expand our drawn, stop-motion or 3D animations that are anywhere from existing/ half-done to newly-conceived.

In the first week, we will look at work by filmmakers such as Len Lye, Jen Reeves, Nazli Dinel, Naomi Uman and Stan Brakhage as well as other, lesser-known animators as inspiration for how to use 16mm to create visual noise and textures. The second week, we will look at clips from Ralph Bakshi's "Fritz the Cat", Alison de Vere's "The Black Dog" and her backgrounds in "The Yellow Submarine," as well as some lesser-known direct-on-film animators from the '60s and '70s who use lots of moving textures in their backgrounds.

We will use found and blank 16mm film as our bases. Methods will include painting, dying, collage, stamping, cut-out, hole punching, scratching and possibly bleaching.

The course will also include scanning of our direct-on-film animations to use for digital compositing.

After Effects or Premiere knowledge is encouraged, but not necessary.

Registration Restrictions
RGAFV - School of Film/Video Students Only

FWNT528B - The Big Bang

General

Course Long Title
The Big Bang

Subject Code	Course Number
FWNT	528B

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
The afterglow of the Big Bang was discovered in the 1960s while conducting experiments with radio waves. The scientists encountered a persistent background noise that seemed to come from everywhere. Initially seen as a nuisance, this "noise" was revealed to be the remnant heat from the Big Bang, providing invaluable evidence of the universe's origin. The afterglow serves as proof that the past is not only a distant memory but intricately woven into the fabric of the present, reminding us that remnants of history continue to influence our current realities. We'll explore the "noise" at the intersections of cultures--to look towards writings, archives and films that respond to specific socio-political events, and find languages of responding to our present.

We will read the writings of Stuart Hall, Trinh T. Minh-ha, Jose Luis Falconi, Eve Tuck, K Wayne Yang and Faiz Ahmed Faiz. We will listen to the radio archives such as Radio Alhara and watch films like Milisuthando (2023, Bongela), Mangoes (2000, Abidi) and works of the Black Audio Film Collective.

FWNT528C - Seeing in the Phonocene

General

Course Long Title
Seeing in the Phonocene

Subject Code	Course Number
FWNT	528C

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
"What does a loud -crack- outside your door sound like, and what does it sound like to your neighbor? We are constantly transformed by the sonic vibrations of our urban and natural environments. Sounds are not exclusive to the experiences in our ears--they lay a path in our subjective memory.

Taking from concepts of sound ecology and the provocation that we could live in the "Phonocene" (a vision of the future that emphasizes sound and active listening theorized by Donna Haraway), this four session course offers students the opportunity to produce a sound and image work as a collective. The students will practice deep listening and will learn to identify "the gap between our two eyes that sound accounts for" (Michel Chion). This course encourages collaboration between schools across CalArts, and for artists to take the prompt they receive as an opportunity to work in their preferred medium, or break from their comfort modes.

In the first session, we will engage in an active listening exercise, and collaborate in the creation of a sound map. Moving image and sound works will be presented as inspiration. In the second session, students will submit a sound or music piece (of field recording, instrumentation, synthetic sound, or somewhere in between) that will be exchanged with another student in class (anonymously), and used as a prompt for the creation of an audio/visual "exquisite corpse". In the third session we will share our works in progress, and work collectively to curate these works into a multichannel, sound focused installation and performance, which we will present on campus in our final session. As a description for the performance and installation, students will write a manifesto for active listening.

Examples of work we will be viewing:
"The Diary of the Sky" - Lawrence Abu Hamdan (2024)
"Preemptive Listening" - Aura Satz (2024)
"Dissonant" - Manon De Boer (2010)

Examples of writing that influences the course:
"The Gender of Sound" - Anne Carson
Soundscape: Our Sonic Environment and the Tuning of the World - R. Murray Schafer
Undrowned: Black Feminist Lessons from Marine Mammals Emergent Strategy Series: 2 - Alexis Pauline Gumbs
A Worm's Eye View from a Bird's Beak - Raven Chacon

FWNT528D - Fake Game Design

General

Course Long Title
Fake Game Design

Subject Code	Course Number
FWNT	528D

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
"The course ""Fake Game"" explores how gameplay can be integrated into non-game media to create simulated game experiences, to guide audiences to observe works with a player's mindset, or to any direction that redefines the beauty of ""fake"" and ""limitation.""
Instead of focusing on traditional gaming media like video games or tabletop games, the course looks into how game-related ideas such as game psychology, aesthetics, and concepts can apply to various art formats.
The course consists of themed lectures, in-class activities, and 3-4 short assignments.
As a part of the course, students explore cross-media works such as playable physical works, films with game aesthetics, illusions of interaction, rules-driven creations, and beyond.

For assignments, students work within limitations. For instance, achieve interactivity in non-interactive mediums to break their inherent perceptions of materials. Expand their previous practice's potential gameplay elements through assignments like "Adding a fake button to your artworks." Throughout the critique, students ""playtest"" the assignments and discuss experiences that different media can bring to artistic expression, uncover the playfulness and interactivity hidden in various ideas, and draw connections between game-thinking and their own artistic practices that enrich the possibilities and originality of their creative expression."

FWNT528E - Embracing Digital Noise

General

Course Long Title
Embracing Digital Noise

Subject Code Course Number
FWNT 528E

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This intensive course will be primarily a lecture and screening-based exploration of technological and digital "noise." Readings and screenings will cover the epidemic of lost focus, the predicament of misinformation and decay of verisimilitude, overstimulation in the online world, and issues of digital imaging. We will explore the previous issues largely in the context of reinterpretation, detailed critical analysis, and positive reconstruction through creative practice. Over the course of two weeks, we will investigate various modes of exploiting information over-saturation through screenings and readings of work focused on virtual information, and create a short film/video project. The short project can be an original one or one based on the appropriation of found digital material.

FWNT528F - Burnt Spinach: Visual Humor

General

Course Long Title
Burnt Spinach: Visual Humor

Subject Code Course Number
FWNT 528F

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This workshop is geared toward students interested in learning more about and trying their hand at visual humor, through drawing exercises and kinetic sculpture. Students are encouraged to produce iteratively, reducing preciousness and emancipating their creative spirit. While humor is intangible and ethereal, we will train ourselves to look for it in the spontaneous as we trick ourselves into generating ideas through unorthodox practices.

The course takes its title from Jean Dubuffet's quote, "If you serve someone spinach that is cooked the way it should be, no one notices or remembers that they have eaten spinach. Whereas if you burn it, it shocks their taste-buds and they become immediately aware that it is burned spinach and they gain new insights into the characteristics of spinach".

- As a cursory overview of course activity, below is a class-by-class break down:
- 1. Class lecture and discussion followed by novel drawing exercises (non-dominant hand, not looking at paper, exquisite corpse).
 - 2. Students scan their favorite drawing from these exercises, add audio and experiment with minimal animation.
 - 3. Preliminary screening followed by class brainstorm for kinetic sculpture ideas.
 - 4. Students work with motors and cardboard to create said kinetic sculptures.
 - 5. Class screening and exhibition.

FWNT528G - Alter Egos

General

Course Long Title
Alter Egos

Subject Code Course Number
FWNT 528G

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
Alter Egos will focus on exploring the multitude of characters that reside within us. Through drama games we will pursue this process of discovery, and through the artistic mode of filmmaking and/or performance, our alter egos will be manifested and expressed.

In the first class, the focus will be on meeting and greeting, building rapport within the group, and engaging in trust-building theater games. The project of Alter Egos and process are introduced, with examples of videos and correlated artists to provide context such as Cindy Sherman, Pippilotti Rist, and Tim Robinson among others. We will introduce the final assignment of creating a short 1-5 minute performance or film with their chosen alter ego. This will be followed by guiding students through group performance and theater techniques to generate ideas for their pieces. For homework, students are tasked with journaling and coming to the next class with an idea for a piece around their chosen character.

In Class 2, the goal is to further develop group rapport, improvisational, and imaginative skills, as students begin character work, using theater and performance to discover their alter egos. Students will then break into groups to start building pieces based on these alter ego states. Homework involves meeting with group members to discuss and plan their piece for class.

In Class 3, the group continues developing individual and collective theater and performance skills to advance their pieces, with homework focused on working with their groups to refine their work to be performed or screened in the following class.

In Class 4 students will present their final performances of short films or live theater, followed by an appreciation circle, closing activities, and celebration.

FWNT528H - Afro-Modern Composition

General

Course Long Title
Afro-Modern Composition

Subject Code Course Number
FWNT 528H

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This course uses graphic scoring as a way to compose music for stand-alone sonic work, film, installation, or any other time-based media. Because of the sprawling nature of the material, the course is rooted in an Afro-modernist framework, focusing on reclaiming the appropriation of Afro-diasporic artists and cultures by modernist pioneers of the 20th century. There are three goals for the program: an historical overview of afro-modernism, a practical guide for creating cohesive graphic scores, and an opportunity for the students to showcase their work. The historical overview will primarily be a survey of Afro-diasporic work of the 20th century, with readings on what exactly Afro-modernism is, and its relevance to us in the 21st century. The practical guide for graphic scoring will be based in the formal practice of graphic design, porting over language used for the organization of images and symbols, to a compositional context. The showcase will involve students recording/performing their scores, so that they can leave with documentation of their expanded practice.

FWNT528I - Coffee and Silver:Hand Processing Super8

General

Course Long Title
Coffee and Silver:Hand Processing Super8

Subject Code Course Number
FWNT 528I

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
Super 8 film is a compact, portable cinematic medium ideal for spontaneous and intimate image making. With its smaller sized cameras and overall ease of use, Super 8 facilitates an easily accessible, tactile, expressive, and personal relationship with analog filmmaking.

In this hands-on, workshop style class, students will engage with Super 8, both creatively and technically. We will cover the basics of planning and shooting analog film, guiding each student through the process of preparing, shooting, and hand developing their own roll of black and white Super 8 film using a lower toxicity, "home brewed" developer called Caffinol. Students will learn how to mix and handle Caffinol using easily available household ingredients.

This course emphasizes the materiality of analog mediums, giving students a deeper understanding of the physical properties of moving images and their potential for expressive manipulation.

FWNT528J - Creative Noise: AI and the Moving Image

General

Course Long Title
Creative Noise: AI and the Moving Image

Subject Code Course Number
FWNT 528J

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This course invites students to explore the concept of noise in AI art and filmmaking, transforming it from a perceived technical obstacle into a catalyst for artistic innovation. Through creative experimentation, we'll investigate how noise can become a powerful resource in moving image creation.

Students will engage with AI tools like Stable Diffusion, Adobe Firefly, and Runway to understand noise's crucial role in generating images. We'll examine how AI image creation often begins with random noise--much like visual static--and, through iterative refinement, transforms it into coherent visuals guided by prompts. Through hands-on projects, participants will manipulate noise within these tools to produce unexpected and original artistic outcomes.

The course includes critical discussions on the ethical implications of using AI in creative work, addressing issues like authorship, authenticity, and potential biases. By analyzing contemporary artworks that incorporate AI and noise, students will gain insights into emerging trends in digital storytelling.

By the end of the course, students will have developed practical skills in AI moving image creation and a deeper appreciation for the role of noise in art, empowered to harness the unpredictable nature of AI-generated noise, pushing the boundaries of conventional filmmaking and shaping the future of the medium.

FWNT528K - Bela Tarr and U/Dys-topian Vision

General

Course Long Title
Bela Tarr and U/Dys-topian Vision

Subject Code Course Number
FWNT 528K

School(s)
School of Film/Video

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

This course will be an examination of the later work of Hungarian filmmaker Bela Tarr. A major figure in what has been called slow cinema, Tarr's films deploy extremely long takes and complex moving camerawork in order to create philosophical narratives about the breakdown of social structures or ideological belief systems. They are also philosophical meditations on our relationship to time - whether its cyclical repetition, its apocalyptic end, or its utopian potential for liberation. Boredom, hope, despair and expectation are some of the affects Tarr explores and embodies in his work. While Tarr's work suggests a dystopian vision of our social and political world, it also evokes a utopian conception of moving images' aesthetic power to reflect humanity's crises.

We will screen Satantango (1994) in its entirety as well as Damnation (1988), Werckmeister Harmonies (2000) and Turin Horse (2011). Students will be required to read one of the three books on Tarr and /or analyze his filmmaking strategies in relation to the textual source material by writer Lazlo Krasnahorkai. Readings will be provided before the class begins, and students must attend ALL class sessions.

Videographics Mixtape

Subject Code

FWNT

Course Number

528L

School(s)

School of Film/Video

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

1

Description

In the Videographics Lab, it's easy to zone out and jam endlessly, vamping on a couple of techniques for hours as a tape plays through. It's a great way to gain proficiency and amass material. But what about using the lab in a more compositional way? In this workshop we will plan and execute simple but rich short films and videos that might hinge on just one or a few ideas and techniques done well.

Technical concepts we will learn to implement in our films will include color shifting, optical illusions using cameras, superimposing multiple images, keying, using noise, wavefolding, audio synthesis, and wiring feedback networks into all of the above to introduce chaotic and noisy elements.

As we get comfortable with the equipment and screen existing works, we will brainstorm and develop short films/videos. We'll think about compositional matters such as beginning and ending a piece, planning and executing deliberately timed live gestures, chance operations, and collaborating with people at different stations. Short assignments may include still image manipulation, haiku structure, contradictory narration, political cinetracts, and more.

The class will culminate in a compilation containing multiple short works by each student, to be donated to the Film Library.

FWNT528M - Sand Animation**General****Course Long Title**

Sand Animation

Subject Code

FWNT

Course Number

528M

Description

MFA WS Supervised Instruction supports a Film/Video MFA2 or MFA3 who has developed a short course proposal (reading group or screening/discussion) for Wintersession that has been approved by the Film/Video WS Committee. The student will receive 1 credit for the course preparation and supervised instruction during Wintersession. Each MFA instructor must work with a faculty member in developing the course and considering pedagogical issues. The teaching will be supervised and reviewed by the faculty supervisor.

School of Music Department

The Herb Alpert School of Music at CalArts offers rigorous training in an unrivaled variety of musical styles and cultures.

The vibrant mix of offerings allows students to acquire the musical fluency to work across conventional boundaries, expand their artistic and cultural horizons, and develop a global creative vision. Qualitatively different from conventional music conservatories, technical excellence is only one part of the story, as The Herb Alpert School of Music seeks to empower students as complete makers of music.

The School stands above the field in several ways, including world-class musical innovators on faculty; a stylistically open approach to musical creativity; the ability for students to work with mentors from all areas of the School to construct individualized courses of study; ample opportunities for collaboration within CalArts' multidisciplinary arts environment; flexibility for students to organize ensembles, often with faculty participation; and performances that are centered on original music and spontaneous creation alongside extant musical literature and interactive media.

For additional information please visit <https://music.calarts.edu/>

In addition to the Programs of Study, the School also offers the following Minor and Specializations:

Undergraduate Minor in Music Theory

The Minor in Music Theory affords eligible undergraduate students a non-degree credential that supplements their Major. If earned, the Minor is noted on CalArts transcripts. Course credit earned by a student can count simultaneously towards the requirements of a student's specialization and this Minor. Interested students must visit the Music Office in order to formally declare in writing their intent to pursue the Minor. However, they must first have fulfilled all of the following prerequisites either by means of placement examination or by course completion with a grade of P or HP.

Prerequisites to the Music Theory Minor

- MTHY112 Tonal Theory & Applications B
- MTHY210 Non-Tonal Theories
- MTHY203 Musicianship Skills C

The Minor is awarded to undergraduate students who formally declare their intention to pursue it before graduation and who complete all of the following course requirements.

Requirements for the Music Theory Minor

- MTHY214 Counterpoint
- MTHY240 Jazz Keyboard Theory (2 classes, 2 units in total)
- MSCM310 Acoustics for Musicians
- Music Perception Option: ONE class chosen from:
 - MSCM309 Psychoacoustics
 - MTHY306 The Experimenting Ear
 - MTHY403 Intonation Workshop I
 - MTHY404 Intonation Workshop II
- Musical Forms Option: ONE class chosen from
 - MTHY217 Form and Analysis
 - MTHY215 Song Writing & Analysis
- Analytical Survey Option: ONE class chosen from
 - MTHY216 Different Tonalities
 - MTHY450 Chamber Thought
 - MTHY451 Orchestral Thought
 - MTHY454 The String Quartet since 1900
 - MTHY455 The Piano since 1900
- World Theory Options: TWO classes chosen from
 - MTHY216 North Indian Music Theory
 - MTHY220 Rhythm: A Global Perspective
 - MTHY228 Journey to the Persian Music
 - MTHY226 Ghanaian Rhythm Theory
 - MTHY224 Java/Bali: Music-Dance-Theory
 - MTHY425 Tala Systems

- **MTHYxxx music theory electives (2 units of additional coursework with subject code MTHY)**

Good standing in the Major specialization is required for continued enrollment in the Music Theory Minor. Students on Academic Warning may be suspended from the Minor in Music Theory. Students may be permanently removed from the Minor after more than one semester on Academic Warning, at the recommendation of their Dean.

Optional Undergraduate Composition Concentrations

Interested undergraduate Composition and Performer-Composer students can earn one or more optional Concentrations within their major by completing additional requirements as indicated below. Earned Concentrations will be noted on CalArts transcripts. Course credits earned towards the Shared Curriculum or towards the BFA composition foundation can also count towards one or more of these Concentrations, and vice versa. Any student interested in pursuing one or more concentrations must declare this during their Graduation Review.

BFA Composition: Optional Concentration in Avant-Garde Rock & Noise

- **MTHY215 Song Writing & Analysis**
- **ONE class chosen from:**
 - MTEC212 Recording the Voice
 - MCMP308 The Art of the Mix
 - MTEC365 Digital Recording Studio
 - MCMP369 Production as Composition
 - MTEC367 Project Recording
- **THREE units of coursework chosen from:**
 - MAIC316 Blues before 1960
 - MAIC370 DIY
 - MHST330 Studies in Experimental Pop
 - MHST331 Studies in Avant-Rock and Noise
 - MHST405–410 Focus Rock
 - other courses in pop musicology
- **FIVE units of coursework chosen from:**
 - MBLE310 Improvisation Ensemble
 - MBLE325 Creative Electronic Ensemble
 - MBLE450 Sonic Boom Ensemble
 - MCMP325 Experimental Music Workshop I
 - MCMP326 Experimental Music Workshop II
 - MCMP336 Writing for Voice
 - MCRW209 Words for Music
 - MPRF217 Learning to Scream
 - MTEC420 Grids, Beats & Groups
 - Critical Studies course in creative poetic writing (mentor approval required)

BFA Composition: Optional Concentration in Electronic Music

- **TWO units of coursework chosen from:**
 - MTHY306 The Experimenting Ear
 - MTHY411 Electroacoustic Music Analysis
 - MHST425 Survey of Sound Art
- **FOUR units of coursework chosen from:**
 - MBLE415 Networked Music Ensemble
 - MCMP369 Production as Composition
 - MCMP465 Composition with Max/MSP
 - MTEC270 History of Electronic Dance Music
- **EIGHT units of additional coursework with ICOM or MTEC subject codes**

BFA Composition: Optional Concentration in Experimental Music

- **MCMP325 Experimental Music Workshop I**
- **MCMP326 Experimental Music Workshop II**
- **ONE class chosen from**
 - MSCM309 Psychoacoustics
 - MTHY403 Intonation Workshop I
 - MTHY404 Intonation Workshop II
- **THREE classes chosen from:**
 - MBLE310 Improvisation Ensemble
 - MBLE325 Creative Electronic Ensemble
 - MBLE415 Networked Music Ensemble
 - MBLE450 Sonic Boom Ensemble
 - MBLE460 Golia Large Ensemble
 - MCMP465 Composition with Max/MSP
- **TWO classes chosen from:**
 - MCMP343 Experiments in Film Sound
 - MHST350 Stylists and Innovators 1961–Now

- MHST422 Experimental Music Post-Cage
- MHST425 Survey of Sound Art
- MHST472 John Cage: Music & Thought
- MHST473 John Cage, Sun Ra, Musique Concrète and the Noise Uprising
- MAIC412 Critical Reading (may be repeated for credit)

BFA Composition: Optional Concentration in Composition for Film & Video

- MHST205 Western Music History I
- MHST206 Western Music History II
- MPCD350 Career Designs for Musicians
- MPRF307 Conducting I
- FPFV424 Aesthetics of Sound and Image
- TWO classes chosen from:
 - MTHYP341 Film Music History & Analysis
 - MCMP342 Composition for Film & Video
 - MCMP343 Experiments in Film Sound
 - MTHY344 Non-Traditional Film Music
- ONE class chosen from (taking all of these courses is strongly recommended):
 - FSFV435 Sound Student Technician Course
 - FPFV481 Sound Mixing and Editing
 - MTEC214 Sound Design for Moving Image
 - MTEC365 Digital Recording Studio
- ONE class chosen from:
 - MCMP402 Orchestration
 - MTHY451 Orchestral Thought

BFA Composition: Optional Concentration in Instrumental Composition

- MCMP330–339 Writing for ... (2 classes)
- MPRF307 Conducting I
- MPRF408 Conducting II
- MLSN001 Performance Lessons (2 different orchestral instruments as assigned, 2 courses total)*
- One class chosen from:
 - MTHY450 Chamber Thought
 - MTHY454 The String Quartet since 1900
 - MTHY455 The Piano since 1900
- One class chosen from:
 - MCMP402 Orchestration
 - MTHY451 Orchestral Thought
- Two different classes chosen from:
 - MBLE106 Chamber Music
 - MBLE300 The Ensemble
 - MBLE310 Improvisation Ensemble
 - MBLE450 Sonic Boom Ensemble
 - MBLE460 Golia Large Ensemble

**In specializations or concentrations for which lessons are required, students who do not own an appropriate instrument may need to rent one. Further information is available from the Music Office.*

Programs

MAMD.MFA - Master of Fine Arts - African Music and Dance

General

Program Title	School	
Master of Fine Arts - African Music and Dance	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music

finds form and perfects their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring creative territories.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time

residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

World Music Performance - African Music and Dance (MFA)

Two years of intensive study in the field of emphasis are required. A final recital or series of performances is required. Mentors may require a written thesis.

- **MLSN601 Hour Lesson as assigned (4 classes)**
- **MLSN501 Half-Hour Lesson (2 classes, as approved by Mentor)**
- **MHST512 Ethnology of African Music**
- **MHST500–509 Music Cultures**
- **MTHY508 Transcription Skills (or other transcription class as approved by mentor)**
- **TWO classes chosen from:**
 - MPRF620 Tabla Accompaniment
 - MTHY520/ MTHY522 Beginning/Advanced Svar Graam (Vocal)
 - MTHY521/ MTHY523 Beginning/Advanced Svar Graam (Instrumental)
 - MTHY622 North Indian Theory
 - MTHY624 Java/Bali: Music-Dance-Theory
 - MTHY626 Ghanaian Rhythm Theory
 - MTHY628 Journey to the Persian Music

- **MTHY625 Tala Systems**
- **MBLE502 Advanced African Ensemble (4 classes)**
- **MBLE World Music Ensembles, outside of African specialization (4 classes) (see list under BFA Shared Curriculum)**
- **MBLE550 African Dance (at least 1 class)**
- **MPRF621 African Song (at least 1 class)**
- **MPCD699 Graduate Independent Project: Pedagogy (2 classes)**
- **FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)**
- **MFOR600 Artists-in-Residence Week (2 classes)**
- **Winter Session (2 units of coursework taken in January)**
- **MPRF690 Graduation Recital**
- **Electives (to fulfill 60-unit degree requirement)**

MCES.BFA - Bachelor of Fine Arts - Comp & Experimental Sound Practices

General

Program Title	School	
Bachelor of Fine Arts - Comp & Experimental Sound Practices	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		50.0904

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Free Form Requirements

Composition & Experimental Sound Practices (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music

- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Composition & Experimental Sound Practices (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MFOR101 Undergraduate Composers' Forum (first two Fall semesters in residence)

MCMP105 Music Notation (in first Spring semester in residence)

MCMP120 Instrumental Composition I

MCMP121 Instrumental Composition II

MTHY204 Musicianship Skills D

ICOM111 Introduction to Sound Production

MSCM310 Acoustics for Musicians

At least THREE different courses and SIX units of coursework chosen from:

- MTHY210 Non-Tonal Theories (3 units)
- MTHY214 Counterpoint (3 units)
- MTHY215 Song Writing & Analysis (2 units)
- MTHY216 Different Tonalities (3 units)
- MTHY217 Form (3 units)
- MTHY108 Transcription Skills (2 units)
- MTHY240 Jazz Keyboard Theory (1 unit, may be repeated)
- MTHY306 The Experimenting Ear (2 units)
- MPRF101 Jazz Improvisation, Group (1 unit may be repeated)
- MPRF102 Jazz Improvisation, 1-on-1 (1 unit, may be repeated)

TWO units of coursework chosen from:

- MCMP308 The Art of the Mix
- MCMP369 Production as Composition
- MCMP465 Composition with Max/MSP
- MTEC270 History of Electronic Dance Music
- MTEC365 Digital Recording Studio
- MTEC367 Project Recording

TWO units of coursework chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses & Lineage
- MHST205 Western Music History I
- MHST206 Western Music History II
- MHST331 Studies in Avant-Rock & Noise
- MHST350 Stylists & Innovators 1961–Now
- MHST422 Experimental Music Post-Cage
- MHST425 Survey of Sound Art

TWO units of coursework chosen from:

- MAIC314 The Music of Flamenco
- MAIC316 Blues Before 1960
- MHST300-309 Music Cultures
- MHST312 Ethnology of African Music

FOUR units of coursework in MCMP/MHST/MTHY4xx Advanced Composition, History or Theory Electives

MCMP490 Graduation Portfolio and Website Review

Electives (to fulfill 120-unit degree requirement)

Optional Undergraduate Composition Concentrations

Interested undergraduate Composition and Performer-Composer students can earn one or more optional Concentrations within their major by completing additional requirements as indicated below. Earned Concentrations will be noted on CalArts transcripts. Course credits earned towards the Shared Curriculum or towards the BFA composition foundation can also count towards one or more of these Concentrations, and vice versa. Any student interested in pursuing one or more concentrations must declare this during their Graduation Review.

BFA Composition: Optional Concentration in Avant-Garde Rock & Noise

MTHY215 Song Writing & Analysis

ONE class chosen from:

- MTEC212 Recording the Voice
- MCMP308 The Art of the Mix
- MTEC365 Digital Recording Studio
- MCMP369 Production as Composition
- MTEC367 Project Recording

THREE units of coursework chosen from:

- MAIC316 Blues before 1960
- MAIC370 DIY
- MHST330 Studies in Experimental Pop
- MHST331 Studies in Avant-Rock and Noise
- MHST405–410 Focus Rock
- other courses in pop musicology

FIVE units of coursework chosen from:

- MBLE310 Improvisation Ensemble
- MBLE325 Creative Electronic Ensemble
- MBLE450 Sonic Boom Ensemble
- MCMP325 Experimental Music Workshop I
- MCMP326 Experimental Music Workshop II
- MCMP336 Writing for Voice
- MCRW209 Words for Music
- MPRF217 Learning to Scream
- MTEC420 Grids, Beats & Groups
- Critical Studies course in creative poetic writing (mentor approval required)

BFA Composition: Optional Concentration in Electronic Music

TWO units of coursework chosen from:

- MTHY306 The Experimenting Ear
- MTHY411 Electroacoustic Music Analysis
- MHST425 Survey of Sound Art

FOUR units of coursework chosen from:

- MBLE415 Networked Music Ensemble
- MCMP369 Production as Composition
- MCMP465 Composition with Max/MSP

- MTEC270 History of Electronic Dance Music

EIGHT units of additional coursework with ICOM or MTEC subject codes

BFA Composition: Optional Concentration in Experimental Music

MCMP325 Experimental Music Workshop I

MCMP326 Experimental Music Workshop II

ONE class chosen from:

- MSCM309 Psychoacoustics
- MTHY403 Intonation Workshop I
- MTHY404 Intonation Workshop II

THREE classes chosen from:

- MBLE310 Improvisation Ensemble
- MBLE325 Creative Electronic Ensemble
- MBLE415 Networked Music Ensemble
- MBLE450 Sonic Boom Ensemble
- MBLE460 Golia Large Ensemble
- MCMP465 Composition with Max/MSP

TWO classes chosen from:

- MCMP343 Experiments in Film Sound
- MHST350 Stylists and Innovators 1961–Now
- MHST422 Experimental Music Post-Cage
- MHST425 Survey of Sound Art
- MHST472 John Cage: Music & Thought
- MHST473 John Cage, Sun Ra, Musique Concrète and the Noise Uprising
- MAIC412 Critical Reading (may be repeated for credit)

BFA Composition: Optional Concentration in Composition for Film & Video

MHST205 Western Music History I

MHST206 Western Music History II

MPCD350 Career Designs for Musicians

MPRF307 Conducting I

FPFV424 Aesthetics of Sound and Image

TWO classes chosen from:

- MTHYP341 Film Music History & Analysis
- MCMP342 Composition for Film & Video
- MCMP343 Experiments in Film Sound
- MTHY344 Non-Traditional Film Music

ONE class chosen from (taking *all* of these courses is strongly recommended):

- FSFV435 Sound Student Technician Course
- FPFV481 Sound Mixing and Editing
- MTEC214 Sound Design for Moving Image
- MTEC365 Digital Recording Studio

ONE class chosen from:

- MCMP402 Orchestration
- MTHY451 Orchestral Thought

BFA Composition: Optional Concentration in Instrumental Composition

MCMP330–339 Writing for ... (2 classes)

MPRF307 Conducting I

MPRF408 Conducting II

MLSN001 Performance Lessons (2 different orchestral instruments as assigned, 2 courses total)*

One class chosen from:

- MTHY450 Chamber Thought
- MTHY454 The String Quartet since 1900
- MTHY455 The Piano since 1900

One class chosen from:

- MCMP402 Orchestration
- MTHY451 Orchestral Thought

Two different classes chosen from:

- MBLE106 Chamber Music
- MBLE300 The Ensemble
- MBLE310 Improvisation Ensemble
- MBLE450 Sonic Boom Ensemble
- MBLE460 Golia Large Ensemble

**In specializations or concentrations for which lessons are required, students who do not own an appropriate instrument may need to rent one. Further information is available from the Music Office.*

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year

First Semester (BFA1-1)

- MTHY101 Musicianship Skills A
- MTHY111 Tonal Theory & Applications A
- MAIC100 Worlds of Music I: Europe & N. Am. 1900–
- MPRF103 Class Piano

Second Semester (BFA1-2)

- MTHY102 Musicianship Skills B
- MTHY112 Tonal Theory & Applications B
- MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year

First Semester (BFA2-1)

- MTHY203 Musicianship Skills C (if required)
- MTHY210 Non-Tonal Theories

- M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

- MTHY204 Musicianship Skills D (if required)
- MTHYxxx World Music Theory course
- MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production
- M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year

First Semester (BFA3-1)

- course in New Methods & Technologies (see course listing above)
- course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
- MBLExxx Ensemble elective

Second Semester (BFA3-2)

- course in Professional Development (see course listing above)
- course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
- MBLExxx Ensemble elective

[Back to top](#)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

- MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.
- MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Musicianship Skills A & B) must all be completed by the end of the second year in residence, if required.
- MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Musicianship Skills C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

- All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the *music theory* sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)
- All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the *Musicianship Skills* sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

- In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' [Metier Standing Policy](#)).

MCES.MFA - Master of Fine Arts - Comp & Experimental Sound Practices

General

The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.

- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

Composition & Experimental Sound Practices (MFA)

- MLSN601 Hour Lesson(s) in Performance or Composition as assigned (4 classes)
- MFOR501 or MFOR508 Graduate Compser's or ESP Forum (4 classes)
- Composition courses (with the prefix MCMP) totaling at least 6 units
- Courses in music technology, theory, history, pedagogy, performance or world music (non MCMP music courses, at least 10 units)
- MBLExxx World Music Ensemble (in MFA1)
- FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
- MFOR600 Artists-in-Residence Week (2 classes)
- Winter Session (2 units of coursework with subject code MITM, taken in in January)
- MCMP690 Graduation Portfolio Review
- Electives (to fulfill 60-unit degree requirement)

MIBS.BFA - Bachelor of Fine Arts - InstrumentalArts Bassoon

General

Program Title	School
Bachelor of Fine Arts - InstrumentalArts Bassoon	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903

Program Description
Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Instrumental Arts Bassoon (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice

- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Bassoon (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF122/124/130/131 Studio Class appropriate to major (8 classes)

MPRF133 Woodwind Workshop (8 classes)

MTHY204 Practical Musicianship D

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MAIC403 Teaching Artistry or MAIC404 College Pedagogy

MCMP110 Introduction to Composition, or any other MCMP course offering

MFOR10x Forums (four classes)

ONE class chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses & Lineage
- MHST30x Music Cultures
- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

Chamber/Conducted Ensembles as assigned (8 classes) from:

- MBLE106 Chamber Music
- MBLE300 The Ensemble

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ **DO finish Music Theory and Skills requirements on time**

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ **DON'T take a vacation from Music Theory and Skills requirements**

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ **DO fulfill Music Theory and Skills Incomplete grades on time**

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

**FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS
ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC
WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL
AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts'
Metier Standing Policy).**

**MIBS.MFA - Master of Fine Arts - InstrumentalArts
Bassoon**

General

Program Title	School	
Master of Fine Arts - InstrumentalArts Bassoon	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Winds studies provides a challenging forum for accomplished students of flute, clarinet, oboe and bassoon to explore advanced performance techniques and a greater range of stylistic directions as they develop their individual artistic profiles and prepare for professional careers after graduation. In addition to major lessons, winds ensemble, winds workshop and advanced classes in music history, literature, theory and analysis, MFA candidates perform in a variety of chamber ensembles and conducted large ensembles, including the School's principal conducted faculty-student group, The Ensemble at CalArts. Wind players further hone their skills in extended techniques, improvisation and interpretation through a number of more specialized groups, covering Baroque, jazz, electronic, improvisational and creative music, as well as a host of non-Western traditions. As part of the preparation for the professional world, the MFA curriculum also incorporates classes in career design. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

**Master of Fine Arts (MFA) and Advanced
Certificate of Fine Arts**

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.

- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts’ Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student’s prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ **DO finish Music Theory and Skills requirements on time**

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ **DON'T take a vacation from Music Theory and Skills requirements**

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ **DO fulfill Music Theory and Skills Incomplete grades on time**

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS
ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC
WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL
AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts’
Metier Standing Policy).

MICB.MFA - Master of Fine Arts - InstrumentalArts
Contrabass

General

Program Title	School
Master of Fine Arts - InstrumentalArts Contrabass	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization Strings MFA studies provides a challenging forum for accomplished students of violin, viola, cello and contrabass to explore advanced performance techniques and a greater range of stylistic directions, as they develop their individual artistic profiles, build creative versatility, and prepare for professional careers after graduation. In addition to major lessons, string workshops, and advanced classes in music history, literature, theory and analysis, MFA candidates perform in a variety of chamber and large ensembles, including the School's main conducted faculty-student group, The Ensemble at CalArts. Players further hone their skills in extended techniques, improvisation and interpretation through a number of more specialized groups, covering Baroque, jazz, electronic, improvisational and experimental music, as well as cross-genre work. As part of preparation for the professional world, the MFA curriculum also incorporates classes in pedagogy and career design. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced
Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts’ Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of
Fine Arts Specialization Requirements

InstrumentalArts Strings (MFA) -

MPRF690 Graduation Jury and Recital

Electives (to fulfill 60-unit degree requirement)

MICE.BFA - Bachelor of Fine Arts - InstrumentalArts Cello

General

Program Title	School
Bachelor of Fine Arts - InstrumentalArts Cello	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903

Program Description
Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Instrumental Arts Cello (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music

- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)

- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Cello (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF128 String Workshop (8 classes)

MTHY204 Practical Musicianship D

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MAIC403 Pedagogy I or MAIC404 Pedagogy II

MFORxxx Forums (4 classes)

MCMP110 Introduction to Composition or any other MCMP course offering

ONE class chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses & Lineage
- MHST30x Music Cultures
- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

Chamber/Conducted Ensembles as assigned (8 classes) chosen from:

- MBLE106 Chamber Music
- MBLE300 The Ensemble
- MBLE309 Period Instrument Ensemble

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production

- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion

- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Clarinet (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF122/124/130/131 Studio Class appropriate to major (8 classes)

MPRF133 Woodwind Workshop (8 classes)

MTHY204 Practical Musicianship D

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MAIC403 Teaching Artistry or MAIC404 College Pedagogy

MCMP110 Introduction to Composition, or any other MCMP course offering

MFOR10x Forums (four classes)

ONE class chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses & Lineage
- MHST30x Music Cultures
- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

Chamber/Conducted Ensembles as assigned (8 classes) from:

- MBLE106 Chamber Music
- MBLE300 The Ensemble

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ **DO finish Music Theory and Skills requirements on time**

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ **DON'T take a vacation from Music Theory and Skills requirements**

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ **DO fulfill Music Theory and Skills Incomplete grades on time**

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MICL.MFA - Master of Fine Arts - InstrumentalArts Clarinet

General

Program Title	School
Master of Fine Arts - InstrumentalArts Clarinet	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description
2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Winds studies provides a challenging forum for accomplished students of flute, clarinet, oboe and bassoon to explore advanced performance techniques and a greater range of stylistic directions as they develop their individual artistic profiles and prepare for professional careers after graduation. In addition to major lessons, winds ensemble, winds workshop and advanced classes in music history, literature, theory and analysis, MFA candidates perform in a variety of chamber ensembles and conducted large ensembles, including the School's principal conducted faculty-student group, The Ensemble at CalArts. Wind players further hone their skills in extended techniques, improvisation and interpretation through a number of more specialized groups, covering Baroque, jazz, electronic, improvisational and creative music, as well as a host of non-Western traditions. As part of the preparation for the professional world, the MFA curriculum also incorporates classes in career design. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

InstrumentalArts Winds (MFA) - Clarinet

- MLSN601 Hour Lesson as assigned (4 classes)
- MBLE623 Woodwind Workshop (2 classes)
- MPRF522/524/530/531 Studio Class as appropriate to major (4 classes)
- MBLExxx World Music Ensemble (in MFA1)
- MHST500+ Advanced Music History and Literature (2 classes)
- MTHY600+ Advanced Theory/Analysis (2 classes)

Studies in Extended Techniques, Improvisation, and/or Interpretation. TWO classes chosen from:

- MBLE610 Improvisation Ensemble
- MBLE617 Jazz Student Ensemble
- MBLE618 Jazz Faculty Ensemble

- MBLE627 Multi-Focus Ensemble
- MBLE650 Sonic Boom Ensemble
- MBLE660 Golia Large Ensemble
- MHST601 Improvisation: Uses and Lineage
- MHST550 Stylists & Innovators 1961–Now
- MPRF512 Jazz Improvisation (1-on-1)

Chamber/Conducted Ensembles as assigned (4 classes):

- MBLE500 The Ensemble
- MBLE606 Graduate Chamber Music Ensemble
- MBLE609 Period Instrument Ensemble

ONE class chosen from:

- MPCD603 Teaching Artistry
- MPCD604 Pedagogy: Best Practices
- MPCD650 Career Design for Musicians (1 class)
- MPCD651 Creative Producing for Music
- MPCD660 Creative Entrepreneurship

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Recital

MPRF690 Graduation Jury and Recital

Electives (to fulfill 60-unit degree requirement)

MIFH.BFA - Bachelor of Fine Arts - InstrumentalArts French Horn

General

Program Title	School
Bachelor of Fine Arts - InstrumentalArts French Horn	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903

Program Description
Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

InstrumentalArts French Horn

Free Form Requirements

Instrumental Arts French Horn (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble

- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts French Horn (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF132 Brass Workshop (8 classes)

In addition, a Music Theory Minor and certain optional Concentrations in Composition are also

available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Instrumental Arts Flute (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music

- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble

- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Flute (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF122/124/130/131 Studio Class appropriate to major (8 classes)

MPRF133 Woodwind Workshop (8 classes)

MTHY204 Practical Musicianship D

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MAIC403 Teaching Artistry or MAIC404 College Pedagogy

MCMP110 Introduction to Composition, or any other MCMP course offering

- MAIC401 Improvisation: Uses & Lineage
- MHST30x Music Cultures
- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

Chamber/Conducted Ensembles as assigned (8 classes) from:

- MBLE106 Chamber Music
- MBLE300 The Ensemble

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MIFL.MFA - Master of Fine Arts - InstrumentalArts Flute

General

Program Title	School	
Master of Fine Arts - InstrumentalArts Flute	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Winds studies provides a challenging forum for accomplished students of flute, clarinet, oboe and bassoon to explore advanced performance techniques and a greater range of stylistic directions as they develop their individual artistic profiles and prepare for professional careers after graduation. In addition to major lessons, winds ensemble, winds workshop and advanced classes in music history, literature, theory and analysis, MFA candidates perform in a variety of chamber ensembles and conducted large ensembles, including the School's principal conducted faculty-student group, The Ensemble at CalArts. Wind players further hone their skills in extended techniques, improvisation and interpretation through a number of more

specialized groups, covering Baroque, jazz, electronic, improvisational and creative music, as well as a host of non-Western traditions. As part of the preparation for the professional world, the MFA curriculum also incorporates classes in career design. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

MIGU.BFA - Bachelor of Fine Arts - InstrumentalArts Guitar

General

Program Title	School
Bachelor of Fine Arts - InstrumentalArts Guitar	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously

fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

InstrumentalArts Harp

Free Form Requirements

Instrumental Arts Harp (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Harp (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF123 Harp Studio Class (8 classes)

MTHY204 Practical Musicianship D

MHST206 Western Music History II

ONE class chosen from:

- MAIC240 Jazz History
- MHST205 Western Music History I
- MAIC401 Improvisation: Uses & Lineage
- MHST350 Stylists & Innovators 1961–Now
- MHST30x Music Cultures
- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST425 Survey of Sound Art

MTHY315 Meaningful Interpretation

MAIC403 Pedagogy I or MAIC404 Pedagogy II

MCMP110 Introduction to Composition or any other MCMP course offering

MFOR10x Forums (2 classes)

MBLExxx Ensembles as assigned from (8 classes):

- MBLE106 Chamber Music
- MBLE300 The Ensemble

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury & Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MIHR.MFA - Master of Fine Arts - InstrumentalArts Harp

General

Program Title	School	
Master of Fine Arts - InstrumentalArts Harp	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

InstrumentalArts (MFA) - Harp

MLSN601 Hour Lesson as assigned (4 classes)

MPRF523 Harp Studio Class (4 classes)

MBLExxx World Music Ensemble (in MFA1)

MHST500+ Advanced Music History and Literature (2 classes)

MTHY600+ Advanced Theory/Analysis (2 classes)

Studies in Extended Techniques, Improvisation, and/or Interpretation. TWO classes chosen from:

- MBLE500 The Ensemble
- MBLE610 Improvisation Ensemble
- MBLE617 Jazz Student Ensemble
- MBLE618 Jazz Faculty Ensemble
- MBLE627 Multi-Focus Ensemble
- MBLE650 Sonic Boom Ensemble

MIHS.MFA - Master of Fine Arts - InstrumentalArts Harpsichord

General

Program Title	School	
Master of Fine Arts - InstrumentalArts Harpsichord	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Piano/Keyboard studies is an environment in which accomplished students of piano and other keyboards can explore advanced performance techniques and branch out in new stylistic directions, allowing them to shape their individual artistic profiles and prepare for careers in the professional music world. In addition to major lessons, piano workshops, performance forums, and advanced classes in music history, literature, theory and analysis, MFA students play in chamber groups and large ensembles, including the School's principal conducted faculty-student group, The Ensemble at CalArts. They further develop more specialized skills through electives (harpsichord, jazz piano, jazz keyboard) and ensembles focused mostly on jazz, improvisation and experimental music. The MFA curriculum also incorporates classes in pedagogy and career design, as well as in movement (yoga for musicians, African and Indonesian dance, and offerings in other Schools at CalArts). Each MFA candidate is required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

- MPRF590 Mid-Residence Recital
- MPRF690 Graduation Jury and Recital
- Electives (to fulfill 60-unit degree requirement)

MIMD.MFA - Master of Fine Arts - Indonesian Music/ Dance

General

Program Title	School	
Master of Fine Arts - Indonesian Music/ Dance	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0999

Program Description
2-Year Program
The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories.

About the Specialization
Tabla students study, practice and perform in various contexts, both as a soloist and accompanist, learning a broad range of traditional repertoire and developing skills as improvisers. Focusing heavily on vocalization and recitation of syllables (e.g. the language and grammar of tabla), students gain a deep understanding of the concepts, devices and rhythmic patterns found in North Indian classical music, building extensive knowledge of many different talas.

Students of melodic instruments develop advanced technical skills required for playing and singing different ragas and talas, as well as comprehensive understanding of North Indian music theory.

All MFA World Music artists are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Indonesian Music/Dance

MIOB.BFA - Bachelor of Fine Arts - InstrumentalArts Oboe

General

Program Title	School	
Bachelor of Fine Arts - InstrumentalArts Oboe	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		50.0903

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Instrumental Arts Oboe (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements**MUSIC CULTURES & LITERATURE**

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES**ONE course chosen from:**

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES**TWO units of coursework chosen from:**

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT**TWO units of coursework chosen from:**

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Oboe (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF122/124/130/131 Studio Class appropriate to major (8 classes)

MPRF133 Woodwind Workshop (8 classes)

MTHY204 Practical Musicianship D

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MAIC403 Teaching Artistry or MAIC404 College Pedagogy

MCMP110 Introduction to Composition, or any other MCMP course offering

MFOR10x Forums (four classes)

ONE class chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses & Lineage

- MHST30x Music Cultures
- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

Chamber/Conducted Ensembles as assigned (8 classes) from:

- MBLE106 Chamber Music
- MBLE300 The Ensemble

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MIOB.MFA - Master of Fine Arts - InstrumentalArts Oboe

General

Program Title	School	
Master of Fine Arts - InstrumentalArts Oboe	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Winds studies

provides a challenging forum for accomplished students of flute, clarinet, oboe and bassoon to explore advanced performance techniques and a greater range of stylistic directions as they develop their individual artistic profiles and prepare for professional careers after graduation. In addition to major lessons, winds ensemble, winds workshop and advanced classes in music history, literature, theory and analysis, MFA candidates perform in a variety of chamber ensembles and conducted large ensembles, including the School's principal conducted faculty-student group, The Ensemble at CalArts. Wind players further hone their skills in extended techniques, improvisation and interpretation through a number of more specialized groups, covering Baroque, jazz, electronic, improvisational and creative music, as well as a host of non-Western traditions. As part of the preparation for the professional world, the MFA curriculum also incorporates classes in career design. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

InstrumentalArts Winds (MFA) - Oboe

MLSN601 Hour Lesson as assigned (4 classes)
MBLE623 Woodwind Workshop (2 classes)
MPRF522/524/530/531 Studio Class as appropriate to major (4 classes)
MBLExxx World Music Ensemble (in MFA1)
MHST500+ Advanced Music History and Literature (2 classes)
MTHY600+ Advanced Theory/Analysis (2 classes)
Studies in Extended Techniques, Improvisation, and/or Interpretation. TWO classes chosen from:

General

Program Title	School
Master of Fine Arts - InstrumentalArts Percussion	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Percussion studies is designed for already accomplished players to explore advanced performance techniques and branch out into new stylistic directions, as they develop their individual artistic profiles and prepare for professional careers across a number of diverse creative settings. In addition to graduate major lessons, supplemental non-major lessons in other areas, experiences with traditional and global contemporary repertoire, students also participate in percussion workshops and performance forums. Intensive ensemble work focuses on playing in percussion ensembles, chamber music ensembles, experimental pop groups, extensive world music offerings, improvisation ensembles and the School's principal conducted faculty-student group, The Ensemble at CalArts. The curriculum further incorporates courses in composition, creative skills and pedagogy. It also encourages percussionists to incorporate experimental forms, improvisation, digital media, hybrid arts and interdisciplinary performance into their individual studies. All MFA percussionists are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.

- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

InstrumentalArts - Percussion (MFA)

- MLSN601 Hour Lesson as assigned (4 classes)
- MPRF529 Percussion Workshop (4 classes)
- MBLE622 Percussion Ensemble (4 classes)
- MHST500+ Advanced Music History and Literature (2 classes)
- MTHY600+ Advanced Theory/Analysis (2 classes)
- MBLE Ensembles as assigned (4 classes)

MIPN.BFA - Bachelor of Fine Arts - InstrumentalArts Piano

General

Program Title	School	
Bachelor of Fine Arts - InstrumentalArts Piano	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

InstrumentalArts Piano

Free Form Requirements

Instrumental Arts Piano/Keyboard (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians

- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Piano/Keyboard (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF119 Piano Workshop (8 classes)

MTHY204 Practical Musicianship D

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MPCD199 Undergraduate Independent Project: Pedagogy (2 classes)

MFOR10x Forums (4 classes)

MBLExxx Ensemble (as pianist) (8 classes)

One class chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses & Lineage
- MHST30x Music Cultures
- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Note: The Shared Curriculum MPRF103 Class Piano requirement is waived for Piano/Keyboard majors.

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M...
World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music
faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music
faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end
of the first year of residence in order to maintain eligibility to continue as a student
in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 &
MTHY102 (Practical Musicianship A & B) must all be completed by the end of the
second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical
Musicianship C & D), if required, must all be completed by the end of the third year
in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses
each semester until all required courses in the music theory sequence MTHY001,
MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization
Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses
each semester until all required courses in the Practical Musicianship sequence
MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the
descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the
Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before
the student will be allowed to enroll in the next course in the sequence. Instructors
are not obliged to permit enrollment in music theory or skills courses after classes
begin, so Incomplete grades should be made up before the date on which the
following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS
ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC
WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL
AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts'
Metier Standing Policy).

MIPN.MFA - Master of Fine Arts - InstrumentalArts Piano

General

Program Title	School
Master of Fine Arts - InstrumentalArts Piano	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program

The MFA Program in Music is designed to enable students to acquire the multiple
skillsets that will empower them to stake out their own, unique, career pathways to
success. The program of study is designed to be a stimulating and challenging,
collaborative learning environment, in which music and sound artists can refine
and perfect their already distinctive voices to reach the highest levels of
professional practice, while simultaneously exploring new and inspiring, creative
territories.

MFA Piano/Keyboard studies is an environment in which accomplished students of
piano and other keyboards can explore advanced performance techniques and
branch out in new stylistic directions, allowing them to shape their individual
artistic profiles and prepare for careers in the professional music world.

In addition to major lessons, piano workshops, performance forums, and advanced
classes in music history, literature, theory and analysis, MFA students play in
chamber groups and large ensembles, including the School's principal conducted
faculty-student group, The Ensemble at CalArts. They further develop more
specialized skills through electives (harpsichord, jazz piano, jazz keyboard) and
ensembles focused mostly on jazz, improvisation and experimental music. The MFA
curriculum also incorporates classes in pedagogy and career design, as well as in
movement (yoga for musicians, African and Indonesian dance, and offerings in
other Schools at CalArts).

Each MFA candidate is required to pass a Mid-Residence Recital and a Graduation
Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced
Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA,
BA or equivalent in music before admittance, or to have a Bachelor's degree in an
alternate subject along with skills and knowledge that are appropriate to enter a
Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews
officially documented. During these reviews, the student's course history is
examined, progress is assessed, problems are discussed and changes to the
curriculum are considered. Mentors and deans must officially approve any changes
to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts
programs require a minimum of 4.0 semesters of enrollment. MFA degree and
Advanced Certificate programs require at least 2.0 semesters of full-time
residence at CalArts. For all programs, the final 1.0 semester of course enrollment
before graduation must be in residence at CalArts, although this requirement may
be satisfied by completing consecutive semesters of part-time enrollment at
CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ **DO fulfill Music Theory and Skills Incomplete grades on time**

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MITB.MFA - Master of Fine Arts - InstrumentalArts Tuba

General

Program Title	School
Master of Fine Arts - InstrumentalArts Tuba	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description
2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Brass studies allows already accomplished students of trumpet, horn, trombone, euphonium and tuba to explore advanced performance techniques and new stylistic directions as they develop their individual artistic and professional profiles and prepare for careers across a variety of creative settings. In addition to major lessons, brass ensemble, brass workshop, and advanced classes in music history, literature, theory and analysis, MFA candidates perform in the School's principal conducted faculty-student group, The Ensemble at CalArts. They further hone their skills in extended techniques, improvisation and interpretation through a number of more specialized groups, covering Baroque, jazz, electronic, improvisational and experimental music, as well as a host of non-Western traditions. As part of the preparation for the professional world, the MFA curriculum also incorporates classes in pedagogy and career design. Each MFA candidate is required to pass a Mid-Residence Recital and a Graduation Jury and Recital.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

InstrumentalArts Brass (MFA) - Tuba

- MLSN601 Hour Lesson as assigned (4 classes)
- MPRF532 Brass Workshop (2 classes)
- MBLE620 Brass Ensemble (4 classes)
- MHST500+ Advanced Music History and Literature (2 classes)
- MTHY/MCMP600+ Advanced Theory/Analysis or Composition (2 classes)
- Chamber/Conducted Ensembles as assigned (4 classes):

- MBLE500 The Ensemble
- MBLE606 Chamber Music Ensemble
- MBLE609 Period Instrument Ensemble

Studies in Extended Techniques, Improvisation, and/or Interpretation: TWO classes chosen from:

- MBLE500 The Ensemble

- MBLE610 Improvisation Ensemble
- MBLE617 Jazz Student Ensemble
- MBLE618 Jazz Faculty Ensemble
- MBLE627 Multi-Focus Ensemble
- MBLE650 Sonic Boom Ensemble
- MBLE660 Golía Large Ensemble
- MHST601 Improvisation: Uses and Lineage
- MHST550 Stylists & Innovators 1961–Now
- MPRF512 Jazz Improvisation (1-on-1)
- MTHY577 Baroque Accompaniment
- MTHY600+

MFOR502 Performance Forum (in Spring Semesters, 2 classes)

ONE class chosen from:

- MPCD603 Teaching Artistry
- MPCD604 Pedagogy: Best Practices
- MPCD650 Career Design for Musicians
- MPCD651 Creative Producing for Music
- MPCD660 Creative Entrepreneurship

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

MBLExxx World Music Ensemble (in MFA1)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Recital

MPRF690 Graduation Jury and Recital

Electives (to fulfill 60-unit degree requirement)

MITP.BFA - Bachelor of Fine Arts - InstrumentalArts Trumpet

General

Program Title	School
Bachelor of Fine Arts - InstrumentalArts Trumpet	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903

Program Description
Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and

career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Instrumental Arts Trumpet (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble

- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Trumpet (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF132 Brass Workshop (8 classes)

MBLE120 Brass Ensemble (8 classes)

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MFOR102 Performance Forum (2 classes)

MCMP110 Introduction to Composition or any other MCMP course offering

ONE class chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses and Lineage
- MHST30x Music Cultures
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

EIGHT classes of MBLExxx Ensembles as assigned:

- MBLE106 Chamber Music
- MBLE300 The Ensemble
- MBLE123 Woodwind Ensemble (for hornists)

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student’s placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

- MTHY101 Practical Musicianship A
- MTHY111 Tonal Theory & Applications A
- MAIC100 Worlds of Music I: Europe & N. Am. 1900-
- MPRF103 Class Piano Second Semester

(BFA1-2)

- MTHY102 Practical Musicianship B
- MTHY112 Tonal Theory & Applications B
- MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

- MTHY203 Practical Musicianship C
- MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

- MTHY204 Practical Musicianship D (if required)
- MTHYxxx World Music Theory course
- MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

- course in Making Original Work (see course listing above)
- course in New Methods & Technologies (see course listing above)
- course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member
- MBLExxx Ensemble elective

Second Semester (BFA3-2)

- course in Professional Development (see course listing above)
- course in New Methods & Technologies (see course listing above)
- course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member
- MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

- course in Professional Development (see course listing above)
- course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

- course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts’ Metier Standing Policy).

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MITR.MFA - Master of Fine Arts - InstrumentalArts Trombone

General

Program Title	School
Master of Fine Arts - InstrumentalArts Trombone	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description
2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA Brass studies allows already accomplished students of trumpet, horn, trombone, euphonium and tuba to explore advanced performance techniques and new stylistic directions as they develop their individual artistic and professional profiles and prepare for careers across a variety of creative settings. In addition to major lessons, brass ensemble, brass workshop, and advanced classes in music history, literature, theory and analysis, MFA candidates perform in the School's principal conducted faculty-student group, The Ensemble at CalArts. They further hone their skills in extended

techniques, improvisation and interpretation through a number of more specialized groups, covering Baroque, jazz, electronic, improvisational and experimental music, as well as a host of non-Western traditions. As part of the preparation for the professional world, the MFA curriculum also incorporates classes in pedagogy and career design. Each MFA candidate is required to pass a Mid-Residence Recital and a Graduation Jury and Recital.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

InstrumentalArts Brass (MFA) - Trombone

MLSN601 Hour Lesson as assigned (4 classes)

- MPCD660 Creative Entrepreneurship

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

MBLExxx World Music Ensemble (in MFA1)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Recital

MPRF690 Graduation Jury and Recital

Electives (to fulfill 60-unit degree requirement)

MIVA.BFA - Bachelor of Fine Arts - InstrumentalArts Viola

General

Program Title	School
Bachelor of Fine Arts - InstrumentalArts Viola	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		50.0903

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

InstrumentalArts Viola

Instrumental Arts Viola (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Instrumental Arts Viola (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MPRF128 String Workshop (8 classes)

MHST205 Western Music History I

MHST206 Western Music History II

MTHY315 Meaningful Interpretation

MAIC403 Teaching Artistry or MAIC404 College Pedagogy

MFOR10x Forums (4 classes)

MCMP110 Introduction to Composition or any other MCMP course offering

ONE class chosen from:

- MAIC240 Jazz History
- MAIC401 Improvisation: Uses & Lineage
- MHST30x Music Cultures

- MHST330 Studies in Experimental Pop I
- MHST331 Studies in Experimental Pop II
- MHST350 Stylists & Innovators 1961–Now
- MHST425 Survey of Sound Art

Chamber/Conducted Ensembles as assigned (8 classes) chosen from:

- MBLE106 Chamber Music
- MBLE300 The Ensemble
- MBLE309 Period Instrument Ensemble

MPRF290 Mid-Residence Recital

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student’s placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester’s regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts’ Metier Standing Policy).

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MIVN.MFA - Master of Fine Arts - InstrumentalArts Violin

General

Program Title	School
Master of Fine Arts - InstrumentalArts Violin	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization Strings MFA studies provides a challenging forum for accomplished students of violin, viola, cello and contrabass to explore advanced performance techniques and a greater range of stylistic directions, as they develop their individual artistic profiles, build creative versatility, and prepare for professional careers after graduation. In addition to major lessons, string workshops, and advanced classes in music history, literature, theory and analysis, MFA candidates perform in a variety of chamber and large ensembles, including the School's main conducted faculty-student group, The Ensemble at CalArts. Players further hone their skills in extended techniques, improvisation and interpretation through a number of more specialized groups, covering Baroque, jazz, electronic, improvisational and experimental music, as well as cross-genre work. As part of preparation for the professional world, the MFA curriculum also incorporates classes in pedagogy and career design. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.

- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

InstrumentalArts Strings (MFA) - Violin

MLSN601 Hour Lesson as assigned (4 classes)

MPRF528 String Workshop (4 classes)

MBLExxx World Music Ensemble (in MFA1)

MHST500+ Advanced Music History and Literature (2 classes)

MTHY600+ Advanced Theory/Analysis (2 classes)

Chamber/Conducted Ensembles as assigned (FOUR classes) from

- MBLE500 The Ensemble
- MBLE606 Chamber Music Ensemble
- MBLE609 Period Instrument Ensemble

Studies in Extended Techniques, Improvisation and/or Interpretation. TWO classes chosen from:

- MBLE500 The Ensemble
- MBLE610 Improvisation Ensemble
- MBLE617 Jazz Student Ensemble
- MBLE618 Jazz Faculty Ensemble
- MBLE627 Multi-Focus Ensemble
- MBLE650 Sonic Boom Ensemble
- MBLE660 Golia Large Ensemble
- MHST601 Improvisation: Uses and Lineage
- MHST550 Stylists & Innovators 1961–Now
- MPRF512 Jazz Improvisation (1-on-1)
- MTHY577 Baroque Accompaniment

MFOR502 Performance Forum (2 classes) (offered in Spring semesters)

ONE class chosen from:

- MPCD603 Teaching Artistry
- MPCD604 Pedagogy: Best Practices
- MPCD650 Career Design for Musicians
- MPCD651 Creative Producing for Music
- MPCD660 Creative Entrepreneurship

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Recital

MPRF690 Graduation Jury and Recital

Electives (to fulfill 60-unit degree requirement)

MJTB.BFA - Bachelor of Fine Arts - Jazz Trombone

General

Program Title	School	
Bachelor of Fine Arts - Jazz Trombone	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0910

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Jazz Trombone

Free Form Requirements

Jazz Trombone (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Jazz Trombone (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (each semester)

MFOR107 Jazz Forum (3 classes)

MTHY240 Jazz Keyboard Theory

MTHY108 Transcription Skills

MBLE201 Beginning African Ensemble

MPRF101 or MPRF102 Undergraduate Jazz Improvisation (1 course)

MPRF203 Harmonic Improvisation

MCMP110 Introduction to Composition or any other MCMP course offering

ONE class chosen from:

- MCMP310 Jazz Composition
- MCMP314 Jazz Arranging

MAIC240 Jazz History

FOUR units of coursework chosen from:

- MAIC314 The Music of Flamenco
- MAIC316 Blues before 1960
- MAIC401 Improvisation: Uses and Lineage
- MHST30x Music Cultures
- MHST312 Ethnology of African Music
- MHST350 Stylists & Innovators 1961–Now
- MHST371 Jazz and Urban Experimentalism

MBLE117 Jazz Student Ensemble (8 classes)

MBLE118 Jazz Faculty Ensemble (8 classes)

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MJTB.MFA - Master of Fine Arts - Jazz Trombone

General

Program Title	School
Master of Fine Arts - Jazz Trombone	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0910

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA students of jazz bass, guitar, keyboard, drums, brass, reeds, and in special cases for other instruments, jazz performance, anchor their individual studies with major lessons, jazz forums and classes in composition, harmonic improvisation, history, theory and analysis. Ensemble work is built around performing with both a student jazz ensemble and a faculty jazz ensemble. MFA jazz students work closely with their mentors to chart an individualized program of study based on needs, interests and the professional aims of each students. MFA jazz artists also play with faculty as part of an apprenticeship model, as colleagues and collaborators, as they build practical experience as performers, improvisers, composers and bandleaders, at home on the concert stage and in the recording studio. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Jazz Trombone (MFA)

These requirements are applicable to the following areas of study: Jazz Bass, Jazz Guitar, Jazz Keyboard, Jazz Drums, Jazz Trumpet, Jazz Trombone, Jazz Reeds, and Jazz Performance.

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester’s regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts’ Metier Standing Policy).

MJTP.MFA - Master of Fine Arts - Jazz Trumpet

General

Program Title	School	
Master of Fine Arts - Jazz Trumpet	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0910

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA students of jazz bass, guitar, keyboard, drums, brass, reeds, and in special cases for other instruments,

jazz performance, anchor their individual studies with major lessons, jazz forums and classes in composition, harmonic improvisation, history, theory and analysis. Ensemble work is built around performing with both a student jazz ensemble and a faculty jazz ensemble. MFA jazz students work closely with their mentors to chart an individualized program of study based on needs, interests and the professional aims of each students. MFA jazz artists also play with faculty as part of an apprenticeship model, as colleagues and collaborators, as they build practical experience as performers, improvisers, composers and bandleaders, at home on the concert stage and in the recording studio. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Jazz Trumpet (MFA)

These requirements are applicable to the following areas of study: Jazz Bass, Jazz Guitar, Jazz Keyboard, Jazz Drums, Jazz Trumpet, Jazz Trombone, Jazz Reeds, and Jazz Performance.

- MLSN601 Hour Lesson as assigned (4 classes)
- MCMP610 Jazz Composition
- MCMP500+ upper-level composition elective
- MPRF603 Harmonic Improvisation
- MBLE618 Jazz Faculty Ensemble (4 classes)
- MBLE617 Jazz Student Ensemble (4 classes)
- MFOR507 Jazz Forum (2 classes)
- ONE class chosen from:
 - MHST550 Stylists & Innovators 1961–Now
 - MHST571 Jazz and Urban Experimentalism
 - MHST601 Improvisation: Uses and Lineage
- MHST/MTHY500+ upper-level history, theory or analysis elective
- MBLE501 Beginning African Music Ensemble
- FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
- MFOR600 Artists-in-Residence Week (2 classes)
- Winter Session (2 units of coursework taken in January)
- MPRF590 Mid-Residence Recital
- MPRF690 Graduation Recital
- Electives (to fulfill 60-unit degree requirement)

MJZB.BFA - Bachelor of Fine Arts - Jazz Bass

General

Program Title	School	
Bachelor of Fine Arts - Jazz Bass	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0910

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course

can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Jazz Bass

Free Form Requirements

Jazz Bass (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory

- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble

- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Jazz Bass (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (each semester)

MFOR107 Jazz Forum (3 classes)

MTHY240 Jazz Keyboard Theory

MTHY108 Transcription Skills

MBLE201 Beginning African Ensemble

MTHY203 Practical Musicianship C

MPRF101 or MPRF102 Undergraduate Jazz Improvisation (1 course)

MPRF203 Harmonic Improvisation

ONE class chosen from:

- MCMP310 Jazz Composition
- MCMP314 Jazz Arranging

MAIC240 Jazz History

FOUR units of coursework chosen from:

- MAIC314 The Music of Flamenco
- MAIC316 Blues before 1960
- MAIC401 Improvisation: Uses and Lineage
- MHST30x Music Cultures
- MHST312 Ethnology of African Music
- MHST350 Stylists & Innovators 1961–Now
- MHST371 Jazz and Urban Experimentalism

MBLE117 Jazz Student Ensemble (8 classes)

MBLE118 Jazz Faculty Ensemble (8 classes)

MPRF490 Graduation Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student’s placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Jazz Drums (MFA)

These requirements are applicable to the following areas of study: Jazz Bass, Jazz Guitar, Jazz Keyboard, Jazz Drums, Jazz Trumpet, Jazz Trombone, Jazz Reeds, and Jazz Performance.

MLSN601 Hour Lesson as assigned (4 classes)

MCMP610 Jazz Composition

MCMP500+ upper-level composition elective

MPRF603 Harmonic Improvisation

MBLE618 Jazz Faculty Ensemble (4 classes)

MBLE617 Jazz Student Ensemble (4 classes)

MFOR507 Jazz Forum (2 classes)

ONE class chosen from:

- MHST550 Stylists & Innovators 1961–Now
- MHST571 Jazz and Urban Experimentalism
- MHST601 Improvisation: Uses and Lineage

MHST/MTHY500+ upper-level history, theory or analysis elective

MBLE501 Beginning African Music Ensemble

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Recital

MPRF690 Graduation Recital

Electives (to fulfill 60-unit degree requirement)

MJZF.BFA - Bachelor of Fine Arts - Jazz Flute

General

Program Title	School
Bachelor of Fine Arts - Jazz Flute	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		50.0910

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Jazz Flute

Free Form Requirements

Jazz Flute (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production

- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Pedagogy I: Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion

- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Jazz Flute (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (each semester)

MFOR107 Jazz Forum (3 classes)

MTHY240 Jazz Keyboard Theory

MTHY108 Transcription Skills

MBLE201 Beginning African Ensemble

MPRF101 or MPRF102 Undergraduate Jazz Improvisation (1 course)

MPRF203 Harmonic Improvisation

ONE class chosen from:

- MCMP310 Jazz Composition
- MCMP314 Jazz Arranging

MAIC240 Jazz History

FOUR units of coursework chosen from:

- MAIC314 The Music of Flamenco
- MAIC316 Blues before 1960
- MAIC401 Improvisation: Uses and Lineage
- MHST30x Music Cultures
- MHST312 Ethnology of African Music
- MHST350 Stylists & Innovators 1961–Now
- MHST371 Jazz and Urban Experimentalism

MBLE117 Jazz Student Ensemble (8 classes)

MBLE118 Jazz Faculty Ensemble (8 classes)

MPRF490 Graduation Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ **DO finish Music Theory and Skills requirements on time**

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ **DON'T take a vacation from Music Theory and Skills requirements**

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ **DO fulfill Music Theory and Skills Incomplete grades on time**

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MJZF.MFA - Master of Fine Arts - Jazz Flute

General

Program Title	School	
Master of Fine Arts - Jazz Flute	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0910

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA students of jazz bass, guitar, keyboard, drums, brass, reeds, and in special cases for other instruments, jazz performance, anchor their individual studies with major lessons, jazz forums and classes in composition, harmonic improvisation, history, theory and analysis. Ensemble work is built around performing with both a student jazz ensemble and a faculty jazz ensemble. MFA jazz students work closely with their mentors to chart an individualized program of study based on needs, interests and the professional aims of each students. MFA jazz artists also play with faculty as part of an apprenticeship model, as colleagues and collaborators, as they build practical experience as performers, improvisers, composers and bandleaders, at home on the concert stage and in the recording studio. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians

- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Beg Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Jazz Keyboard (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (each semester)

MFOR107 Jazz Forum (3 classes)

MTHY240 Jazz Keyboard Theory

MTHY108 Transcription Skills

MBLE201 Beginning African Ensemble

MPRF101 or MPRF102 Undergraduate Jazz Improvisation (1 course)

MPRF203 Harmonic Improvisation

ONE class chosen from:

- MCMP310 Jazz Composition
- MCMP314 Jazz Arranging

MAIC240 Jazz History

FOUR units of coursework chosen from:

- MAIC314 The Music of Flamenco
- MAIC316 Blues before 1960
- MAIC401 Improvisation: Uses and Lineage
- MHST30x Music Cultures
- MHST312 Ethnology of African Music
- MHST350 Stylists & Innovators 1961–Now
- MHST371 Jazz and Urban Experimentalism

MBLE117 Jazz Student Ensemble (8 classes)

MBLE118 Jazz Faculty Ensemble (8 classes)

MPRF490 Graduation Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M...
World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music
faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music
faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end
of the first year of residence in order to maintain eligibility to continue as a student
in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 &
MTHY102 (Practical Musicianship A & B) must all be completed by the end of the
second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical
Musicianship C & D), if required, must all be completed by the end of the third year
in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses
each semester until all required courses in the music theory sequence MTHY001,
MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization
Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses
each semester until all required courses in the Practical Musicianship sequence
MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the
descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the
Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before
the student will be allowed to enroll in the next course in the sequence. Instructors
are not obliged to permit enrollment in music theory or skills courses after classes
begin, so Incomplete grades should be made up before the date on which the
following semester's regular classes commence.

**FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS
ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC
WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL
AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts'
Metier Standing Policy).**

MJZK.MFA - Master of Fine Arts - Jazz Keyboard

General

Program Title	School	
Master of Fine Arts - Jazz Keyboard	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0910

Program Description

2-Year Program The MFA Program in Music is designed to enable students to
acquire the multiple skillsets that will empower them to stake out their own,
unique, career pathways to success. The program of study is designed to be a
stimulating and challenging, collaborative learning environment, in which music
and sound artists can refine and perfect their already distinctive voices to reach
the highest levels of professional practice, while simultaneously exploring new and
inspiring, creative territories. About the Specialization MFA students of jazz bass,
guitar, keyboard, drums, brass, reeds, and in special cases for other instruments,
jazz performance, anchor their individual studies with major lessons, jazz forums
and classes in composition, harmonic improvisation, history, theory and analysis.
Ensemble work is built around performing with both a student jazz ensemble and a
faculty jazz ensemble. MFA jazz students work closely with their mentors to chart
an individualized program of study based on needs, interests and the professional
aims of each students. MFA jazz artists also play with faculty as part of an
apprenticeship model, as colleagues and collaborators, as they build practical
experience as performers, improvisers, composers and bandleaders, at home on
the concert stage and in the recording studio. All MFA candidates are required to
pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain
the degree.

Free Form Requirements

Jazz Keyboard (MFA)

These requirements are applicable to the following areas of study: Jazz Bass, Jazz
Guitar, Jazz Keyboard, Jazz Drums, Jazz Trumpet, Jazz Trombone, Jazz Reeds, and
Jazz Performance.

MLSN601 Hour Lesson as assigned (4 classes)

MCMP610 Jazz Composition

MCMP500+ upper-level composition elective

MPRF603 Harmonic Improvisation

MBLE618 Jazz Faculty Ensemble (4 classes)

MBLE617 Jazz Student Ensemble (4 classes)

MFOR507 Jazz Forum (2 classes)

ONE class chosen from:

- MHST550 Stylists & Innovators 1961–Now
- MHST571 Jazz and Urban Experimentalism
- MHST601 Improvisation: Uses and Lineage

MHST/MTHY500+ upper-level history, theory or analysis elective

MBLE501 Beginning African Music Ensemble

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or
Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Recital

MPRF690 Graduation Recital

Electives (to fulfill 60-unit degree requirement)

MJZM.BFA - Bachelor of Fine Arts - Jazz Mallets

General

Program Title	School	
Bachelor of Fine Arts - Jazz Mallets	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0910

Program Description
Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Jazz Mallets

Free Form Requirements

Jazz Mallets (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MJZP.MFA - Master of Fine Arts - Jazz Performance

General

Program Title	School	
Master of Fine Arts - Jazz Performance	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0910

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. MFA Program in Music About the Specialization MFA students of jazz bass, guitar, keyboard, drums, brass, reeds, and in special cases for

other instruments, jazz performance, anchor their individual studies with major lessons, jazz forums and classes in composition, harmonic improvisation, history, theory and analysis. Ensemble work is built around performing with both a student jazz ensemble and a faculty jazz ensemble. MFA jazz students work closely with their mentors to chart an individualized program of study based on needs, interests and the professional aims of each students. MFA jazz artists also play with faculty as part of an apprenticeship model, as colleagues and collaborators, as they build practical experience as performers, improvisers, composers and bandleaders, at home on the concert stage and in the recording studio. All MFA candidates are required to pass a Mid-Residence Recital and a Graduation Jury and Recital in order to obtain the degree.

Free Form Requirements

Jazz Performance (MFA)

These requirements are applicable to the following areas of study: Jazz Bass, Jazz Guitar, Jazz Keyboard, Jazz Drums, Jazz Trumpet, Jazz Trombone, Jazz Reeds, and Jazz Performance.

MLSN601 Hour Lesson as assigned (4 classes)

MCMP610 Jazz Composition

MCMP500+ upper-level composition elective

MPRF603 Harmonic Improvisation

MBLE618 Jazz Faculty Ensemble (4 classes)

MBLE617 Jazz Student Ensemble (4 classes)

MFOR507 Jazz Forum (2 classes)

ONE class chosen from:

- MHST550 Stylists & Innovators 1961–Now
- MHST571 Jazz and Urban Experimentalism
- MHST601 Improvisation: Uses and Lineage

MHST/MTHY500+ upper-level history, theory or analysis elective

MBLE501 Beginning African Music Ensemble

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Recital

MPRF690 Graduation Recital

Electives (to fulfill 60-unit degree requirement)

MJZR.BFA - Bachelor of Fine Arts - Jazz Reeds

General

Program Title	School	
Bachelor of Fine Arts - Jazz Reeds	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0910

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course

can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Jazz Reeds

Free Form Requirements

Jazz Reeds (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory

- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice
- MPCD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble

- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Jazz Reeds (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (each semester)

MFOR107 Jazz Forum (3 classes)

MTHY240 Jazz Keyboard Theory

MTHY108 Transcription Skills

MBLE201 Beginning African Ensemble

MPRF101 or MPRF102 Undergraduate Jazz Improvisation (1 course)

MPRF203 Harmonic Improvisation

ONE class chosen from:

- MCMP310 Jazz Composition
- MCMP314 Jazz Arranging

MAIC240 Jazz History

FOUR units of coursework chosen from:

- MAIC314 The Music of Flamenco
- MAIC316 Blues before 1960
- MAIC401 Improvisation: Uses and Lineage
- MHST30x Music Cultures
- MHST312 Ethnology of African Music
- MHST350 Stylists & Innovators 1961–Now
- MHST371 Jazz and Urban Experimentalism

MBLE117 Jazz Student Ensemble (8 classes)

MBLE118 Jazz Faculty Ensemble (8 classes)

MPRF490 Graduation Recital

MMEP.BFA - Bachelor of Fine Arts - Musical Arts/ Experimental Pop

General

Program Title	School	
Bachelor of Fine Arts - Musical Arts/ Experimental Pop	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate	Undergraduate	50.0901

Program Description

4-Year Program The BFA program of study is uniquely designed around the concept of the "Music Artist." Unlike a traditional conservatory approach, it allows each student to cultivate a far-ranging musical skillset while also providing specialized training best suited to meet individual goals. About the Specialization The BFA curriculum features a network of courses that offer core theory and skills studies, songwriting, arranging, rock and pop history, recording, producing and individual lessons. Students are highly encouraged to add classes in non-Western music, experimental composition and music technology in order to broaden the creative and technical reach of their individual musical voices. From the beginning and throughout their residency, students build and develop a cumulative portfolio of creative work in close collaboration with their mentor. This portfolio is periodically reviewed. In order to obtain the degree, this portfolio must be evaluated and approved by faculty in the student's final year.

Free Form Requirements

Experimental Pop (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion

- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Experimental Pop (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MFOR104 ExPop Forum (3 classes)

AUDIO PRODUCTION

MTEC104 The Art of Recording

MTEC101 Concert Production I

MSCM310 Acoustics for Musicians

ONE course chosen from:

- MCMP308 The Art of the Mix
- MCMP404 Field Recording Workshop
- MTEC212 Recording the Voice
- MTEC270 History of Electronic Dance Music
- MTEC365 Digital Recording Studio
- MTEC367 Project Recording
- MCMP367 Global Studios and Audiotopias

COMPOSITION

MCMP112 Composing Experimental Pop

MCMP369 Production as Composition

MHST230 Audio-Visual Theory and Composition

ONE course chosen from:

- MTHY215 Song Writing & Analysis
- MTHY306 The Experimenting Ear
- MCMP421 Hybrid Music

ARRANGING

ONE course chosen from:

- MCMP307 Arranging
- MCMP308 The Art of the Mix
- MCMP314 Jazz Arranging
- MCMP33x Writing for ...

CRITICAL POP

MHST330 Studies in Experimental Pop

TWO courses chosen from:

- MAIC240 Jazz History
- MAIC316 Blues before 1960
- MAIC370 DIY
- MAIC401 Improvisation: Uses & Lineage
- MHST30x Music Cultures

- MHST300 Black Temporalities and Black Time
- MHST312 Ethnology of African Music
- MHST331 Studies in Avant-Rock & Noise
- MHST350 Stylists & Innovators 1961–Now
- MHST371 Jazz and Urban Experimentalism
- MHST405–409 Focus Rock
- MHST410 The Elastic Voice
- MHST412 What is a Song?
- MHST498K Disco:Emancipatory Dancefloors
- MHST440 Writing About Music
- MAIC430 Ambient & 4th World Music

COLLABORATION

MBLE328 Collaborative Music Ensemble (3 classes)

TWO ensemble courses chosen from:

- MBLE310 Improvisation Ensemble
- MBLE325 Creative Electronic Ensemble
- MBLE450 Sonic Boom
- MBLE498D Creative Repertory Ensemble
- MCMP367 Global Studios and Audiotopias
- MTEC420 Grids, Beats & Groups

VOICE

MPRF217 Learning to Scream

ONE course chosen from:

- MCRW309 Words for Music
- CCRW211 Hip Hop Poetics Workshop
- CCRW212 Introduction to Creative Writing
- CCRW214 Adventures in Form and Chaos
- CCRW311 Poetry Workshop
- CCRW362 Work the Document
- CCST470 Hip Hop Lab
- other CS course in poetry or creative writing

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano

Second Semester (BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MMUS.BFA - Bachelor of Fine Arts - Music

General

Program Title	School	
Bachelor of Fine Arts - Music	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		50.0901

Program Description

Bachelor of Fine Arts (BFA) and Certificate of Fine Arts Programs
BFA Program in Music comprises the following métier components: 1) a Shared Curriculum that is required for all students, and 2) a Specialization Curriculum that is required for students in their particular specialization. In addition, a Music Theory Minor and certain optional Concentrations in Composition are also available for those who wish to pursue them. A single course can simultaneously fulfill a requirement in each of the Shared Curriculum, a music Specialization, the Music Theory Minor, and an optional concentration in music, but no single course can satisfy more than one requirement within any one of these. In special cases, it may be possible for a student to complete more than one Specialization, in which case completed coursework can simultaneously satisfy requirements in more than one Specialization.

Students must maintain close contact with their faculty mentors, who can guide them in selecting courses that will best serve their individual educational and career objectives and prepare them for their intended Specialization(s). Note that all students are required to develop a cumulative portfolio of work each Spring Semester, which is also reviewed by their mentors and appropriate faculty.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

All BFA degree candidates must complete a minimum of 120 units. In all cases, the units of required métier coursework indicated below represent minimum requirements.

Music

MMUS.MFA - Master of Fine Arts - Music

General

Program Title	School
Master of Fine Arts - Music	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0901
Program Description Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.		

A minimum of 4.0 semesters of enrollment are required for the Master of Fine Arts and Advanced Certificate of Fine Arts. Some individualized specializations may require additional semesters of enrollment.

All MFA degree candidates must complete a minimum of 60 units.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

Master of Fine Arts - North Indian Music Performance	School of Music						
<table><tr><th>Degree</th><th>Program Level</th><th>CIP Code (National ID)</th></tr><tr><td>MFA - Master of Fine Arts</td><td>Graduate</td><td>50.0903</td></tr></table>		Degree	Program Level	CIP Code (National ID)	MFA - Master of Fine Arts	Graduate	50.0903
Degree	Program Level	CIP Code (National ID)					
MFA - Master of Fine Arts	Graduate	50.0903					

Program Description
2-Year Program The North Indian Music MFA Specialization trains students to become fluent and skilled performers through in-depth, hands-on training under the direction of internationally esteemed faculty. The curriculum emphasizes performance practices. Students also study the theoretical basis of North Indian classical music, as well as its cultural and historical underpinnings. Focusing heavily on vocalization and recitation of syllables (e.g. the language and grammar of tabla), students gain a deep understanding of the concepts, devices and rhythmic patterns found in North Indian classical music, building the advanced technical skills required for playing and singing different ragas and talas, as well as a comprehensive understanding of sruti and microtones. Students also have the opportunity to learn practical skills with regard to maintaining, repairing, repairing and tuning the instruments

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

World Music Performance - North Indian Music (MFA)

Two years of intensive study in the field of emphasis are required. A final recital or series of performances is required. Mentors may require a written thesis.

- MLSN601 Hour Lesson as assigned (4 classes)
- MLSN501 Half-Hour Lesson (2 classes, as approved by Mentor)
- MHST500–509 Music Cultures (2 classes)
- MTHY508 Transcription Skills (or other transcription class as approved by Mentor)
- Two classes chosen from:
 - MPRF620 Tabla Accompaniment
 - MTHY520/522 Beginning/Advanced Svar Graam (Vocal)
 - MTHY521/523 Beginning/Advanced Svar Graam (Instrumental)
 - MTHY622 North Indian Theory
 - MTHY624 Java/Bali: Music-Dance-Theory
 - MTHY625 Tala Systems
 - MTHY626 Ghanaian Rhythm Theory

- MTHY628 Journey to the Persian Music

- MBLE530/604 North Indian or Tabla Ensemble (4 classes)
- MBLExxx World Music Ensembles, outside of major focus (4 classes) (see listing under BFA Shared Curriculum)
- MPCD699 Graduate Independent Project: Pedagogy (2 classes)
- FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)
- MFOR600 Artists-in-Residence Week (2 classes)
- Winter Session (2 units of coursework taken in January)
- MPRF690 Graduation Recital
- Electives (to fulfill 60-unit degree requirement)

MPCP.BFA - Bachelor of Fine Arts - Performer/Composer

General

Program Title	School
Bachelor of Fine Arts - Performer/Composer	School of Music

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0904

Program Description

4-Year Program

The BFA program of study is uniquely designed around the concept of the "Music Artist." Unlike a traditional conservatory approach, it allows each student to cultivate a far-ranging musical skillset while also providing specialized training best suited to meet individual goals.

About the Specialization

At the BFA level, Performer-Composer studies provides a structured yet highly individualized course of study—comprehensive training regimens in composition and performance practice that are custom-tailored to the creative interests of each student and assessed continuously by the faculty. Performing is a key component along with composing, as studies are geared toward training undergraduates toward future careers as working musicians.

In addition to fulfilling the requirements of the BFA Core Curriculum and the specialization, undergraduate performer-composers are required to pass a Graduation Composition Portfolio Review and a Graduation Jury and Recital in order to obtain the degree.

Optional BFA Concentrations

Students who would like to concentrate their coursework in certain ways may choose to focus on several optional Concentrations. Though this is not required, students who fulfill the necessary coursework may have these noted on their transcript.

Avant-Garde Rock and Noise aims to develop necessary technical and professional skills to cultivate awareness of the socio-historical context for such music, and to create an environment that will promote radical collaboration and stylistic innovation.

Electronic Music fosters a strong technical foundation in studio and live electronic music-making, and proceeds to instruct in advanced techniques for today's computer musician.

Experimental Music addresses the current frontiers of radical exploration in music and sound art from creative, technical, historical and philosophical perspectives.

Composition for Film and Video affords a technical and aesthetic foundation for students who wish to collaborate with film and video artists.

Instrumental Concert Music Composition offers a technical foundation for contemporary chamber and orchestral composition as well as provides a broad survey of the diverse stylistic, methodological and aesthetic possibilities available to today's concert music composer.

Performer Composer

Free Form Requirements

Performer-Composer (BFA)

BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories or MTHY216 Different Tonalities

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development

- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

TWO units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Teaching Artistry
- IINT398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship
- Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song

- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Performer-Composer (BFA)

Complete SHARED CURRICULUM (see above)

MLSN001 Half-Hour Lesson in Composition & ESP (4 classes, each semester in BFA1&2)

MLSN001 Half-Hour Lesson in Performance (4 classes, each semester in BFA1&2)

MLSN101 Hour Lesson(s) in Composition or Performance (4 classes in BFA3&4)

MFOR305 Performer-Composer Forum (2 classes, offered in Spring semesters)

MCMP105 Music Notation (in first Spring semester in residence)

ICOM111 Introduction to Sound Production

MCMP130 Composer-Performer Laboratory I

MCMP131 Composer-Performer Laboratory II

MTHY204 Practical Musicianship D

MSCM310 Acoustics for Musicians

At least THREE different courses and SIX units of coursework chosen from :

- MTHY210 Non Tonal Theories (3 units)
- MTHY214 Counterpoint (3 units)
- MTHY215 Song Writing & Analysis (2 units)
- MTHY216 Different Tonalities (3 units)
- MTHY217 Form (3 units)
- MTHY108 Transcription Skills (2 units)
- MTHY240 Jazz Keyboard Theory (1 unit, may be repeated)
- MTHY306 The Experimenting Ear
- MPRF101 Jazz Improvisation, Group (1 unit, may be repeated)
- MPRF102 Jazz Improvisation, 1-on-1 (1 unit, may be repeated)

ONE class chosen from:

- MCMP314 Jazz Arranging
- MCMP316 Arranging for Experimental Pop
- MCMP402 Orchestration
- MTHY451 Orchestral Thought

ONE class chosen from:

- MCMP465 Composition with Max/MSP
- MCMP369 Production as Composition
- MTEC270 History of Electronic Dance Music

- MTEC360 Audio Signal Processing
- MTEC365 Digital Recording Studio
- MTEC367 Project Recording

ONE class chosen from:

- MBLE310 Improvisation Ensemble
- MBLE415 Networked Music Ensemble
- MBLE450 Sonic Boom Ensemble
- MBLE460 Golia Large Ensemble
- MCMP325 Experimental Music Workshop I
- MCMP326 Experimental Music Workshop II

MBLExxx / MPRFxxx Workshops, Ensembles or Performance studies appropriate to performance emphasis (THREE units)

TWO units of coursework chosen from:

- MAIC240 Jazz History
- MAIC420 Composing for Improvisors
- MHST205 Western Music History I
- MHST206 Western Music History II
- MHST331 Studies in Avant-Rock & Noise
- MHST350 Stylists & Innovators 1961-NOW
- MHST422 Experimental Music Post-Cage
- MHST425 Survey of Sound Art

TWO units of coursework chosen from:

- MAIC314 The Music of Flamenco
- MAIC316 Blues Before 1960
- MAIC370 DIY
- MAIC401 Improvisation: Uses & Lineage
- MAIC470 Hip-Hop Theory and Praxis
- MHST300 - 309
- MHST312 Ethnology of African Music

TWO units of coursework from MCMP/MTHY 300-498

MCMP490 Graduation Portfolio & Website Review (portfolio must include substantial original work)

MPRF490 Graduation Jury and Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ **DO finish Music Theory and Skills requirements on time**

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ **DON'T take a vacation from Music Theory and Skills requirements**

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ **DO fulfill Music Theory and Skills Incomplete grades on time**

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MPCP.DMA - Doctor of Musical Arts - Performer/Composer

General

Program Title	School	
Doctor of Musical Arts - Performer/Composer	School of Music	
Degree	Program Level	CIP Code (National ID)
DMA - Doctor of Musical Arts	Doctorate	50.0904

Program Description

3-Year Program The ethos of CalArts Doctor of Musical Arts (DMA) program is exploratory and experimental through and through. Students arrive from diverse stylistic origins, but all are driven by artistic visions that can be realized only by a meaningful expansion of the language of music beyond its current boundaries. This challenging program is not a double major in performance and composition, but instead seeks to foster musical artists who holistically combine innovative performance practices with new compositional models. In this process, students who are already accomplished composers and skilled executants thoroughly integrate these practices in their original work. DMA performer-composers work closely with their faculty mentors to develop an individualized course of study, which is built around composition and/or performance lessons, doctoral seminars, topic-driven research and explorations, performance projects and a series of electives. Since DMA students also teach in The Herb Alpert School of Music at CalArts, they are required to continue developing their pedagogical skills through teaching practicums. Research Areas Doctoral proposals must outline a program of scholarly and creative research supporting original composition combined with execution by the student. Any proposal that meets this broad criterion will be considered. CalArts' music faculty comprises innovative, internationally recognized leaders in performance, composition, improvisation, jazz, world music and music technology. Some current areas of creative activity and research among our faculty include the following. new music composition and performance diverse disciplines of improvisation conventional and unconventional instrumental and vocal performance practices experimental sound practices, live electronic music, installation and intermedia art interactive musical technologies, interface design and robotics new strategies for interdisciplinary performance design experimental jazz, rock, noise and electronica African, Indonesian, North Indian, Persian, Latin and other world musics applied inter-cultural experimentation in music new tuning systems: theory and performance practice contemporary music theory, analysis, history, criticism and aesthetics Opportunities exist for collaborations involving CalArts' Schools of Dance, Theater, Film, Art and Critical Studies.

Free Form Requirements

Doctor of Musical Arts -

Performer/ComposerDMA students must satisfactorily complete the program of studies formulated each semester by the student and their Mentor, as well as all requirements specified in the "Doctor of Musical Arts Program Description" section of this catalog. Any changes to the student's curriculum requirements must be officially approved by their Doctoral Examining Committee (DEC) and The Herb Alpert School of Music's Doctoral Policy Committee (DPC).

The course requirements for the DMA program are as follows.

MLSN701 Composition and/or Performance Lessons (each semester; no more than three assigned lessons and no more than 8 lesson-units in total per semester)

MCMP700 Doctoral Seminar (6 classes)

MHST703 Performer-Composer: History & Aesthetics

MPCD604 Pedagogy: Best Practices

MPCD740 Teaching Practicum (1 class in first semester in residence)

MFOR50x Forum courses (2 classes in first year of program, selected in consultation with mentor)

MPRF790 Performance Project (2 classes)

MCMP791 DMA First-Year Review

MTHY750 Topic-Driven Research and Exploration (6 classes minimum with 3 different instructors)

MCMP792 DMA Qualifying Examination

MCMP790 Doctoral Project (2 classes)

MCMP794 DMA Final Review

Winter Session (THREE units of coursework completed in January)

Approved Electives (4 classes, approved by mentor as relevant to the student's research direction)

Free Electives (to fulfill 60-unit degree requirement)

DMA students must pass a First Year Review (MCMP790). This review is conducted by the student's Doctoral Examining Committee (DEC). This Committee comprises a total of 3-4 faculty members and must include the student's Mentor and MTHY750 (Topic-Driven Research) instructors. During this review, the student's artistic, intellectual, academic, professional and pedagogical development is examined, progress is assessed, problems are discussed, and changes to the curriculum are considered.

DMA students must pass *Written and Oral Qualifying Examinations* (MCMP792) before advancing to degree candidacy. The Qualifying Examinations are administered by the student's Doctoral Examining Committee. In preparation for the Qualifying Examinations, the student must enroll in MTHY750 (Topic-Driven Research) at least 6 times with a minimum of 3 different DEC members addressing 3 respective topic areas. This typically takes place over the course of the student's second year in the DMA program. The MTHY750 topic areas are agreed upon by the student and the MTHY750 instructors in light of the student's professional and artistic goals and are subject to approval by the Doctoral Policy Committee. The DMA Qualifying Examinations can be repeated at most once. Any second trial must occur within four months of the first trial. Unsatisfactory performance at the second trial is grounds for dismissal from the Herb Alpert School of Music.

Before the awarding of the degree each DMA student must pass a *Final Review* (MCMP794), conducted by their Doctoral Examining Committee. This review assesses the student's artistic, intellectual, academic, professional, and pedagogical standing in relation to the Learning Goals and Rubrics for the DMA program, and includes detailed evaluation of all components of the student's Doctoral Project (MCMP790), and particularly of the student's Professional Portfolio.

MPCP.MFA - Master of Fine Arts - Performer/Composer

General

Program Title	School	
Master of Fine Arts - Performer/Composer	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0904

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. MFA Program in Music About the Specialization MFA Performer-Composer studies is designed for advanced students who are already accomplished composers and expert players, and who have identified a creative direction that demands the thoroughgoing integration of composition and performance in their work. This course of study is structured to meet the needs of each individual practice as students immerse themselves intensively along the entire continuum of creative music-making. The MFA curriculum offers resources to help performer-composers develop the means to express their ideas in musical, spoken, written, recorded and various media forms; contextualize their own work and that of others in the light of current directions, historical antecedents and a wide range of aesthetic perspectives; and develop strategic plans and career pathways for sustaining their individual directions in creative music-making. MFA performer-composers are required to pass a Mid-Residency Recital, a Graduation Jury and Recital and a Graduation Composition Portfolio Review in order to obtain the degree.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.

- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

Performer-Composer (MFA)

MLSN601 Hour Lesson(s) in Performance or Composition as assigned (4 classes)

MLSN501 Half-Hour Lesson(s), in Year I, in whichever area (Performance or Composition) the Hour Lesson is not taken (2 classes)

MFOR505 Performer-Composer Forum (2 classes)

MFOR501/502/503/506/507/508/509 Other Graduate forums (2 classes)

MBLExxx World Music Ensemble (in MFA1)

Composition courses (with the prefix MCMP) totaling at least 4 units

Performance courses (with the prefix MBL or MPRF) totaling at least 4 units

Courses in music technology, theory, history, or pedagogy, (with prefix MTEC, MTHY, MHST or MPCD, at least 10 units)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

Winter Session (2 units of coursework with subject code MITM, taken in in January)

MPRF590 Mid-Residence Recital (must include substantial original work)

MPRF690 Graduation Jury & Recital (must include substantial original work)

MCMP690 Graduation Portfolio Review

Electives (to fulfill 60-unit degree requirement)

MTEC.BFA - Bachelor of Fine Arts - Music Technology

General

Program Title	School	
Bachelor of Fine Arts - Music Technology	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	11.0899

Program Description

4-Year Program The BFA program of study is uniquely designed around the concept of the "Music Artist." Unlike a traditional conservatory approach, it allows each student to cultivate a far-ranging musical skillset while also providing specialized training best suited to meet individual goals.

About the Specialization

Undergraduate Music Technology students develop their creative engineering skills through a broad spectrum of classes at the intersection of art and technology. These cover concert production, acoustics, sound synthesis, electronic composition and performance, interface design, audio electronics, interactive media and a number of wide-ranging elective topics. Students become trained artists able to work in any orchestral, ensemble or global music production, including knowing how to produce a concert, manage a stage, understand a sound board and run stage monitor and main audience sound.

Students in the BFA track also take part in digital performance ensembles, such as the Machine Orchestra, Sonic Boom, Creative Electronic Ensemble and Improvisation Ensemble, or groups formed specifically in connection with classes offered by the specialization.

Music Technology**Free Form Requirements**

Music Technology: Interaction, Intelligence & Design (BFA)

BFA Curriculum Requirements

All undergraduate music students must complete the BFA Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements**MUSIC CULTURES & LITERATURE**

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY111 Tonal Theory & Applications A

MTHY210 Non-Tonal Theories

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES**ONE course chosen from:**

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES**TWO units of coursework chosen from:**

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT**TWO units of coursework chosen from:**

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist as Educator
- ICOM101 Media & Web Development
- MAIC403 Teaching Artistry
- IIDS398 Internship in Music
- MPD350 Career Designs for Musicians
- MPD351 Creative Producing for Music
- MPD420 Teaching the Voice
- MPD460 Creative Entrepreneurship Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble

- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MPRF221 African Song
- MPRF328 Latin Percussion
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice
- MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

Music Technology: Interaction, Intelligence & Design (BFA)

Complete SHARED CURRICULUM

AUDIO PRODUCTION

MTEC101 Concert Production I

ICOM111 Intro to Sound Production

TWO courses chosen from:

- MCMP308 The Art of the Mix
- MCMP369 Production as Composition
- MCMP404 Field Recording Workshop
- MTEC308 Advanced Production Techniques
- MTEC365 Digital Recording Studio
- MTEC367 Project Recording
- Other elective production class

CREATIVE COMPUTING AND PROGRAMMING

ICOM120 Introduction to Programming I

ICOM121 Introduction to Programming II

THREE courses chosen from:

- IDAR419 Immersive Experience Design
- MTEC415 Visual Programming
- MTEC418 Generative Art
- MTEC421 Advanced Creative Coding
- MTEC498B Ideation and Prototyping
- MTEC498H AI Sonic Explorations
- MCOM440 Audio Programming with C++
- Other Elective Computer Programming Courses

DIGITAL SIGNAL PROCESSING

MSCM150 Fundamentals of Computer Music

TWO courses chosen from:

- MSCM155 Physical Modeling Synthesis

- MTEC418 Generative Art
- MTEC498E AI. Culture. Creativity
- MTEC498H AI Sonic Explorations
- MCOM440 Audio Programing with C++

ELECTRICAL ENGINEERING

TWO courses chosen from:

- MTEC330 Interface Design I
- MTEC450 Mechatronic Art and Music
- MCOM335 Algorithmic Interactive Sound

BREADTH IN MUSIC TECHNOLOGY

MFOR106 Creative Technology Forum (4 classes)

MTEC490 Music Technology BFA Project (2 classes)

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MTEC.MFA - Master of Fine Arts - Music Technology

General

Program Title	School	
Master of Fine Arts - Music Technology	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	11.0899

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach

the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization At the MFA level, students concentrate on developing and refining advanced creative engineering skills while working toward a Music Technology MFA Thesis Project, required for completing the degree. The coursework covers topics in creative technology, programming for electronic music and other digital media, sound art, interface design, audio signal processing, interactive systems, software development and music technology pedagogy, as well as numerous elective subjects, such as robotics, machine learning and mobile music computing. MFA students also take part in digital performance ensembles, either in standing groups such as the Machine Orchestra, Sonic Boom, Creative Electronic Ensemble, and Improvisation Ensemble, or groups formed specifically in connection with classes.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

Music Technology (MFA): Interaction, Intelligence & Design Specialization (MFA)

GENERAL

MFOR506 Creative Technology Forum (2 classes)

MTEC690 Music Technology MFA Project (variable units; 2 classes)

MTEC691 Thesis

CREATIVE COMPUTING AND PROGRAMMING

MTEC613 Introduction to Programming I

MTEC614 Introduction to Programming II

THREE courses chosen from:

- MTEC616 Visual Programming
- MTEC618 Generative Art
- MCOM621 Creative Coding for AI Art
- MCOM640 Audio Programming with C++
- MTEC698B Ideation and Prototyping
- MTEC698H AI Sonic Explorations
- Other Elective Computer Programming Courses

DIGITAL SIGNAL PROCESSING

TWO courses chosen from:

- MTEC618 Generative Art
- MTEC650 Fundamentals of Computer Music
- MTEC655 Physical Modeling Synthesis
- MTEC698C Advanced Electronic Music Production
- MTEC698E AI. Culture. Creativity

ELECTRICAL ENGINEERING

TWO courses chosen from:

- MTEC630 Interface Design I
- MTEC550 Mechatronic Art & Music
- MCOM635 Interactive Algorithmic Sound

DIGITAL CREATIVE PRACTICE / COMPOSITION / INSTALLATION

TWO courses chosen from:

- MCMP615 Choreographers & Composers
- MTEC508 Advanced Production Techniques
- MTEC540 Machine Orchestra
- MTEC618 Generative Art
- MTEC619 Immersive Experience Design
- MTEC520 Grids, Beats, and Groups
- MTEC5xx/6xx Upper-Division Music Technology electives

BREADTH IN MUSIC TECHNOLOGY

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

MBLExxx World Music Ensemble (in MFA1)

Winter Session (2 units of coursework taken in January)

Electives (to fulfill 60-unit degree requirement)

MVAP.BFA - Bachelor of Fine Arts - Voicearts Performance

General

Program Title	School	
Bachelor of Fine Arts - Voicearts Performance	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903

Program Description
4-Year Program The BFA program of study is uniquely designed around the concept of the "Music Artist." Unlike a traditional conservatory approach, it allows each student to cultivate a far-ranging musical skillset while also providing specialized training best suited to meet individual goals. About the Specialization BFA VoiceArts students are trained in the fundamentals of vocal technique through intensive voice lessons and a range of foundational requisites. The rigorous BFA curriculum incorporates language, text and repertoire studies, contextualization of artistic work, performance and interpretation studies, keyboard studies, composition for voice, technology, multidisciplinary performance, professional development, and a vast array of ensemble and solo performance opportunities, as well as working with a significant number of guest artists who come from multiple fields and backgrounds. All undergraduate voice artists are required to pass a Mid-Residence Project/Recital and a Graduation Jury and Project/Recital in order to obtain the degree.

Free Form Requirements

VoiceArts (BFA)

BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MBLE235 Japan Ensemble
- MPRF221 African Song
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

VoiceArts (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Voice Lessons, as assigned (8 classes)

MPRF115 VoiceArts Foundation

MPRF126 Experimental Voice

MPRF110 Vocal Coaching (first year in residence)

MPRF310 Advanced Vocal Coaching (each recital semester)

MFOR103 Voice Forum (3 classes, first three years in residence)

MTHY204 Practical Musicianship D

ONE class chosen from:

- MHST205 Western Music History I
- MHST206 Western Music History II

TWO units of coursework chosen from:

- MHST345 Topics in Vocal Literature
- MHST346 Opera AND
- MHST410 The Elastic VBoice
- MPRF456 Readings in VoiceArts
- Other vocal music history/cultures class as approved by mentor

ONE class chosen from:

- MPCD420 Teaching the Voice
- MSCM410 Physiology of the Voice

- MPRF454 Sounding the Voice

FOUR Vocal Ensembles and/or Vocal Projects chosen from:

- MBLE106 Chamber Music
- MBLE201 Beginning African Ensemble
- MBLE260 The Baltic Voice
- MBLE301 Chamber Singers
- MBLE302 Contemporary Vocal Ensemble
- MBLE309 Period Instrument Ensemble
- MBLE325 Creative Electronic Ensemble
- MBLE328 Collaborative Music Ensemble
- MPRF221 African Song
- MPRF402 Opera Theater
- other vocal ensemble or project as approved by mentor

Keyboard Requirement (in addition to Shared Curriculum) as approved by mentor, chosen from:

- MLSN001 Non-Major Lesson in Piano (audition required)
- MTHY240 Jazz Keyboard Theory

Techniques (1 class) chosen from:

- MCMP336 Writing for Voice
- MPD420 Teaching the Voice
- MPRF101 Jazz Improvisation
- MPRF221 African Song
- MPRF452 Contemporary Vocal Techniques
- MPRF498B Mic Use for Vocalists
- MPRF498K To Exist in Sound
- MTEC212 Recording the Voice
- MTHY120 Beginning Svar Graam (vocal)
- MTHY215 Song Writing & Analysis
- MTHY305 Advanced Sight-Singing
- MTHY322 Advanced Svar Graam (vocal)
- TACT470 Voice-Over Elective
- other techniques course **or lessons** as approved by mentor

Language and Text (2 classes) chosen from:

- CCRW211 Hip Hop Poetics Workshop
- CCRW212 Intro to Creative Writing
- CCRW214 Adventures in Form and Chaos (poetry writing)
- CCRW222 Creative Writing Workshop
- CCRW310 Impossible Stage Directions
- CCRW311 Poetry Workshop
- CCRW336 Eco Writing
- CCRW362 Work the Document
- CCRW448 Source and Archive
- CCRW455 Hybrid Writing
- CCRW457 Feminist Poetics

- CCRW458 Advanced Experimental Writing
- CCRW464 Writing and Performing the Self
- MAIC470 Hip Hop Lab
- MCMP309 Words for Music
- MPRF453 What Kind of Text is That?
- TAIC300 Survey of World Theater—Text
- TWFP380 Special Topics in Writing
- Other language and text course as approved by mentor

Contextualization (1 class) chosen from:

- MHST300+ any MHST (music history) course, 200-level or higher
- MHST345 [r]evolution of Solo Vocal Lit
- MPRF451 Singing the Books
- MAIC455A or MAIC455B Dada Divas
- MPRF456 Readings in VoiceArts
- MPRF457 Land, Ritual, Performance
- TAIC305 Survey of World Theater—Performance Tactics
- TAIC310 Survey of World Theater—Arts Activism
- other contextualization course as approved by mentor

Performance and Interpretation (1 class) chosen from:

- MAIC455A or MAIC455B Dada Divas
- MBLExxx any music ensemble course as vocalist
- MBLE325 Creative Electronic Ensemble
- MCMP325 Experimental Music Workshop I
- MCMP326 Experimental Music Workshop II
- MPRF216 Singing the Standards
- MPRF221 African Song
- MPRF402 Opera Theater
- MPRF451 Singing the Books
- MPRF452 Contemporary Vocal Techniques
- MPRF498A Jazz Improv for the Vocalist
- Other performance or interpretation course as approved by mentor

MPRF290 Mid-Residence Performance Project/Recital

MCMP490 Graduation Portfolio/Website Review

MPRF490 Graduation Performance Project/Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student's placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ **DO finish Music Theory and Skills requirements on time**

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ **DON'T take a vacation from Music Theory and Skills requirements**

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ **DO fulfill Music Theory and Skills Incomplete grades on time**

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts' Metier Standing Policy).

MVAP.MFA - Master of Fine Arts - Voicearts Performance

General

Program Title	School	
Master of Fine Arts - Voicearts Performance	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year Program The MFA Program in Music is designed to enable students to acquire the multiple skillsets that will empower them to stake out their own, unique, career pathways to success. The program of study is designed to be a stimulating and challenging, collaborative learning environment, in which music and sound artists can refine and perfect their already distinctive voices to reach the highest levels of professional practice, while simultaneously exploring new and inspiring, creative territories. About the Specialization MFA VoiceArts studies enables accomplished voice artists to develop advanced performance techniques and a greater range of stylistic directions as they build their individual artistic profiles, enhance their creative versatility, and prepare for professional careers after graduation. In addition to major lessons, graduate vocal coaching, and advanced classes in music history, literature, theory and analysis, MFA candidates focus on experimental courses and directions, and on vocal physiology and pedagogical topics, with all areas supplemented with independent study, as desired. While most MFA candidates focus on performance projects of their own creation, they may perform in a variety of ensemble and solo situations as well. Studies in performance theory and practicums outside of music enhance student projects, as do movement studies chosen from a wide array of options. All study and projects are designed in close consultation with the student's mentor and the VoiceArts faculty. All MFA candidates graduate with a fully developed website and professional portfolio of their work, along with intensive career development assistance. All MFA voice artists are required to pass a Mid-Residence Project/Recital and a Graduation Jury, Graduation Project/Recital, and a Graduation Portfolio in order to obtain the degree.

Free Form Requirements

VoiceArts (MFA)

MLSN601 Hour Lessons as assigned (4 classes)

MPRF510 Graduate Vocal Coaching

MBLExxx World Music Ensemble (recommended in MFA1)

TWO classes in advanced History/Literature/Theory/Analysis chosen from

- MHST500-509 Music Cultures
- MHST525 Survey of Sound Art
- MHST530 Studies in Experimental Pop

- MHST531 Studies in Avant-Rock & Noise
- MHST542 Women in Western Music History
- MHST545 [r]evolution of Solo Vocal Lit
- MHST546 Opera AND
- MHST610 The Elastic Voice
- MHST600–698
- MTHY510 Acoustics for Musicians
- MTHY600–698

FOUR Experimental Voice classes chosen from:

- MAIC654 Sounding the Voice
- MCMP625 & 626 Experimental Music Workshop I & II
- MPRF526 Experimental Voice
- MPRF651 Singing the Books
- MPRF652 Contemporary Vocal Techniques
- MPRF653 What kind of text is that?
- MPRF655 Dada's Divas
- MPRF657 Land, Ritual, Performance
- Other experimental voice courses as approved by mentor

MPRF610 Physiology of the Voice

Pedagogy Course, chosen from (1 course):

- AAIC523 Practice & Pedagogy: ArtPilot
- MPCD699 Graduate Independent Project: Pedagogy
- MPCD603 Teaching Artistry
- MPCD604 Pedagogy: Best Practices
- MPCD620 Teaching the Voice

MFOR503 Voice Forum (2 classes or as assigned by mentor)

Performance project or ensemble electives, chosen in consultation with mentor chosen from (4 classes):

- MBLE500 The Ensemble
- MBLE560 The Baltic Voice
- MBLE601 Chamber Singers
- MBLE602 Contemporary Vocal Ensemble
- MBLE606 Chamber Music
- MBLE609 Period Instrument Ensemble
- MBLE610 Improvisation Ensemble
- MBLE625 Creative Electronic Ensemble
- MBLE628 Collaborative Music Ensemble
- MBLE650 Sonic Boom Ensemble
- MPRF502 Opera Theater
- MPRF699 Independent Study
- Other performance project course as approved by mentor

Career preparation course chosen from:

- AART511L Collaborate, Perform, Document
- MPCD650 Career Design for Musicians

- MPCD651 Creative Producing for Music
- MPCD660 Creative Entrepreneurship
- MTEC617 Media and Web Development
- TGEN750 Entrepreneurship: The Artist as Entrepreneur
- Other professional development courses as approved by mentor

Performance theory or practicum classes outside of Music (2 classes):

- CCRW548 Source and Archive
- CCRW557 Feminist Poetics
- CMWP651 Documentary Strategies
- CMWP688 Writing and Performing the Self
- DAIC550 Extreme Body in Performance
- DCHR501 Institute Dance Composition
- DCHR560 Creation & Critique
- DPER560 Performance & Identity
- FFDP604 Advanced Acting Workshop
- FPFV673 Acting Bad
- TACT770 Voice-Over Elective
- THST530 Grad Seminar: Adaptation
- THST535 Grad Seminar: Dramaturgy
- THST545 Grad Seminar: Theater of Witness
- TGEN510 Institute Acting Techniques I
- TGEN515 Institute Acting Techniques II
- TGEN520 Institute Directing I
- TGEN525 Institute Directing II
- TGEN575 Inst Producing: Prac Skills
- TGEN660 Improvisation
- TGEN661 Improvisation
- TIMM571 Performing Object Laboratory
- THST510 Surv World Theater Arts
- TWFP680 Special Topics in Writing
- Other performance theory or practicum class as approved by mentor

Courses in movement techniques (2 classes) chosen from:

- DCHR601 Graduate Advanced Improv
- DTCH500 Institute Dance Contemporary
- DTCH552 The Conscious Dancer
- DTCH603 Institute Dance Ballet
- DTCH604 Institute Dance Special Topics
- MBLE550 African Dance
- MBLE552 Balinese Dance
- MBLE554/556 Javanese Dance
- MPRF505 Alexander Technique for Musicians
- MPRF611 Bodies and Voice
- TACT570/571 Intro to Tai Chi

- TGEN535 Alexander Technique Fundamentals
- Other movement class as approved by mentor

MFOR600 Artists-in-Residence Week (2 classes)

Winter Session (2 units of coursework taken in January)

MPRF590 Mid-Residence Performance Project/Recital

MPRF690 Graduation Jury & Performance Project/Recital

MCMP690 Graduation Portfolio Review

Electives (to fulfill 60-unit degree requirement)

The VoiceArts specialization requires a review of each student's professional portfolio development each semester as a component of the lesson requirement.

MWMP.BFA - Bachelor of Fine Arts - World Music Performance

General

Program Title	School	
Bachelor of Fine Arts - World Music Performance	School of Music	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0903
Program Description		
4-Year Program		

Students in the World Music Performance Specialization closely study music and dance practices from a variety of musical cultures, while simultaneously acquiring solid grounding in music theory, musicianship skills, and music history and literature.

This expansive course of study allows World Music Performance students to acquire high-level performance skills in both solo and ensemble situations, facility with both notated and oral methods of learning music, and awareness of the cultural, theoretical and social aspects of multiple musical traditions.

Unlike traditional ethnomusicology or anthropology curricula, this truly unique Specialization is focused on high-level performance in non-Western traditions. This is achieved through very close, faculty-student instruction and performance projects, supported by classes in music cultures of the world, relevant theoretical studies and ethnology.

World Music Performance

Free Form Requirements

World Music Performance (BFA)
BFA Shared Curriculum Requirements BFA Shared Curriculum Requirements

All undergraduate music students must complete the BFA Shared Curriculum requirements. This curriculum is intended to foster the development of skills in the essential areas of music cultures and literature, music theory and practice, performance experiences, making original work, new methods and technologies, professional development, and breadth of experience in the arts. Courses completed to meet Shared Curriculum requirements can also be used to meet Specialization Requirements.

Shared Curriculum: Summary Listing of Requirements

MUSIC CULTURES & LITERATURE

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

MUSICAL SKILLS & TECHNIQUES

MPRF103 Class Piano (or other approved keyboard course)

MTHY101 Practical Musicianship A

MTHY102 Practical Musicianship B

MTHY203 Practical Musicianship C (not required for the Music Technology Specialization)

MTHY111 Tonal Theory & Applications A

MTHY112 Tonal Theory & Applications B (not required for the Music Technology Specialization)

MTHY210 Non-Tonal Theories

ONE unit (minimum) of coursework chosen from:

- MTHY220 Global Rhythm & Notation
- MTHY222 North Indian Music Theory
- MTHY228 Journey to the Persian Music
- MTHY226 Ghanaian Rhythm Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY425 Tala Systems

PERFORMANCE AND PRODUCTION EXPERIENCES

ONE course chosen from:

- MTEC100 Intro to Concert Production (BFA2 year)
- MTEC101 Concert Production I

MBLExxx TWO World Music Ensemble electives (see listing below)

MBLExxx TWO additional ensemble courses

NEW METHODS & TECHNOLOGIES

TWO units of coursework chosen from:

- ICOM101 Media & Web Development
- ICOM111 Intro to Sound Production
- ICOM120 Introduction to Programming I
- ICOM121 Introduction to Programming II
- ICOM301 Digital Fabrication
- MSCM150 Fundamentals of Computer Music
- MSCM310 Acoustics for Musicians

PROFESSIONAL DEVELOPMENT

FOUR units of coursework chosen from:

- AAIC323 Practice & Pedagogy: ArtPilot
- CSOC300 Artist As Educator
- ICOM101 Media & Web Development
- MAIC403 Teaching Artistry
- IINT398 Internship in Music
- MPCD350 Career Designs for Musicians
- MPCD351 Creative Producing for Music
- MPCD420 Teaching the Voice

- MPCD460 Creative Entrepreneurship Other professional development coursework as approved

MCMP290 Portfolio Review (in Spring semesters, 4 classes)

BREADTH IN THE ARTS

MFOR110 First-Year Seminar in Music

MFOR200 Artists in Residence Week (4 classes)

Winter Session (FOUR units of coursework completed in January)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts

Shared Curriculum: World Music Ensemble Options

The following listing of world music ensemble electives is provided for ease of reference.

- MBLE104 Tabla Ensemble
- MBLE109 Advanced World Percussion Ensemble
- MBLE201 Beginning African Ensemble
- MBLE202 Advanced African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE216 Advanced Talking Drum Ensemble
- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE230 North Indian Ensemble
- MBLE240 Persia Electric Ensemble
- MBLE235 Japan Ensemble
- MPRF221 African Song
- MBLE250 African Dance
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)
- MBLE260 The Baltic Voice MPRF328 Latin Percussion
- MTHY120 Beginning Svar Graam (Vocal)
- MTHY121 Beginning Svar Graam (Instrumental)
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY323 Advanced Svar Graam (Instrumental)

World Music Performance (BFA)

Complete SHARED CURRICULUM (see above)

MLSN101 Hour Lesson as assigned (8 classes)

MTHY108 Transcription Skills (or other transcription class as approved by mentor)

MHST30x Music Cultures (2 classes)

MCMP110 Introduction to Composition, or any other MCMP course offering

MTHYxxx World Music Theory Electives chosen from (4 classes):

- MTHY120 Beginning Svar Graam (Vocal)
- MTHY222 North Indian Theory
- MTHY224 Java/Bali: Music-Dance-Theory
- MTHY226 Ghanaian Rhythm Theory
- MTHY228 Journey to the Persian Music
- MTHY322 Advanced Svar Graam (Vocal)
- MTHY425 Tala Systems

ONE African Music Ensemble chosen from:

- MBLE201 Beginning African Ensemble
- MBLE206 Talking Drum Ensemble
- MBLE211 Advanced African Ensemble
- MBLE 216 Advanced Talking Drum Ensemble
- MPRF221 African Song
- MBLE250 African Dance

ONE Balinese/Javanese Ensemble chosen from:

- MBLE210 Beginning Javanese Gamelan
- MBLE211 Advanced Javanese Gamelan
- MBLE220 Beginning Balinese Gamelan
- MBLE221 Advanced Balinese Gamelan
- MBLE222 Gender Wayang Ensemble
- MBLE223 Balinese Flute Ensemble
- MBLE224 Kecak Ensemble
- MBLE252 Balinese Dance
- MBLE254 Javanese Dance (Women)
- MBLE256 Javanese Dance (Men)

ONE North Indian Ensemble chosen from:

- MBLE230 Beginning North Indian Ensemble
- MBLE430 Advanced North Indian Ensemble
- MBLE104 Tabla Ensemble

ONE other World Music Ensemble chosen from:

- MBLE109 Advanced World Percussion Ensemble
- MPRF328 Latin Percussion
- MBLE240 Persia Electric Ensemble
- Other world music ensemble as approved by mentor

MBLE xxx additional World Music Ensembles (8 classes)

MBLExxx Ensemble electives outside of World Music Specialization (4 classes) chosen from:

- MBLE117 Jazz Student Ensemble
- MBLE118 Jazz Faculty Ensemble
- MBLE302 Contemporary Vocal Ensemble
- MBLE310 Improvisation Ensemble
- MBLE327 Multi-Focus Ensemble
- MBLE328 Collaborative Music Ensemble

- MBLE450 Sonic Boom Ensemble
- MBLE460 Golia Large Ensemble
- Other ensemble outside of world music

MPRF490 Graduation Recital

Electives (to fulfill 120-unit degree requirement)

Shared Curriculum: A Typical Course Sequence Semester-by-Semester

There may be some variability as to when Shared Curriculum courses are taken depending on the individual student’s placement, experience and development. However, certain strict deadlines do apply (see Music Theory and Skills Deadlines below).

First Year First Semester (BFA1-1)

MTHY101 Practical Musicianship A

MTHY111 Tonal Theory & Applications A

MAIC100 Worlds of Music I: Europe & N. Am. 1900-

MPRF103 Class Piano Second Semester

(BFA1-2)

MTHY102 Practical Musicianship B

MTHY112 Tonal Theory & Applications B

MAIC101 Worlds of Music II: Africa, Asia, L. Am.

Second Year First Semester (BFA2-1)

MTHY203 Practical Musicianship C

MTHY210 Non-Tonal Theories M... World Music Ensemble elective (see the list of ensemble electives above)

Second Semester (BFA2-2)

MTHY204 Practical Musicianship D (if required)

MTHYxxx World Music Theory course

MTEC100 (or MTEC101 for Music Tech majors) Intro to Concert Production M... World Music Ensemble elective (see the list of ensemble electives above)

Third Year First Semester (BFA3-1)

course in Making Original Work (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Second Semester (BFA3-2)

course in Professional Development (see course listing above)

course in New Methods & Technologies (see course listing above)

course in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR) NOT taught by any Music faculty member

MBLExxx Ensemble elective

Fourth Year First Semester (BFA4-1)

course in Professional Development (see course listing above)

course in an artistic métier outside the School of Music (not taught by music faculty)

Second Semester (BFA4-2)

course in an artistic métier outside the School of Music (not taught by music faculty)

Music Theory and Skills Deadlines (DOs and DON'Ts)

⇒ DO finish Music Theory and Skills requirements on time

MTHY001 (Fundamental Musicianship), if required, must be completed by the end of the first year of residence in order to maintain eligibility to continue as a student in The Herb Alpert School of Music.

MTHY111 & MTHY112 (Tonal Theory & Applications A & B), and MTHY101 & MTHY102 (Practical Musicianship A & B) must all be completed by the end of the second year in residence, if required.

MTHY210 (Non-Tonal Theories) and MTHY203 & MTHY204 (Practical Musicianship C & D), if required, must all be completed by the end of the third year in residence.

⇒ DON'T take a vacation from Music Theory and Skills requirements

All undergraduate students must take and pass Shared Curriculum theory courses each semester until all required courses in the music theory sequence MTHY001, MTHY111, MTHY112, MTHY210 are completed. (See Individual Specialization Descriptions below for requirements by specialization.)

All undergraduate students must take and pass tonal musicianship skills courses each semester until all required courses in the Practical Musicianship sequence MTHY001, MTHY101, MTHY102, MTHY203, MTHY204 are completed. (See the descriptions of BFA Music Specializations below for requirements.)

⇒ DO fulfill Music Theory and Skills Incomplete grades on time

In any course that constitutes a prerequisite for another required course in the Music Theory or Skills curriculum, an Incomplete (I) grade must be made up before the student will be allowed to enroll in the next course in the sequence. Instructors are not obliged to permit enrollment in music theory or skills courses after classes begin, so Incomplete grades should be made up before the date on which the following semester's regular classes commence.

FAILURE TO FULFILL MUSIC THEORY AND SKILLS REQUIREMENTS ACCORDING TO THESE STIPULATIONS MAY RESULT IN ACADEMIC WARNING, INELIGIBILITY TO ADVANCE IN YEAR LEVEL, LOSS OF FINANCIAL AID, AND POSSIBLE DISMISSAL FROM THE SCHOOL OF MUSIC (see CalArts’ Metier Standing Policy).

MWMP.MFA - Master of Fine Arts - World Music Performance

General

Program Title	School	
Master of Fine Arts - World Music Performance	School of Music	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description
Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts
Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

A minimum of 4.0 semesters of enrollment are required for the Master of Fine Arts and Advanced Certificate of Fine Arts. Some individualized specializations may require additional semesters of enrollment.

All MFA degree candidates must complete a minimum of 60 units.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student’s course history is

examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

World Music Performance

No Requirements

MWPP.MFA - Master of Fine Arts - World Percussion Performance

General

Program Title	School
Master of Fine Arts - World Percussion Performance	School of Music

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0903

Program Description

2-Year The MFA World Percussion Specialization trains students who already possess a strong foundation as percussionists to become exceptional, innovative performers and teachers by developing a broad range of skills drawn from the multitude of areas of world percussion. Immersed in both the traditional contexts of world music and emerging contemporary applications, this Specialization is designed to give students the skills necessary to lead by example in this, genre-bending field of modern world percussion and hand drumming. Students have access to the School's African, North Indian and Indonesian specializations, as well as group and private instruction in Latin percussion, Brazilian percussion, Persian percussion, Arabic percussion and the study of frame drums and other hand-drumming traditions from around the world. In addition to developing their practices in the contexts of traditional world music, students also focus on contemporary experiments in performance, including the opportunity to work with a large array of electronic percussion controllers, composition and improvisation, drawing from the creative eclecticism of the larger CalArts community, as well as the rich cultural diversity of Los Angeles as a global crossroads.

Free Form Requirements

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts

Applicants to the Music MFA program will be required to have attained a BM, BFA, BA or equivalent in music before admittance, or to have a Bachelor's degree in an alternate subject along with skills and knowledge that are appropriate to enter a Master's degree program in a music-related field.

Students must attend and have both mid-residence and graduation reviews officially documented. During these reviews, the student's course history is examined, progress is assessed, problems are discussed and changes to the curriculum are considered. Mentors and deans must officially approve any changes to the student's curriculum requirements.

The Master of Fine Arts (MFA) degree and Advanced Certificate of Fine Arts programs require a minimum of 4.0 semesters of enrollment. MFA degree and Advanced Certificate programs require at least 2.0 semesters of full-time residence at CalArts. For all programs, the final 1.0 semester of course enrollment before graduation must be in residence at CalArts, although this requirement may be satisfied by completing consecutive semesters of part-time enrollment at CalArts that total 1.0 semester of residence and culminate in graduation.

All MFA degree candidates must complete a minimum of 60 units.

Also see [CalArts' Institute Degree and Certificate Requirements](#).

Learning Goals

By the time they graduate, students will have had opportunity to:

- develop a forward-looking approach to music-making that embraces openness, experimentation, and critical engagement while recognizing precedent and tradition.
- realize and document distinctive musical projects reflecting their own artistic interests.
- offer and receive constructive critique regarding their musical work and thinking from both senior practitioners and peers.
- perform within ensemble contexts and gain experience with the particular demands and rewards of performing with other musicians.
- discover collaborative possibilities through engagement with other artistic métiers.
- produce and present professional-quality documentation of their artistic work in appropriate media.

MFA Placement Examinations

All entering MFA and Advanced Certificate of Fine Arts students in Music are required to take CalArts' Music Theory and Musicianship Skills Placement Exams.

For MFA and Advanced Certificate students, placement exam results may indicate either that a student's prior training and current skill levels are already appropriate for graduate study or that supplemental courses will be required in addition to the normal graduate curriculum.

Master of Fine Arts (MFA) and Advanced Certificate of Fine Arts Specialization Requirements

World Music Performance - World Percussion (MFA)

Two years of intensive study in the field of emphasis are required. A final recital or series of performances is required. Mentors may require a written thesis.

MLSN601 Hour Lesson as assigned (4 classes)

MLSN501 Half-Hour Lesson (2 classes, as approved by Mentor)

MHST500–509 Music Cultures (2 classes)

MTHY508 Transcription Skills (or other transcription class as approved by Mentor)

FOUR classes chosen from:

- MPRF620 Tabla Accompaniment
- MPRF628 Latin Percussion
- MTHY520/522 Beginning/Advanced Svar Graam (Vocal)
- MTHY521/523 Beginning/Advanced Svar Graam (Instrumental)
- MTHY622 North Indian Theory
- MTHY624 Java/Bali: Music-Dance-Theory
- MTHY625 Tala Systems
- MTHY626 Ghanaian Rhythm Theory
- MTHY628 Journey to the Persian Music

MBLE509/604 Advanced World Percussion Ensemble / Tabla Ensemble (4 classes)

MBLExxx Other World Music Ensembles (4 classes) (see listing under BFA Shared Curriculum)

MPCD699 Graduate Independent Project: Pedagogy (2 classes)

FOUR units of coursework in Art, Dance, Film/Video, Theater, Creative Writing, or Digital Arts (IDAR)

MFOR600 Artists-in-Residence Week (2 classes)

Description

This course is designed to develop a deep and meaningful understanding and appreciation of JS Bach, the man, the myth and the music. There will be guided listening in and out of class, as well as reading of materials from Bach's time along with later commentaries. Weekly discussions will go "Beyond" to explore modern-day perspectives of "rethinking, reinventing and reimagining" Bach as well as students own perceptions. Papers written by students will be distributed to the entire class in order to learn from one another and create a sense of community.

Description

From the moment that music became a recorded medium- a sonic event fixed in time and space- artists have sculpted musical sound into worlds that one can inhabit, wander through and linger in; imaginary landscapes that are unknown and even unknowable.

This class will explore a range of artistic practices and concepts that evoke the otherworldly, the eerie or the audiotopic; including psychogeography, the derive, and urban exploration; acousmatic field recording and ethnographic surrealism; outsider, psychedelic and hauntological pop music; cinematic spaces from

Tarkovsky's Stalker to Sun Ra's Space is the Place; and Mark Fisher's notions of the weird as "something which does not belong" and the eerie as a crisis of presence ("something here where there should be nothing") or absence ("nothing here where there should be something"),

We will look at how sound can not only establish territory, but can also be used to disrupt or "deterritorialize" existing boundaries, leading to the possibility of audiotopias--liberatory sonic spaces that listeners inhabit for the duration of the record.

This class will alternate lectures and listening sessions with practical workshops that use the recorded sonic event as autonomous musical material that can traverse the nexus of electronic and ethnographic sounds, evoke the eerie in the evacuated landscapes of dub and ambient music, and engage in trans-cultural collision in the 4th world.

While working with strategies of defamiliarization, transmutation, collision and subliminal haunting to transport listeners to unfamiliar places, students will experiment with acoustic and synthesized sound design techniques that integrate field recordings with sonic mimesis, tape loops, reverb, and spatial effects.

By the end, participants will have created original compositions that navigate the otherworldly, the eerie, and the post-geographic possibilities of sound.

Credit Hours

Min Credit Hours:
2

Description

Do-it-yourself - and the related concept of release-it-yourself - has been the ideological and practical underpinning of radical music for at least a half-century. Often identified with the punk rock movement, the DIY imperative actually predates punk by more than a decade, and it has arguably propagated and flourished even more with later genres such as industrial music, underground hip hop, rave + electronica, and extreme metal. Because DIY is usually equated with a rough-hewn, low-budget aesthetic, it's easy to miss the fact that for all its emollient sickness of sound New Age music in the 1980s - produced in home studios, distributed largely on cassette through an alternative circuit of head shops and health food stores - was one of the DIY success stories of the late 20th Century.

In this course, we examine a diverse range of eruptions of do-it-yourself/release-it-yourself culture across the last 50 years, exploring how

ideology and aesthetics have intertwined and sometimes come into contradiction. As well as music and its means of production, we'll look at ancillary expressions of DIY such as fanzines, cooperatively-run performance spaces, independent labels, and alternative media channels from pirate radio to the internet. We'll be attentive to the different ideological inflections of DIY at different historical junctions and for different communities. For some, DIY is more or less a form of micro-capitalism, street-level hustling that cultivates and satisfies niche markets and minority populations. For others, it comes freighted with utopian aspirations to collectivity and autonomy. For yet others, it is a refusal of the professionalism and polish of top-down, unidirectional culture, an abrasively self-liberating form of riposte and retaliation towards the mainstream media.

Running through most of these sonically various expressions of the DIY spirit is a nebulous yet still potent and seductive notion of the "underground". As we approach the present day, we'll examine how that notion of alternative culture has altered in the context of corporate platforms such as YouTube, Soundcloud, and TikTok that - far from being challenged by homegrown, grass-roots culture-making - actively encourage and enable people to generate their own content (YouTube's slogan is "broadcast yourself"). Yet what could be dubbed "the desire called 'underground'" persists as a musically generative impulse, an ideal that has spawned a swarm of online microgenres like vaporwave, Soundcloud rap, and hyperpop, and shows no sign of fading.

Key eras / areas of DIY music culture covered in the class likely to include: '70s post-psychedelic underground, free jazz, improv and experimental music, postpunk, the cassette culture of industrial and "minimal synth" in the 1980s and onward, New Age and ambient, indie and lo-fi in 80s / 90s, the dilemma of crossover (grunge, riot grrl etc) underground hip hop from the 1980s to 2000s, Detroit techno / Underground Resistance, hardcore rave, IDM, extreme metal, 21st Century alt-genres - freak folk (aka the New Weird America), noise, drone, grime, road rap, and UK drill, hypnagogic pop / chill-wave, vaporwave.

The course will culminate in an assessment of the dematerialized present - available almost entirely as downloads or streams, and, despite Bandcamp etc, increasingly circulating outside retail mechanisms and the exchange economy, online microgenres proliferate in uncontrollable number and mutate / rename themselves at incredible speed. As exciting as much of this music is, there are nagging doubts about possible downsides: "excess of access" leading to unmanageable overload, art as a necessarily public activity versus "the no audience underground", and the question of whether DIY in the 21st Century often means the absence of support systems, institutional facilities, the structures and

resources that enable creativity. In an oversupplied attention economy, how do you find listeners, let alone a livelihood?

MAIC401 - Improvisation: Uses & Lineage

Description
Teaching Artistry is a lecture class that will focus on best practices of teaching. Through a combination of demo lessons, video clips, field observations, and discussion, participants will explore various pedagogical approaches. Each of these approaches will be engaged by students as they write papers, plan and teach mini lessons, and critique each other's work. In addition, the course will cover creating lesson plans, creating syllabi, creating a curricular map, assessment, educational standards, reflection, project based learning, arts-integration, and brain research as

it connects to music learning. First semester, this course focuses primarily on the perspective of a teaching artist, working in the K-12 classroom with students and teachers, as well as various community settings. We will also discuss how these ideas connect to various other teaching opportunities such as: private lesson instruction, university level.

Description

Open to BFA3 and BFA4 students only.

Where does human perception leave off and the object begin? Can we know the substance of the artistic object, or are we dealing with mental representations of it? What can art itself know? How does it connect with the 'great outdoors' if at all? We will explore these questions through the lens of two books: *Nihil Unbound* by Ray Brassier and *After Finitude* by Quentin Meillassoux, along with articles by Frantois Laruelle, Alain Badiou and Gilles Deleuze. Students will write a term paper, applying the concepts developed in the class to an artist or work. The papers of the first term will be the basis for the second term.

Credit Hours**Min Credit Hours:**

2

Description

Sounding the Voice: Utterance, Phonetics, Advanced Diction, Articulation and Sense.

This course is an intermediate study of language and phonology for singers and other artists who work with the voice. It focuses on phonetics and language-like sounds ranging from utterances to allophones and from phonemes to words and word-like inventions, covering nearly all language-type sounds [consonants and vowels] thought capable of being produced by the human vocal mechanism. The International Phonetic Alphabet (IPA) is used intensively as a tool for reading and transcribing linguistic sounds and for notating vocal quality and laryngeal positions used in speech, singing, and foreign language diction. Sound symbolism and nonsensical sounds, artificially invented languages, and language change and reconstruction also will be studied. Sound poetry and works in foreign languages will be performed or composed.

This course is geared towards students who have had prior experience with linguistics and/or foreign languages and/or the IPA. A good "ear" will be helpful.

Description

DADA'S DIVAS is a two-semester course (one historical, one performative) dedicated to the (re)discovery of the Dada movement's female pioneers, most of whom have been overshadowed historically by their male counterparts. These women, operating independently of one another, were highly regarded performers, poets, visual artists, writers, actresses, models, feminists, and political activists who lived incredibly interesting lives. Now, 100 years after the birth of Dada, they deserve to have their stories told and their art resurrected.

Taking as its basis the experimental opera and

research project "Dada Divas," as well as newly digitized archives and a growing wealth of other resources, this course will delve deeply into the artistic works and lives of Mina Loy, Baroness Elsa von Freytag-Loringhoven, Emmy Hennings, and others. The first semester will begin with a historical study of early twentieth-century artistic and literary movements-Futurism, literary Expressionism, Modernism, various performance movements, and cabaret and its offshoots-and will continue into the birth and early years of Dada. The course will take an interdisciplinary approach from a variety of perspectives including performance and gender studies, literary modernism, and socio-political and cultural history, while relating these subjects to the status of women, immigration, drug addiction, war, and other concerns that are as pressing today as they were when Dada erupted a century ago.

The second semester will be devoted to the development and performance-by class members and guests-of a newly constructed, interdisciplinary, Dada-inspired performance work. In the spirit of Dada's origins, this may take the form of a low-budget "guerilla theatre" event, and may include the performance of already composed as well as newly created works. Appropriate written material will accompany or follow the performance. Students are encouraged to enroll in both semesters of the course.

Description

Hip-Hop music and culture is fundamentally Black work. Hip Hop is Black work created in response to a set of conditions. In the words of Lupe Fiasco the question is always "Did you improve on the design? Did you do something new?" That's the question you can't know the answer to without understanding the initial design before you. In this course we are developing the capacity to access fundamentally Black work. We need a theoretical foundation to do so. We do this work together. This course will utilize film, video, documentary and music to explore the ways in which hip-hop culture has become a powerful tool to probe and challenge the larger global

consciousness. The goal of this class is to share a better understanding of the ancestral metadata present in the music we are consuming and engaging with. This class is focused on getting to the root of what we are listening to. This course is an invitation to explore the nuances in what else is being communicated beyond beats and rhymes. We will produce an understanding to engage with the hyper-commodification of the culture, questions around gender and sexuality, art and aesthetics, and also hip-hop's enduring ability to speak truth to power.

Description
This is an all-women's ensemble that will primarily focus on learning how to play traditional drumming from Ghana, West Africa. Students will learn the complex layers and polyrhythms of this music as well as the songs and dances that accompany it. In addition to learning how to play this music this course will also teach students about the historical and sociological aspects of this music from its past and how it is today. In most traditional African societies, women are not allowed to drum and are limited to

singing and dancing. Dahomey, now present-day Benin, was an African kingdom that existed between 1600 and the late 1800s. It is from this kingdom that came a tribe of women warriors known as the Dahomey Amazons. This all women battalion protected the palace and its king when there were not enough men to do so. One of the main musical masterpieces of traditional Ghanaian drumming is a war dance that was adapted from the ancient times where men would take an oath of allegiance and fight to their possible deaths, while women stayed in the background as a support system.. It is now socially acceptable for women to dance these roles as an entertainment piece, but to this day, it is still only men that you will find drumming this music. In a day and age where women are continually underrepresented and overlooked for opportunities in Music, Film and beyond, it is vital that we as women are empowered to control the course and change the narrative in every part of the workforce. It is in the spirit of the great Dahomey Women warriors, that the Dahomey Women's Ensemble ushers us into the "future of the female" and that our place is EVERYWHERE!

Description
TALKING DRUM ENSEMBLE - MUSIC OF THE DAGOMBA PEOPLE OF NORTHERN GHANA. This class will be a performance-based ensemble, with students learning traditional drumming, singing and dance from the Dagomba of Northern Ghana. In this musical tradition, drummers are griots, charged with the history keeping of their community. Unlike many other West African drumming traditions, the drum language of the Dagombas has been maintained and remains a vital part of the community. Students will learn the role of the drummers in Dagomba society, and explore how drum language is used to praise chiefs, and connect the community in general. We will view video footage of pieces the ensemble will play, and discuss how the music functions to mark important community events. Students will play the talking drum (Lunga), and bass drum (Gun-gon) that are the primary instruments of the ensemble. Our repertoire will focus on various praise name dances, which are composed for new chiefs when they are "skinned" (inducted as chiefs), group dances and a variety of other dance rhythms that connect to harvests, funerals, and various professions within the community.

Description

In Japan Ensemble we have three sections to teach students their choice of traditional Japanese instruments: Strings (Koto/Shamisen), Shakuhachi (the Japanese bamboo vertical flute), or Taiko (Japanese drums). Instruction is separated by

instrument, and by the end of the semester, the three groups will have a common goal of playing together. Kotos, shamisen and shakuhachi will be on loan from the teachers personal instruments. We will focus on the folk songs of Japan: traditional work songs, fishing songs, and festival songs. Improvisation will be explored, as well as the possibility for composing original work using the traditional styles the class has studied. The goal for all students will be to practice and prepare their parts and techniques on their instruments to be able to perform in a final performance, in person, or virtually. Possibilities include traditional music performances live, recorded or video recorded; original compositions, improvisations, or interdisciplinary projects with technology or other art forms. The class may be repeated each semester for credit. No prerequisites. It is open to the entire institute. No previous knowledge of music or Japanese music is necessary.

Description

This inaugural launch of the intersection between ancient and new forms is a year-long course. Paths will be re-traced along the Silk Road hundreds of years before, works rehearsed and performed on Persian and Western instruments alongside genres developed in North America in the early 1990s still to this day known as the indefinable "Electronica", tracing techniques and esthetics from artists such as Martin Garrix, Plaid, Aphex Twin, Autechre; performed with live sampling of ancient instruments on machines that mangle, de-construct and splice back together new forms."Not Just for Dancing".

Description

The Conducted Collective Ensemble (formerly known as The Ensemble) is a large ensemble focusing on notated music that has been recently composed. The group's repertoire emphasizes new forms of composition and collaborative directions in concert music, experimental music, improvisation, and new media. Working with traditional western notation as well as graphic and text scores, the Conducted Collective Ensemble focuses on the development of ensemble playing skills in a conducted and collaborative environment. There will be one performance at the end of each semester and may be additional performances depending on the semester. Repertoire selection vary depending on enrolled students and projects will consist of music for the full group as well as sub-group projects, which will be assigned during the course of the semester. This ensemble is open to school of music students. Students from other schools may join with instructor consent.

Description

This course serves as an interdisciplinary introduction to structured improvisation through Soundpainting, a sign language for spontaneous composition originally developed by Walter Thompson as part of the vibrant downtown improv scene in 1980s New York. Soundpainting is open to students of all artistic disciplines whose work can be executed in real-time, and offers an opportunity for students across a wide variety of creative practices to consider improvisation as a form of empowered decision-making as part of an ensemble. Students will work together to learn the sign language under the guidance of a skilled conductor, rehearse as an ensemble, and develop an interdisciplinary performance practice by exploring the commonalities between the various disciplines employed within the group.

Description

The Faculty Collective Ensemble is an ensemble made up largely of performance faculty members along with advanced performance students. Ensemble size and repertoire will vary each semester due to rotating curation and direction. The ensemble will be managed by the Program Director of Instrumental Arts and will be curated and directed by a different faculty member each semester. This six-week ensemble rehearsal cycle will conclude with a concert and occasionally a

recording session each semester. Depending on the faculty curator, the ensemble may focus on contemporary or traditional repertoire, notated, improvised, or oral traditions, as well as new student work. Permission of instructor is required to ensure appropriate experience depending on the plan for a given semester.

Description
Course open to all CalArts students playing an instrument, but, of course, especially school of music students.
Sonic Boom is an ensemble/band somewhere between avant-garde rock, noise, electronica, ambient, new music, and other things that fall between the cracks. This course will explore the hidden tradition of experimental rock music and address where new, experimental, electronic and rock music meet. What is their common ground now and historically? How does amplification fundamentally change playing of an instrument? We will work on new original pieces, left-field covers of rock songs, and rock versions of new music pieces.

Description
This is an all-women's ensemble that will primarily focus on learning how to play traditional drumming from Ghana, West Africa. Students will learn the complex layers and polyrhythms of this music as well as the songs and dances that accompany it. In addition to learning how to play this music this course will also teach students about the historical and sociological aspects of this music from its past and how it is today. In most traditional African societies, women are not allowed to drum and are limited to singing and dancing. Dahomey, now present-day Benin, was an African kingdom that existed between 1600 and the late 1800s. It is from this kingdom that came a tribe of women warriors known as the Dahomey Amazons. This all women battalion protected the palace and its king when there were not enough men to do so. One of the main musical

masterpieces of traditional Ghanaian drumming is a war dance that was adapted from the ancient times where men would take an oath of allegiance and fight to their possible deaths, while women stayed in the background as a support system.. It is now socially acceptable for women to dance these roles as an entertainment piece, but to this day, it is still only men that you will find drumming this music. In a day and age where women are continually underrepresented and overlooked for opportunities in Music, Film and beyond, it is vital that we as women are empowered to control the course and change the narrative in every part of the workforce. It is in the spirit of the great Dahomey Women warriors, that the Dahomey Women's Ensemble ushers us into the "future of the female" and that our place is EVERYWHERE!

Description
TALKING DRUM ENSEMBLE - MUSIC OF THE DAGOMBA PEOPLE OF NORTHERN GHANA. This class will be a performance-based ensemble, with students learning traditional drumming, singing and dance from the Dagomba of Northern Ghana. In this musical tradition, drummers are griots, charged with the history keeping of their community. Unlike many other West African drumming traditions, the drum language of the Dagombas has been maintained and remains a vital part of the community. Students

will learn the role of the drummers in Dagomba society, and explore how drum language is used to praise chiefs, and connect the community in general. We will view video footage of pieces the ensemble will play, and discuss how the music functions to mark important community events. Students will play the talking drum (Lunga), and bass drum (Gun-gon) that are the primary instruments of the ensemble. Our repertoire will focus on various praise name dances, which are composed for new chiefs when they are "skinned" (inducted as chiefs), group dances and a variety of other dance rhythms that connect to harvests, funerals, and various professions within the community.

Description

In Japan Ensemble we have three sections to teach students their choice of traditional Japanese instruments: Strings (Koto/Shamisen), Shakuhachi (the Japanese bamboo vertical flute), or Taiko (Japanese drums). Instruction is separated by instrument, and by the end of the semester, the three groups will have a common goal of playing together. Kotos, shamisen and shakuhachi will be on loan from the teachers personal instruments. We will focus on the folk songs of Japan: traditional work songs, fishing songs, and festival songs. Improvisation will be explored, as well as the possibility for composing original work using the traditional styles the class has studied. The goal for all students will be to practice and prepare their parts and techniques on their instruments to be able to perform in a final performance, in person, or virtually. Possibilities include traditional music performances live, recorded or video recorded; original compositions, improvisations, or interdisciplinary projects with technology or other art forms. The class may be repeated each semester for credit. No prerequisites. It is open to the entire institute. No previous knowledge of music or Japanese music is necessary.

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This course serves as an interdisciplinary introduction to structured improvisation through Soundpainting, a sign language for spontaneous composition originally developed by Walter Thompson as part of the vibrant downtown improv scene in 1980s New York. Soundpainting is open to students of all artistic disciplines whose work can be executed in real-time, and offers an opportunity for students across a wide variety of creative practices to consider improvisation as a form of empowered decision-making as part of an ensemble. Students will work together to learn the sign language under the guidance of a skilled conductor, rehearse as an ensemble, and develop an interdisciplinary performance practice by exploring the commonalities between the various disciplines employed within the group.

MBLE617 - Jazz Student Ensemble

General

Course Long Title
Jazz Student Ensemble

Subject Code Course Number
MBLE 617

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
Course open to Music School students only.
Performance of ensemble works written for small jazz groups and performed by all-student groups.

Registration Restrictions

Min Credit Hours:
1

Description

Course open to Music School students only.
An ensemble researching the interactive languages
and the improvisational forms of live electronic
music with a major philosophical focus on music
technology and interactive, improvisational music.

Registration Restrictions
RGAMUS - Music School Students Only

MBLE627 - Multi-Focus Ensemble

General

Course Long Title
Multi-Focus Ensemble

Subject Code Course Number
MBLE 627

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

This is a course for ensembles that are entirely
initiated, organized and run by
students. The personnel, repertoire and rehearsal
times and places are decided by
ensemble members. In order for members to receive
credit, the ensemble needs to be coached by one or
more Faculty members of students' choice and it
has to give at least one CalArts public
performance of at least one substantial piece. Any
style of music and any combination of 2 or more
musicians is valid.

MBLE628 - Collaborative Music Ensemble

General

Course Long Title
Collaborative Music Ensemble

Subject Code Course Number
MBLE 628

School(s)
School of Music

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

1

Description

Students work collectively to develop, rehearse and record experimental pop music in ensembles of 3-4 students each. Students will explore multiple approaches to collaboration: from rehearsing and recording as a live ensemble; to "turn-taking" overdubbing; to trading songwriting, arranging and production roles for individually-conceived works. Each group of students will have two opportunities to record as a live ensemble in CalArts recording studios, with significant development and guidance for both performance and production techniques from the instructor.

Registration Restrictions

RGMMMEP - Experimental Pop Only

MBLE635 - Microtonal Ensemble**General****Course Long Title**

Microtonal Ensemble

Subject Code

MBLE

Course Number

635

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

1

Description

The microtonal ensemble will focus on hearing, playing, composing and improvising microtonally. We will develop our skills by looking at and playing contemporary pieces in a range of tuning systems, by improvising as a group, and by writing our own works for the ensemble. The ensemble will be open to instrumentalists, singers and composers and to other music majors interested. We will look at tuning systems in just intonation as well as equal divisions of the octave, and scales in traditional music from non-Western cultures.

Course Number

650

School(s)

School of Music

Program(s)

Composition / ESP

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

1

Description

Course open to all CalArts students, but , of course, especially for School of Music students.

An ensemble/band falling somewhere between avant-garde rock, noise, electronica, ambient, new music, and other things that fall between the cracks. This course will explore the hidden tradition of experimental rock music and address where new, experimental, electronic and rock music meet. What is their common ground-now and historically? How does amplification fundamentally change playing of an instrument? We will work on new original pieces, left-field covers of rock songs, and rock versions of new music pieces.

Registration Restrictions

RGAMUS - Music School Students Only

MBLE660 - Golia Large Ensemble**General****Course Long Title**

Golia Large Ensemble

Subject Code

MBLE

Course Number

660

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

1

Description

Course open to Music School students only. The Large Ensemble, under the direction of faculty member Vinny Golia, is a loosely based chamber orchestra which improvises, and performs compositions and structured improvisations by Golia. The Large Ensemble is open to all students who can read music and have an interest in improvisation, composition, and want to have some serious musical fun.

MBLE670 - Faculty Collective Ensemble**General****Course Long Title**

Faculty Collective Ensemble

Subject Code	Course Number
MBLE	670

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

The Faculty Collective Ensemble is an ensemble made up largely of performance faculty members along with advanced performance students. Ensemble size and repertoire will vary each semester due to rotating curation and direction. The ensemble will be managed by the Program Director of Instrumental Arts and will be curated and directed by a different faculty member each semester. This six-week ensemble rehearsal cycle will conclude with a concert and occasionally a recording session each semester. Depending on the faculty curator, the ensemble may focus on contemporary or traditional repertoire, notated, improvised, or oral traditions, as well as new student work. Permission of instructor is required to ensure appropriate experience depending on the plan for a given semester.

MBLE698C - Electroacoustic Ensemble

General

Course Long Title
Electroacoustic Ensemble

Subject Code	Course Number
MBLE	698C

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

The electroacoustic ensemble explores electroacoustic and digital music performance practices using laptops, tablets, various sensors, controllers, synths, and multi-channel speakers. The ensemble will perform improvised and composed works and explore non-traditional and networked performance presentations. Musicians playing electronic instruments, laptops, digital controllers, voice or acoustic instruments with or without added electronics are welcome to participate. Class time will be divided between ensemble playing and group discussion on performance practice. Student composers will be invited to propose their own projects for the ensemble, in addition to works presented by the instructor.

Registration Restrictions

RGAMUS - Music School Students Only

MBLE698D - Creative Repertory Ensemble

General

Course Long Title
Creative Repertory Ensemble

Subject Code	Course Number
MBLE	698D

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Students will immerse themselves in historical aspects of the resistance movement of the 1960s and 1970s as it relates to folk music and its intersection with afropunk and other elements of early rock and roll. The themes are futurism, androgyny and rock opera as seen through the lens of David Bowie's collected works. Students will participate in a faculty-directed ensemble to establish best practices for applied harmony, arranging, melodic improvisation and collaborative recording while exploring the social impact that comes from the marriage of social activism and song. This class will interface with the Project Recording class over the course of the semester to arrange and realize professionally-recorded repertory and collaborative material as well as a live performance.

MBLE698E - Folk Singing Ensemble

General

Course Long Title
Folk Singing Ensemble

Subject Code	Course Number
MBLE	698E

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

The Folk Singing Ensemble, led by graduate student Elizabeth Ann Setzer, will delve into folk singing traditions from the Balkans, the Caucasus, and beyond. Through weekly rehearsals, virtual and in-person workshops with guest artists, and research/practice outside of ensemble rehearsals, we will prepare for a culminating performance at the end of the semester. We will look at the context in which folk traditions are passed on

through generations and beyond their cultural and physical places of origin. No prior singing experience is necessary.

MCMP112 - Composing Experimental Pop

General

Course Long Title
Composing Experimental Pop

Subject Code Course Number
MCMP 112

School(s) Program(s)
School of Music ExPop

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This course will analyze the rhythmic, harmonic, melodic, timbral, and lyrical content of experimental pop and encourage students to perceive and describe its organization.

Deconstructing compositions from a diverse range of artists including David Bowie, Grace Jones, Yoko Ono, Sly Stone, Kate Bush, Prince, Sparks, Brain Eno, Cocteau Twins, The Knife, MGMT, MIA, Mdou Moctar, SOPHIE and others, students will explore hooks, topline melodies, richly-layered vocal harmonies, dynamic instrumental arrangements, and infectious grooves and then reconstruct these compositions in a Digital Audio Workstation.

Students will also create original compositions while exploring experimental strategies: from deploying William Burroughs' cut-up techniques to generate lyrics, to transforming melodic and harmonic patterns into both Minimalist and Baroque renderings, to alchemizing fissions and fusions of rhythms from heterogeneous cultural and technical origins.

Registration Restrictions
RGMMMEP - Experimental Pop Only

Course Long Title
Portfolio Review

Subject Code Course Number
MCMP 290

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0

Description

The student must prepare and submit for review a cumulative portfolio of their creative work. This portfolio will contain work produced at CalArts, a substantial portion of which should have been presented in performance or other appropriate manner. Portfolio contents may be presented in the form of scores, recordings, videos, texts, etc., and must be of archival quality and suitable for presentation in the professional field.

Successful completion of this course requires satisfactory completion of the portfolio and review as assessed by faculty.

MCMP306 - Arranging Experimental Pop

General

Course Long Title
Arranging Experimental Pop

Subject Code Course Number
MCMP 306

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Experimental Pop artists who compose in a DAW have an unlimited arsenal of virtual musicians and drag-n-drop riffs available at their fingertips, ready to be deployed with the click of a mouse. No longer "constrained" by the natural order of instrumentation previously established by "the band" (drums, bass, guitar, keys), one has the ability to transpose and embellish the seeds of a composition-a compelling vocal performance, infectious bass line or beat-in any number of genres and imaginative stylistic configurations.

Nor is the challenge for the self-producing musician so much about access to the pro-players and production technology needed to create a perfectly polished record-with today's sophisticated plug-ins, almost anyone can do that now. Instead, it's more about navigating this unbounded terrain to identify the most original and effective sounds and out-of-the-box sonic sources to accompany one's individual performance.

When pursuing an experimental approach to pop, arranging (as well as composition) becomes more about exploring melodic, harmonic and rhythmic accompaniment that one does not expect to find

within a particular genre (resulting in fresh cross-pollinations and mutating forms) rather than simply ticking the boxes of what one expects to find (swelling strings in a ballad.check; trap high-hats.check; autotuned hyperpop vocals.check; EDM riser.check).

In this class, we will investigate how musical languages and techniques of arranging have catalyzed the possibilities for studio productions in a post-genre era of music.

Students will be expected to learn how to make arrangements in the DAW, to explore transpositions of these arrangements to live performance settings, to demonstrate awareness and knowledge of the history and role of arrangement/productions within popular recorded music, and to conceptualize the task of the arranger-producer from the standpoint of experimental pop and post-genre musical practices.

By examining the arrangement strategies deployed by a wide array of experimental pop artists, students will learn how these artists managed to mutate and transcend their influences through constant experimentation and restless creativity and exploration.

MCMP307 - Arranging

General

Course Long Title
Arranging

Subject Code Course Number
MCMP 307

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Arranging is a "secret sauce" between composition and performance. It is a design involving style, sound, technique, and feeling. Arrangers have been somewhat mercurial figures who emerged from the jazz age, and who adapted to the possibilities and techniques of studio recording. Arranging is sometimes conceived of as merely functional, technical and pragmatic. But as we will see in practice, there are many creative possibilities here. Our guiding question will be: how may the hidden role of the arranger be inhabited for subversive or experimental means?

Registration Restrictions

MCMP308 - The Art of the Mix

General

Course Long Title
The Art of the Mix

Subject Code Course Number
MCMP 308

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
What do arranging and mixing look like in a modern recording studio or home studio? In the era of self-production (where the lines between composer, engineer, arranger and producer are blurred) and recording in a DAW with unlimited tracks and unlimited arrangement possibilities, arranging and production have become tasked with efficient work-flow and effective decision making (about everything from sonic signatures to degrees of quantization), as much as they involve analyzing musical content.

In this class, we will learn how to decide what your recording needs and doesn't need in order to be engaging to listen to. We will learn how to use a range of studio production techniques to arrange, enhance and mix our ideas correspondingly. We will also use our ears to identify why our favorite recordings work so well, and apply these strategies to our own recordings.

This class will include listening sessions that analyze arrangement and production techniques for popular and experimental music; hands-on studio production technique workshops for instrumental, structural and spatial arrangement; individually-tailored demo development sessions and whole-class critiques.

MCMP 325

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This class is a study of experimental music repertoire largely but not exclusively following the tradition of John Cage and onward into the 21st century. We study the music through performance and discussion, sometimes probing in detail theories of experimental music. Classes often take the form of rehearsals. All instruments and voices are able to take part. Each year the course centers on a different theme, which is used as a guide to select the repertoire we will work on. Recent themes have included, melody, water, indeterminacy, earthworks, text scores, theater, etc.

General

Course Long Title
Writing for Woodwinds

Subject Code Course Number
MCMP 331

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Writing for Woodwinds is a workshop in composing music for wind instruments. Instrumental techniques from the traditional to the extended are demonstrated and discussed. In addition to listening assignments and study of scores of music, which range from the Baroque to the most recent works for woodwinds, there are in-class presentations by professional wind instrument players and readings of composition projects for each instrument- including auxiliary woodwinds. At the end of the semester, final ensemble

composition projects are recorded by guest artists. Students will complete the course with final completed recordings of their pieces.

MCMP332 - Writing for Harp

General

Course Long Title
Writing for Harp

Subject Code Course Number
MCMP 332

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
The course will incorporate a thorough investigation of the physical and notational aspects of harp techniques, with opportunities to apply what the student has learned in several composition projects. Throughout the course, students will compose short works for solo harp and harp with ensemble, culminating in one or more recording sessions. Topics will include the instrument itself and its mechanism, including playing position and pedals; techniques such as arpeggio, muffling, glissando, and bisbigliando; and special and extended techniques, such as preparations, bowing, pitch bending, and tuning key slides. Students will study different compositional approaches to the harp by investigating significant compositions for the harp. Students will also be given basic instruction on the harp so that they might directly experience playing the instrument.

Writing for Everything Else

Subject Code	Course Number
MCMP	339

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This course will examine the risks, rewards, realities, pleasures, pitfalls, and hazards of composing for instruments indigenous to cultures other than one's own. Technical and notation aspects related to writing for instruments played by performers who may not read music, or who are likely to be unacquainted with stylistic trends in contemporary music, will be addressed. Topics to be introduced within the context of the course include: aesthetics; stylistic spectrums; attitudes of players; navigating through different languages; composers who incorporate indigenous instruments into their oeuvre; assimilation; and an investigation of the appeal/privileging of certain instruments over others. Instruments introduced in the past include shakuhachi, dijeridu, kayagum, ehru, theremin, koto, tar, and many others. Students will have the opportunity to record their final project compositions with instruments drawn from the course demonstrations.

General

Course Long Title
Experiments in Film Sound

Subject Code Course Number
MCMP 343

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
This course will explore the development of sound manipulation techniques for film--including Eisenstein's vertical montages, the BBC Radiophonic Workshop's musique concrete strategies, David Lynch's industrial drones, and Wendy Carlos' synthesized soundscapes--and apply these strategies to create our own audio works for the moving image. We learn how to use EQ to make sounds more sinister or sweet; how to use panning and ambience to expand cinematic width and depth; and how to use acousmatic sounds to draw the audience into the world of the film. We will also explore the relationship between sound and image, and how sound can be employed in collaboration with or opposition to the image. This course will include lectures, discussions, and technical demonstrations, along with a weekly screening. Students will develop their own libraries of sounds they have created. Each participant will also develop a 5-7-minute film sound project, which will be screened on the final day.

Description
Students in this class will form remote collaborative music ensembles with guest artists that will include musicians from across the globe. Past collaborations have involved Bergsonist (Morocco/NYC), Ela Orleans (Poland/France), MC Yallah (Uganda), Debmaster (Germany), Francis Ayamga/Top Link Studios (Ghana), Adhan Zidan (Egypt), Lucas Santtana (Brazil), The Meridian Brothers (Colombia), and Takako Minekawa (Japan) Dustin Wong (LA). This course will explore how hybridity as a model for collaboration and composition manifests itself in record production and is afforded and transformed by remote technologies and conditions (in-person vs. remote, actual vs. virtual, local vs. global). How can we develop and explore new models for collaboration using remote technology, such as "networked sound collages" or "collaborative DAWs," that afford greater opportunity for heterogeneous cultural production and the creation of audiotopias? Using the "human signal chain" as the basis for compositional strategies that utilize the "virtual" and the "global" (alongside the "actual" and the "local"), this course will facilitate ensembles that can move fluidly between in-person, on-campus rehearsals and production lessons, and remote, off-campus collaboration (using collaborative DAWs that live in the cloud, like Soundtrap), expanding ensembles to include musicians from all over the globe. Through projects that examine sound transmission and transmutation, deconstruction and decontextualization, assemblage/collage, deterritorialization and the audiotopia, students will work through the aesthetic, technical, and interpersonal challenges that remote collaboration entails.

MCMP368 - Sonic Collage

General

Course Long Title
Sonic Collage

Subject Code Course Number
MCMP 368

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
In Sonic Collage, we will reimagine and recontextualize soundscapes by revisiting the art of the archive. Sonic Collage asks us to compose through the compost, to RE*member the dismembered and forgotten by sighting our sources. We will explore unorthodox and experimental methodologies of creating new compositions: from building and sounding acoustic instruments using found objects; to incorporating found sounds, field recordings, and samples into DAW-based music productions; to orchestrating collisions between archival audio and video materials to generate new audio-visual works. Working across acoustic, analog, digital, audio and visual mediums, we will explore how the meaning and identity of our original materials is transformed when it comes into contact with materials from divergent sources and contexts. We also ask how processes like filtering, editing, pitch-shifting, reversing, and other forms of spectromorphology can alter the identification and meaning of our sound sources. Merging editing software, analog and digital processing, and the art of storytelling, Sonic Collage will explore poetic forms that get below the surface of sound.

MCMP369 - The Studio As Instrument

Credit Hours

Min Credit Hours:
2

Description

How has the merging of composing, recording, and production afforded by developments in studio technology--from the multitrack analog studios of the 1960's to the DAW-based home studios of today--opened up new ways of creating music and new musical forms and shifted the medium of composition from pitch progressions to sound fields? Or, as Keith Richards would say, "It's not the notes, it's the sounds."

In Brian Eno's essay, The Studio As A Compositional Tool, he argues that recorded music is an entirely different artform from traditional music, and that the contemporary composer in a multitrack studio becomes empirical in a way that the traditional composer never could be, working directly with sound to shape the final result with no transmission lost along the way, much like a painter works directly and responsively with their own medium.

In this class, we will envision ourselves as painters and sculptors of sound--composing, recording and enhancing (or degrading) our sounds correspondingly to create original works. Using the recording studio as our instrument, we will explore various strategies for creating sound colors and shapes; sculpting sound timbres and textures with feedback and distortion; composing with loops and randomizing games; (de)constructing form with subtractive arranging; and expanding into space by fabricating imaginary sonic worlds.

MCMP399 - Independent Study

General

Course Long Title
Independent Study

Subject Code Course Number
MCMP 399

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours: Max Credit Hours:
0.5 3

Description
Under the direction of a specific faculty member, students complete projects defined in a contractual agreement made at the beginning of each semester.

MCMP404 - Field Recording Workshop

General

Course Long Title
Field Recording Workshop

Subject Code	Course Number
MCMP	404

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Course available only by permission of instructor at Course Advising Day
The Field Recording Workshop is an investigation into the historical, technical and aesthetic aspects of field recording as a means of documentation and as a musical practice. As a workshop, we will actively engage in making recordings, comparing and testing equipment, testing various post-recording procedures and, as a final project, creating field recording pieces. The history of field recording, from its inception as a form of documentation (of existing music and environments) towards its use as musical material (from musique concrete onward) will be sketched through readings and especially an extensive listening list.

Course Long Title
Electroacoustic Seminar

Subject Code	Course Number
MCMP	405

School(s)	Program(s)
School of Music	Composition / ESP

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

In this seminar we will learn about and explore non-linear creative systems for composition and performance with the Experimental Sound Studio serving as our exploratory vessel. A mixture of group discussion, lecture, and in-class presentations will help us create systems that combine fixed composition with improvisational techniques. Students will have an opportunity to learn fundamentals of modular synthesis, strategies for combining acoustic with electronic elements, and develop multi-channel works. Expect to spend time in the Experimental Sound Studio to develop your own voice and style a final work that will combine our semester of investigations. No previous synth experience is necessary.

Recommended but not required requisite courses:
Fundamentals of Computer Music (MSCM-150) and
Composition with Max/MSP (MCMP-465/665)

MCMP407 - Music for a Concert Hall

General

Course Long Title
Music for a Concert Hall

Subject Code	Course Number
MCMP	407

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

In this course, we will discover the concert hall as an instrument. Instead of understanding the hall as a shell that provides a space for performers and audiences to engage with music, we will research the venue's acoustic properties, analyze its sonic relation to the surrounding environment, and explore options to actually "play" the hall without adding any sound sources. In the end, we will create and perform a piece

specific to the hall.
Be prepared to listen, open and close windows and doors, excite surfaces, microphone and amplify, play lights and other infrastructure. Musical training is not required. Curiosity is.

MCMP408 - Sound and Audio Walks

General

Course Long Title
Sound and Audio Walks

Subject Code Course Number
MCMP 408

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
While sound walks guide the attention of audience members to the sounding reality of their immediate surroundings, audio walks constitute a simple form of augmented reality where audience members listen to audio through headphones while walking through a predetermined environment.

In this course, we will explore the acoustic qualities and dominant sounds of the main building and the CalArts campus. Based on this experience, we will create both sound and audio walks that are site-specific to this environment.

Registration Restrictions
RGAMUS - Music School Students Only, RGNBFA1 - No BFA 1 Students

General

Course Long Title
Concert Theater

Subject Code Course Number
MCMP 416

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Performing Landscapes: Music, Text, Space, Body, & Design investigates contemporary music-based performance through the lens of alternative modalities and non-traditional strategies emerging from music, theater, movement, and space. Intended for MFA and upper-level BFA students desiring to engage in cross-disciplinary collaboration, the course supports students who wish to move beyond perceived limitations of their single disciplines. In addition to analyzing works of composers who pioneered cross-disciplinary strategies (such as Mauricio Kagel, George Crumb, Heiner Goebbels, Gyorgy Ligeti, and Meredith Monk), students will learn ways of communicating specific to other disciplines, fostering a more holistic and productive collaborative experience. Utilizing theories, histories and methods of experimental interdisciplinary processes that reflect a wide variety of philosophical, political and aesthetic viewpoints, the course is ideal for interpreters and creators of new performance who will discover and personalize new methodologies, leading to the creation of short works for in-class presentations, and to developing and refining larger works-in-progress.

MCMP421 - Cross-Genre Hybrid Music Composition

General

Course Long Title
Cross-Genre Hybrid Music Composition

Subject Code Course Number
MCMP 421

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

In this course students will focus on creating new compositions that are hybrid in nature. Students will be tasked with creating new works based on the blending or juxtaposition of varying sonic elements, drawn from specific historical eras or genres. We will explore what the word genre means, and dive into the various characteristics that define such sounds including but not limited to techno, ambient, dub, house, drone and more. After taking this course students will have a better understanding of pre-existing musical traditions within contemporary electronic and experimental music, and how to employ these traditions to effect in their own compositions. The stranger the mix the sweeter the result! Students should be fluent in the digital audio workstation of their choice and be prepared to present new work every two weeks for group listening and critique.

Description

This course takes music, photography and writing together as a unified creative process. In fact this is the combination in which recorded music typically appears on recorded media or online (eg. bandcamp) - but what are the ways that these media can be regarded as equal parts of a whole and how can resonance of music-photo-fiction can be acknowledged, amplified or extended? This class will answer the question through a series of generative prompts for student work. At the same time we will reflect on processes and models of music-photo-fiction through the lens of work by Theresa Hak Kyung Cha, Francois Laruelle, Joanna Demers, Celer and Danielle Baquet-Long (Chubby Wolf), Hanne Darboven, Laurie Anderson, Gregory Whitehead, Os Mutantes, Marguerite Duras, Michael

Madsen, Ornette Coleman and others. We will unfold the capacities of models created by these artists and thinkers to create new works and methods.

Course Long Title

Making Music Videos

Subject Code

MCMP

Course Number

498S

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

3

Description

Students in this class will complete a number of collaborative music video production projects in groups that include students from the schools of music, dance, film/video and experimental animation.

Music videos can be a wonderful tool for filmmakers to explore and expand on their art of image-making through rhythm and gesture, and for musicians to explore how their sonic compositions can be enlivened by moving images that respond to what they hear.

In this production class, we will start by looking at music videos to develop a critical sense of the conventions and challenges of the media, in order to confront, interrogate and re-envision them. Students will be encouraged to conceive of music video both as an aesthetic entity as well as an opportunity to govern the narrative of the song, and to push their audio-visual ideas further through the elaboration of technique, language and experimentation.

Considering narrative as our first approach, we will explore how meaning is conveyed, either as a reflection of or in contrast to the lyrics and narrative content of the song, taking in mind various levels of representation: literal, poetic, metaphorical, and surreal.

We will also explore Visual Music and consider how tempo, rhythm, phrasing, tonality and structure can create a dialogue with the rhythmic and structural components of the moving image by controlling both the editing and the movement inside and outside the frame. The possibility of synesthesia and abstraction within music video practice will allow students to research deeply and boundlessly into movement and editing in both the audio and visual realm, gaining tools they can later apply to their own filmmaking, composition and choreography.

The class will put a strong emphasis on pre-production, creative development, and treatment crafting, with talks by visiting music video artists who will elaborate on industry practice. We will look at music video treatments from various artists to demonstrate how directors have planned for their shoots through animatics, references and mood-boards. We will also host technical workshops that demonstrate ways of shooting live music and how to direct play-backs and/or live performances in unconventional ways.

After working on different groups through the thematic exercises, each collaborative group (which will include musicians, dancers and film-makers) will create their own music video project, starting with the development of a treatment, through planning, shooting and editing their project.

This class is open to BFA 2/3/4 students in the Schools of Music, Dance and Film/Video and Experimental Animation.

MCMP506 - Arranging Experimental Pop

General

Course Long Title

Arranging Experimental Pop

Subject Code

MCMP

Course Number

506

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Experimental Pop artists who compose in a DAW have an unlimited arsenal of virtual musicians and drag-n-drop riffs available at their fingertips, ready to be deployed with the click of a mouse. No longer "constrained" by the natural order of instrumentation previously established by "the band" (drums, bass, guitar, keys), one has the ability to transpose and embellish the seeds of a composition-a compelling vocal performance, infectious bass line or beat-in any number of genres and imaginative stylistic configurations.

Nor is the challenge for the self-producing musician so much about access to the pro-players and production technology needed to create a perfectly polished record-with today's sophisticated plug-ins, almost anyone can do that now. Instead, it's more about navigating this unbounded terrain to identify the most original and effective sounds and out-of-the-box sonic sources to accompany one's individual performance.

When pursuing an experimental approach to pop, arranging (as well as composition) becomes more about exploring melodic, harmonic and rhythmic accompaniment that one does not expect to find within a particular genre (resulting in fresh cross-pollinations and mutating forms) rather than simply ticking the boxes of what one expects to find (swelling strings in a ballad.check; trap high-hats.check; autotuned hyperpop vocals.check; EDM riser.check).

In this class, we will investigate how musical languages and techniques of arranging have catalyzed the possibilities for studio productions in a post-genre era of music.

Students will be expected to learn how to make arrangements in the DAW, to explore transpositions of these arrangements to live performance settings, to demonstrate awareness and knowledge of the history and role of arrangement/productions within popular recorded music, and to conceptualize the task of the arranger-producer from the standpoint of experimental pop and post-genre musical practices.

By examining the arrangement strategies deployed by a wide array of experimental pop artists, students will learn how these artists managed to mutate and transcend their influences through constant experimentation and restless creativity and exploration.

Description

Arranging is a "secret sauce" between composition and performance. It is a design involving style, sound, technique, and feeling. Arrangers have been somewhat mercurial figures who emerged from the jazz age, and who adapted to the possibilities and techniques of studio recording. Arranging is sometimes conceived of as merely functional, technical and pragmatic. But as we will see in practice, there are many creative possibilities here. Our guiding question will be: how may the hidden role of the arranger be inhabited for subversive or experimental means?

The Art of the Mix

Subject Code
MCMP

Course Number
608

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

What do arranging and mixing look like in a modern recording studio or home studio? In the era of self-production (where the lines between composer, engineer, arranger and producer are blurred) and recording in a DAW with unlimited tracks and unlimited arrangement possibilities, arranging and production have become tasked with efficient work-flow and effective decision making (about everything from sonic signatures to degrees of quantization), as much as they involve analyzing musical content.

In this class, we will learn how to decide what your recording needs and doesn't need in order to be engaging to listen to. We will learn how to use a range of studio production techniques to arrange, enhance and mix our ideas correspondingly. We will also use our ears to identify why our favorite recordings work so well, and apply these strategies to our own recordings.

This class will include listening sessions that analyze arrangement and production techniques for popular and experimental music; hands-on studio production technique workshops for instrumental, structural and spatial arrangement; individually-tailored demo development sessions and whole-class critiques.

Modeling Propositional Music in Art-Sci

Subject Code	Course Number
MCMP	623

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

Propositional music is a point of view about composing that emerges from a unique philosophy, framework, and method for compositional practice in experimental music that proceeds from proposing models informed by pandisciplinary interests, and then proceeding to make work consistent with those models. In this practice, composers might build proposed models of worlds, universes, evolution, brains, consciousness, or whole domains of thought and life, and then proceed to make dynamical musical embodiments of these models, inviting audiences to experience them in spontaneously emerging sonic forms. Such a practice fuels creative music methodologies when energized in composition, improvisation, analysis, and adjacent areas of interdisciplinary thought, including self-organizing forms, complex adaptive systems, and interactive networks. According to this view, composing involves proposing models for whole musical realities. Their correspondence to proposed realities navigates a profound and rich meeting place for creative license and scientific verification. In science, one brings an idea to the world mostly by proving it. Artists, musicians, and engineers manifest their ideas through making. The concept of propositional music unifies the two in an area where music, science, and philosophy can meet in shared creative investigations, one in which distinctions may collapse into a new kind of artscience. The course will proceed in lecture/discussion format. Through lectures, readings, and listening assignments, students will be exposed to detailed examples of compositional methods and musical works that can be analyzed with ideas from propositional music thinking. Students will be asked to present brief written and verbal responses for class discussion weekly. They will then be given choices for culminating class projects that may include analyzing extant or original works within the framework of propositional music, writing analytical and/or philosophical texts in response to ideas discussed in class, or composing and presenting new works in which they develop their own ways to experiment with propositional music thinking and methods.

Description

This class is a study of experimental music repertoire largely but not exclusively following the tradition of John Cage and onward into the 21st century. We study the music through performance and discussion, sometimes probing in detail theories of experimental music. Classes often take the form of rehearsals. All instruments and voices are able to take part. Each year the course centers on a different theme, which is used as a guide to select the repertoire we will work on. Recent themes have included, melody, water, indeterminacy, earthworks, text scores, theater, etc.

Description

When offered this course picks up on the theme of Experimental Music Workshop I in the same academic year. The class will center around compositions made by students in the class, based upon that theme. (Recent themes have included, melody, water, indeterminacy, earthworks, text scores, theater, etc.) Typically class will be devoted to rehearsal and discussion of the student works leading to a final concert.

MCMP630 - Writing for Strings

General

Course Long Title

Writing for Woodwinds

Subject Code

MCMP

Course Number

631

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

Writing for Woodwinds is a workshop in composing music for wind instruments. Instrumental techniques from the traditional to the extended are demonstrated and discussed. In addition to listening assignments and study of scores of music, which range from the Baroque to the most recent works for woodwinds, there are in-class presentations by professional wind instrument players and readings of composition projects for each instrument- including auxiliary woodwinds. At the end of the semester, final ensemble composition projects are recorded by guest artists. Students will complete the course with final completed recordings of their pieces.

MCMP632 - Writing for Harp

General

Course Long Title

Writing for Harp

Subject Code

MCMP

Course Number

632

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

1

Description

The course will incorporate a thorough investigation of the physical and notational aspects of harp techniques, with opportunities to apply what the student has learned in several composition projects. Throughout the course, students will compose short works for solo harp

and harp with ensemble, culminating in one or more recording sessions. Topics will include the instrument itself and its mechanism, including playing position and pedals; techniques such as arpeggio, muffling, glissando, and bisbigliando; and special and extended techniques, such as preparations, bowing, pitch bending, and tuning key slides. Students will study different compositional approaches to the harp by investigating significant compositions for the harp. Students will also be given basic instruction on the harp so that they might directly experience playing the instrument.

General

Course Long Title
Writing for Everything Else

Subject Code	Course Number
MCMP	639

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
This course will examine the risks, rewards, realities, pleasures, pitfalls, and hazards of composing for instruments indigenous to cultures other than one's own. Technical and notation

aspects related to writing for instruments played by performers who may not read music, or who are likely to be unacquainted with stylistic trends in contemporary music, will be addressed. Topics to be introduced within the context of the course include: aesthetics; stylistic spectrums; attitudes of players; navigating through different languages; composers who incorporate indigenous instruments into their oeuvre; assimilation; and an investigation of the appeal/privileging of certain instruments over others.

Instruments introduced in the past include shakuhachi, dijeridu, kayagum, ehru, theremin, koto, tar, and many others. Students will have the opportunity to record their final project compositions with instruments drawn from the course demonstrations.

Credit Hours

Min Credit Hours:

2

Description

This course will explore the development of sound manipulation techniques for film--including Eisenstein's vertical montages, the BBC Radiophonic Workshop's musique concrete strategies, David Lynch's industrial drones, and Wendy Carlos' synthesized soundscapes--and apply these strategies to create our own audio works for the moving image. We learn how to use EQ to make sounds more sinister or sweet; how to use panning and ambience to expand cinematic width and depth; and how to use acousmatic sounds to draw the audience into the world of the film. We will also explore the relationship between sound and image, and how sound can be employed in collaboration with or opposition to the image.

This course will include lectures, discussions, and technical demonstrations, along with a weekly screening.

Students will develop their own libraries of sounds they have created. Each participant will also develop a 5-7-minute film sound project, which will be screened on the final day.

Description

Students in this class will form remote collaborative music ensembles with guest artists that will musicians from across the globe. Past collaborations have involved Bergsonist (Morocco/ NYC), MC Yallah (Uganda), Debmater (Germany), Francis Ayamga/Top Link Studios (Ghana), Adham Zidan (Egypt), Lucas Santtana (Brazil), The Meridian Brothers (Colombia), Takako Minekawa (Japan), Dustin Wong (LA) and Ela Orleans (Poland / France).

This course will explore how hybridity as a model for collaboration and composition manifests itself in record production and is afforded and transformed by remote technologies and conditions (in-person vs. remote, actual vs. virtual, local vs. global). How can we develop and explore new models for collaboration using remote technology, such as "networked sound collages" or "collaborative DAWs," that afford greater opportunity for heterogeneous cultural production and the creation of audiotopias? Using the "human signal chain" as the basis for compositional strategies that utilize the "virtual" and the "global" (alongside the "actual" and the "local"), this course will facilitate ensembles that can move fluidly between in-person, on-campus rehearsals, and remote, off-campus collaboration (using collaborative DAWs that live in the cloud), expanding ensembles to include musicians from all over the globe. Through projects that examine sound transmission and transmutation, deconstruction and decontextualization, assemblage/collage, deterritorialization and the audiotopia, students will work through the aesthetic, technical, and interpersonal challenges that remote collaboration entails. We will explore how these aesthetics manifest themselves in everything from Musique Concrete to Hip-Hop, Dub, Post-Punk, Remix Culture and Punk Ethnography.

668

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

In Sonic Collage, we will reimagine and recontextualize soundscapes by revisiting the art of the archive. Sonic Collage asks us to compose through the compost, to RE*member the dismembered and forgotten by sighting our sources. We will explore unorthodox and experimental methodologies of creating new compositions: from building and sounding acoustic instruments using found objects; to incorporating found sounds, field recordings, and samples into DAW-based music productions; to orchestrating collisions between archival audio and video materials to generate new audio-visual works. Working across acoustic, analog, digital, audio and visual mediums, we will explore how the meaning and identity of our original materials is transformed when it comes into contact with materials from divergent sources and contexts. We also ask how processes like filtering, editing, pitch-shifting, reversing, and other forms of spectromorphology can alter the identification and meaning of our sound sources. Merging editing software, analog and digital processing, and the art of storytelling, Sonic Collage will explore poetic forms that get below the surface of sound.

MCMP669 - The Studio As Instrument

Course Long Title
The Studio As Instrument

Subject Code
MCMP

Course Number
669

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

How has the merging of composing, recording, and production afforded by developments in studio technology--from the multitrack analog studios of the 1960's to the DAW-based home studios of today--opened up new ways of creating music and new musical forms and shifted the medium of composition from pitch progressions to sound fields? Or, as Keith Richards would say, "It's not the notes, it's the sounds."

In Brian Eno's essay, The Studio As A Compositional Tool, he argues that recorded music is an entirely different artform from traditional music, and that the contemporary composer in a multitrack studio becomes empirical in a way that the traditional composer never could be, working directly with sound to shape the final result with no transmission lost along the way, much like a painter works directly and responsively with their own medium.

In this class, we will envision ourselves as painters and sculptors of sound--composing, recording and enhancing (or degrading) our sounds correspondingly to create original works. Using the recording studio as our instrument, we will explore various strategies for creating sound colors and shapes; sculpting sound timbres and textures with feedback and distortion; composing

with loops and randomizing games; (de)constructing form with subtractive arranging; and expanding into space by fabricating imaginary sonic worlds.

MCMP690 - Graduation Portfolio Review

General

Course Long Title
Graduation Portfolio Review

Subject Code Course Number
MCMP 690

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0

Description
In the semester preceding graduation, students in certain programs must submit a portfolio of work for review. This portfolio will contain work produced at CalArts, a substantial portion of which should have been presented in performance or other appropriate manner. Portfolio contents may be presented in the form of scores, recordings, videos, texts, etc., and must be of archival quality and suitable for presentation in the professional field.

Successful completion of this course requires satisfactory completion of the portfolio and review as assessed by faculty. Selected student work will be archived at CalArts.

MCMP698M - Video Game Scoring

General

Course Long Title
Video Game Scoring

Subject Code Course Number
MCMP 698M

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
This course will focus on the unique challenges of music scoring for game environments. Parallels and distinctions with regard to concert music, film, TV, cartoons and other linear media music will be explored as students analyze and create

music for video games and non-linear media. Technical considerations in game design workflow will be addressed as students compose music for a variety of game play styles and forms using DAW's, audio middleware and game engines.

Access to a laptop computer
(Students must have a laptop or be able to share one with a fellow student-they will be installing software tools.)

Basic familiarity with a DAW (ProTools, Logic, Garage Band, or other)

Students should expect to spend an approximately \$75, for materials and software.

Description
This course takes music, photography and writing together as a unified creative process. In fact this is the combination in which recorded music typically appears on recorded media or online (eg. bandcamp) - but what are the ways that these media can be regarded as equal parts of a whole and how can resonance of music-photo-fiction can be acknowledged, amplified or extended? This class will answer the question through a series of generative prompts for student work. At the same time we will reflect on processes and models of music-photo-fiction through the lens of work by Theresa Hak Kyung Cha, Francois Laruelle, Joanna Demers, Celer and Danielle Baquet-Long (Chubby Wolf), Hanne Darboven, Laurie Anderson, Gregory Whitehead, Os Mutantes, Marguerite Duras, Michael Madsen, Ornette Coleman and others. We will unfold the capacities of models created by these artists and thinkers to create new works and methods.

Description

This course will investigate the nature of writing words for music and setting pre-existing words to music. Students will develop an understanding of how musical time affects the perception of words and how words interact with the perception of musical ideas. Collaboration will be important and the course is open both to composers and to writers as well. Writers will be paired with different composers, and in addition to writing their own texts will be required to write analyses of historical and contemporary musical lyrics. Composers will also be asked to write a significant amount of text to be set to music and will additionally be asked to set music to their own texts and to the texts of their assigned writing partners. A broad range of musical and verbal styles will be explored, both popular and historical, and writing for the musical stage will

be explored in depth as well. Prerequisite for music students is MTHY-112; prerequisite for non-music students is permission of instructor.

3

Description

Grant Writing for Artists will provide students with a basic introduction to grant writing, hands-on experience preparing a grant application in a workshop setting, and critical discussion around the history and cultural practices related to funding arts organizations in the US. Students will gain tools to understand funding structures of granting organizations, research grant opportunities, prepare supporting materials including work samples and budgets, and craft an application that will highlight their strengths and amplify their story. Each student will write and workshop a grant application over the course of the semester, with the goal of creating a final document that can be submitted for a real world funding opportunity. Grant Writing for Artists is presented in collaboration between the CalArts Writing Center, Center for Life and Work, and the Herb Alpert School of Music.

MFOR100 - Musician's Toolkit

General

Course Long Title

Musician's Toolkit

Subject Code	Course Number
MFOR	100

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

Toolkit is designed as a preparation for a life in professional music, as well as an orientation to the college experience. It's especially helpful for first year undergraduates, but it is also open to upper division undergraduates and graduate students. The course covers a variety of the skills and tools needed for success as a music student as well as in the world of a professional musician. Whether you are a performer, composer, sound designer, or music technology specialist, or whatever your genre of music, Toolkit will explore areas of interest and research in multiple facets of the musical universe. The class meets once a week for two hours, and each week we'll discuss a module of information about a different topic. Some examples include: practical focus on organizational skills, study habits, physical and mental techniques for practicing/making music more efficiently and without pain or stress; specific tactics for managing your time better; developing strategies for improving areas of health and wellness that many musicians ignore, like muscular skeletal issues, nutrition, posture, hearing loss and vocal health; ergonomics and health risks of computer use, sitting for too many hours and commuting; and stress reduction techniques to aid with issues of stage fright, procrastination, and cramming. Evidence based studies from the fields of medicine, psychology and neuroscience will be noted and discussed.

MHST 230

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This course explores the synesthetic potential of music and the moving image as it manifests itself throughout audio-visual practice: music video, film scoring, audio-visual performance and installation.

We'll begin with Michel Chion's seminal text Audio-Vision: Sound on Screen to explore how concepts such as acousmatic sound, synchresis, rendering, empathy/anempathy, temporalization, and added value enhance our understanding of how sound and the moving image interact, both in collaboration and opposition to one another. We'll continue with Carol Vernallis' Experiencing Music Video: Aesthetics and Cultural Context to explore the non-realist, non-narrative, nonsensical and musicalized nature of the moving image within music video.

Throughout the course, we will develop conceptual and practical strategies for manipulating sound and the moving image to create original works that explore this synesthetic potential to "see" music and "hear" the moving image. How can properties of sound and the moving image, such as tone/timbre, texture, noise, fidelity, rhythm, speed, repetition, and dynamics be manipulated and deployed correspondingly?

Basic practical workshops in video editing and post-production will enable us to develop audio-visual works that exist in a liminal space between music video and film score, where neither the music nor the moving image asserts complete authority, but where they interact and respond to each other in innovative and dynamic ways.

This course is intended for students in the Experimental Pop program, with the intention of developing their audio-visual practice towards the creation of both music videos and moving image accompaniment for live musical performances. However, anyone with prior skills in music production and an interest in expanding into audio-visual production is welcome.

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

Black Temporalities and Black Time: To fully engage with Black music we must understand Black time. We do this work together. In 'Black Temporalities & Black Time' we will explore non-linear storytelling and the elasticity of (un)time through the framework of Terence Nance's Random Acts of Flyness. The course will also be in dialogue with creators from Sun Ra to Solange to Moor Mother to Alice Coltrane and Flying Lotus. We will center the plentitude of artists that are pivotal in using time itself as an instrument. We will analyze film, music, and essays to find a fluid understanding as well as identify the key distinctions between Afrofuturism and Afropresentism. We will spend time meditating on different vignettes of Black life and analyze the ways Black artists use and tune our antennae to code-switch and channel ancestral data. We will also be engaging with texts such as Dilla Time by Dan Charnas, Black Space on the Poetics of an Afro Future by Anaïs Duplan, and Black Utopias by Jayna Brown. There's a quote from the Black Quantum Futurism Collective: "Nothing ever becomes real until it is experienced." Time is not real until it is experienced. This course is an invitation to dive into the Black (W)Hole of it all.

MHST300H - Latin Am Music: Traditions and Digital

Course Long Title

Latin Am Music: Traditions and Digital

Subject Code	Course Number
MHST	300H

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This course will examine a variety of musical styles from Latin America, and at the same time analyze the political and historical context in which the music developed. The focus will be on the music of the Caribbean and Central America and South America from traditional practices to urban production.

This course aims to intertwine the artistic and the political currents of Latin America in order to explore the ways in which historical events-such as colonialism, migration, globalization, and political upheavals-have affected music, and how music in turn has affected political and social events.

It will analyze how the increasing speed of technology has impacted the music of the region, and how syncretism takes place within each country, as well as regionally and in the world at large.

School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Course not available to BFA1 students.
This is a survey course introducing the music cultures of North America; focusing on an interdisciplinary approach to view the history, social institutions, culture, literature, arts, and relationships of North American Indigenous peoples and their sonic practices. This course will treat the practice of listening as an integral research practice in the study and understanding of Indigenous music and sonic practice. The aim of this course is to provide students with the listening tools necessary to

hear and understand Indigenous sonic practices as a continuum of ethnomusicological and contemporary sonic practices. The outcomes of this course will be a Research-Creation project, which includes a creative component (of any medium) and an accompanying written contextualization, engaging with Indigenous sonic theories and their contexts in non-appropriative ways. Students will be required to bring questions to each class discussion and turn in 5 written listening responses. While this course is not about the basics of Indigenous culture, it will provide students with terminologies and background knowledge in order to approach the material in a respectful and academic manner.

Course Long Title
Extended Duration in Music

Subject Code	Course Number
MHST	325

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This course investigates the relationship between live music performance of extended duration and sound-oriented installation art. Taking Erik Satie's "Vexations" (1893) and "Musique d'Ameublement" (1920) as points of departure, we will analyze 1950s and 60s Happening, Fluxus, and Conceptual Art pieces as in regards to the time structures they establish. This shall help to understand the milieu in which the first sound installations by Maryanne Amacher and Max Neuhaus were perceived (1967). Focusing on the listener's perspective and the aesthetic implications of a revised (or abandoned) work concept, we will try to reconstruct the scandal that these early examples of sound installation art posed for audiences both from the music and the art world. Finally, the course addresses more recent examples of conceptual music and sound installation art that transcends the notion of a perceiver who can actually experience the piece in its full temporal expansion.

Open to graduate students from all schools and programs who are comfortable reading music and reading and writing theory.

Description

Since the 1960s, pop music has been a zone in which experimental, avant-garde impulses have coexisted with commercial and hedonistic imperatives. In this course, we will look at artists who have imported ideas and techniques from the music academy or from visual arts schools into song-based, danceable entertainment aimed principally at young people. But we'll also be exploring the experimentalism already embedded within mainstream pop itself - the use and abuse of new technology to create startling sounds that are genuinely radical but also work on another level as gimmicks that make a record stand out on the radio and the dancefloor.

These mixed motives - stretching the boundaries of sound versus commercialism, inventing the future versus beating the competition - point to a vital impurity intrinsic to pop. As well as iconic figures of art-into-pop like the Beatles or David

Bowie, this semester we'll be paying particular attention to "street" genres such as trap, grime, Jamaican styles from dub to dancehall, and so forth - scenes and styles that don't necessarily use artworld discourse to describe their process but share the same drive to create disruptive sounds, use technology "incorrectly", incorporate improvisation and error into the creative process. Who gets to call themselves "experimental" and how does that affect the framing and reception of their music?

Although the primary focus of the course is on sonic innovation, pop is inherently an audio-visual form -even an audio-visual-textual form, given the importance of lyrics, as well as public statements and artistic rationales. Experimental impulses rarely limit themselves to music alone but manifest in promo videos and visual albums, record artwork, performance, style and costume, even marketing. Can there be such thing as an experimental or innovative pop personality? Fame and publicity can be a medium for artistic expression and provocation, as the careers of David Bowie, Prince, and Lady Gaga illustrate.

Description

This second module of the two-semester Studies in Experimental Pop course might be better titled Studies in Experimental Rock. The focus shifts away from the mainstream of the pop charts and radio, towards the alternative and underground; there is less focus on the dancefloor and more emphasis on electric guitars as the starting point for experimentation. Starting with the spirit of drift and discovery that emerged from the late Sixties psychedelic moment and developed in the Seventies, we then look at Brian Eno career as artist, producer and collaborator; the German cosmic music scene of the 1970s and its turn towards the electronic in the later part of the decade; Japan's mutations of Western sounds across several decades; how art school ideas filtered into postpunk and No Wave music; late Eighties and early '90s neo-psychedelic rock and the birth of the blurry, texturally saturated aesthetic of shoegaze; the controversial but fertile concept of

post-rock in the '90s and 2000s, which filtered into the mainstream through Radiohead; industrial music and its unexpected echoes in conceptual queer electronic music of the 2010s; and various developments in "post-indie" music of the 21st Century, including hauntology, chillwave and vaporwave.

Description
This would be a class on women in the history of Western art music from Ancient Music through the present day, combining musicology, sociology, music theory, ethnomusicology, political science, world history, hermeneutics, feminist theory, philosophy, gender studies, pop music analysis and more fields as needed to provide a fuller picture on the role of women throughout music history. Women have been active in music from the first named composer to the present day as composers, performers, patrons, teachers, critics, historians, students, conductors, producers, financial backers, and much more. This course seeks to prove the dedication written by Maddalena Casulana in 1568 in her First Book of Madrigals for Four Voices, dedicated to Isabella de' Medici, "I want to show the world, as much as I can in this profession of music, the vain error of men that they alone possess the gifts of intellect and artistry, and that such gifts are never given to women."

Description
This course is an introductory survey to film music history and analysis. We will primarily focus on international and experimental cinema, but will likely draw on certain Hollywood or independent American filmmakers who don't quite fit the mold and whose use of music is particularly singular (e.g., David Lynch and Angelo Badalamenti). In this course you will learn how to hear how music operates within film, how sound design can operate on a similar level to score, how to hear "emotion" and "affect" within film score, as well as basic music theory concepts related to film score composition. I am passionate about this subject as cinema is an important medium that can define generations of viewers - no surprise given its potential to veer into the territory of propaganda. As creators we have a responsibility to be aware of the past and to understand how we can be trained by the media that we consume. Part of the power of film lies squarely in the music and sound - the emotion and atmosphere they instill are undeniably powerful tools!

Description
Topics in Vocal Literature: The[R]Evolution of Solo Vocal Literature through the lens of the song cycle

This course will focus on the evolution of vocal music-through the lens of the song cycle and its offspring-over the past few centuries up to the present, primarily in Western Europe and the United States. This course will not be approached as a survey, but rather will examine certain important works, topics and developments in-depth. Circumstances giving rise to this genre and its

evolution will be examined, as will representative composers and performers and their unique styles. Works will be examined within their specific historical situations, considering economic, political, class, gender, social, educational, philosophical, literary and other conditions. The idea of the song cycle and how it has evolved, and its probable connection/relation to pop/rock concept albums also will be explored. Course work will include extensive listening and reading; analysis of features common to music within a certain period and to the composers who wrote within this genre; research into areas outside of music that had a direct influence on its development, and individual and group creative projects. The class also will engage in discussions about what it means to perform historical music today.

Description
Focus Rock: Art Music & Rock - An unwritten history of cross-pollination

Music is: organized sound - timbre and rhythm. This quote by Edgar Varese not only applies to (most) so-called new music (20th and 21st century classical contemporary music), but also to most rock music and related genres. This class will thoroughly research this statement and will look at the little discussed influences of new music on rock l and vice versa - from the Velvet Underground and LaMonte Young, psychedelica and minimalism, Zappa and Varese, to prepared piano and prepared guitars, guitar orchestras, just intonation, no wave, metal, musique concrete, tape music, noise, the studio as instrument, and more. This class not only surveys these influences and cross-pollinations, but also includes musical analysis, discussion of the problem of transcriptions of rock music for classical performers, and other aspects. Students will be expected to create their own works or write a paper.

Description
Make a joyful noise: the development and importance of noise elements in popular and experimental music of the 20th and 21st century. Noise has always been a part of music, if desired or not. But over time noise elements stopped being just an add-on and became the center focus of many new styles. This class will follow the development of noise throughout the 20th century into the 21st. We begin in the early 20th century with the Italian Futurists and follow the

development through the decades looking at emerging noise elements in 20th century avant-garde music, rock, pop and electronic music. A strong focus will be on late-20th/early 21st century styles like Industrial Music, Japan Noise, and Electronica, which fully embrace noise and make it their main artistic creative element.

Description

Post-Punk is another one of these music historical terms that were, of course, applied backwards.

It is not really sure what it means, especially because it starts around the same time as punk (1977).

Does it include or exclude simultaneous styles such as industrial and no wave? In general post-punk -and that's how we will understand it in this class- are styles (! plural) that share some of the aesthetic of punk and the DIY approach, but are not punk, and evolved around the same time from late-70s to mid-80s in relationship to punk. This includes industrial, no wave, new wave, various revivals (punkabilly, ska) and mutations (mutant disco, free funk, post-blues) as well as some art music.

All these styles originated as opposition to cooperate 70s rock, complex and bombast prog-rock,

and at the same time are looking forward (No Future !?) as well as backwards to archaic rock music.

But not only rock music, also the avant-garde influenced post-punk strongly: from free jazz, free improvisation, contemporary art music, and German krautrock to -yes, entering through the back door- prog-rock. But post-punk in general can be seen as the emancipation of rock from blues. So far, even the most artistic prog-rock, still had strong influences and traces of blues, if it was chord changes, scales or inflections in

guitar solos. Post-Punk for a large part gave up on chord changes all together and fully embraced dissonances and sounds as basic elements, resulting in a variety of new approaches and forms. Most post-punk riffs are free of blue notes or inflections.

This class looks at the most creative time in rock music after the 60s and will show how between 1977-1985 the grammar of rock music has been rewritten, influencing nearly everything that is being played today.

Focus Rock: Electronica - Body Electric - Electronic Pop and Dance Music

This class looks at the development of electronic popular music from its early days to its conquest of the international dance floors, creating the international rave community, and follows it further into abstractions such as glitch-electronica, the combination of experimental and post-techno electronica. The development will be traced from pioneering academic electronic music through early electronic use in popular music such as psychedelic, prog-rock, krautrock, ambient, and synth-pop into all-electronic euro-disco, EBM, EDM, IDM, house, techno, drum n bass, glitch electronica and noise. Besides historic, social and politic aspects, the class focuses strongly on musical analysis of the discussed styles.

UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
"Voice is the original instrument." So says Joan La Barbara, the doyenne of extended vocal technique. This course explores the extraordinary panoply of purposes to which the human voice has been deployed. While the focus is on popular music genres of the past half-century, the course is limned with an awareness of parallels and precursors across 20th century avant-garde music, jazz, and musics from outside Western traditions. Diverse forms of vocal expression are under consideration, but there'll be a bias towards the experimental, the extreme, and the excessive - a journey that will take us from the beautifully harrowing screams of Yoko Ono and Diamanda Galas, through the aerobic feats of Tim Buckley and Robert Wyatt, the rhythmic inventions of Bobby McFerrin and human beatboxers like Rahzel.

We'll look at spectacular vocalists like Freddie Mercury and Klaus Nomi and at eccentric singers like Mary Margaret O'Hara and Elisabeth Fraser. Conversely, we'll also dedicate some time to "non-singers", artists who use the voice rhythmically or in a recitative fashion: rappers from Rakim to Lil Wayne, reggae modes like DJ talkover, toasting, and "fast chat" as practiced by performers like U Roy, Big Youth, Eek-a-Mouse, and Smiley Culture, the MC tradition in UK rave and pirate radio from jungle to grime, and a lineage of postpunk speak-sing artists from Mark E. Smith and John Cooper Clarke to Sleaford Mods and Dry Cleaning.

As the course unfolds, the interface between the human voice and technology will become increasingly central, starting with devices like vocoder and talk box (Roger Troutman, Kraftwerk), then moving into the era of sampling cut-ups and "vocal science" (The Art of Noise, Todd Edwards, Daft Punk, Burial) and Auto-Tune (Future, Playboi Carti). We'll be reckoning with the lineage of artists who've used found vocals as raw material for collage or reprocessing (Holger Czukay, Brian Eno & David Byrne, Boards of Canada). Towards the end of the semester, we'll engage with the last decade of conceptual electronic music, where the voice has emerged as the privileged locus for experimentation, with female artists like Holly Herndon, Katy Gately, and Stine Janvin leading the way. Among the most interesting developments in this realm is the creation of fully artificial voices by producers like Amnesia Scanner and Oneohtronix Point Never, although in some ways this is just left-field electronica catching up with the 'vocaloids' trend in Japanese pop.

While spending plenty of time on the technical or technological aspects of all this vocal mutation and manipulation, we will never lose sight of the

artistic and communicative purposes to which all this experimentation is applied: what the artist is trying to say or create, and how different notions about the role and status of the human voice that prevail within various music micro-cultures frames the reception and listener experience of these divergent vocal modes. The goal of the course is to deepen both our understanding of and our awe at the limitless stretchiness of the human voice. We will confront the paradoxes of singing: the way that ethereal, unearthly, immaterial-seeming sounds are produced from the physical interior of the human body through intense exertion and discipline (whether trained or self-taught). We'll also explore how digital culture has dematerialized the voice (along with everything else), turning carnal sounds into disincarnate data that's susceptible to remodeling and restructuring using pitch-correction and vocal design technology like Auto-Tune, Melodyne and Harmony Engine, to the point where a vocal can be reassigned completely different emotions. Terminally elasticated, the voice has become pure posthuman Play-Doh.

Description

Experimental Music of the post-Cage Generation
This class will deal with the explosion of experimental music in the mid-20th century to the 1990s. Experimental music will be explored as more a method or set of approaches to creating music than as a genre. We will, over the course of two semesters, look at music by people born between 1926 and 1945, and try to follow trajectories in that incredibly wide-ranging repertoire. A tentative list of musicians covered (in one to two week units) will be: Morton Feldman (1926), Ben Johnston (1926), Cecil Taylor (1929), Robert Ashley (1930), Ornette Coleman (1930), Pauline Oliveros (1930), Alvin Lucier (1931), Eliane Radigue (1932), James Tenney (1934), Christian Wolff (1934), Alice Coltrane (1937), Art Ensemble of Chicago (Joseph Jarman (1937), Roscoe Mitchell (1940)), Maryanne Amacher (1938), Annea Lockwood (1939), Julius Eastman (1940), Keith Rowe (1940), Wadada Leo Smith (1941), George Clinton (1941), Meredith Monk (1942) and Anthony Braxton (1945). There will be weekly listening and reading assignments and at the end of each semester a project based on the work of one of the musicians studied.

Students should expect to spend approx. \$100 on course supplies and materials.

Survey of Sound Art

Subject Code

MHST

Course Number

425

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

Sound Art draws on many fields, among them: experimental music, experimental theater, installation, sculpture, architecture, and poetry, but what all sound art works have as their primary focus is the experience of sound and listening. Following an introduction to psychoacoustics and phenomenology, we will examine how sound art implicates the listening body through frequency, intensity and duration, and how sound can shape our sense of space and place.

This class will be a survey of works by a wide variety of artists throughout the 20th Century and into the present. It will also include cross-cultural examples of artistic practices that invoke deep listening-from archeo-acoustic excavations of oracle rooms in Malta to trance states induced by frequency-modulation in Bali and field-recordings from Chernobyl.

Primarily a lecture class, there will also be weekly listening sessions and journal writing requirements.

Students have the option to co-register for MTHY-306 / MTHY-506 The Experimenting Ear and MSCM-310 / MTHY-510 - ACOUSTICS: Applied Physics for Musicians and complete a cluster project for this course.

Credit Hours

Min Credit Hours:

2

Description

This class will explore a wide range of critical writing about popular music as well as various forms of underground or alternative music. We start with jazz criticism in the mid-20th Century, then proceed through various eras of rock and pop criticism, and then explore the critical discourses around hip hop, electronic dance music, and internet microgenres of the 21st Century. Although the greater part of the focus will be on journalistic writing, we'll take on the ideas of scholars, sociologists, and philosophers. And we'll look also at fan discourses, the sorts of non-professional but passionate and deeply personal writing about music that flourishes in blogs, on message boards, and in other online spaces.

Alongside tracing the evolution of ideas and arguments about music - its value, purpose, social function, private pleasures, role in identity formation, etc - we'll also be exploring writing from the standpoint of style and the pure entertainment value of reading. There will be a practical element to the course, with the skills and techniques involved in journalistic and critical writing discussed, and guidance offered to those who are interested in pursuing music criticism as a career.

The fundamental objective of the class is to explore all the ways in which critical writing expands our understanding of music - the roles it plays in our lives, the motivations of musicians, how music genres evolve and mutate, etc - and enriches our enjoyment. But the class is also intended to be a celebration of great writing and deep thinking as a worthwhile and rewarding pursuit for writer and reader alike.

Description

Besides Charles Ives, Arnold Schoenberg and Igor Stravinsky, the French-American composer Edgard Varese(1883-1965) was certainly the most radical and influential founding father of 20th century Western music. He established a method for a conceptual atonal pitch organization within the tone system of 12-tone Equal Temperament which served as a powerful alternative to Schoenberg's dodecaphonic serialism, and with his keen focus on the 'Liberation of Sound' (projecting its corporeality and fully embracing noise), he opened great new doors for composers as different as Iannis Xenakis, Morton Feldman, or James Tenney and indeed for all of us! The course will combine biography, music theory, analysis, score study, guided listening and aesthetic discussion in order to yield an overview of Edgard Varese's life, work and historical influence and an appreciation of his revolutionary thinking, his new musical concepts and compositional methods and of the contemporary relevance of his heritage even for our music making today and in the future.

Description

The study of the contemplative arts, as they relate to the creation of musical experiences and musical compositions, will be investigated by actively privileging the concept of compassion and its manifestations, and by the routine practice of mindfulness. Students will become familiar with seminal works of music written by composers who have integrated specific spiritual disciplines into their creative lives, and with esoteric spiritual leaders (such as Gurdjieff, Steiner, Krisnamurti, Rudhyar) who have actively engaged in or written about the art of musical creation and performance. Further readings are designed to focus on recent investigations centering on neuroplasticity, as they explore relationships between neuroscience and religion and the implications of brain-mind science for contemplative practices and compassionate behavior (Bulkeley, Schwartz). These explorations will culminate in a public performance of individual compositions included in the syllabus, and of new original works.

Throughout the first half of the past century, Igor Stravinsky (1882-1971) impacted the contemporary music scene like a startling super-brilliant meteor. The course will combine biography, music theory, analysis, score study, guided listening and aesthetic discussion in order to yield an overview of Stravinsky's life, work and historical influence and an appreciation

of his ingenious sense of timbre, harmony and rhythm and of the fascinating precision and virtuosity of his compositional craft, as well as of his most original transformational methods for energizing his music by drawing upon the authenticity and power of highly esteemed roots and influences (like the Russian folklore, early Jazz, beloved Pergolesi, or Arnold Schoenberg's 12-tone-method).

Description

During the first part of the past century, Arnold Schoenberg (1874-1951) revolutionized the contemporary music scene more profoundly than anyone else. With his independent, courageous and radical set of mind and with his extraordinary ability to understand and carry out the historic mission suggested by the musical material itself, he expanded the harmonic language far beyond the borders of tonality, pioneering free atonality and the 'emancipation of dissonance' in his music written during the first two decades of the 20th century, before introducing the new technique of dodecaphonic serialism (his 'method of composing with twelve tones which are related only with one another') during the early 1920s. The course will combine biography, music theory, analysis, score study, guided listening and aesthetic discussion in order to yield an overview of Schoenberg's life, work and historical influence and an appreciation of his supreme compositional metier and creative imagination, his intimate knowledge of the Classical masters and the Romantic tradition, and of the unique profundity of his thought. In discussing his 12-tone-method, we shall see that this surprising and controversial innovation was actually just a radical continuation of the inherited principle of 'developing variation', while at the same time constituting as it were the vertex or 'historical fulfillment' of the present tone system of 12-tone Equal Temperament.

Description

Pursuing the heritage of his mentor Edgard Varese with an infinite minimalist focus on the quality of sound, just how it floats, and with a unique sense of musical orchestration, Morton Feldman(1926-1987) introduced the quiet longing of Franz Schubert into 20th century American music. Talking about Karlheinz Stockhausen in his seminar lectures and anecdotes 'The Future of Local Music', he said in 1984, 'He wanted time measured out, and I wanted time felt, a more subjective feeling of time, you see.' 'Maybe it's because I'm Jewish; . In other words I'm not creating music, it's already there. . So, if I have a secret: don't push the sounds around.' These quotes were first published by the most original and independent German composer Walter Zimmermann (*1949) in a substantial book he compiled and edited to celebrate Morty's 60th birthday. Creating a sense of orientation early on in his career, Walter Zimmermann had traveled through the United States and published his first book in the mid 1970s ('Desert Plants: Conversations with 23 American Musicians'). Inspired by his love for John Cage, Morton Feldman and the American experimental music tradition, as well as for various genres of world music and for his own Franconian local heritage, he explored, among other things, the beauty of repositioned authentic folklore and of microtonal just intonation more than thirty years ago in his unique and compelling conceptual music. The course will combine biography, music theory, analysis, score study, guided listening and aesthetic discussion in order to yield an overview of Morton Feldman's and Walter Zimmermann's life, work and historical influence, as well as an appreciation of what we can learn from them for our own creative work today.

MHST472 - John Cage: Music and Thought

General

Course Long Title

John Cage: Music and Thought

Subject Code	Course Number
MHST	472

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This is class is designed as a critical inquiry into the aesthetic, theoretical and political implications of John Cage's music. In addition to sustained encounters with several of Cage's significant pieces it will look at the implications of those works in the artist products of others. There is a philosophy behind Cage's work and we will attempt to trace some of its lineage: from Thoreau and Sellars, through Kant, to Bergson, Jankélévitch, Derrida, Deleuze and Meillassoux.

Course Long Title
Cage, Sun Ra, Musique Concrete, Noise

Subject Code	Course Number
MHST	473

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

As a parallel to the emergence of the American Experimental Tradition, and its "uprising" in the music of Cage and following, we will study the revolutionary works of Sun Ra (growing from and away from jazz) and the founding of Musique Concrete in France. The second part of the class will look at the simultaneous explosion of "noise" in the waves of recordings originating from points spread out over the globe (what Michael Denning has called a "noise uprising"). Together these four points of contact (Cage, Sun Ra, Musique Concrete, and the edges of a world popular music) allow for the fanning out and diversity of experimental music from the second half of the 20th century to today.

Music reading skill is not necessary, but some familiarity with experimental music would be useful.

Music of Karlheinz Stockhausen

Subject Code	Course Number
MHST	474

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Karlheinz Stockhausen is a composer who, especially in the 1950s and 60s, seemed to have re-defined the understanding of what music is about with each of his compositions. His theoretical writings and lectures are as legendary as his music. In the tradition of European art music, which claimed philosophical status and was considered a progressive field of intense aesthetic discourse, Stockhausen was, together with Pierre Boulez and Luigi Nono, the most prominent representative of the young post-war generation, rebelling in Darmstadt against paradigms of expression and entertainment. Music had to be about something; each composition addressed an aesthetic problem.

The course is designed for all instrumentalists and composers - as well as other artists at CalArts who can read music - who have a particular interest in contemporary classical music with a focus on early electronic music, serialism, musical form, and aesthetic theory.

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Ecomusicalities

This course is an introduction to ecologically oriented music, sound art, and the study of ecomusicology in the context of the contemporary environmental crisis. Ecology is conceived broadly as relational understandings of human and non-human worlds, including considerations of the sublime beauty of Nature and the wisdom of traditional ecological knowledges (TEK), but also of knowledge produced by pollution, sacrifice zones, nuclear culture, and states of toxic sovereignty. What do commitments to environmental justice and climate movements entail for music and sound? How do philosophical notions of sentience and juridical notions of legal rights of natural entities like rivers and glaciers, affect the way we listen to and produce sound and music? What do reconsiderations of the relation of nature and culture prompted by discourses about the anthropocene change the foundational ideas of the production of music and sound?

We will address these questions in theory and practice, surveying works by artists like Annea Lockwood, David Dunn, Sun Ra, Jacob Kirkegard, John and Alice Coltrane, Bill Fontana, Pauline Oliveros, Hildegard Westerkamp, Marvin Gaye, Forsensic Architecture, Olafur Eliasson, Suzanne Kite, the Sparks, Crass, Napalm Death, Savage Family, Childish Gambino, Esperanza Spalding, Leah Barclay, Maryanne Amacher, Megan Thee Stallion, the Weathermakers, Danielle Baquet-Long, Celer, Raven Chacon, William Basinski, Hildur Gudnadottir, Johann Johannson, John Akomfrah, James Acord, Roni Horn, Peter Cusack, Lawrence Abu Hamdan and many others. The second part of the course will be devoted to generating new works and methods of ecological music and sound making.

The Semiotics of Queerness in Music

Subject Code	Course Number
MHST	498J

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This course explores the intersection of popular and dance music with queerness, examining how the meanings of queer identities are conveyed through music and music videos. Over the past 40 years, popular and dance music have been shaped by and have shaped queer culture. Through the analysis of

diverse musical styles, this course will focus on how music has been used to express and negotiate queer identities and experiences.

The course will begin by introducing students to the concept of semiotics, the study of signs and symbols and how they are used to communicate meaning. Students will then explore how musical elements such as lyrics, melody, rhythm, harmony, instrumentation, and production techniques are used to convey meaning and, more specifically, queer interpretations of meaning. The course will also examine how music videos, fashion, and performance are used to express and perform queerness in popular and dance music.

Through listening, discussion, and analysis, students will explore a variety of popular and dance music genres, including disco, new wave, punk, hip hop, R&B, house, techno, pop, and more. The course will highlight key artists who have used their music and performance to challenge heteronormative assumptions and to celebrate queer identities, including Sylvester, Madonna, Prince, Azaelia Banks, RuPaul, Lady Gaga, Beyoncé, Janelle Monáe, and others.

This course aims to deepen students' understanding of the complex and diverse ways that popular and dance music have been used to express and perform queerness since the 1980s. Students will develop critical listening, analysis, and writing skills, as well as an appreciation for the rich history and cultural significance of queer pop and dance music.

MHST498K - Disco:Emancipatory Dancefloors 1970-1990

Credit Hours

Min Credit Hours:
2

Description

The emergence of contemporary DJ-led dance music in the 1970's provoked a transformational way of experiencing music and the body. For many people who existed on the margins of society, these dance floors represented an open, deterritorialized, liberatory space where multiple bodies could engage in new forms of expression, ecstatic release and solidarity through a shared experience of the world through sound.

This course will look at Disco heterotopias from 1970-1990, defined by Michel Foucault as cultural, institutional and discursive spaces that are somehow 'other': disturbing, intense, incompatible, contradictory or transforming.

We will follow the birth of the underground discotheque in the early 1970s (when same-sex partner dancing was illegal in the United States); through an exploration of the music, politics and social practices of the downtown club scene in mid-70s New York City; middle America's racist and homophobic "Disco Sucks" backlash; Disco's evolution in the 1980's (which continued to be led by Black and Queer artists) into New York Electro, Chicago House and Detroit Techno; followed by countless global manifestations (from Belgian Electronic Body Music to Charanjit Singh's Ten Ragas to a Disco Beat) and culminating in the explosion of post-geographic dance music and Rave culture by the late 1980's (with its own attendant backlash, exemplified by the UK government's curtailment of public gatherings where the "music includes sounds wholly or predominantly characterized by the emission of a succession of repetitive beats.")

We will conclude with a look at the political and social role that the communal space of the dancefloor can play in our increasingly non-physical and highly-individualized digitized world. What does it mean to gather in a space with other physical bodies united by sound? Can these experiences bring about the kind of collective joy or collective agency that fail to materialize in the online world fostered by social media?

Description
Black Temporalities and Black Time: To fully engage with Black music we must understand Black time. We do this work together. In 'Black Temporalities & Black Time' we will explore non-linear storytelling and the elasticity of (un)time through the framework of Terence Nance's Random Acts of Flyness. The course will also be in dialogue with creators from Sun Ra to Solange to Moor Mother to Alice Coltrane and Flying Lotus. We will center the plentitude of artists that are pivotal in using time itself as an instrument. We will analyze film, music, and essays to find a fluid understanding as well as identify the key distinctions between Afrofuturism and Afropresentism. We will spend time meditating on different vignettes of Black life and analyze the ways Black artists use and tune our antennae to code-switch and channel ancestral data. We will also be engaging with texts such as Dilla Time by Dan Charnas, Black Space on the Poetics of an Afro Future by Anaïs Duplan, and Black Utopias by Jayna Brown. There's a quote from the Black Quantum Futurism Collective: "Nothing ever becomes real until it is experienced." Time is not real until it is experienced. This course is an invitation to dive into the Black (W)Hole of it all.

2

Description

This course will examine a variety of musical styles from Latin America, and at the same time analyze the political and historical context in which the music developed. The focus will be on the music of the Caribbean and Central America and South America from traditional practices to urban production.

This course aims to intertwine the artistic and the political currents of Latin America in order to explore the ways in which historical events-such as colonialism, migration, globalization, and political upheavals-have affected music, and how music in turn has affected political and social events.

It will analyze how the increasing speed of technology has impacted the music of the region, and how syncretism takes place within each country, as well as regionally and in the world at large.

Description

This is a survey course introducing the music cultures of North America; focusing on an interdisciplinary approach to view the history, social institutions, culture, literature, arts, and relationships of North American Indigenous peoples and their sonic practices. This course will treat the practice of listening as an integral research practice in the study and understanding of Indigenous music and sonic practice. The aim of this course is to provide students with the listening tools necessary to hear and understand Indigenous sonic practices as a continuum of ethnomusicological and contemporary sonic practices. The outcomes of this course will be a Research-Creation project, which includes a creative component (of any medium) and an accompanying written contextualization, engaging with Indigenous sonic theories and their contexts in non-appropriative ways. Students will be

required to bring questions to each class discussion and turn in 5 written listening responses. While this course is not about the basics of Indigenous culture, it will provide students with terminologies and background knowledge in order to approach the material in a respectful and academic manner.

Course Long Title
Survey of Sound Art

Subject Code Course Number
MHST 525

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Sound Art draws on many fields, among them: experimental music, experimental theater, installation, sculpture, architecture, and poetry, but what all sound art works have as their primary focus is the experience of sound and listening. Following an introduction to psychoacoustics and phenomenology, we will examine how sound art implicates the listening body through frequency, intensity and duration, and how sound can shape our sense of space and place.

This class will be a survey of works by a wide variety of artists throughout the 20th Century and into the present. It will also include cross-cultural examples of artistic practices that invoke deep listening-from archeo-acoustic excavations of oracle rooms in Malta to trance states induced by frequency-modulation in Bali and field-recordings from Chernobyl.

Primarily a lecture class, there will also be weekly listening sessions and journal writing requirements.

Students have the option to co-register for MTHY-306 / MTHY-506 The Experimenting Ear and MSCM-310 / MTHY-510 - ACOUSTICS: Applied Physics for Musicians and complete a cluster project for this course.

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

2

Description

Since the 1960s, pop music has been a zone in which experimental, avant-garde impulses have coexisted with commercial and hedonistic imperatives. In this course, we will look at artists who have imported ideas and techniques from the music academy or from visual arts schools into song-based, danceable entertainment aimed principally at young people. But we'll also be exploring the experimentalism already embedded within mainstream pop itself - the use and abuse of new technology to create startling sounds that are genuinely radical but also work on another level as gimmicks that make a record stand out on the radio and the dancefloor.

These mixed motives - stretching the boundaries of sound versus commercialism, inventing the future versus beating the competition - point to a vital impurity intrinsic to pop. As well as iconic figures of art-into-pop like the Beatles or David Bowie, this semester we'll be paying particular attention to "street" genres such as trap, grime, Jamaican styles from dub to dancehall, and so forth - scenes and styles that don't necessarily use artworld discourse to describe their process but share the same drive to create disruptive sounds, use technology "incorrectly", incorporate improvisation and error into the creative process. Who gets to call themselves "experimental" and how does that affect the framing and reception of their music?

Although the primary focus of the course is on sonic innovation, pop is inherently an audio-visual form - even an audio-visual-textual form, given the importance of lyrics, as well as public statements and artistic rationales. Experimental impulses rarely limit themselves to music alone but manifest in promo videos and visual albums, record artwork, performance, style and costume, even marketing. Can there be such thing as an experimental or innovative pop personality? Fame and publicity can be a medium for artistic expression and provocation, as the careers of David Bowie, Prince, and Lady Gaga illustrate.

Description

This second module of the two-semester Studies in Experimental Pop course might be better titled Studies in Experimental Rock. The focus shifts away from the mainstream of the pop charts and radio, towards the alternative and underground; there is less focus on the dancefloor and more emphasis on electric guitars as the starting point for experimentation. Starting with the spirit of drift and discovery that emerged from the late Sixties psychedelic moment and developed in the Seventies, we then look at Brian Eno career as artist, producer and collaborator; the German cosmic music scene of the 1970s and its turn towards the electronic in the later part of the decade; Japan's mutations of Western sounds across several decades; how art school ideas filtered into postpunk and No Wave music; late Eighties and early '90s neo-psychedelic rock and the birth of the blurry, texturally saturated aesthetic of shoegaze; the controversial but fertile concept of post-rock in the '90s and 2000s, which filtered into the mainstream through Radiohead; industrial music and its unexpected echoes in conceptual queer electronic music of the 2010s; and various developments in "post-indie" music of the 21st Century, including hauntology, chillwave and vaporwave.

Description

Topics in Vocal Literature: The[R]Evolution of Solo Vocal Literature through the lens of the song cycle

This course will focus on the evolution of vocal music through the lens of the song cycle and its

offspring over the past few centuries up to the present, primarily in Western Europe and the United States. This course will not be approached as a survey, but rather will examine certain important works, topics and developments in-depth. Circumstances giving rise to this genre and its evolution will be examined, as will representative composers and performers and their unique styles. Works will be examined within their specific historical situations, considering economic, political, class, gender, social, educational, philosophical, literary and other conditions. The idea of the song cycle and how it has evolved, and its probable connection/relation to pop/rock concept albums also will be explored. Course work will include extensive listening and reading; analysis of features common to music within a certain period and to the composers who wrote within this genre; research into areas outside of music that had a direct influence on its development, and individual and group creative projects. The class also will engage in discussions about what it means to perform historical music today.

Description

This discussion based seminar will present a survey of historical and contemporary musical idioms in which com-posers, producers, and sound designers associated with the fields of hip hop, jazz and contemporary R&B have consciously and actively developed strategies for experimentalism in the rhythmic, melodic, harmonic, and timbral composition of their work. Kendrick Lamar, Thundercat, Meshell Ndegeocello, JLin, Craig Taborn, JDilla, and Steve Coleman are among the artists whose work will be covered. The goal of this course is to collectively move, via directed reading, listening and discussion, toward the development of new and interdisciplinary perspectives on the nature of experimentalism in African American music that no longer adheres to standard taxonomies of high and low culture.

MHST601 - Improvisation: Uses & Lineage

Description

Improvisation: Uses and Cross-Cultural Lineage

This class will explore the nature of improvisation in all its forms-Indian music, flamenco, baroque, organ music, rock, jazz, contemporary, and "free" music. The class integrates material from a wide variety of sources and the visual & performing arts, natural & social sciences, Eastern & Western spiritual traditions.

MHST605 - Focus Rock: Extreme Metal

Description

Death, Black, Doom and Experimental Metal will be the focus of this class. We will do in-depth analysis of selected pieces (harmony, melody, rhythm, form, sound, lyrics) and research the influence of contemporary classical and experimental music on metal as well as its position within the history of rock music. Furthermore, we will discuss the socio-political and philosophical aspects behind metal and the culture surrounding it.

Description

Focus Rock: Art Music & Rock - An unwritten history of cross-pollination

Music is: organized sound - timbre and rhythm. This quote by Edgar Varese not only applies to (most) so-called new music (20th and 21st century classical contemporary music), but also to most rock music and related genres. This class will thoroughly research this statement and will look at the little discussed influences of new music on rock Ì and vice versa - from the Velvet Underground and LaMonte Young, psychedelica and minimalism, Zappa and Varese, to prepared piano and prepared guitars, guitar orchestras, just intonation, no wave, metal, musique concrete, tape music, noise, the studio as instrument, and more. This class not only surveys these influences and cross-pollinations, but also includes musical analysis, discussion of the problem of transcriptions of rock music for classical performers, and other aspects. Students will be expected to create their own works or write a paper.

Description

Make a joyful noise: the development and importance of noise elements in popular and experimental music of the 20th and 21st century. Noise has always been a part of music, if desired or not. But over time noise elements stopped being just an add-on and became the center focus of many new styles. This class will follow the development of noise throughout the 20th century into the 21st. We begin in the early 20th century with the Italian Futurists and follow the

development through the decades looking at emerging noise elements in 20th century avant-garde music, rock, pop and electronic music. A strong focus will be on late-20th/early 21st century styles like Industrial Music, Japan Noise, and Electronica, which fully embrace noise and make it their main artistic creative element.

MHST608 - Focus Rock: Post-Punk

General

Course Long Title
Focus Rock: Post-Punk

Subject Code	Course Number
MHST	608

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Post-Punk is another one of these music historical terms that were, of course, applied backwards.

It is not really sure what it means, especially because it starts around the same time as punk (1977).

Does it include or exclude simultaneous styles such as industrial and no wave? In general post-punk -and that's how we will understand it in this class- are styles (! plural) that share some of the aesthetic of punk and the DIY approach, but are not punk, and evolved around the same time from late-70s to mid-80s in relationship to punk. This includes industrial, no wave, new wave, various revivals (punkabilly, ska) and mutations (mutant disco, free funk, post-blues) as well as some art music.

All these styles originated as opposition to cooperate 70s rock, complex and bombast prog-rock,

and at the same time are looking forward (No Future !?) as well as backwards to archaic rock music.

But not only rock music, also the avant-garde influenced post-punk strongly: from free jazz, free improvisation, contemporary art music, and German krautrock to -yes, entering through the back door- prog-rock. But post-punk in general can be seen as the emancipation of rock from blues. So far, even the most artistic prog-rock, still had strong influences and traces of blues, if it was chord changes, scales or inflections in guitar solos. Post-Punk for a large part gave up on chord changes all together and fully embraced

dissonances and sounds as basic elements, resulting in a variety of new approaches and forms. Most post-punk riffs are free of blue notes or inflections.

This class looks at the most creative time in rock music after the 60s and will show how between 1977-1985 the grammar of rock music has been rewritten, influencing nearly everything that is being played today.

MHST609 - Focus Rock: Electronica

Description

Focus Rock: Electronica - Body Electric -
Electronic Pop and Dance Music

This class looks at the development of electronic popular music from its early days to its conquest of the international dance floors, creating the international rave community, and follows it further into abstractions such as glitch-electronica, the combination of experimental and post-techno electronica. The development will be traced from pioneering academic electronic music through early electronic use in popular music such as psychedelic, prog-rock, krautrock, ambient, and synth-pop into all-electronic euro-disco, EBM, EDM, IDM, house, techno, drum n bass, glitch electronica and noise. Besides historic, social and politic aspects, the class focuses strongly on musical analysis of the discussed styles.

Course Long Title

The Elastic Voice

Subject Code	Course Number
MHST	610

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

"Voice is the original instrument." So says Joan La Barbara, the doyenne of extended vocal technique. This course explores the extraordinary panoply of purposes to which the human voice has been deployed. While the focus is on popular music genres of the past half-century, the course is limned with an awareness of parallels and precursors across 20th century avant-garde music, jazz, and musics from outside Western traditions. Diverse forms of vocal expression are under consideration, but there'll be a bias towards the experimental, the extreme, and the excessive - a journey that will take us from the beautifully harrowing screams of Yoko Ono and Diamanda Galas, through the aerobatic feats of Tim Buckley and Robert Wyatt, the rhythmic inventions of Bobby McFerrin and human beatboxers like Rahzel.

We'll look at spectacular vocalists like Freddie Mercury and Klaus Nomi and at eccentric singers like Mary Margaret O'Hara and Elisabeth Fraser. Conversely, we'll also dedicate some time to "non-singers", artists who use the voice rhythmically or in a recitative fashion: rappers from Rakim to Lil Wayne, reggae modes like DJ talkover, toasting, and "fast chat" as practiced by performers like U Roy, Big Youth, Eek-a-Mouse, and Smiley Culture, the MC tradition in UK rave and pirate radio from jungle to grime, and a lineage of postpunk speak-sing artists from Mark E. Smith and John Cooper Clarke to Sleaford Mods and Dry Cleaning.

As the course unfolds, the interface between the human voice and technology will become increasingly central, starting with devices like vocoder and talk box (Roger Troutman, Kraftwerk), then moving into the era of sampling cut-ups and "vocal science" (The Art of Noise, Todd Edwards, Daft Punk, Burial) and Auto-Tune (Future, Playboi Carti). We'll be reckoning with the lineage of artists who've used found vocals as raw material for collage or reprocessing (Holger Czukay, Brian Eno & David Byrne, Boards of Canada). Towards the end of the semester, we'll engage with the last decade of conceptual electronic music, where the voice has emerged as the privileged locus for experimentation, with female artists like Holly Herndon, Katy Gately, and Stine Janvin leading the way. Among the most interesting developments in this realm is the creation of fully artificial voices by producers like Amnesia Scanner and Oneohtronix Point Never, although in some ways this is just left-field electronica catching up with the 'vocaloids' trend in Japanese pop.

While spending plenty of time on the technical or technological aspects of all this vocal mutation and manipulation, we will never lose sight of the artistic and communicative purposes to which all this experimentation is applied: what the artist is trying to say or create, and how different

notions about the role and status of the human voice that prevail within various music micro-cultures frames the reception and listener experience of these divergent vocal modes. The goal of the course is to deepen both our understanding of and our awe at the limitless stretchiness of the human voice. We will confront the paradoxes of singing: the way that ethereal, unearthly, immaterial-seeming sounds are produced from the physical interior of the human body through intense exertion and discipline (whether trained or self-taught). We'll also explore how digital culture has dematerialized the voice (along with everything else), turning carnal sounds into disincarnate data that's susceptible to remodeling and restructuring using pitch-correction and vocal design technology like Auto-Tune, Melodyne and Harmony Engine, to the point where a vocal can be reassigned completely different emotions. Terminally elasticated, the voice has become pure posthuman Play-Doh.

MHST612 - What Is a Song?

General

Course Long Title

What Is a Song?

Subject Code	Course Number
MHST	612

School(s)
School of Music

Academic Level

Description

Experimental Music of the post-Cage Generation

This class will deal with the explosion of experimental music in the mid-20th century to the 1990s. Experimental music will be explored as more a method or set of approaches to creating music than as a genre. We will, over the course of two semesters, look at music by people born between 1926 and 1945, and try to follow trajectories in that incredibly wide-ranging repertoire. A tentative list of musicians covered (in one to two week units) will be: Morton Feldman (1926), Ben Johnston (1926), Cecil Taylor (1929), Robert Ashley (1930), Ornette Coleman (1930), Pauline Oliveros (1930), Alvin Lucier (1931), Eliane Radigue (1932), James Tenney (1934), Christian Wolff (1934), Alice Coltrane (1937), Art Ensemble of Chicago (Joseph Jarman (1937), Roscoe Mitchell (1940)), Maryanne Amacher (1938), Annea Lockwood (1939), Julius Eastman (1940), Keith Rowe (1940), Wadada Leo Smith (1941), George Clinton (1941), Meredith Monk (1942) and Anthony Braxton (1945). There will be weekly listening and reading assignments and at the end of each semester a project based on the work of one of the musicians studied.

Students should expect to spend approx. \$100 on course supplies and materials.

MHST625 - Extended Duration in Music

General

Course Long Title
Extended Duration in Music

Subject Code Course Number
MHST 625

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

This course investigates the relationship between live music performance of extended duration and sound-oriented installation art. Taking Erik Satie's "Vexations" (1893) and "Musique d'Ameublement" (1920) as points of departure, we will analyze 1950s and 60s Happening, Fluxus, and Conceptual Art pieces as in regards to the time structures they establish. This shall help to understand the milieu in which the first sound installations by Maryanne Amacher and Max Neuhaus were perceived (1967). Focusing on the listener's perspective and the aesthetic implications of a revised (or abandoned) work concept, we will try to reconstruct the scandal that these early examples of sound installation art posed for audiences both from the music and the art world. Finally, the course addresses more recent examples of conceptual music and sound installation art that transcends the notion of a perceiver who can actually experience the piece in its full temporal expansion.

Open to graduate students from all schools and programs who are comfortable reading music and reading and writing theory.

MHST630 - Audio-Visual Theory & Practice

General

Course Long Title
Audio-Visual Theory & Practice

Subject Code Course Number
MHST 630

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

This course explores the synesthetic potential of music and the moving image as it manifests itself throughout audio-visual practice: music video, film scoring, audio-visual performance and installation.

We'll begin with Michel Chion's seminal text Audio-Vision: Sound on Screen to explore how concepts such as acousmatic sound, synchresis, rendering, empathy/anempathy, temporalization, and added value enhance our understanding of how sound and the moving image interact, both in collaboration and opposition to one another. We'll continue with Carol Vernallis' Experiencing Music Video: Aesthetics and Cultural Context to explore the non-realist, non-narrative, nonsensical and musicalized nature of the moving image within music video.

Throughout the course, we will develop conceptual and practical strategies for manipulating sound and the moving image to create original works that explore this synesthetic potential to "see" music and "hear" the moving image. How can properties of sound and the moving image, such as tone/timbre, texture, noise, fidelity, rhythm, speed, repetition, and dynamics be manipulated and deployed correspondingly?

Basic practical workshops in video editing and post-production will enable us to develop audio-visual works that exist in a liminal space between music video and film score, where neither the music nor the moving image asserts complete authority, but where they interact and respond to each other in innovative and dynamic ways.

This course is intended for students in the Experimental Pop program, with the intention of developing their audio-visual practice towards the creation of both music videos and moving image accompaniment for live musical performances. However, anyone with prior skills in music production and an interest in expanding into audio-visual production is welcome.

Description
This class will explore a wide range of critical writing about popular music as well as various forms of underground or alternative music. We start with jazz criticism in the mid-20th Century, then proceed through various eras of rock and pop criticism, and then explore the critical discourses around hip hop, electronic dance music, and internet microgenres of the 21st Century. Although the greater part of the focus will be on journalistic writing, we'll take on the ideas of scholars, sociologists, and philosophers. And we'll look also at fan discourses, the sorts of non-professional but passionate and deeply personal writing about music that flourishes in blogs, on message boards, and in other online spaces.

Alongside tracing the evolution of ideas and arguments about music - its value, purpose, social function, private pleasures, role in identity formation, etc - we'll also be exploring writing from the standpoint of style and the pure entertainment value of reading. There will a practical element to the course, with the skills and techniques involved in journalistic and critical writing discussed, and guidance offered to those who are interested in pursuing music criticism as a career.

The fundamental objective of the class is to explore all the ways in which critical writing expands our understanding of music - the roles it plays in our lives, the motivations of musicians, how music genres evolve and mutate, etc - and enriches our enjoyment. But the class is also intended to be a celebration of great writing and deep thinking as a worthwhile and rewarding pursuit for writer and reader alike.

Description
From the moment that music became a recorded medium- a sonic event fixed in time and space- artists have sculpted musical sound into worlds that one can inhabit, wander through and linger in; imaginary landscapes that are unknown and even unknowable. This class will explore a range of artistic practices and concepts

that evoke the otherworldly, the eerie or the audiotopic; including psychogeography, the derive, and urban exploration; acousmatic field recording and ethnographic surrealism; outsider, psychedelic and hauntological pop music; cinematic spaces from Tarkovsky's Stalker to Sun Ra's Space is the Place; and Mark Fisher's notions of the weird as "something which does not belong" and the eerie as a crisis of presence ("something here where there should be nothing") or absence ("nothing here where there should be something"), We will look at how sound can not only establish territory, but can also be used to disrupt or "deterritorialize" existing boundaries, leading to the possibility of audiotopias-- liberatory sonic spaces that listeners inhabit for the duration of the record. This class will alternate lectures and listening sessions with practical workshops that use the recorded sonic event as autonomous musical material that can traverse the nexus of electronic and ethnographic sounds, evoke the eerie in the evacuated landscapes of dub and ambient music, and engage in trans-cultural collision in the 4th world. While working with strategies of defamiliarization, transmutation, collision and subliminal haunting to transport listeners to unfamiliar places, students will experiment with acoustic and synthesized sound design techniques that integrate field recordings with sonic mimesis, tape loops, reverb, and spatial effects. By the end, participants will have created original compositions that navigate the otherworldly, the eerie, and the post-geographic possibilities of sound.

Description

This course is an introductory survey to film music history and analysis. We will primarily focus on international and experimental cinema, but will likely draw on certain Hollywood or independent American filmmakers who don't quite fit the mold and whose use of music is particularly singular (e.g., David Lynch and Angelo Badalamenti). In this course you will learn how to hear how music operates within film, how sound design can operate on a similar level to score, how to hear "emotion" and "affect" within film score, as well as basic music theory concepts related to film score composition. I am passionate about this subject as cinema is an important medium that can define generations of viewers - no surprise given its potential to veer into the territory of propaganda. As creators we have a responsibility to be aware of the past and to understand how we can be trained by the media that we consume. Part of the power of film lies squarely in the music and sound - the emotion and atmosphere they instill are undeniably powerful tools!

Description

James Tenney was a pioneer in multiple areas of music, all of which remain domains of vigorous creative activity to the present day. These include plunderphonia, computer music, process form, spectral music and extended just-intonation. His theoretical writings addressing the perception of form, timbre and harmony have been similarly influential. Moreover, a remarkable cross-section of American experimental art in the 20th Century is provided by the ensemble of Tenney's teachers (Edgard

Varese, Carl Ruggles, John Cage, LeJaren Hiller), associates (Stan Brakhage, Carolee Schneemann, Harry Partch, Max Mathews, the Judson Group, Fluxus, Steve Reich, Philip Glass, Harold Budd, Conlon Nancarrow, Lou Harrison) and students (John Luther Adams, Michael Byron, Peter Garland, Charlemagne Palestine, Larry Polansky, Marc Sabat, Chiyoko Slavics, Catherine Lamb, Daniel Corral). This course provides a detailed analytical survey of Tenney's music and thought, with periodic excursions exploring the work in diverse media of his associates.

Description

Besides Charles Ives, Arnold Schoenberg and Igor Stravinsky, the French-American composer Edgard Varese(1883-1965) was certainly the most radical and influential founding father of 20th century Western music. He established a method for a conceptual atonal pitch organization within the tone system of 12-tone Equal Temperament which served as a powerful alternative to Schoenberg's dodecaphonic serialism, and with his keen focus on the 'Liberation of Sound' (projecting its corporeality and fully embracing noise), he opened great new doors for composers as different as Iannis Xenakis, Morton Feldman, or James Tenney and indeed for all of us! The course will combine biography, music theory, analysis, score study, guided listening and aesthetic discussion in order to yield an overview of Edgard Varese's life, work and historical influence and an appreciation of his revolutionary thinking, his new musical concepts and compositional methods and of the contemporary relevance of his heritage even for our music making today and in the future.

Focused Topics Course: The study of the contemplative arts, as they relate to the creation of musical experiences and musical compositions, will be investigated by actively privileging the concept of compassion and its manifestations, and by the routine practice of mindfulness. Students will become familiar with seminal works of music written by composers who have integrated specific spiritual disciplines into their creative lives, and with esoteric spiritual leaders (such as Gurdjieff, Steiner, Krisnamurti, Rudhyar) who have actively engaged in or written about the art of musical creation and performance. Further readings are designed to focus on recent investigations centering on neuroplasticity, as they explore relationships between neuroscience and religion and the implications of brain-mind science for contemplative practices and compassionate behavior (Bulkeley, Schwartz). These explorations

will culminate in a public performance of individual compositions included in the syllabus, and of new original works.

Description

During the first part of the past century, Arnold Schoenberg (1874-1951) revolutionized the contemporary music scene more profoundly than anyone else. With his independent, courageous and radical set of mind and with his extraordinary ability to understand and carry out the historic mission suggested by the musical material itself, he expanded the harmonic language far beyond the borders of tonality, pioneering free atonality and the 'emancipation of dissonance' in his music written during the first two decades of the 20th century, before introducing the new technique of dodecaphonic serialism (his 'method of composing with twelve tones which are related only with one another') during the early 1920s. The course will combine biography, music theory, analysis, score study, guided listening and aesthetic discussion in order to yield an overview of Schoenberg's life, work and historical influence and an appreciation of his supreme compositional metier and creative imagination, his intimate knowledge of the Classical masters and the Romantic tradition, and of the unique profundity of his thought. In discussing his 12-tone-method, we shall see that this surprising and controversial innovation was actually just a radical continuation of the inherited principle of 'developing variation', while at the same time constituting as it were the vertex or 'historical fulfillment' of the present tone system of 12-tone Equal Temperament.

Description

Pursuing the heritage of his mentor Edgard Varese with an infinite minimalist focus on the quality of sound, just how it floats, and with a unique sense of musical orchestration, Morton Feldman (1926-1987) introduced the quiet longing of Franz Schubert into 20th century American music. Talking about Karlheinz Stockhausen in his seminar lectures and anecdotes 'The Future of Local Music', he said in 1984, 'He wanted time measured out, and I wanted time felt, a more subjective feeling of time, you see.' 'Maybe it's because I'm Jewish; . In other words I'm not creating music, it's already there. . So, if I have a secret: don't push the sounds around.' These quotes were first published by the most original and independent German composer Walter Zimmermann (*1949) in a substantial book he compiled and edited to celebrate Morty's 60th birthday. Creating a sense of orientation early on in his career, Walter Zimmermann had traveled through the United States and published his first book in the mid 1970s ('Desert Plants: Conversations with 23 American Musicians'). Inspired by his love for John Cage, Morton Feldman and the American experimental music tradition, as well as for various genres of world music and for his own Franconian local heritage, he explored, among other things, the beauty of repositioned authentic folklore and of microtonal just intonation more than thirty years ago in his unique and compelling conceptual music. The course will combine biography, music theory, analysis, score study, guided listening and aesthetic discussion in order to yield an overview of Morton Feldman's and Walter Zimmermann's life, work and historical influence, as well as an appreciation of what we can learn from them for our own creative work today.

MHST672 - John Cage: Music and Thought

General

Course Long Title
John Cage: Music and Thought

Subject Code	Course Number
MHST	672

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

This class is designed as a critical inquiry into the aesthetic, theoretical and political implications of John Cage's music. In addition to sustained encounters with several of Cage's significant pieces it will look at the

implications of those works in the artist products of others. There is a philosophy behind Cage's work and we will attempt to trace some of its lineage: from Thoreau and Sellars, through Kant, to Bergson, Jankélévitch, Derrida, Deleuze and Meillassoux.

Cage, Sun Ra, Musique Concrete, Noise

Subject Code

MHST

Course Number

673

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

As a parallel to the emergence of the American Experimental Tradition, and its "uprising" in the music of Cage and following, we will study the revolutionary works of Sun Ra (growing from and away from jazz) and the founding of Musique Concrete in France. The second part of the class will look at the simultaneous explosion of "noise" in the waves of recordings originating from points spread out over the globe (what Michael Denning has called a "noise uprising"). Together these four points of contact (Cage, Sun Ra, Musique Concrete, and the edges of a world popular music) allow for the fanning out and diversity of experimental music from the second half of the 20th century to today.

Music reading skill is not necessary, but some familiarity with experimental music would be useful.

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

Karlheinz Stockhausen is a composer who, especially in the 1950s and 60s, seemed to have re-defined the understanding of what music is about with each of his compositions. His theoretical writings and lectures are as legendary as his music. In the tradition of European art music, which claimed philosophical status and was considered a progressive field of intense aesthetic discourse, Stockhausen was, together with Pierre Boulez and Luigi Nono, the most prominent representative of the young post-war generation, rebelling in Darmstadt against paradigms of expression and entertainment. Music had to be about something; each composition addressed an aesthetic problem.

The course is designed for all instrumentalists and composers - as well as other artists at CalArts who can read music - who have a particular interest in contemporary classical music with a focus on early electronic music, serialism, musical form, and aesthetic theory.

Min Credit Hours:

2

Description

Ecomusicalities

This course is an introduction to ecologically oriented music, sound art, and the study of ecomusicology in the context of the contemporary environmental crisis. Ecology is conceived broadly as relational understandings of human and non-human worlds, including considerations of the sublime beauty of Nature and the wisdom of traditional ecological knowledges (TEK), but also of knowledge produced by pollution, sacrifice zones, nuclear culture, and states of toxic sovereignty. What do commitments to environmental justice and climate movements entail for music and sound? How do philosophical notions of sentience and juridical notions of legal rights of natural entities like rivers and glaciers, affect the way we listen to and produce sound and music? What do reconsiderations of the relation of nature and culture prompted by discourses about the anthropocene change the foundational ideas of the production of music and sound?

We will address these questions in theory and practice, surveying works by artists like Annea Lockwood, David Dunn, Sun Ra, Jacob Kirkegard, John and Alice Coltrane, Bill Fontana, Pauline Oliveros, Hildegard Westerkamp, Marvin Gaye, Forsensic Architecture, Olafur Eliasson, Suzanne Kite, the Sparks, Crass, Napalm Death, Savage Family, Childish Gambino, Esperanza Spalding, Leah Barclay, Maryanne Amacher, Megan Thee Stallion, the Weathermakers, Danielle Baquet-Long, Celer, Raven Chacon, William Basinsiki, Hildur Gudnadottir, Johann Johansson, John Akomfrah, James Acord, Roni Horn, Peter Cusack, Lawrence Abu Hamdan and many others. The second part of the course will be devoted to generating new works and methods of ecological music and sound making.

The Semiotics of Queerness in Music

Subject Code	Course Number
MHST	698J

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

This course explores the intersection of popular and dance music with queerness, examining how the meanings of queer identities are conveyed through music and music videos. Over the past 40 years, popular and dance music have been shaped by and have shaped queer culture. Through the analysis of diverse musical styles, this course will focus on how music has been used to express and negotiate queer identities and experiences.

The course will begin by introducing students to the concept of semiotics, the study of signs and symbols and how they are used to communicate meaning. Students will then explore how musical elements such as lyrics, melody, rhythm, harmony, instrumentation, and production techniques are used to convey meaning and, more specifically, queer interpretations of meaning. The course will also examine how music videos, fashion, and performance are used to express and perform queerness in popular and dance music.

Through listening, discussion, and analysis, students will explore a variety of popular and dance music genres, including disco, new wave, punk, hip hop, R&B, house, techno, pop, and more. The course will highlight key artists who have used their music and performance to challenge heteronormative assumptions and to celebrate queer identities, including Sylvester, Madonna, Prince,

Azalia Banks, RuPaul, Lady Gaga, Beyoncé, Janelle Monáe, and others.

This course aims to deepen students' understanding of the complex and diverse ways that popular and dance music have been used to express and perform queerness since the 1980s. Students will develop critical listening, analysis, and writing skills, as well as an appreciation for the rich history and cultural significance of queer pop and dance music.

MHST698K - Disco:Emancipatory Dancefloors 1970-1990

GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

The emergence of contemporary DJ-led dance music in the 1970's provoked a transformational way of experiencing music and the body. For many people who existed on the margins of society, these dance floors represented an open, deterritorialized, liberatory space where multiple bodies could engage in new forms of expression, ecstatic release and solidarity through a shared experience of the world through sound.

This course will look at Disco heterotopias from 1970-1990, defined by Michel Foucault as cultural, institutional and discursive spaces that are somehow 'other': disturbing, intense, incompatible, contradictory or transforming.

We will follow the birth of the underground discotheque in the early 1970s (when same-sex partner dancing was illegal in the United States); through an exploration of the music, politics and social practices of the downtown club scene in mid-70s New York City; middle America's racist and homophobic "Disco Sucks" backlash; Disco's evolution in the 1980's (which continued to be led by Black and Queer artists) into New York Electro, Chicago House and Detroit Techno; followed by countless global manifestations (from Belgian Electronic Body Music to Charanjit Singh's Ten Ragas to a Disco Beat) and culminating in the explosion of post-geographic dance music and Rave culture by the late 1980's (with its own attendant backlash, exemplified by the UK government's curtailment of public gatherings where the "music includes sounds wholly or predominantly

characterized by the emission of a succession of repetitive beats.")

We will conclude with a look at the political and social role that the communal space of the dancefloor can play in our increasingly non-physical and highly-individualized digitized world. What does it mean to gather in a space with other physical bodies united by sound? Can these experiences bring about the kind of collective joy or collective agency that fail to materialize in the online world fostered by social media?

Description

Punk, metal, grunge, doom sludge, hardcore, grindcore, powerviolence, and all their glorious sub and sub-sub genres. I'll tell you about the specific genres I know about and love. I invite everyone to bring a playlist of songs to share. We're going to sit around and listen to each others' selections of heavy, fast (or slow), aggressive music on loud excellent speakers, hopefully in a dimly lit room. We will share our reactions, opinions, and whatever else we know about them including its history, political/social ideologies, DIY culture, etc. You can of course include your own music as well. If you don't have anything to share, that's fine. Anyone is welcome to listen and chat with us and I'll have you write something up as an alternative to bringing in music. If I can manage it, I'll bring in one of my bands to perform. I'll let you know if there's a good grind show happening during those 2 weeks (or whenever) and if you want to go I'll introduce you to our fiercely DIY LA Grindcore scene!

Description

The first in a new Winter Session series of hands-on music production courses, Channeling, where, each year, we will dive deeply into the work of a sonic practitioner, listen to their music and explore in the studio: how did they get those

sounds? 2024's artist will be Delia Derbyshire, the trail-blazing producer of electronic music, most well-known for her work with the BBC's Radiophonic Workshop and realization of the Dr. Who theme. We will start by listening to and appreciating works that she created from the 1960's through to the 1990's, from proto-techno experiments to her psychedelic musique concrte band, White Noise. We will examine how she generated and manipulated sounds using oscillators / signal generators, tape loops, sampling and tape manipulation. Students will explore these hands-on techniques in the Analog Mixing Studio, and the course will culminate in a creative sound design project to compose and record a theme song for a hypothetical science fiction program. Open to students from across the institute, the course will also include a crash course in analog signal chains and recording studio orientation.

Description

We need brave new words to birth a brand-new world. Hip-hop is turning 50 this year and it is clear that it is beyond music and is a unifying cultural vehicle. Hip-Hop is also an embodied practice. In Hip-Hop as a Verb, we will dive into the doing of Hip-Hop, connecting students from their dreams and ambitions into community actions and sharpening performance skills. Each participant in this course is preparing to be a part of a collaborative Hip Hop Festival that makes space and platforms for Hip-Hop artists at CalArts. Students who take the course should be prepared to fulfill some role, whether as a performance artist, creative director, poster designer or volunteer to help put on the event. Hip-Hop as a Verb will explore the process of making the medium of Hip-Hop: the first 4 meetings will cover recording, publishing, song to distribution, roll out, making merch, and all the steps in between. Students will be introduced to systems of reciprocity meant to subvert within an industry built on exploitation. The 5th and final meeting of the course will conclude with a performance at Leimert Park's KAOS Network, home of Project Blowed and where so many local legends have come through, from Open Mike Eagle and Kendrick Lamar to Dojacat. Hip-hop is not something that happens privately. You're not just nodding your head to a beat: it is a communal head nod, a collective "go ahead." You're agreeing with your body that this voice and this beat should be in existence. In the course, we will practice performance and everything needed up until the time we hit the stage. Driven by the students' questions, the course aims to answer "How does one hip-hop?": We verb.

Elijah McClain and Music

Subject Code Course Number
MITM 324K

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

Elijah McClain was a violinist murdered by Aurora police on the night of Aug 24, 2019. His name was repeated on the streets along with those of others recently killed by police -George Floyd, Breonna Taylor, Sandra Bland, and others - during the Black Lives Matter uprisings of 2020. Photographs emerged of McClain playing violin for kittens in an animal shelter and for patients in a hospital. And his last words, recorded by the body cam of one of the murdering officers, went viral, shocking and moving many people. Numerous "violin vigils" were held after his death, some of which were violently disrupted by police. "They unleashed him, and now he's touching the world," said his mother, Sheneen McClain. What is the meaning of Elijah McClain for violinists and for all other musicians? How does justice for Elijah impact music making? What music would Elijah McClain have made if his life had not been violently cut short? How does police murder affect music? What is the role of music and musicians in police and prison abolitionism?

MITM324L - Orchestration for concert stage and film

Course Long Title

Koto Sounds Into Your Art and Music

Subject Code	Course Number
MITM	324M

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

This course is a lecture and workshop and will explore the ways to integrate koto sounds into your art/music making. We will be exploring

How the koto works: possibilities and limitations/n Like any instrument, koto has its own physical reality that allows koto to do certain things and not other things. We will learn these realities so we can think about what it means to have koto sounds and the special and unique aspects of this instrument.

Koto notation systems and Western notation systems

Koto has its own notation system. There are reasons why we still use it. We compare it and Western notations and learn about the possibilities and limitations of each notation system as well as how we can utilize both systems./n3) Other ways to communicate with koto performers for your art-making. /n Using a notation system is only a way to communicate with performers about your ideas. We will explore other ways to communicate with performers for your art-making.

Classical koto music, Ghibli music, city pop, and other forms of music may be used as examples for this course

Learning Goals:

Students will be able to create a sketch of their artwork that includes koto sounds, discuss it, and have it played by a koto performer.

Credit Hours

Min Credit Hours:
0.5

Description

Modern life and society have retrained the perfect breath we were born to take. Each breath we take dictates the confidence, connection and effectiveness of the sound we emanate no matter if we sing or speak, in performance or in life. Connecting to the source and harnessing a free and connected breath - it empowers, emboldens, and energizes the self, the brain, the body, the voice, the artist and the art. This is a meditative and physically active course. Combining Kundalini yoga, Feldenkrais Technique, Dalcroze Eurhythmics, Martial Arts, Somatic Breath and Bodywork, Pilates and ending each class with a sound bath, students will elevate the heart rate and enter into a meditation where they focus on the breath and explore sensations. As the skills learned will build from session to session having an opportunity to deep dive into these sensations will be the most effective way to give students the opportunity to carry this practice outside of the classroom. Outside of class work will be required including a daily practice of the techniques introduced in each class.

This is an introductory course for students interested in learning Indian Classical vocal and instrumental Music. Students will learn the basics of Raag and Taal and be introduced to Swar Gram and Alankar so they may begin their individual practice.

MITM324S - Perfecting the Playlist

General

Course Long Title
Perfecting the Playlist

Subject Code	Course Number
MITM	324S

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description
The playlist has become a steady fixture in our lives, presented by professional DJs in clubs and on the radio around the world. In this short course we will explore what it means to "perfect the playlist" - how to approach pacing, harmonic mixing, and selection in a set. We will explore making genre-specific playlists (such as acid, house, or ambient), as well

as making eclectic, non-genre specific, "mood" based playlists (such as "Early AM Fog" or "Winter Clarity"). In taking this class students will hone their aesthetic listening skills, as well as music research (or "digging") skills. The playlist is a fertile ground for further compositional exploration - how one's own music might fit alongside the work of others, or how the dynamic flow or changing density of a playlist may inform composers' approach to their own work. Students will become better affective listeners, and better playlist makers, after taking this course. Course requirements - students need to have access to a laptop and DJ software like Rekordbox, Virtual DJ or Ableton Live. The course will primarily use Rekordbox and Ableton Live, and there may also be live demonstrations of CDJs.

MITM324T - Building Interactive Audiovisual System

General

Course Long Title
Building Interactive Audiovisual System

Subject Code	Course Number
MITM	324T

School(s)
School of Music

Academic Level

Description

All-Inclusive Music: A Multi-Pedagogical Journey of Composition & Improvisation

This class is aimed at examining non-traditional methods of music composition & approaches to improvisation that allow for individuals of any training or pedagogical background to access without necessarily diminishing one's artistic vision. We will examine the works of various living composers, ranging from graphic notation, to text scores & beyond. Students will have one

major assignment with class writings/discussions.
The ultimate goal of this class is to have each student's piece performed and documented in class.
The most important aspect of this class is that it is open to all and meant to be a place for analysis of sound that can be combined with compositional practices that allow for inclusivity.

MITM324Y - Development, Rehearsal and Performance

General

Course Long Title
Development, Rehearsal and Performance

Subject Code Course Number
MITM 324Y

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
The participants will form a chamber ensemble (5-10 musicians) with open instrumentation. Every member will play in the ensemble and contribute with one piece of their own for us to develop, rehearse and perform. This can be a fixed, notated score, an open score, guidelines for improvisation, a concept or a simple idea as starting point for a collaborative creation.

When preparing/writing the idea/score prior to Winter Session, have in mind that your piece should be suitable for (or adaptable to) our final instrumentation. As soon as we have an idea of who will be in the ensemble, you will be informed what instruments we have, so you can choose to adapt your piece to the specific group of instruments. Remember you can also choose to keep your piece open to interpretation and not arranged for specific instruments. Your idea/score should be prepared prior to Winter Session and be ready to bring to class for the group to work with during the first week of Winter Session.

Week 1 in A300
Tuesday through Friday 1/9-1/12 2-5pm:
During the first week we will develop and rehearse the pieces together as a group. Each member will get one rehearsal session for their piece. If they wish, they can lead and direct the ensemble, or they can decide to open it up for collaborative development.

Week 2 in ROD:
Thursday 1/18 1-5pm: Rehearsal and revision of all the pieces

Friday 1/19 3-6.30pm: Set up and dress rehearsal
5pm Performance in ROD open for the CalArts Community and livestream

Course Long Title
Subversion as Practice : DIY Design

Subject Code Course Number
MITM 324Z

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description
This course is open to all students interested in incorporating Sound as an element of their practice or project.
Students are encouraged to have personal or collaborative projects in mind prior to attending.

This is NOT a coding class. Computers are only necessary if you want to use digital tools. All methods of sound creation are encouraged.

I will provide information and assistance for getting started with the Electro-Smith Daisy Seed, however do not feel pressured to go down that road.
It is highly recommended that you show up the first day with some sort of realistic concept or idea, no matter how small.

We'll take plenty of time to brainstorm / conceptualize / critique throughout the stages of development.
Minds may change, groups may form etc...

Topics include:

- DIY practices / Creative Strategy (Subversion as Artistic Practice)
- Signal Flow / Electronics
- Amplification / Sonification
- Digital & Analog Sound Processing & Practices
- Materials
- Construction Methods & Practices
- Message / Medium
- Discreet Practices
- Realizing Concepts
- Tortoise Techniques (Prototyping)

Collaborative projects are highly encouraged, especially if you want to design a Multimedia work or require a lot of construction.

MITM325A - Music and Politics: When does it work?

General

Course Long Title

Music and Politics: When does it work?

Subject Code	Course Number
MITM	325A

School(s)
School of Music, School of Critical Studies

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

Can an analysis of musical techniques interact with an analysis of whether social and political goals are effectively communicated in a piece of music? When is music effective politically and when is it not? Can overt political goals compromise musical effectiveness? Can they strengthen musical effectiveness? How do exogenous goals effect Music Composition in different styles and genres?

In this course we will ask these questions and more as we examine political music from different genres including, pop, experimental concert music, opera, folk music, commercial music, and other styles.

Students will be encouraged to make their own explorations and discoveries, and they will be expected to form their own analytically supported opinions.

MITM325B - Working in Commercial Music

Course Long Title

Working in Commercial Music

Subject Code	Course Number
MITM	325B

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Introducing standard practices, expectations, and repertoire for students interested in performing commercial music in professional environments. This course seeks to prepare music students for life as professional musicians working within the Los Angeles area. Ensemble performances are at the core of this course, and will equip students with a fundamental understanding of the live music industry as it is today.

MITM325C - DIY Artist Toolkit

General

Course Long Title

DIY Artist Toolkit

Subject Code	Course Number
MITM	325C

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

While creating new work within a performer-composer-producer continuum, many contemporary musical artists also operate within a do-it-yourself, release-it-yourself milieu. This series of 5 workshops, based in the Experimental Pop program but open to musicians and artists from across the institute with an interest in DIY production and promotion techniques, will equip the DIY artist with skills and strategies to navigate the ever evolving/collapsing/reforming music industry. Sami Perez (independent musician, music producer, and director of Wiggle World recording studio) will offer workshops on booking shows and tours (routing, contracts, budgets, promoters and promotion, designing and selling your own merchandise); designing screen printed posters (from idea, to sketch, to Photoshop layout, to screenprint); and bringing your record from rough mix to release (including mix strategies and demystifying the mastering process). Def Sound (independent musician, poet, and Grammy-considered artist) will offer workshops in promotion and marketing (visual communication, social media, supporter networks and writing a compelling artist's bio) and "systems of reciprocity" (how to not get exploited in contracts or publishing deals).

MITM325D - Creating with Alexander Technique

General

Course Long Title
Creating with Alexander Technique

Subject Code Course Number
MITM 325D

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
Students will collaborate in small groups over the two weeks to create and workshop an original work (of any medium) that integrates and explores the Alexander Technique. The Alexander Technique is a mind-body unity work meant to help students understand how they respond to emotional and physical stimuli in their day to day life, and deepen their awareness of the habitual patterns that affect these responses. Throughout the course, students will be introduced to the three main principles of Alexander Technique (inhibition, direction, and awareness) and will be allowed to explore the hands-on side of the technique, which uses non-manipulative, physical touch to bring awareness and attention to a person's response to external stimuli. The course will culminate in a showcase of their original work. Students of all artistic practices will be welcomed. No prior experience with the Alexander Technique is necessary.

Credit Hours

Min Credit Hours:
0.5

Description
The 21st century protest movement has been the largest and most widespread in planetary history. Yet the movement has also been criticized for its failures and even for leading to the opposite of what it wanted- a massive shift to the right in global politics. How has music been involved? How can music learn from its blind spots, its failures, its vulnerability to capitalist and counterinsurgent capture? How can music support protest, resistance, revolution while at the same time providing resilience, steadfastness and deep caring? How can music be deployed to both "burn shit down" and to create the world we want to see?

325J

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

1

Description

Despite the rise in confessional poetry and contemporary memoir writing over the past 3-4 decades, experimental musicians are still largely encouraged to leave personal details about themselves and their lives out of their work, often in favor of more objective examinations of acoustics and the psychologies of sound and listening. How, then, might we start to think about representing ourselves more explicitly in our work? Furthermore, how do we give an account of ourselves without acquiescing to the dangers of neoliberal individualism? This course aims to use the tools of personal prose alongside practices of sampling, field recording, and other subjective approaches to soundmaking that re-center ourselves and our communities in our work. We will look at noteworthy historical examples in music and writing, and students will workshop their own autobiographical projects throughout the course.

Description

This is an ensemble exploring the notions of live performance sleep therapy music. Open to the institute, the course will move between lecture, practice, and performance and invites all sound making mediums to participate. The course will culminate in a live surround sound performance with an open invitation for

audience attendance. This course meets M/W, M/W/F with the open performance on Friday of the second week. All rehearsals are mandatory, and creative participation is required.

MITM325M - Biotech Art and Code: Patterns and Sound

General

Course Long Title

Biotech Art and Code: Patterns and Sound

Subject Code MITM Course Number 325M

School(s) School of Music

Academic Level UG - Undergraduate

Credit Hours

Min Credit Hours: 1

Description Biotech Art and Code: Patterns and Sound introduces students to the creative intersections of art, biotechnology, and generative algorithms, exploring how Cellular Automata and DNA coding can inspire new forms of artistic expression. In this project-research-based course, students will investigate concepts of growth, decay, and self-organization, working in a collaborative environment with faculty and visiting artists.

Using tools like TouchDesigner and Max/MSP, students will step into the field of creative coding, with no prior coding knowledge required. Pre-made code and accessible templates will support students as they develop an individual project inspired by the class's collective explorations. Through the incorporation of algorithmic methods, students will explore immersive sound design to complement their visual and conceptual work, adding a multi-sensory layer to the bio-inspired art they create.

Guided by influential works such as John Conway's Game of Life, Joe Davis's DNA Manifolds, Ira Fleming's Gene Music, and Daniel Shiffman's The Nature of Code, students will engage in a unique journey, merging biological and algorithmic principles to expand their creative horizons.

No prerequisites are required--just curiosity and an openness to explore how sound, life sciences, and code converge in art.

MITM325N - I have you covered

General

Course Long Title

I have you covered

Subject Code MITM Course Number 325N

School(s) School of Music

Academic Level UG - Undergraduate

Credit Hours

Min Credit Hours: 0.5

Description

The first portion of the course will focus on the why of performing a cover, focusing on how context, identity, and perspective can allow an artist to say something new with an existing composition. The bulk of the course will focus on the process of creating a cover song, by identifying the "musical DNA" of the song that should remain, while exploring strategies for breathing new life into a song, such as altering harmonic or melodic ideas, groove or rhythmic concepts, instrumentation and orchestration, lyrical content and emotional resonance, or production. There will be multiple opportunities for arranging partial covers throughout the two weeks, and the class will culminate with the performance or recording of a newly conceptualized cover song.

Let's Talk Titles

Subject Code Course Number
MITM 325S

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description
In this course students will examine, interpret, and create titles for artistic works. After surveying titles over multiple artistic disciplines, including music, dance, visual arts, theater, film, fiction and non-fiction literature, poetry, and other forms, students will individually and in group workshops, create titles for works in their discipline as well as other disciplines. Readings will include artists' insights into their titlemaking process, writings exploring concepts and themes, and critiques and analysis of artworks. Discussions will include interpretations of titles and how they can shift meaning and perception of the underlying artwork and also create public interest in the piece. By the end of the course, students should feel more comfortable with creating titles for their own projects.

MITM325T - Dance and Music Improvisation

General

Course Long Title
Dance and Music Improvisation

Subject Code Course Number
MITM 325T

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description
In this course students will explore improvisation through movement and sound. Drawing from the styles of prominent experimentalists such as Pauline Oliveros, Roscoe Mitchell, Sarah Hennies, Simone Forti, Yvonne Rainer, and Merce Cunningham, improvisational environments will be developed that encourage idiosyncrasy, immediacy, and newness. As a new piece is improvised in the moment and the group grows into its own unique ensemble, the relationship between sound, movement, and space will be explored spontaneously. This course is open to the institution.

School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

Are you an aspiring director who is passionate about crafting the perfect soundtrack for your film or video game, but are unsure of how to communicate your creative vision to a composer? Or perhaps a composer looking to write music for the big screen? This is the course for you! Film scoring is more than just composing music - it's about working as a team. In this course, students from different departments will learn how to effectively communicate and collaborate with each other (composers directors, editors, sound designers, and animators and anyone else in the filmmaking world) to create music that enhances the narrative and emotional impact of a film. Through analyzing existing film music, having lively discussions with one another, and doing activities in the classroom that simulate real-world conversations between the film and music departments, students will explore the workflow of film music and develop a palette of tools to take into their future collaborative projects.

MITM325X - Writing for Bassoon

General

Course Long Title
Writing for Bassoon

Subject Code	Course Number
MITM	325X

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

The bassoon is one of the more daunting instruments for composers to write for. Its extreme range, vast array of available timbers, seemingly endless possibilities for extended techniques, and potential for many weird sounds make it a challenging instrument to approach from a soloistic standpoint. This class will shed light on all of these subjects and more in a lecture format that will provide composers with insight as to how to efficiently write for the bassoon. I will discuss basics of engraving and notation preferences, go into detail on extended techniques (notation, possibility, variety, etc), and touch on the possibilities of amplification and effects with live performance. The other major portion of this class will be the ability for composers to workshop their music live with me so we can all learn and enjoy each other's work together. All students will be composing a work for me that I will perform for them at the end of the class. Second week classes will be focused on workshopping the pieces during class.

MITM325Y - CHAOS REIGNS

Description

Create powerful electronic music with Cal Arts synthesizers. Open to the institute (BFA 4 & MFA). We'll be listening to the works of Pauline Oliveros, Eliane Radigue, Wendy Carlos, Delia Derbyshire as well as Rob Hjordijk, Allen Strange, Todd Barton, Morton Subotnick, Don Buchla and Laetitia Sonomi. Key texts include Eliane Radigue's "Intermediary Spaces" and writings on parametric thinking. We will explore how to compose and perform music with societal impact. Students will have ample time to create and record their own music on some of the world's rarest synths and improvise solo or collaboratively. Through this immersion, students will develop both technical proficiency and an appreciation for the creative possibilities of electronic sound design, history, and live performance.

Guitar Anatomy

Subject Code

MITM

Course Number

398K

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

0.5

Description

This course is aimed at guitarists (acoustic, electric, classical) and bassists (electric) regardless of their major/specialization at CalArts. We will take a concise look at how different types of guitars are made, the function of their various parts, how they interact and how they are affected by use, age, weather changes, rough handling, etc.

The goal is to learn how to:

- set up your instrument for optimum performance according to your specific needs
- find sources of various problems (bad intonation, high action, uneven sound, etc) and learn to fix them
- understand common repair procedures
- understand when it is time to take your guitar to a professional repairperson
- maintain your instrument to stay in its best shape

There will be two lecture/presentation classes plus one individual hour meeting with each student

If you need more information about this course please contact the instructor at mtadic@calarts.edu

Description

In a musical career spanning nearly sixty years, the alto saxophonist and composer Jackie McLean (1931-2006) developed a model of collaborative and socially engaged pedagogy that was to prove enormously fruitful both for his own career and that of the younger musicians who came into his sphere of activities. Based on a rigorous musicianship essential to Afrological forms of improvisation, an uncommon depth and breadth of experience, professional ties to seminal artists like Charlie Parker, Bud Powell, Miles Davis, Charles Mingus, and Ornette Coleman, and a personal self-confidence which allowed for a radical openness, McLean was able to integrate performance, pedagogy and social and cultural advocacy into a uniquely coherent whole which was much greater than the sum of its parts.

In looking at McLean's work, this course will draw from a wide variety of sources including scholarly literature from the emerging field of jazz studies, as well as older and less formal jazz histories and criticism, archival materials such as McLean's commercial recordings and their associated liner notes, formal interviews which I conducted with McLean in 2000 and many informal conversations that took place from 1996-2000, during which time I audited several of McLean's undergraduate courses at the University of Hartford. Special attention will also be devoted to Ken Levis's 1976 documentary Jackie McLean On Mars, which provides particularly valuable insights into the nature of McLean's early work as a community activist and an educator.

The Fast-Acting and Self-Eating Quintet

Subject Code Course Number
MITM 425D

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description
Fast-Acting/Self Eating is an experiment in time-restricted collaborative composition. This class will be a small ensemble of five composers/ instrumentalists. Each participant of the class will write a piece for the instrumentation of the group. All instruments and experience levels welcome. The instrumentation of the class will be announced to all participants at least a week before the first class period, and each participant of the class will be assigned a day throughout the two week period where they must present a piece for the group. All forms of musical notation are welcome, whether they are transmitted aurally or on paper. The participant to whom the first day is assigned will present a piece with no prompt other than the instrumentation of the group. The participant to whom the second class is assigned will have to write a piece that is based on the previous piece presented in the first class period. This process continues, creating a meta structure where every piece written is based on the piece that was presented a day or two before. This will challenge participants to write pieces that are based on pre-existing material, and also to do so in very small amounts of time. The last class period will be a rehearsal that aims to string together all of the pieces into a setlist that will be performed and recorded via room mic. The class will meet a total of six times for, at the most, two hours per meeting, although the full two hours may not be needed for every meeting. The restriction of the class to five participants is a result of the format being five class periods of presenting pieces, and one final rehearsal.

Description

Building a physical music collection is a process of discovery, choices and self determination. Those of us who choose to collect physical media, over time, come to understand the advantages and disadvantages to building a physical music collection. We will be discussing the strengths, aesthetics and challenges of the three main physical forms of music for sale people have traditionally used to build music collections - vinyl, CD's and cassettes. The class will strategize on practical ways to build and maintain (take care of) a physical music collection, play examples from the various mediums - vinyl, CD's and cassettes - and learn ways building a physical music collection can inform one's musicianship, and imagination.

Description

The first in a new Winter Session series of hands-on music production courses, Channeling, where, each year, we will dive deeply into the work of a sonic practitioner, listen to their music and explore in the studio: how did they get those sounds? 2024's artist will be Delia Derbyshire, the trail-blazing producer of electronic music, most well-known for her work with the BBC's Radiophonic Workshop and realization of the Dr. Who theme. We will start by listening to and appreciating works that she created from the 1960's through to the 1990's, from proto-techno experiments to her psychedelic musique concrte band, White Noise. We will examine how she generated and manipulated sounds using oscillators / signal generators, tape loops, sampling and tape manipulation. Students will explore these hands-on techniques in the Analog Mixing Studio, and the course will culminate in a creative sound design project to compose and record a theme song for a hypothetical science fiction program. /n/nOpen to students from across the institute, the course will also include a crash course in analog signal chains and recording studio orientation.

MITM524D - Hip-Hop As A Verb

Course Long Title

Hip-Hop As A Verb

Subject Code	Course Number
MITM	524D

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

We need brave new words to birth a brand-new world. Hip-hop is turning 50 this year and it is clear that it is beyond music and is a unifying cultural vehicle. Hip-Hop is also an embodied practice. In Hip-Hop as a Verb, we will dive into the doing of Hip-Hop, connecting students from their dreams and ambitions into community actions and sharpening performance skills. Each participant in this course is preparing to be a part of a collaborative Hip Hop Festival that makes space and platforms for Hip-Hop artists at CalArts. Students who take the course should be

prepared to fulfill some role, whether as a performance artist, creative director, poster designer or volunteer to help put on the event. Hip-Hop as a Verb will explore the process of making the medium of Hip-Hop: the first 4 meetings will cover recording, publishing, song to distribution, roll out, making merch, and all the steps in between. Students will be introduced to systems of reciprocity meant to subvert within an industry built on exploitation. The 5th and final meeting of the course will conclude with a performance at Leimert Park's KAOS Network, home of Project Blowed and where so many local legends have come through, from Open Mike Eagle and Kendrick Lamar to Dojacat. Hip-hop is not something that happens privately. You're not just nodding your head to a beat: it is a communal head nod, a collective "go ahead." You're agreeing with your body that this voice and this beat should be in existence. In the course, we will practice performance and everything needed up until the time we hit the stage. Driven by the students' questions, the course aims to answer "How does one hip-hop?": We verb.

MITM524E - Frame Drum Workshops

Elijah McClain and Music

Subject Code
MITM

Course Number
524K

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

Elijah McClain was a violinist murdered by Aurora police on the night of Aug 24, 2019. His name was repeated on the streets along with those of others recently killed by police -George Floyd, Breonna Taylor, Sandra Bland, and others - during the Black Lives Matter uprisings of 2020. Photographs emerged of McClain playing violin for kittens in an animal shelter and for patients in a hospital. And his last words, recorded by the body cam of one of the murdering officers, went viral, shocking and moving many people. Numerous "violin vigils" were held after his death, some of which were violently disrupted by police. "They unleashed him, and now he's touching the world," said his mother, Sheneen McClain.

What is the meaning of Elijah McClain for violinists and for all other musicians? How does justice for Elijah impact music making? What music would Elijah McClain have made if his life had not been violently cut short? How does police murder affect music? What is the role of music and musicians in police and prison abolitionism?

MITM524L - Orchestration for concert stage and film

Course Long Title

Koto Sounds Into Your Art and Music

Subject Code	Course Number
MITM	524M

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

This course is a lecture and workshop and will explore the ways to integrate koto sounds into your art/music making. We will be exploring How the koto works: possibilities and limitations Like any instrument, koto has its own physical reality that allows koto to do certain things and not other things. We will learn these realities so we can think about what it means to have koto sounds and the special and unique aspects of this instrument. Koto notation systems and Western notation systems Koto has its own notation system. There are reasons why we still use it. We compare it and Western notations and learn about the possibilities and limitations of each notation system as well as how we can utilize both systems. Other ways to communicate with koto performers for your art-making. Using a notation system is only a way to communicate with performers about your ideas. We will explore other ways to communicate with performers for your art-making. Classical koto music, Ghibli music, city pop, and other forms of music may be used as examples for this course

Learning Goals:
Students will be able to create a sketch of their artwork that includes koto sounds, discuss it, and have it played by a koto performer.

Course Long Title

The Full Bodied Breath

Subject Code	Course Number
MITM	524N

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

Modern life and society have retrained the perfect breath we were born to take. Each breath we take dictates the confidence, connection and effectiveness of the sound we emanate no matter if we sing or speak, in performance or in life. Connecting to the source and harnessing a free and connected breath - it empowers, emboldens, and energizes the self, the brain, the body, the voice, the artist and the art. This is a meditative and physically active course. Combining Kundalini yoga, Feldenkrais Technique, Dalcroze Eurythmics, Martial Arts, Somatic Breath and Bodywork, Pilates and ending each class with a sound bath, students will elevate the heart rate and enter into a meditation where they focus on the breath and explore sensations. As the skills learned will build from session to session having an opportunity to deep dive into these sensations will be the most effective way to give students the opportunity to carry this practice outside of the classroom. Outside of class work will be required including a daily practice of the techniques introduced in each class.

General

Course Long Title

Perfecting the Playlist

Subject Code

MITM

Course Number

524S

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

0.5

Description

The playlist has become a steady fixture in our lives, presented by professional DJs in clubs and on the radio around the world. In this short course we will explore what it means to "perfect the playlist" - how to approach pacing, harmonic mixing, and selection in a set. We will explore making genre-specific playlists (such as acid, house, or ambient), as well as making eclectic, non-genre specific, "mood" based playlists (such as "Early AM Fog" or "Winter Clarity"). In taking this class students will hone their aesthetic listening skills, as well as music research (or "digging") skills. The playlist is a fertile ground for further compositional exploration - how one's own music might fit alongside the work of others, or how the dynamic flow or changing density of a playlist may inform composers' approach to their own work. Students will become better affective listeners, and better playlist makers, after taking this course. Course requirements - students need to have access to a laptop and DJ software like Rekordbox, Virtual DJ or Ableton Live. The course will primarily use Rekordbox and Ableton Live, and there may also be live demonstrations of CDJs.

MITM524T - Building Interactive Audiovisual System

Description
All-Inclusive Music: A Multi-Pedagogical Journey of Composition & Improvisation

This class is aimed at examining non-traditional methods of music composition & approaches to improvisation that allow for individuals of any training or pedagogical background to access without necessarily diminishing one's artistic vision. We will examine the works of various living composers, ranging from graphic notation, to text scores & beyond. Students will have one major assignment with class writings/discussions. The ultimate goal of this class is to have each student's piece performed and documented in class. The most important aspect of this class is that it is open to all and meant to be a place for analysis of sound that can be combined with compositional practices that allow for inclusivity.

MITM524Y - Development, Rehearsal and Performance

General

Course Long Title

Development, Rehearsal and Performance

Subject Code Course Number
MITM 524Y

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

The participants will form a chamber ensemble (5-10 musicians) with open instrumentation. Every member will play in the ensemble and contribute with one piece of their own for us to develop, rehearse and perform. This can be a fixed, notated score, an open score, guidelines for improvisation, a concept or a simple idea as starting point for a collaborative creation.

When preparing/writing the idea/score prior to Winter Session, have in mind that your piece should be suitable for (or adaptable to) our final instrumentation. As soon as we have an idea of who will be in the ensemble, you will be informed what instruments we have, so you can choose to adapt your piece to the specific group of instruments. Remember you can also choose to keep your piece open to interpretation and not arranged for specific instruments. Your idea/score should be prepared prior to Winter Session and be ready to bring to class for the group to work with during the first week of Winter Session.

Week 1 in A300

Tuesday through Friday 1/9-1/12 2-5pm:

During the first week we will develop and rehearse the pieces together as a group. Each member will get one rehearsal session for their piece. If they wish, they can lead and direct the ensemble, or they can decide to open it up for collaborative development.

Week 2 in ROD:

Thursday 1/18 1-5pm: Rehearsal and revision of all the pieces

Friday 1/19 3-6.30pm: Set up and dress rehearsal
5pm Performance in ROD open for the CalArts Community and livestream

MITM

Course Number

524Z

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

0.5

Description

This course is open to all students interested in incorporating Sound as an element of their practice or project.

Students are encouraged to have personal or

collaborative projects in mind prior to attending.

This is NOT a coding class. Computers are only necessary if you want to use digital tools. All methods of sound creation are encouraged.

I will provide information and assistance for getting started with the Electro-Smith Daisy Seed, however do not feel pressured to go down that road.

It is highly recommended that you show up the first day with some sort of realistic concept or idea, no matter how small.

We'll take plenty of time to brainstorm / conceptualize / critique throughout the stages of development.

Minds may change, groups may form etc...

Topics include:

- DIY practices / Creative Strategy (Subversion as Artistic Practice)
- Signal Flow / Electronics
- Amplification / Sonification
- Digital & Analog Sound Processing & Practices
- Materials
- Construction Methods & Practices
- Message / Medium
- Discreet Practices
- Realizing Concepts
- Tortoise Techniques (Prototyping)

Collaborative projects are highly encouraged, especially if you want to design a Multimedia work or require a lot of construction.

Course Long Title

Music and Politics: When does it work?

Subject Code

MITM

Course Number

525A

School(s)

School of Music, School of Critical Studies

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

0.5

Description

Can an analysis of musical techniques interact with an analysis of whether social and political goals are effectively communicated in a piece of music? When is music effective politically and when is it not? Can overt political goals compromise musical effectiveness? Can they strengthen musical effectiveness? How do exogenous goals effect Music Composition in different styles and genres?

In this course we will ask these questions and more as we examine political music from different genres including, pop, experimental concert music, opera, folk music, commercial music, and other styles.

Students will be encouraged to make their own explorations and discoveries, and they will be expected to form their own analytically supported opinions.

General

Course Long Title

DIY Artist Toolkit

Subject Code Course Number
MITM 525C

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

While creating new work within a performer-composer-producer continuum, many contemporary musical artists also operate within a do-it-yourself, release-it-yourself milieu. This series of 5 workshops, based in the Experimental Pop program but open to musicians and artists from across the institute with an interest in DIY production and promotion techniques, will equip the DIY artist with skills and strategies to navigate the ever evolving/collapsing/reforming music industry. Sami Perez (independent musician, music producer, and director of Wiggle World recording studio) will offer workshops on booking shows and tours (routing, contracts, budgets, promoters and promotion, designing and selling your own merchandise); designing screen printed posters (from idea, to sketch, to Photoshop layout, to screenprint); and bringing your record from rough mix to release (including mix strategies and demystifying the mastering process). Def Sound (independent musician, poet, and Grammy-considered artist) will offer workshops in promotion and marketing (visual communication, social media, supporter networks and writing a compelling artist's bio) and "systems of reciprocity" (how to not get exploited in contracts or publishing deals).

Credit Hours

Min Credit Hours:
1

Description

Students will collaborate in small groups over the two weeks to create and workshop an original work (of any medium) that integrates and explores the Alexander Technique. The Alexander Technique is a mind-body unity work meant to help students understand how they respond to emotional and physical stimuli in their day to day life, and deepen their awareness of the habitual patterns that affect these responses. Throughout the course, students will be introduced to the three main principles of Alexander Technique (inhibition, direction, and awareness) and will be allowed to explore the hands-on side of the technique, which uses non-manipulative, physical touch to bring awareness and attention to a person's response to external stimuli. The course will culminate in a showcase of their original work. Students of all artistic practices will be welcomed. No prior experience with the Alexander Technique is necessary.

MITM525E - Insurgent Musicalities

General

Course Long Title

Insurgent Musicalities

Subject Code Course Number
MITM 525E

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

The 21st century protest movement has been the largest and most widespread in planetary history. Yet the movement has also been criticized for its failures and even for leading to the opposite of what it wanted- a massive shift to the right in global politics. How has music been involved? How can music learn from its blind spots, its failures, its vulnerability to capitalist and counterinsurgent capture? How can music support protest, resistance, revolution while at the same time providing resilience, steadfastness and deep caring? How can music be deployed to both "burn shit down" and to create the world we want to see?

MITM525F - String Quartet Intensive

General

Course Long Title
String Quartet Intensive

Subject Code Course Number
MITM 525F

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description
A performance project in which a string quartet comprised of three students and Andrew McIntosh meet extensively over the two weeks of Winter Session to prepare a full program of repertoire for performance at the end of Winter Session. Topics covered include how to prepare challenging repertoire in a short period of time, as well as contemporary performance techniques, ensemble leadership skills, group communication and rehearsal skills, and exposure to music in non-standard notation.

The Sonic Self

Subject Code Course Number
MITM 525J

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

Despite the rise in confessional poetry and contemporary memoir writing over the past 3-4 decades, experimental musicians are still largely encouraged to leave personal details about themselves and their lives out of their work, often in favor of more objective examinations of acoustics and the psychologies of sound and listening. How, then, might we start to think about representing ourselves more explicitly in our work? Furthermore, how do we give an account of ourselves without acquiescing to the dangers of neoliberal individualism? This course aims to use the tools of personal prose alongside practices of sampling, field recording, and other subjective approaches to soundmaking that re-center ourselves and our communities in our work. We will look at noteworthy historical examples in music and writing, and students will workshop their own autobiographical projects throughout the course.

MITM525K - Idioms & Idiots

General

Course Long Title

Idioms & Idiots

Subject Code	Course Number
MITM	525K

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

Idioms & Idiots focuses on deconstructing our instrumental habits with a goal to avoid repeating the same instrumental patterns embedded in our practice. The class proposal is based on a project by artists and philosophers Jean-Luc Guionnet, Seijiro Murayama, Mattin, and Ray Brassier, which consists of a performance and a CD release, as well as philosophical writings, where all the members of the ensemble contributed to both.

General

Course Long Title

Sleep Ensemble

Subject Code	Course Number
MITM	525L

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

This is an ensemble exploring the notions of live performance sleep therapy music. Open to the institute, the course will move between lecture, practice, and performance and invites all sound making mediums to participate. The course will culminate in a live surround sound performance with an open invitation for

audience attendance. This course meets M/W, M/W/F with the open performance on Friday of the second week. All rehearsals are mandatory, and creative participation is required.

MITM525M - Biotech Art and Code: Patterns and Sound

General

Course Long Title

Biotech Art and Code: Patterns and Sound

Subject Code	Course Number
MITM	525M

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

Biotech Art and Code: Patterns and Sound introduces students to the creative intersections of art, biotechnology, and generative algorithms, exploring how Cellular Automata and DNA coding can inspire new forms of artistic expression. In this project-research-based course, students will investigate concepts of growth, decay, and self-organization, working in a collaborative environment with faculty and visiting artists.

Using tools like TouchDesigner and Max/MSP, students will step into the field of creative coding, with no prior coding knowledge required. Pre-made code and accessible templates will support students as they develop an individual project inspired by the class's collective explorations. Through the incorporation of algorithmic methods, students will explore immersive sound design to complement their visual and conceptual work, adding a multi-sensory layer to the bio-inspired art they create.

Guided by influential works such as John Conway's Game of Life, Joe Davis's DNA Manifolds, Ira Fleming's Gene Music, and Daniel Shiffman's The Nature of Code, students will engage in a unique journey, merging biological and algorithmic principles to expand their creative horizons.

No prerequisites are required--just curiosity and an openness to explore how sound, life sciences, and code converge in art.

MITM525N - I have you covered

General

Course Long Title

I have you covered

Subject Code	Course Number
MITM	525N

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

The first portion of the course will focus on the why of performing a cover, focusing on how context, identity, and perspective can allow an artist to say something new with an existing composition. The bulk of the course will focus on the process of creating a cover song, by identifying the "musical DNA" of the song that should remain, while exploring strategies for breathing new life into a song, such as altering harmonic or melodic ideas, groove or rhythmic concepts, instrumentation and orchestration, lyrical content and emotional resonance, or production. There will be multiple opportunities for arranging partial covers throughout the two weeks, and the class will culminate with the performance or recording of a newly conceptualized cover song.

MITM525O - Text Based Drum Sequencing- Tidalcycles

Course Long Title

Composing with Birdsong

Subject Code	Course Number
MITM	525P

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

The course is for those interested in experimenting with field recording based composition, specifically of birdsong. Whether using pure audio processing via a DAW, Messiaenic musical transcription on an acoustic instrument, or any combination of the two, all styles of birdsong music are welcome. The class will follow the whole process from recording birdsongs in nature using a recording device to creating a finished musical product.

MITM525Q - Ignite the Creative Process - Strategies

General

Course Long Title

Ignite the Creative Process - Strategies

Subject Code	Course Number
MITM	525Q

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

Open to all schools and year levels, this interdisciplinary class will investigate and actively engage students in strategies, games and exercises from the Surrealists (Leonora Carrington, Andre Breton), the Fluxus Movement (Ben Patterson, Yoko Ono), Pauline Oliveros, Brian Eno, Viola Spolin, Joseph Beuys, Andy Warhol, Simone Forti, R. Murray Schafer, and others. Insight into background and history will be offered, but most of our class time will be for auditioning and interrogating a broad spectrum of exercises that propose to foster imagination and creativity. Along the way, students will choose exercises to incorporate into their own work, examining the effects and presenting the results.

Rave Production 101: Planning, Logistics

Subject Code	Course Number
MITM	525R

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

This course offers a comprehensive look into the art and science of organizing a rave, from concept creation to event execution. Students will learn how to design immersive environments, coordinate sound and lighting, manage permits, ensure safety, and market to diverse audiences. With insights into music curation, venue scouting, and even budgeting, this class is perfect for future event producers looking to bring their dream rave to life. Get ready to go behind the scenes, where the real party planning magic happens!

MITM525S - Let's Talk Titles

General

Course Long Title

Let's Talk Titles

Subject Code	Course Number
MITM	525S

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

In this course students will examine, interpret, and create titles for artistic works. After surveying titles over multiple artistic disciplines, including music, dance, visual arts, theater, film, fiction and non-fiction literature, poetry, and other forms, students will individually and in group workshops, create titles for works in their discipline as well as other disciplines. Readings will include artists' insights into their titlemaking process, writings exploring concepts and themes, and critiques and analysis of artworks. Discussions will include interpretations of titles and how they can shift meaning and perception of the underlying artwork and also create public interest in the piece. By the end of the course, students should feel more comfortable with creating titles for their own projects.

MITM525T - Dance and Music Improvisation

General

Course Long Title
Dance and Music Improvisation

Subject Code Course Number
MITM 525T

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

In this course students will explore improvisation through movement and sound. Drawing from the styles of prominent experimentalists such as Pauline Oliveros, Roscoe Mitchell, Sarah Hennies, Simone Forti, Yvonne Rainer, and Merce Cunningham, improvisational environments will be developed that encourage idiosyncrasy, immediacy, and newness. As a new piece is improvised in the moment and the group grows into its own unique ensemble, the relationship between sound, movement, and space will be explored spontaneously. This course is open to the institution.

MITM525U - Generative AI for Audio Visual

Credit Hours

Min Credit Hours:
0.5

Description

In this course, students will focus on developing skills directly applicable to real-world video production, utilizing generative AI tools like stable diffusion and flux within ComfyUI. Moving beyond abstract image creation, the course emphasizes practical and creative implementations tailored for actual production environments. Students will also engage with graphical software such as TouchDesigner to integrate their artistic vision into AI-generated content, ensuring their work aligns with professional video production standards.

MITM525V - Post Studio Music

General

Course Long Title
Post Studio Music

Subject Code Course Number
MITM 525V

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

Inspired by Michael Asher's long durational art critique classes held at CalArts for decades, we will "read", analyze and critique works of art (music) at length in group discussions with a focus on what the music does, rather than how the music has been done. We will engage with a select number of musical artists that utilize strategies known from the visual arts, who push boundaries of music's function in a critical, political, social context (Terre Thaemlitz, Klein, Fatima Al Quadiri, Robert Ashley). Through these discussions we will develop a shared language and a set of reference points, that will form the basis of discussing "objects" (music), that the students bring in for the last class.

Are you an aspiring director who is passionate about crafting the perfect soundtrack for your film or video game, but are unsure of how to communicate your creative vision to a composer? Or perhaps a composer looking to write music

General

Writing for Bassoon

Subject Code MITM Course Number 525X

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description

The bassoon is one of the more daunting instruments for composers to write for. Its extreme range, vast array of available timbers, seemingly endless possibilities for extended techniques, and potential for many weird sounds make it a challenging instrument to approach from a soloistic standpoint. This class will shed light on all of these subjects and more in a lecture format that will provide composers with insight as to how to efficiently write for the bassoon. I will discuss basics of engraving and notation preferences, go into detail on extended techniques (notation, possibility, variety, etc), and touch on the possibilities of amplification and effects with live performance. The other major portion of this class will be the ability for composers to workshop their music live with me so we can all learn and enjoy each other's work together. All students will be composing a work for me that I will perform for them at the end of the class. Second week classes will be focused on workshoping the pieces during class.

MITM525Y - CHAOS REIGNS

General

Course Long Title
CHAOS REIGNS

Subject Code MITM Course Number 525Y

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

Create powerful electronic music with Cal Arts synthesizers. Open to the institute (BFA 4 & MFA). We'll be listening to the works of Pauline Oliveros, Eliane Radigue, Wendy Carlos, Delia Derbyshire as well as Rob Hjordijk, Allen Strange, Todd Barton, Morton Subotnick, Don Buchla and Laetitia Sonomi. Key texts include Eliane Radigue's "Intermediary Spaces" and writings on parametric thinking. We will explore how to compose and perform music with societal impact. Students will have ample time to create and record their own music on some of the world's rarest synths and improvise solo or collaboratively. Through this immersion, students will develop both technical proficiency and an appreciation for the creative possibilities of electronic sound design, history, and live performance.

Course Long Title

Guitar Anatomy

Subject Code

MITM

Course Number

598K

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

0.5

Description

This course is aimed at guitarists (acoustic, electric, classical) and bassists (electric) regardless of their major/specialization at CalArts. We will take a concise look at how different types of guitars are made, the function of their various parts, how they interact and how they are affected by use, age, weather changes, rough handling, etc.

The goal is to learn how to:

- set up your instrument for optimum performance according to your specific needs
- find sources of various problems (bad intonation, high action, uneven sound, etc) and learn to fix them
- understand common repair procedures
- understand when it is time to take your guitar to a professional repairperson
- maintain your instrument to stay in its best shape

There will be two lecture/presentation classes plus one individual hour meeting with each student

If you need more information about this course please contact the instructor at mtadic@calarts.edu

Subject Code

MITM

Course Number

625D

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours**Min Credit Hours:**

0.5

Description

Fast-Acting/Self Eating is an experiment in time-restricted collaborative composition. This class will be a small ensemble of five composers/ instrumentalists. Each participant of the class will write a piece for the instrumentation of the group. All instruments and experience levels welcome. The instrumentation of the class will be announced to all participants at least a week before the first class period, and each participant of the class will be assigned a day throughout the two week period where they must present a piece for the group. All forms of musical notation are welcome, whether they are transmitted aurally or on paper. The participant to whom the first day is assigned will present a piece with no prompt other than the instrumentation of the group. The participant to whom the second class is assigned will have to write a piece that is based on the previous piece presented in the first class period. This process continues, creating a meta structure where every piece written is based on the piece that was presented a day or two before. This will challenge participants to write pieces that are based on pre-existing material, and also to do so in very small amounts of time. The last class period will be a rehearsal that aims to string together all of the pieces into a setlist that will be performed and recorded via room mic. The class will meet a total of six times for, at the most, two hours per meeting, although the full two hours may not be needed for every meeting. The restriction of the class to five participants is a result of the format being five class periods of presenting pieces, and one final rehearsal.

Description
A comprehensive journey and immersive guide from the genesis of a song to its successful release into the world. Learn how to balance your artistic authenticity with real life demands, and learn the skill sets required to successfully work in, navigate and yet remain musically true, in today's music business. From song start to successful commercial release, you will be challenged to identify your best work at an early stage and then through guidance and discussion, be able choose, amplify and produce your focus song for the class. From there we will plan it's promotion and marketing campaigns, discuss social media and its challenges for the artistic soul, and yet stay focused on tangible actions to grab your target audience and release your music successfully.

Course Long Title
Teaching Artistry

Subject Code
MPCD

Course Number
603

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Teaching Artistry is a lecture class that will focus on best practices of teaching. Through a combination of demo lessons, video clips, field observations, and discussion, participants will explore various pedagogical approaches. Each of these approaches will be engaged by students as they write papers, plan and teach mini lessons, and critique each other's work. In addition, the course will cover creating lesson plans, creating syllabi, creating a curricular map, assessment, educational standards, reflection, project based learning, arts-integration, and brain research as it connects to music learning. First semester, this course focuses primarily on the perspective of a teaching artist, working in the K-12 classroom with students and teachers, as well as various community settings. We will also discuss how these ideas connect to various other teaching opportunities such as: private lesson instruction, university level.

MPCD670 - DIY

General

Course Long Title

DIY

Subject Code	Course Number
MPCD	670

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

Do-it-yourself - and the related concept of release-it-yourself - has been the ideological and practical underpinning of radical music for at least a half-century. Often identified with the punk rock movement, the DIY imperative actually predates punk by more than a decade, and it has arguably propagated and flourished even more with later genres such as industrial music, underground hip hop, rave + electronica, and extreme metal.

Running through most of these sonically various expressions of the DIY spirit is a nebulous yet still potent and seductive notion of the "underground". As we approach the present day, we'll examine how that notion of alternative culture has altered in the context of corporate platforms such as YouTube, Soundcloud, and TikTok that - far from being challenged by homegrown, grass-roots culture-making - actively encourage and enable people to generate their own content (YouTube's slogan is "broadcast yourself"). Yet what could be dubbed "the desire called 'underground'" persists as a musically generative impulse, an ideal that has spawned a swarm of online microgenres like vaporwave, Soundcloud rap, and hyperpop, and shows no sign of fading.

The course will culminate in an assessment of the dematerialized present - available almost entirely as downloads or streams, and, despite Bandcamp

etc, increasingly circulating outside retail mechanisms and the exchange economy, online microgenres proliferate in uncontrollable number and mutate / rename themselves at incredible speed. As exciting as much of this music is, there are nagging doubts about possible downsides: "excess of access" leading to unmanageable overload, art as a necessarily public activity versus "the no audience underground", and the question of whether DIY in the 21st Century often means the absence of support systems, institutional facilities, the structures and resources that enable creativity. In an oversupplied attention economy, how do you find listeners. let alone a livelihood?

Credit Hours

Min Credit Hours:

General

Course Long Title
Introductory Foundations in Guitar

Subject Code	Course Number
MPRF	106

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Fundamentals of plectrum and fingerstyle guitar. Highly recommended for students interested in learning the basics in electric, steel string acoustic and nylon string guitar performance. This class serves as a foundation for the techniques, terminology and musical vocabulary that will assist any beginning or self-taught guitarist in developing a sustainable, lifelong relationship with the instrument. We will work in a group lessons format to discover healthy approaches to technique, as well as the basic chord shapes, scales, strumming and finger-picking patterns that form the foundation of guitar performance across a variety of styles. Students can expect to learn song structures, 'riffs', and chord progressions in a number of genres and from a wide selection of musical eras. Open to complete beginners, or to self-taught players who would like to build a solid foundation to supplement their personal practice from the ground up.

Registration Restrictions

Course Long Title
VoiceArts Foundation

Subject Code	Course Number
MPRF	115

School(s)	Program(s)
School of Music	Voice Arts

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

This practicum course provides an introduction to a wide-range of topics, skills and contexts with which all voice-based artists need to be familiar, and lays a foundation for more advanced work. The course will explore issues critical to vocal artists, and participants will gain practice with tools they will need in future work. Participants also will learn to observe themselves and their work, and will begin to determine which skills, tools, resources, etc., will be necessary for them to accomplish work at the highest level. Topics will include vocal function, healthy singing and speaking, phonetics and diction, interpretation and communication, listening, resources for singers, professionalism, development of the physical and the artistic voice, and many other subjects necessary for all vocalists.

MPRF119 - Piano Workshop

General

Course Long Title
Piano Workshop

Subject Code	Course Number
MPRF	119

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

Course open to Piano Program students only. Piano Workshop will be required every semester for piano majors and the collaborative arts specialization at both the BFA and MFA levels. MAP pianists and performer composers are encouraged but not required to enroll (see instructor if interested). The course will strive to integrate previously separated aspects of pianism by encouraging a holistic approach to the instrument. Over the course of the entire year the class will encompass various literature and skills topics, guest artist presentations, master-classes, issues of stage anxiety, acoustics, student performances and group projects (Interim concerts etc.). Students will be assessed and graded on attendance,

participation (both as listener, responder and performer) and at least one in-class presentation on a work in preparation for recital.

1

Description

The goal of this course will be to explore the Alexander Technique and how it applies to musicians. The course will focus on two main topics: learning about the Technique and discovering how musicians can use the Technique to reduce practice and performance related injuries. Students will have the opportunity to bring in their work and explore practice and performance related issues in a supportive, coaching style environment that directly applies the Technique.

Course Long Title
Bodies and Voice

Subject Code	Course Number
MPRF	211

School(s)	Program(s)
School of Music	Voice Arts

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Course open to Music School students only, by Permission of Instructor only. The course is intended as a laboratory to explore the body in relationship to the voice and the voice in relation to the emotional memory of the body. The laboratory will consist of the physical exploration of voice mechanics within the body and its outward projection of different emotional responses. A final project, using the compendium of body/voice relationships encountered, is encouraged.

General

Course Long Title
Singing the Standards

Subject Code	Course Number
MPRF	216

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Singing the Standards is a style survey, repertoire, and performance course introducing the vocal technique and delivery of jazz singing. The course will focus on listening and style analysis of recordings, videos, and assigned student participation performances. In addition to analyzing the form, arrangements, chords changes, and bass lines of several jazz standards, this course will mainly focus on the interpretive and improvisatory elements of jazz singing. Topics will include phrasing, tone, timbre, rhythmic variations, melodic development, vowel production, resonance and how apply these to other contemporary repertoire. Students will learn to distinguish vocal characteristics of several artists such as Ma Rainey, Bessie Smith, Billie Holiday, Louis Armstrong, Ella Fitzgerald, Sarah Vaughan, Dinah Washington, Anita O'Day, Carmen McRae, Mel Tormé, Frank Sinatra, Chet Baker, Joao Gilberto, Astrud Gilberto, Lambert, Hendricks, & Ross, Betty Carter, Al Jarreau, Bobby McFerrin, and representative contemporary artists. The social, political, and cultural aspects of the music will be discussed in relation to the course material. Students will be asked to perform weekly.

Description

This course is a series of hands-on workshops exploring the possibilities for percussionists performing with electronic controllers via computer music software, processors, sampling and loop based performance. This course explores the potential and realized impact of electronic controllers in the world of live performance. Members of this class develop the ability to shape sound in ways that are informed by contemporary composition and performance practices. It is the goal of this course that: all participants become empowered electronic musicians/artists; that students be comfortable and adaptable when encountering newly designed controllers, evaluating the possibilities as live performance tools and programming the devices confidently; Students will develop ancillary skills that question the design of existing controllers and may ultimately consider creating their own design for use in live performance settings.

MPRF	406

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours**Min Credit Hours:**

1

Description

This course is designed to help musicians prevent and rehabilitate musical instrument-based overuse injuries. It will also address injuries from other sources that might affect our ability to play our instruments. We will look at postural imbalances, faulty habits, and the reality of maybe just too many hours in the practice room. Through yoga therapy, pilates rehabilitation, aspects of physical therapy, and stress reduction and breathing techniques, each student will be given an individual program of stretching, strengthening and relaxing for optimum health. More than just an exercise routine, these programs will be uniquely designed for each student's needs, and may include modifications in posture, alignment, behaviors, and practice techniques.

Course Long Title
Just Intonation Performance Practice

Subject Code	Course Number
MPRF	412

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
Just Intonation Practicum is a course for performers to learn and explore practical
understandings and approaches to just intonation as well as alternative
microtonality vocabulary. We will explore approaches based on sonic vocabulary,
instrumental structures, and acoustic underpinnings, as well as through existing
and new repertoire.

While the primary focus will be on Just Intonation, larger issues of microtonal
performance practice and the effects of individual instrumental inharmonicity will
also be explored. Available assistive softwares, including the Hayward Tuning Vine,
will be an integral part of in-class work, allowing students to develop an
understanding of available tools and resources.
Additionally the class will involve a thorough exploration of existing notation
systems and how to navigate them as a performer.

Singing the Books

Subject Code	Course Number
MPRF	451

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Focused Topic in Vocal Performance: This workshop will focus on facilitating processes of constructing realizations of various 'songs' included in the Song Books, along with an overview of Cage's aesthetics. Students will engage in substantial disciplined creative work, action and research, especially as Cage understood 'research' to mean experimental music making. Course work will include discussion, reading assignments, interpreting and constructing pieces, and performing in class. This work will lead toward public performances and/or installations. It is anticipated that students will gain an understanding of the different types of compositional processes Cage utilized in the Song Books. They also will develop the capacity for intensely disciplined action and creation; will develop an understanding of non-ego based methods of composition and performance; will explore their capacity to develop and work within highly rigorous constraints; will explore electronics as they pertain to the Song Books; will learn how to ask appropriate questions when realizing Cage's work; and will work on the ability to perform in a manner independent of self-expression.

MPRF452 - Contemporary Vocal Techniques

General

Course Long Title
Contemporary Vocal Techniques

Subject Code	Course Number
MPRF	452

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Focused Topic in Vocal Performance: This course focuses on facilitating learning processes and specific techniques necessary for preparing and performing standard twentieth-century and contemporary experimental vocal works, as well as exposes students to a wide range of works and issues. All work will be approached with an adventurous and exploratory spirit, with group and individual exercises and coaching. The class will study and analyze scores and notation, with emphasis on developing practical and informed learning and performing skills. When learning new, challenging and unusual techniques, maintaining a healthy vocal production while

achieving desired results will be emphasized. Course work will include discussion and analysis, practical experimentation, learning and interpreting new techniques and works, in-class coaching and a final project. Some work will lead towards public performance.

Description

This course features an historical and contextual study of unconventional and experimental literature, poetry and text in works for voice, as well as the creation and performance of new text-based works. Participants will analyze and perform representative works while undertaking interdisciplinary study (music, literature, theater, visual art) and composition involving experimental movements, texts, language, structures, and content. Movements to be studied include Futurism, Dada, Surrealism, Modernism, James Joyce, Gertrude Stein, John Cage, concrete poetry, Oulipo, Lettrisme, Text-Sound Texts, Imaged-Words, and the incorporation of linguistic signs and symbols. Composers to be studied include Hanns Eisler, Darius Milhaud, Luciano Berio, John Cage, Gyorgy Ligeti, Giacinto Scelsi, Dieter Schnebel, George Aperghis, Heiner Goebbels, Unsuk Chin, and David Lang, among others. Much of the course will focus on composing and creating new works that reflect the materials and techniques studied.

Description

Readings in Voice Arts:Odyssey of the Voice

Readings in VoiceArts is dedicated to group study of a wide array of voice-related writings, with

specific readings chosen each semester from important writings on the study of the voice, evolution and development of the voice and communication, philosophical writings, performance studies, and even, occasionally, literary fiction that is voice-centric. The course requires extensive out-of-class time for reading. Class time will be devoted to discussion and explanation, explication, and analysis. Occasionally, the class may develop creative projects based on the materials read. Topics vary, based on the instructor and student interests, and may include Jean Abitbol's seminal work *The Odyssey of the Voice*, Mladen Dolar's *A Voice and Nothing More*, Catherine Clement and Betsy Wing's *Opera the Undoing of Women*, Adriana Cavarero's *For More than One Voice*, John Potter's *Vocal Authority: Signing Style and Ideology*, Richard Powers' *The Time of our Signing*, and many others.

Fall 2015: Jean Abitbol: *Odyssey of the Voice*

Odyssey of the Voice is written by the renowned French otolaryngologist, Jean Abitbol, and translated into English. Dr. Abitbol holds an intense and life-long passion for the human voice, clearly apparent in this book which takes us on a journey from the origin of the human voice to the modern day, from grunting to intricately complex classical singing and various vocal techniques of the world. Dr. Abitbol covers a vast array of topics, including the evolution of humans and the voice, anatomy, genetics, the function of the brain in voicing and singing language acquisition and evolution, acoustics, articulation, the voice and emotions, hormones and sex, the aging voice, vocal health, memory, vocal techniques, extended uses and practices of the voice, and ultimately, the mystery of the human singing voice.

Students will read this 500 page book, over the course of a semester, and will conduct outside research on areas of the book that hold relevance or interest to them. Regular written assignments and short in-class presentations will be given. Much class time will be devoted to discussion of the assigned passages, as well as explication of complicated material.

Description

Course is open to students who have previously completed MAIC-470 Hip-Hop Lab or MAIC-470 Hip-Hop Theory and Praxis, or by permission of instructor.

We need brave new words to birth a brand-new world. Hip-hop is turning 52 this year and it is clear that it is beyond music and is a unifying cultural vehicle. Hip-Hop is also an embodied practice. In Hip Hop Lab Practicum, we will dive into the doing of Hip-Hop, connecting students from their dreams and ambitions into community actions and sharpening performance skills. Each week will will ossilate between practice and study of the sweet poetic craft of what it takes to embody Hip Hop in your every day living. Each participant in this course is preparing to be a part of a collaborative Hip Hop performance that makes space and platforms Hip Hop artists at CalArts and the communities that they come from. Students who take the course should be prepared to fulfill some role, whether as a performance artist, creative director, poster designer or volunteer to help put on the event. Hip Hop Lab Practicum will explore the process of making the medium of Hip-Hop including but not limited to: recording, collaboration, truth telling, publishing, memorization, song to distribution, roll out, and making merch. Students will be introduced to systems of reciprocity meant to subvert within an industry built on exploitation.

Description

In this class we will examine the profoundly influential and experimental works of John Cage through the performance and discussion of pieces chosen by the class's participants. The often idiosyncratic elements of Cagean performance practice will be addressed through weekly coachings, and a final concert of the works will be presented. Concepts to be addressed might include the realization of indeterminate compositional elements, execution of proportional notation, piano preparation/bowing, graphic score interpretation, various uses of electronics, lecture performance, multimedia performance, etc. The cultural context and general aesthetics of Cage's work will also be explored through various readings and discussion of pieces performed. Performers of non-western and electronic instruments are encouraged to participate.

This class is designed for students who are fluent in reading musical notation.

Music in the Oral Tradition

Subject Code

MPRF

Course Number

498H

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

1

Description

A practice-based examination of the fretboard theory behind music of the 20th and 21st centuries including, but not limited to, the origins of the blues, bluegrass, folk, pop, rock, alternative, soul and funk as they relate to the electric and acoustic guitar.

We will look at musical forms and stylistic approaches passed down from guitarist to guitarist over the generations, with an emphasis on instrumental and vocal music that does not easily translate to and from the written note.

This is a two-semester course; the first semester is open to non-reading guitarists with an interest in growing their understanding of the fingerboard. The second semester is open to anyone interested in developing an applied modal approach to improvising and composing music traditionally originated from the electric and acoustic guitar.

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

The aim of this class is to demystify alternate guitar tunings by combining hands-on experience with theoretical analysis and a thorough understanding of the instrument's history. 'Scordatura' (literally meaning 'mistuning') first appeared in German violin repertoire in the 1700s. However, all over the world, instruments were intuitively tuned to what worked and sounded best. We will explore a range of commonly used tunings and understand their strengths and weaknesses. The tuning we will explore most in depth is DADGAD, which has become the 'standard of open tunings' due to its popularity and versatility in playing in various keys.

a few examples of tunings we'll explore are:
Open D tuning - DADF#AD - probably best known from Joni Mitchell's "Big Yellow Taxi"

Open G tuning - DGDGBD - known as "Taro Patch" tuning in the Hawaiian "ki ho`alu" - Slack Key tradition. Rolling Stones guitarist Keith Richards uses it in quite a few of their songs, such as "Start Me Up" and "Brown Sugar".

Open C tuning - CGCGCE - used by Led Zeppelin, John Butler and Soundgarden.

CGDAEG, an approximation of an all-fifths tuning. It provides a very interesting range and chord voicings, but most importantly: once familiar with this tuning, a guitar player can pick up a mandolin or bouzouki and not feel lost.

Description

Woody Aplanalp has decades of experience touring with acts such as Lauryn Hill, Thomas Mapfumo, Aloe Blacc and Quetzal. Thomas Leeb has played thousands of solo concerts all over the world, the only continent he has not toured is Antarctica. Together, we will prepare students for what it means and takes to be out there playing music while keeping your sanity, health and wallet intact.

- Finances: booking, budgeting and planning a tour, navigating contracts and riders, selling merchandise, understanding foreign exchange rates and tax implications.

- Travel hacks, saving money: Credit card perks can automatically cover rental car insurance. Phone plans may include free roaming data internationally. Airline or hotel status can give free updates, free checked baggage and more.

- Crossing Borders: avoiding pitfalls with Passports, Visas, Customs and Permits

- Physical and mental self-care, interpersonal issues

- Navigating different cultures and customs safely and gracefully

MPRF498N - Class Guitar

General

Course Long Title
Class Guitar

Subject Code	Course Number
MPRF	498N

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Fundamentals of plectrum and fingerstyle guitar. Highly recommended for students interested in learning the basics in electric, steel string and nylon string guitar performance. This class serves as a foundation for the techniques, terminology and musical vocabulary that will assist any beginning or self-taught guitarist in having a sustainable, lifelong relationship with the instrument. We will work together to discover healthy approaches to technique, as well as the basic chord shapes, scales, strumming and finger-picking patterns that form the foundation of guitar performance across a variety of styles. Students can expect to learn song structures, 'riffs', and chord progressions in a number of genres and from a wide selection of musical eras.

Open to complete beginners, or to self-taught players who would like to build a solid foundation around the things they might already know.

Registration Restrictions

RGAMUS - Music School Students Only

General

Course Long Title

Opera Theater

Subject Code

MPRF

Course Number

502

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

An intensive project-based class focused on rehearsing, producing and performing select opera/music-theater works in innovative interpretations. Works are often mounted in collaboration with other Schools within the Institute. The rigorous process culminates in public performances. Past works performed have included world and U.S. premieres, as well as older works presented in new and compelling productions. Given limitations of campus access, performances may take place in a virtual environment.

Singing the Standards

Subject Code	Course Number
MPRF	516

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Singing the Standards is a style survey, repertoire, and performance course introducing the vocal technique and delivery of jazz singing. The course will focus on listening and style analysis of recordings, videos, and assigned student participation performances. In addition to analyzing the form, arrangements, chords changes, and bass lines of several jazz standards, this course will mainly focus on the interpretive and improvisatory elements of jazz singing. Topics will include phrasing, tone, timbre, rhythmic variations, melodic development, vowel production, resonance and how apply these to other

contemporary repertoire. Students will learn to distinguish vocal characteristics of several artists such as Ma Rainey, Bessie Smith, Billie Holiday, Louis Armstrong, Ella Fitzgerald, Sarah Vaughan, Dinah Washington, Anita O'Day, Carmen McRae, Mel Tormé, Frank Sinatra, Chet Baker, Joao Gilberto, Astrud Gilberto, Lambert, Hendricks, & Ross, Betty Carter, Al Jarreau, Bobby McFerrin, and representative contemporary artists. The social, political, and cultural aspects of the music will be discussed in relation to the course material. Students will be asked to perform weekly.

MPRF519 - Piano Workshop

General

Course Long Title
Piano Workshop

Subject Code	Course Number
MPRF	519

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
0.5

Description
Course open to Piano Program students only. Piano Workshop will be required every semester for piano majors and the collaborative arts specialization at both the BFA and MFA levels. MAP pianists and performer composers are encouraged but not required to enroll (see instructor if interested). The course will strive to integrate previously separated aspects of pianism by encouraging a holistic approach to the instrument. Over the course of the entire year the class will encompass various literature and skills topics, guest artist presentations, master-classes, issues of stage anxiety, acoustics, student performances and group projects (Interim concerts etc.). Students will be assessed and graded on attendance, participation (both as listener, responder and performer) and at least one in-class presentation on a work in preparation for recital.

Hip-Hop Theory and Praxis

Subject Code	Course Number
MPRF	570

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

Hip-Hop music and culture is fundamentally Black work. Hip Hop is Black work created in response to a set of conditions. In the words of Lupe Fiasco the question is always "Did you improve on the design? Did you do something new?" That's the question you can't know the answer to without understanding the initial design before you. In this course we are developing the capacity to access fundamentally Black work. We need a theoretical foundation to do so. We do this work together. This course will utilize film, video, documentary and music to explore the ways in which hip-hop culture has become a powerful tool to probe and challenge the larger global consciousness. The goal of this class is to share a better understanding of the ancestral metadata present in the music we are consuming and engaging with. This class is focused on getting to the root of what we are listening to. This course is an invitation to explore the nuances in what else is being communicated beyond beats and rhymes. We will produce an understanding to engage with the hyper-commodification of the culture, questions around gender and sexuality, art and aesthetics, and also hip-hop's enduring ability to speak truth to power.

MPRF571 - Hip Hop Lab Practicum

Course Long Title

Hip Hop Lab Practicum

Subject Code	Course Number
MPRE	571

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Course is open only to students who have previously completed MAIC-570 Hip-Hop Lab, MAIC-570 Hip-Hop Theory and Praxis, or by permission of instructor.

We need brave new words to birth a brand-new world. Hip-hop is turning 52 this year and it is clear that it is beyond music and is a unifying cultural vehicle. Hip-Hop is also an embodied practice. In Hip Hop Lab Practicum, we will dive into the doing of Hip-Hop, connecting students from their dreams and ambitions into community actions and sharpening performance skills. Each week will oscillate between practice and study of the sweet poetic craft of what it takes to embody Hip Hop in your every day living. Each participant in this course is preparing to be a part of a collaborative Hip Hop performance that makes space and platforms Hip Hop artists at CalArts and the communities that they come from. Students who take the course should be prepared to fulfill some role, whether as a performance artist, creative director, poster designer or volunteer to help put on the event. Hip Hop Lab Practicum will explore the process of making the medium of Hip-Hop including but not limited to: recording, collaboration, truth telling, publishing, memorization, song to distribution, roll out, and making merch. Students will be introduced to systems of reciprocity meant to subvert within an industry built on exploitation.

Credit Hours

Min Credit Hours:
1

Description
An integrated approach to various branches of yoga, including Hatha Yoga asanas, Pranayama, and Dhyana. Physical postures, breathing exercises, and meditation/ visualization techniques will be explored. Students will learn to increase efficiency, relaxation, and concentration in musical performance and practice settings.

MPRF606 - Musicians' Injury Prevention

General

Course Long Title
Musicians' Injury Prevention

Subject Code Course Number
MPRF 606

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
This course is designed to help musicians prevent and rehabilitate musical instrument-based overuse injuries. It will also address injuries from other sources that might affect our ability to play our instruments. We will look at postural imbalances, faulty habits, and the reality of maybe just too many hours in the practice room. Through yoga therapy, pilates rehabilitation, aspects of physical therapy, and stress reduction and breathing techniques, each student will be given an individual program of stretching, strengthening and relaxing for optimum health. More than just an exercise routine, these programs will be uniquely designed for each student's needs, and may include modifications in posture, alignment, behaviors, and practice techniques.

Credit Hours

Min Credit Hours:
1

Description

The course is intended as a laboratory to explore the body in relationship to the voice and the voice in relation to the emotional memory of the body. The laboratory will consist of the physical exploration of voice mechanics within the body and its outward projection of different emotional responses. A final project, using the compendium of body/voice relationships encountered, is encouraged.

MPRF612 - Just Intonation Performance Practice

General

Course Long Title
Just Intonation Performance Practice

Subject Code
MPRF

Course Number
612

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

Just Intonation Practicum is a course for performers to learn and explore practical understandings and approaches to just intonation as well as alternative microtonality vocabulary. We will explore approaches based on sonic vocabulary, instrumental structures, and acoustic underpinnings, as well as through existing and new repertoire.

While the primary focus will be on Just Intonation, larger issues of microtonal performance practice and the effects of individual instrumental inharmonicity will also be explored. Available assistive softwares, including the Hayward Tuning Vine, will be an integral part of in-class work, allowing students to develop an understanding of available tools and resources. Additionally the class will involve a thorough exploration of existing notation systems and how to navigate them as a performer.

Description

This course is a series of hands-on workshops exploring the possibilities for percussionists performing with electronic controllers via computer music software, processors, sampling and loop based performance. This course explores the potential and realized impact of electronic controllers in the world of live performance. Members of this class develop the ability to shape sound in ways that are informed by contemporary composition and performance practices. It is the goal of this course that: all participants become empowered electronic musicians/artists; that students be comfortable and adaptable when encountering newly designed controllers, evaluating the possibilities as live performance tools and programming the devices confidently; Students will develop ancillary skills that question the design of existing controllers and may ultimately consider creating their own design for use in live performance settings.

Description

Focused Topic in Vocal Performance: This workshop will focus on facilitating processes of constructing realizations of various 'songs' included in the Song Books, along with an overview of Cage's aesthetics. Students will engage in substantial disciplined creative work, action and research, especially as Cage understood 'research' to mean experimental music making. Course work will include discussion, reading assignments, interpreting and constructing pieces, and performing in class. This work will lead toward public performances and/or installations. It is anticipated that students will gain an understanding of the different types of compositional processes Cage utilized in the Song Books. They also will develop the capacity for intensely disciplined action and creation; will develop an understanding of non-ego based methods of composition and performance; will explore their capacity to develop and work within highly rigorous constraints; will explore electronics as they pertain to the Song Books; will learn how to ask appropriate questions when realizing Cage's work; and will work on the ability to perform in a manner independent of self-expression.

Description

Focused Topic in Vocal Performance: This course focuses on facilitating learning processes and specific techniques necessary for preparing and performing standard twentieth-century and contemporary experimental vocal works, as well as exposes students to a wide range of works and issues. All work will be approached with an adventurous and exploratory spirit, with group and individual exercises and coaching. The class will study and analyze scores and notation, with emphasis on developing practical and informed learning and performing skills. When learning new, challenging and unusual techniques, maintaining a healthy vocal production while

achieving desired results will be emphasized. Course work will include discussion and analysis, practical experimentation, learning and interpreting new techniques and works, in-class coaching and a final project. Some work will lead towards public performance.

Description
Focused Topic in Vocal Performance: Beginning with an historical and contextual study of vocal works that utilize unconventional or atypical texts, students will research and perform representative works while exploring, creating and building works and analyses of their own. The course will involve collective and individual readings of various texts and in-class coaching of works based on such texts, with a large portion of the course devoted to the composition of new pieces/readings/performances based on unusual texts. Collaborative development and performance is highly encouraged. Writers, artists and composers covered may include Filippo Marinetti, Tristan Tzara, Kurt Schwitters, Gertrude Stein, Lewis Carroll, James Joyce, Samuel Beckett, concrete poets, e.e. cummings, John Cage, Luciano Berio, George Aperghis, and others.

Focused Topics in Voice: Dada's Divas

Subject Code	Course Number
MPRF	655B

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
DADA'S DIVAS is a two-semester course (one historical, one performative) dedicated to the (re)discovery of the Dada movement's female pioneers, most of whom have been overshadowed historically by their male counterparts. These women, operating independently of one another, were highly regarded performers, poets, visual artists, writers, actresses, models, feminists, and political activists who lived incredibly interesting lives. Now, 100 years after the birth of Dada, they deserve to have their stories told and their art resurrected.

Taking as its basis the experimental opera and research project "Dada Divas," as well as newly digitized archives and a growing wealth of other resources, this course will delve deeply into the artistic works and lives of Mina Loy, Baroness Elsa von Freytag-Loringhoven, Emmy Hennings, and others. The first semester will begin with a historical study of early twentieth-century artistic and literary movements-Futurism, literary Expressionism, Modernism, various performance movements, and cabaret and its offshoots-and will continue into the birth and early years of Dada. The course will take an interdisciplinary approach from a variety of perspectives including performance and gender studies, literary modernism, and socio-political and cultural history, while relating these subjects to the status of women, immigration, drug addiction, war, and other concerns that are as pressing today as they were when Dada erupted a century ago.

The second semester will be devoted to the development and performance-by class members and guests-of a newly constructed, interdisciplinary, Dada-inspired performance work. In the spirit of Dada's origins, this may take the form of a low-budget "guerilla theatre" event, and may include the performance of already composed as well as newly created works. Appropriate written material will accompany or follow the performance. Students are encouraged to enroll in both semesters of the course.

Description

Readings in Voice Arts:Odyssey of the Voice

Readings in VoiceArts is dedicated to group study of a wide array of voice-related writings, with specific readings chosen each semester from important writings on the study of the voice, evolution and development of the voice and communication, philosophical writings, performance studies, and even, occasionally, literary fiction that is voice-centric. The course requires extensive out-of-class time for reading. Class time will be devoted to discussion and explanation, explication, and analysis. Occasionally, the class may develop creative projects based on the materials read. Topics vary, based on the instructor and student interests, and may include Jean Abitbol's seminal work *The Odyssey of the Voice*, Mladen Dolar's *A Voice and Nothing More*, Catherine Clement and Betsy Wing's *Opera the Undoing of Women*, Adriana Cavarero's *For More than One Voice*, John Potter's *Vocal Authority: Signing Style and Ideology*, Richard Powers' *The Time of our Signing*, and many others.

Fall 2015: Jean Abitbol: *Odyssey of the Voice* is written by the renowned French otolaryngologist, Jean Abitbol, and translated into English. Dr. Abitbol holds an intense and life-long passion for the human voice, clearly apparent in this book which takes us on a journey from the origin of the human voice to the modern day, from grunting to intricately complex classical singing and various vocal techniques of the world. Dr. Abitbol covers a vast array of topics, including the evolution of humans and the voice, anatomy, genetics, the function of the brain in voicing and singing language acquisition and evolution, acoustics, articulation, the voice and emotions, hormones and sex, the aging voice, vocal health, memory, vocal techniques, extended uses and practices of the voice, and ultimately, the mystery of the human singing voice.

Students will read this 500 page book, over the course of a semester, and will conduct outside research on areas of the book that hold relevance or interest to them. Regular written assignments and short in-class presentations will be given. Much class time will be devoted to discussion of the assigned passages, as well as explication of complicated material.

Description

Topics in Performance Studies: Jazz Improvisation for the Vocalist

A course designed for beginner and intermediate vocalists who want to develop skill in jazz improvisation. This course will emphasize the fundamentals of improvisation. Specific attention will be paid to standard jazz forms, including blues and standard jazz repertoire. Topics include articulation, time feel, melodic and rhythmic phrasing, using tone colors, interpretation, motivic development, hearing

basic instrumental patterns, blues patterns, vamps, turnarounds, and II-V progressions. Additional focus will be on improving improvisation skills through application of ear training and harmonic concepts including intervals, scales, and chord patterns.

Special Topics courses offer in-depth treatments of topics in their subject area, and are offered on a one-time or trial basis.

Description

In this class we will examine the profoundly influential and experimental works of John Cage through the performance and discussion of pieces chosen by the class's participants. The often idiosyncratic elements of Cagean performance practice will be addressed through weekly coachings, and a final concert of the works will be presented. Concepts to be addressed might include the realization of indeterminate compositional elements, execution of proportional notation, piano preparation/bowing, graphic score interpretation, various uses of electronics, lecture performance, multimedia performance, etc. The cultural context and general aesthetics of Cage's work will also be explored through various readings and discussion of pieces performed. Performers of non-western and electronic instruments are encouraged to participate.

This class is designed for students who are fluent in reading musical notation.

Description

A practice-based examination of the fretboard theory behind music of the 20th and 21st centuries including, but not limited to, the origins of the blues, bluegrass, folk, pop, rock, alternative, soul and funk as they relate to the electric and acoustic guitar.

We will look at musical forms and stylistic approaches passed down from guitarist to guitarist over the generations, with an emphasis on instrumental and vocal music that does not easily translate to and from the written note.

This is a two-semester course; the first semester is open to non-reading guitarists with an interest in growing their understanding of the fingerboard. The second semester is open to anyone interested in developing an applied modal approach to improvising and composing music traditionally originated from the electric and acoustic guitar.

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

1

Description

The aim of this class is to demystify alternate guitar tunings by combining hands-on experience with theoretical analysis and a thorough understanding of the instrument's history. 'Scordatura' (literally meaning 'mistuning') first appeared in German violin repertoire in the 1700s. However, all over the world, instruments were intuitively tuned to what worked and sounded best. We will explore a range of commonly used tunings and understand their strengths and weaknesses. The tuning we will explore most in depth is DADGAD, which has become the 'standard of open tunings' due to its popularity and versatility in playing in various keys.

a few examples of tunings we'll explore are:

Open D tuning - DADF#AD - probably best known from Joni Mitchell's "Big Yellow Taxi"

Open G tuning - DGDGBD - known as "Taro Patch" tuning in the Hawaiian "ki ho'alu" - Slack Key tradition. Rolling Stones guitarist Keith Richards uses it in quite a few of their songs, such as "Start Me Up" and "Brown Sugar".

Open C tuning - CGCGCE - used by Led Zeppelin, John Butler and Soundgarden.

CGDAEG, an approximation of an all-fifths tuning. It provides a very interesting range and chord

voicings, but most importantly: once familiar with this tuning, a guitar player can pick up a mandolin or bouzouki and not feel lost.

Description
Fundamentals of plectrum and fingerstyle guitar. Highly recommended for students interested in learning the basics in electric, steel string and nylon string guitar performance. This class serves as a foundation for the techniques, terminology and musical vocabulary that will assist any beginning or self-taught guitarist in having a sustainable, lifelong relationship with the instrument. We will work together to discover healthy approaches to technique, as well as the basic chord shapes, scales, strumming and finger-picking patterns that form the foundation of guitar performance across a variety of styles. Students can expect to learn song structures, 'riffs', and chord progressions in a number of genres and from a wide selection of musical eras. Open to complete beginners, or to self-taught players who would like to build a solid foundation around the things they might already know.

UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Sound design for moving images is a class to explore the different sound components needed to create sound design for different types of projects, mostly focused on moving images, such as animation, tv, film and audiovisual art installations, any environment where there is a visual relationship to the sound, and the sound it self is not the only component of the artistic piece. This course is mostly focused in covering the conceptual and technical aspects of sound in the related fields, rather than covering historical aspects.

The course will be focused on understanding and practicing audio technical skills, while at the same time will cover artistic approaches to the different styles where sound design can be applied. It will be focused on non Dialogue sound design editing and mixing, but basic Dialog treatment will be covered.

School(s)
School of Music

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1.5

Description

How do machines see, and what does it mean to be seen by a machine? In this course, we dissolve the boundary between the human body and the computational gaze, exploring computer vision as an emergent collaborator. We will explore the historical, artistic, and critical contexts of computer vision in the arts. Through the interplay of MediaPipe and TouchDesigner, we will choreograph interactions between the face, hands, body, and space, forging new relationships between movement, image, and sound. We will investigate how vision--once the domain of the human eye--can become an instrument of abstraction, distortion, and resonance. Drawing from contemporary art, experimental music, and performance, we will craft dynamic, camera-driven experiences: faces melting into glitch, hands conjuring audiovisual textures, bodies composing in space. This is not just an introduction to computer vision--it is an invitation to inhabit new spaces, where the machine does not merely capture, but interprets, transforms, and reimagines the body and objects.

Credit Hours

Min Credit Hours:

2

Description

In this course we will examine the history of various styles of electronic dance music from the '70s to present time. We will learn where these genres came from, and how they led to the development of modern day dance music styles. We'll also explore the various production methods and equipment used to create these genres and dive into what made them unique. In the class students will compose different pieces as we move through the evolution of different moments in dance music history learning how one style or city influenced the sound and culture of an entire planet. Over the years I have been fortunate enough to travel the world learning first hand from legendary producers and have been lucky enough to perform and collaborate with many of them. Let's learn from these pioneers who have paved the way and create the next wave of electronic dance music together.

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

In this course students will learn how to master music for digital platforms. We will learn what mastering is, the history of various mastering techniques and which modern tools work best for our individual needs. Through exploring all the options modern dsp and hardware have to offer, we will learn how to simplify these options to best fit our workflow and to make our music sound the best it can. Taught by a mastering engineer over 25 years in the business, John Tejada's client list includes Ghostly, Warp, Umor Rex, and Brainfeeder. He's also mastered releases for artists including Paul Hartnoll (Orbital), Plaid, Geotic, Frank Bretschneider, Daedalus, Shackleton, and Gudrun Gut, among others, in styles ranging from electronic to experimental

Prerequisites: Must have taken "Intro to sound production" and have a working knowledge of electronic music production with a DAW or hardware.

LEARNING GOALS

- 1.Demystifying what mastering is. Learning through weekly practice and example.
- 2. Gain an understanding of modern mastering and tools used.
- 3. Learn how to master various genres and styles
- 4. Master music with confidence and have a true understanding of how to achieve this goal.

Credit Hours

Min Credit Hours:
2

Description

This course explores the intentional design of socio-technical systems through the use of AI as a design material. Students will prototype AI projects through ethical and sociocultural lenses.

In exploring systems-thinking and artificial decision-making, the course draws on natural systems and different forms of natural intelligence and knowing to imagine new technological worlds and new dimensions to our own.

Students will learn critical prototyping techniques and AI basic concepts. The course will engage in ethical design conversations rooted in the challenges of AI: transparency, accountability, and inclusion of - and impact on - a multitude of lived experiences.

This course will use the social tech design tool poieto, as well as generative art and prototyping tools like Wekinator, Runway-ML, Teachable Machine, Processing, and p5/ML5 to craft projects throughout the semester. As part of critical prototyping explorations, students will be introduced to microcontrollers. Students will hear from experts in the AI Art and AI Industries as well as poieto community members sharing work crafted with the poieto tool. Students will produce two individual AI Art projects, and a shared group project.

No Requirements

input data to optimize towards a certain task.

In this class, we will look at the uses of ML as a way to deepen our relationship with sound and music production. Particularly we will look at machine learning techniques that focus on machine and human collaboration rather than ML models as solely an open "toolbox" for new sound techniques. This class will learn how to organize and work with large sound datasets, generate new raw audio with neural networks, work with existing plug-ins that have machine learning capabilities, as well as generate midi and compositional structure by training our own AI models. It will be a series of hands-on workshops, critical discussions, and investigations of generative sound techniques where we will build our own projects (whether sound art installations, musical compositions, electronic music production, or interfacing Machine Learning sound models on the web).

While this isn't a programming course, experience with sound production techniques, digital audio workstations, and a basic understanding of programming concepts are required, as we will need to be able to go into the code and steer the models toward artistic goals. There will be a series of technical mini-projects as well as a final project of the students own choosing.

Requirements:

Some basic knowledge of sound production/ audio concepts.
A basic grasp of programming concepts: variables, strings, functions, object oriented programming: Intro To Programming or some kind of programming equivalent.

General

Course Long Title
The Art of Recording

Subject Code Course Number
MTEC 504

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
The Art of Recording will provide both a practical and theoretical introduction to working with sound as musical material in a recording studio.

Students will learn how to listen critically and creatively and to use their ears when generating, manipulating and recording sounds. Students will learn the fundamentals of both analog and digital audio recording; acoustics; signal chain assembly; gain-staging; mixing-console orientation; microphone usage/placement; and working with Pro Tools. Practical, studio-based workshops will demonstrate methods of working with out-of-the box sounds and recording techniques that emphasize thoughtful and committed creative decision making (including minimalist drum mic-ing, working with 4-track tape recorders, DIY reverb, and MIDI-clocked analog electronic instruments).

Students will complete several studio-based practical exams, as well as having the opportunity to create small recording projects that encourage sonic exploration and experimentation. The emphasis in all projects will be on generating engaging sounds in the room and choosing and placing microphones to capture these sounds, rather than relying on post-production signal processing or plug-ins.

This course is appropriate both for students who already have experience recording in a DAW as well as those who have never picked up a microphone before.

Description

Sound design for moving images is a class to explore the different sound components needed to create sound design for different types of projects, mostly focused on moving images, such as animation, tv, film and audiovisual art installations, any environment where there is a visual relationship to the sound, and the sound it self is not the only component of the artistic piece. This course is mostly focused in covering the conceptual and technical aspects of sound in the related fields, rather than covering historical aspects.

The course will be focused on understanding and practicing audio technical skills, while at the same time will cover artistic approaches to the different styles where sound design can be applied. It will be focused on non Dialogue sound design editing and mixing, but basic Dialog treatment will be covered.

Description
This course will be looking at different methods for working with sound in mixed reality applications. Topics covered include C# programming for working with Audio inside Unity, spatialized audio in Virtual Reality and Augmented Reality applications, working with reverb zones and audio effects in Unity, and utilizing Unity's existing audio tools to refine and customize audio applications for mixed reality XR applications.

Students will learn the basics of C# scripting for interacting with game objects and components within the Unity Game Engine. By the end of the course, students will be able to build or extend customizable components for making audio applications within Unity. By doing so they will extend that knowledge to building sound based virtual reality apps and Augmented Reality applications using the in built Unity tools. Students will also learn how middleware audio softwares can work with Unity using Audiokinect WWise. Intro to Programming(or some equivalent of a beginner programming course) is required in order to take this course. C# experience is not required, but an understanding of functions and object oriented programming concepts is required.

Description

This course provides a comprehensive introduction to TouchDesigner, a leading platform for interactive visual design. Students explore audio reactivity and dynamic visuals, introduction to 3D modeling and rendering, essential TouchDesigner components and workflows, and building interactive, real-time visual systems. No prior TouchDesigner experience is necessary. This course is perfect for artists, designers, and creatives seeking to harness the potential of interactive visuals.

Course Long Title
Media & Web Development

Subject Code Course Number
MTEC 617

School(s) Program(s)
School of Music Music Technology

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

This course provides an introduction to the process of modern web development. Each student will learn the basics of HTML, CSS, and JavaScript and how to combine them into a functioning portfolio website. Students will learn how to work with rich media sources, create dynamic animations, and deploy content to the web using free and open source tools. In addition, students will explore modern development tools like Github, Visual Studio Code, CMS (content management systems) like Wordpress, Contentful and others. We will also explore how to deploy virtual machines (VM's) on cloud servers (Google, Amazon AWS) to host our web applications and infrastructure. Furthermore, throughout the course, students will also gain essential skills in uploading, managing, and analyzing media content online, enabling them to effectively showcase their work and track its performance in the digital landscape.

MTEC618 - Algorithmic Art and Design

General

Course Long Title
Algorithmic Art and Design

Subject Code Course Number
MTEC 618

School(s) Program(s)
School of Music Music Technology

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description

Learn interactive system design in TouchDesigner, exploring algorithmic art, generative visuals, and dynamic simulations. Develop skills in audio reactivity, image processing, data visualization, and the basics of projection mapping to craft immersive, sensor-driven installations and innovative interactive experiences.

Credit Hours

Min Credit Hours:
1.5

Description

How do machines see, and what does it mean to be seen by a machine? In this course, we dissolve the boundary between the human body and the computational gaze, exploring computer vision as an emergent collaborator. We will explore the historical, artistic, and critical contexts of computer vision in the arts. Through the interplay of MediaPipe and TouchDesigner, we will choreograph interactions between the face, hands, body, and space, forging new relationships between movement, image, and sound. We will investigate how vision--once the domain of the human eye--can become an instrument of abstraction, distortion, and resonance. Drawing from contemporary art, experimental music, and performance, we will craft dynamic, camera-driven experiences: faces melting into glitch, hands conjuring audiovisual textures, bodies composing in space. This is not just an introduction to computer vision--it is an invitation to inhabit new spaces, where the machine does not merely capture, but interprets, transforms, and reimagines the body and objects.

MTEC655 - Adv Sound Synthesis: Physical Modeling

General

Course Long Title
Adv Sound Synthesis: Physical Modeling

Subject Code Course Number
MTEC 655

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

This course builds off of the foundations presented in Intro to Computer Music. Advanced synthesis (and analysis) techniques, including Modal synthesis and Fourier Analysis, Waveguide Physical Model synthesis of Strings and Winds, and Formant models for voice and other resonance-dominated systems. Also covers control of synthesis models, and Physics-based audio effects

Course Long Title

Intro to Sound Production

Subject Code

MTEC

Course Number

668

School(s)

School of Music

Academic Level

GR - Graduate

Credit Hours

Min Credit Hours:

2

Description

This course provides a basic understanding of working with a digital audio workstation. Students will learn proper gain staging, where and how distortion enters recordings, how to set levels and panning, effective sub group mixing, and an introduction to signal processing such as equalization, compression, delay, and reverb. In addition to core audio and mixing concepts, students will learn various production techniques, such as sequencing, using virtual instruments (e.g. synth and drum machine plugins), working with MIDI, plugin formats such as VST/Audio-Units, and mapping digital USB controllers. Additionally, introductory analog/digital audio theory will be covered, and other topics such as loudness and mastering will be discussed.

Credit Hours

Min Credit Hours:

3

Description

Open to Music Technology Program students only. Course open to Music Technology Program students only. The MFA in Music Technology Final Project serves as the culmination of the degree program, synthesizing several distinct components into an integrated whole. Candidate's research, hands-on practices, technological studies and experiments, theoretical work, teaching, and interdisciplinary elements are all combined in order to create a technologically sophisticated creative work. Work is expected to be of the highest level, to be uniquely innovative, and to marry research, development and creativity. The project may culminate in a performance, installation and/or event, and must be accompanied by a paper suitable for publication in a peer-reviewed journal and a professional-level portfolio. Students are expected to work on this project throughout their enrollment at CalArts.

Description
This course explores advanced electronic musical production techniques covering sound design, mixing and mastering. Various electronic based musical genres and production techniques from different decades will be explored, taking into account the technical and aesthetic considerations needed to develop new skills across the production process, from sound design to mixing to live performance. This advanced course will incorporate workshop elements aligning with the personal goals of the students, giving a practical and real-world context to the course and coursework. Students will leave confident in expressing their musical ideas, helping strip away some of the intimidating mysticism surrounding going from a bedroom producer to an active working artist.

Prior experience with digital audio production is required.

Credit Hours

Min Credit Hours:
2

Description
This course explores the intentional design of socio-technical systems through the use of AI as a design material. Students will prototype AI projects through ethical and sociocultural lenses.

In exploring systems-thinking and artificial decision-making, the course draws on natural systems and different forms of natural intelligence and knowing to imagine new technological worlds and new dimensions to our

own.

Students will learn critical prototyping techniques and AI basic concepts. The course will engage in ethical design conversations rooted in the challenges of AI: transparency, accountability, and inclusion of - and impact on - a multitude of lived experiences.

This course will use the social tech design tool poieto, as well as generative art and prototyping tools like Wekinator, Runway-ML, Teachable Machine, Processing, and p5/ML5 to craft projects throughout the semester. As part of critical prototyping explorations, students will be introduced to microcontrollers. Students will hear from experts in the AI Art and AI Industries as well as poieto community members sharing work crafted with the poieto tool. Students will produce two individual AI Art projects, and a shared group project.

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description
This course is a survey and a series of hands-on workshops exploring the critical, speculative, and also practical ways of applying Artificial Intelligence to working with sound and musical composition. In particular, we will be focusing on using Machine Learning models that learn from input data to optimize towards a certain task.

In this class, we will look at the uses of ML as a way to deepen our relationship with sound and music production. Particularly we will look at machine learning techniques that focus on machine and human collaboration rather than ML models as solely an open "toolbox" for new sound techniques. This class will learn how to organize and work with large sound datasets, generate new raw audio with neural networks, work with existing plug-ins that have machine learning capabilities, as well as generate midi and compositional structure by training our own AI models. It will be a series of hands-on workshops, critical discussions, and investigations of generative sound techniques where we will build our own projects (whether sound art installations, musical compositions, electronic music production, or interfacing

Machine Learning sound models on the web).

While this isn't a programming course, experience with sound production techniques, digital audio workstations, and a basic understanding of programming concepts are required, as we will need to be able to go into the code and steer the models toward artistic goals. There will be a series of technical mini-projects as well as a final project of the students own choosing.

Requirements:

Some basic knowledge of sound production/ audio concepts.
A basic grasp of programming concepts: variables, strings, functions, object oriented programming: Intro To Programming or some kind of programming equivalent.

Description
The purpose of this course is to learn to be fluent as well as notate in sargam (solfege) through a combination of vocal paltas/alankars (exercises), composition, and analytical listening. Sargam is the language at the core of all vocal and instrumental music, and the key to learning any language is immersion in it. We will explore the music across a variety of ragas (melodic modes) and talas (rhythmic cycles). The material will be set to both Sargam and traditional wording such as hindi, sanskrit and percussive syllables such as Tarana.

Credit Hours

Min Credit Hours:
2

Description
The goal of this course is to help students to not be afraid of any kind of music they encounter. Cross-stylistic strategies of identifying musical material are used towards this end, including octave equivalence, Jazz hearing, set-theory, microtonality, extended harmonic function, third-relations, and an awareness of psycho-acoustic effects. Recognizing that we all hear differently, this course tries to help each student develop a personalized array of tools that can help them approach any kind of music with a philosophy of active amusement. Sub-topics will be cross referenced with sight-singing, notation, analysis, and a relatively humane sense of dictation. Rapid frame-shifting will be practiced. The book Modus Novus will be revered, hated, and then revered again. Frequent short quizzes and small group breakout sessions are designed to further individualize a healthy, bemused relationship between theory and practice.

Rhythm: a Global Perspective

Subject Code

MTHY

Course Number

220

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

2

Description

This class is designed to teach rhythm from a broader, global perspective by examining rhythmic concepts, devices, structures and approaches found in music cultures from around the world. In studying varying facets and approaches (as well as converging universal properties) of rhythm, the student will hopefully gain a deeper understanding of how rhythm functions, and how these ideas can reinforce and enhance their own individual work as a performer, composer, improviser, etc., as well as building a strong foundation in the practical ability to demonstrate these ideas.

Each class will be structured as a lecture/workshop with active class participation (singing, clapping, and/or playing) at the core. Each lecture topic will then culminate in an assigned project utilizing, demonstrating, and/or applying those specific ideas in the student's own creative work.

Topics may include (but are not limited to):

.Universal rhythm concepts
.Rhythm as shape and perspective
.The building blocks of rhythm: 2's and 3's and the binary nature of rhythm
."Additive rhythms", and odd-meter
.South Indian rhythmic solfege (Solkattu), and North Indian rhythm concepts

.Rhythm as language and movement
.Quantized and non-quantized approaches to rhythm
.Examining ideas such as "feel" / "swing" from multiple perspectives from around the world
.Polyrhythm
.Metric modulation
.Examining western and American musical idioms, and how they have and continue to evolve through incorporating and synthesizing world music rhythmic concepts
.Comparing and contrasting Aural/oral traditions with written ones, their convergences and divergences, strengths, benefits (as well as deficits), and finding relevance and use, and a personal connection with these ideas. At the same time increasing rhythmic ability, expressiveness, and literacy. Hearing, learning, and understanding music through various perspectives, being open and receptive to "new" ideas, influences, and sounds from the world around us

Description

How can we parse and make sense of the varied sonic phenomena that comprise our world? Can we build a vocabulary that helps us recognize and recall its components, like frequency, duration, and form, as accurately as we do those described as music? How does building this vocabulary help us make sound-based art? Drawing on ideas borrowed from studies in soundscapes, deep listening, and others, we will analyze different musics, field recordings, and our

surrounding environment, and use these tools to make new work.

Students have the option to co-register for MHST 425-01 / 525-01 Survey of Sound Art and MSCM-310 / MTHY-510 - ACOUSTICS: Applied Physics for Musicians and complete a cluster project for this course.

MTHY

Course Number

307

School(s)

School of Music

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

1.5

Description

This course will focus on analyzing basic elements of a musical structure and then applying that analysis in practice through singing. This will be done through rhythmic and melodic exercises, listening and dictation. The repertoire will consist of solo vocal excerpts and choral excerpts. The main goal is developing strong awareness of musical elements in order to learn the music faster and with more understanding of the whole score.

School of Music

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

2

Description

Meaningful Interpretation is conceived as a semester-long examination of the effect of musical narrative on the listener, and the

critical role that the performer's skills play in eliciting that understanding between composition and audience. It is expected that this examination will culminate in an understanding of the basics of musical interpretation - shaping a phrase in tonal music as a starting place - together with a global understanding of music's relationship to organic forms and the human experience to express a compelling and charismatic point of view in live performance.

Part 'analysis for performers', part score study, part historical perspective, the course includes both ensemble and solo playing/singing in a practical application of the skills developed throughout the semester.

Description

Let's make use of the results of acoustical research concerning the various phenomena constituting the timbre of tuned compound sounds (as first described in 1863 by the physicist Hermann von Helmholtz in his historic book 'On the Sensations of Tone as a Physiological Basis for the Theory of Music'), of Harry Partch's 'language of frequency ratios' ('Genesis of a Music') and of James Tenney's concept of harmonic space ('John Cage and the Theory of Harmony')! This experimental hands-on tuning workshop with instrumental and computer sounds (with students playing their instruments) will set out to expand the ear's analytical hearing capabilities (training the awareness of partial unisonos, difference tones, and beats) and explore the sonorities of microtonal just intonation, methods for refining instrumental tuning and ensemble playing techniques, and possibilities for their musical application. The course will offer a review of the complete curriculum for the theory of harmony (with a focus on just intonation and its microtonal implications) and an overview of the history of intonation in Western music.

Description

The goal of this course is to help students to not be afraid of any kind of music they encounter. Cross-stylistic strategies of identifying musical material are used towards this end, including octave equivalence, Jazz hearing, set-theory, microtonality, extended harmonic function, third-relations, and an awareness of psycho-acoustic effects. Recognizing that we all hear differently, this course tries to help each student develop a personalized array of tools that can help them approach any kind of music with a philosophy of active amusement. Sub-topics will be cross referenced with sight-singing, notation, analysis, and a relatively humane sense of dictation. Rapid frame-shifting will be practiced. The book Modus Novus will be revered, hated, and then revered again. Frequent short quizzes and small group breakout sessions are designed to further individualize a healthy, bemused relationship between theory and practice.

Description
A course designed to improve listening, understanding and appreciation of electroacoustic music.

Through an integrated curriculum of listening, analyzing, reading, and vocalizing, course participants will gain greater facility in their ability to perceive and describe elements of electroacoustic music. We will use a form of analysis called Spectromorphology to examine, in detail, selected examples from a wide variety of electroacoustic music. We will discuss and apply different modes of listening and analysis (as described by Pierre Schaeffer, Michel Chion,

James Tenney and others) as well as applicable elements of psychoacoustics and use them to improve our real-time auditory skills.

Description

Meaningful Interpretation is conceived as a semester-long examination of the effect of musical narrative on the listener, and the critical role that the performer's skills play in eliciting that understanding between composition and audience. It is expected that this examination will culminate in an understanding of the basics of musical interpretation - shaping a phrase in tonal music as a starting place - together with a global understanding of music's relationship to organic forms and the human experience to express a compelling and charismatic point of view in live performance.

Part 'analysis for performers', part score study, part historical perspective, the course includes both ensemble and solo playing/singing in a practical application of the skills developed throughout the semester.

School(s)
School of Music

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

This class is designed to teach rhythm from a broader, global perspective by examining rhythmic concepts, devices, structures and approaches found in music cultures from around the world. In studying varying facets and approaches (as well as converging universal properties) of rhythm, the student will hopefully gain a deeper understanding of how rhythm functions, and how these ideas can reinforce and enhance their own individual work as a performer, composer, improviser, etc., as well as building a strong foundation in the practical ability to demonstrate these ideas.

Each class will be structured as a lecture/workshop with active class participation (singing, clapping, and/or playing) at the core. Each lecture topic will then culminate in an assigned project utilizing, demonstrating, and/or applying those specific ideas in the student's own creative work.

Topics may include (but are not limited to):
.Universal rhythm concepts
.Rhythm as shape and perspective
.The building blocks of rhythm: 2's and 3's and the binary nature of rhythm
."Additive rhythms", and odd-meter
.South Indian rhythmic solfege (Solkattu), and North Indian rhythm concepts
.Rhythm as language and movement
.Quantized and non-quantized approaches to rhythm
.Examining ideas such as "feel" / "swing" from multiple perspectives from around the world
.Polyrhythm
.Metric modulation
.Examining western and American musical idioms, and how they have and continue to evolve through incorporating and synthesizing world music rhythmic concepts
.Comparing and contrasting Aural/oral traditions with written ones, their convergences and divergences, strengths, benefits (as well as deficits), and finding relevance and use, and a personal connection with these ideas. At the same time increasing rhythmic ability, expressiveness, and literacy. Hearing, learning, and understanding music through various perspectives, being open and receptive to "new" ideas, influences, and sounds from the world around us

General
Course Long Title
Topic-Driven Research

Subject Code MTHY	Course Number 750
School(s) School of Music	
Academic Level DR - Doctorate	
Credit Hours Min Credit Hours: 1.5 Max Credit Hours: 6	
Description Course open to Music School students only. Topic-Driven Research is an independent-study project that will provide the basis for the	

material tested during the written and oral examinations, while simultaneously laying the foundation for the Doctoral Project. In consultation with a faculty mentor and the Doctoral Advisory Committee, key research areas will be identified that are relevant to the interests and foci of the student's work. Intensive guided research and study of these topics will inform ongoing creative work, and constitute an intellectual and practical foundation for it. Topic-driven research will promote wide-ranging and deep knowledge appropriate to each student's creative interests and objectives.

School of Theater Department

Dedicated to the development of new voices and new forms, CalArts is one of the preeminent theater training grounds in the country, designed to educate the whole person and to prepare fully equipped theater artists to transform the field.

The School of Theater offers students an educational experience that is experimental, interdisciplinary, international, and diverse. Each unique Program gives students the flexibility, skills, and critical thinking tools to navigate a rapidly changing field and to pursue their professional goals with maximum agency.

Our educational mission is to forge a community of citizen artists who are rigorously trained in their respective métiers and who are able to work effectively and innovatively across a broad spectrum of artistic settings, media, and technologies. As the School is based in Los Angeles, the epicenter of film and media production, the training gives considerable attention to students having the versatility to succeed in a variety of arenas.

Theater students are especially encouraged to build professional experiences and relationships while in school, mining every opportunity for them to create effective careers after graduation. The CalArts Center for New Performance, the Institute's professional producing arm, embodies the School's firm commitment to open exactly such possibilities for talented, ambitious students.

TACT.BFA - Bachelor of Fine Arts - Acting

General

Program Title	School	
Bachelor of Fine Arts - Acting	School of Theater	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts Undergraduate		50.0506

Program Description

4-Year Program The intensive BFA Acting Program prepares students for the demands of a professional acting career across a variety of media. The objective is to nurture visionary actors who can work on stage, film, television and in the exciting world of new-media platforms. Based in classical actor training, this Program focuses on the tools needed to succeed in the shifting landscape of the 21st century. Rigorous classes in acting, voice, speech, movement and theatrical production are augmented by a wide range of performance and production experiences-each tailored to the individual needs of the student. The curriculum is structured progressively with a strong emphasis on movement and physical expression as a means to unlock the imagination. First-year students study and perform significant texts of the American canon. Focus is given to developing process and technique while expanding imagination and artistry. The second year is devoted to the study of classical text in performance. In addition, there is an increased focus on defining, developing and deepening craft and individual vision. In the third year of training, students engage the modern classics as well as contemporary and world dramatic literature. The third and fourth years are devoted to on-camera technique as well as advanced scene study, all meant to address the growing importance of media to the actor. All BFA Acting students are required to pass a Mid-Residence and Graduation Review in order to complete the Program and obtain the BFA degree.

TACT.MFA - Master of Fine Arts - Acting

General

Program Title	School	
Master of Fine Arts - Acting	School of Theater	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0506

Program Description

3-Year Program The Acting MFA is designed for advanced actors who are adventurous, imaginative and highly motivated. Training prepares students for the demands of a professional acting career across all media-from traditional to emerging. The curriculum focuses on all facets of the actor's art and technique, striving to question commonly held assumptions about theater while exploring new possibilities. Rigorous classes in acting, voice, speech, movement and theatrical production are augmented by a wide range of performance and production experiences-each tailored to the individual needs of the student. The curriculum is structured progressively, beginning with particularly strong emphasis on movement and physical expression as a means to unlock the imagination. Later on, training is devoted to on-camera technique as well as advanced scene study. The final year is balanced between the deepening of craft and imagination and the practical preparation for a career in performance. MFA Actors are required to pass a Graduation Review to complete the Program and obtain the MFA degree.

TDIR.MFA - Master of Fine Arts - Directing

General

Program Title	School	
Master of Fine Arts - Directing	School of Theater	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0507

Program Description

3-Year Program In addition to MFA Directing-specific seminars and labs, students participate extensively in the Acting Program as well as in the Programs in Design and Production. They are further encouraged to take classes offered by other CalArts schools. Many MFA candidates engage in interdisciplinary collaborations with students throughout CalArts, while others take advantage of the many internship opportunities offered from the Institute. MFA Directors are required to pass a Graduation Review and submit a Thesis to complete the Program and obtain the MFA degree

Directing

Free Form Requirements

Residency Requirement for the School of Theater

The Bachelor of Fine Arts and Certificate of Fine Arts Programs in the School of Theater are four-year programs, consisting of eight (8) full-time semesters of study. The Master of Fine Arts and Advanced Certificate of Fine Arts are three-year programs, consisting of six (6) full-time semesters of study.

Directing Program (Graduate Only)

By the time they graduate, Directing students will exhibit:

- A defined, deepened, and expanded development of their individual aesthetic terrains.
- Engagement with a variety of aesthetic and practical approaches that have challenged and expanded their unique perspectives, and have embraced an openness to that which is alien.
- An understanding of principles in multiple areas necessary for effective direction: acting, dramaturgy, and design.
- Development of the communication skills needed to work effectively with collaborators coming from disparate disciplines.
- Development of acute analytical skills.
- Engagement in practical production activity in the context of a disciplined conceptual framework.
- The ability to lead effectively in complex production situations and a profound awareness of the obligations and responsibilities that are attendant in the director's leadership role, including providing ethical leadership of their processes.
- An understanding of the foundation of the discourse and practice of film, video, and the visual arts in acknowledgement of the increasing importance of the media to a director's work.
- An understanding of where their work exists within the context of contemporary social, cultural, and intellectual discourse.

TDPR.BFA - Bachelor of Fine Arts - Design and Production Program

General

Program Title	School	
Bachelor of Fine Arts - Design and Production Program	School of Theater	
Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0502

Program Description

4-Year Program In the first two years, the BFA core curriculum is structured to expose students to the fundamental concepts and skills used by theater artists, fostering a sustained dialogue between thinking and making. In keeping with the School's commitment to trans-disciplinary study, the core years are anchored in a series of project-driven Theater Studio Labs, in which students examine approaches to design thinking, visual communication and aesthetics, and explore ideas of "theater" as an expanded field. The core curriculum is intended to provide the foundation for advanced study in the métier practice of the student's choice. Transfer and upper-division undergraduates work with their mentors to create training programs tailored to each student's individual needs and interests. The curriculum is highly individualized, with core program requirements serving as a framework for further studies customized to meet each student's goals and ambitions. All BFA Design and Production students are required to pass a Mid-Residence and Graduation Review in order to complete the Program and obtain the BFA degree. Students may specialize in one or more of the following areas: Scene Design Costume Design Lighting Design Sound Design Technical Direction Experience Design/Themed Entertainment

TEDP.BFA - Bachelor of Fine Arts - Experience Design & Production

General

Program Title	School
Bachelor of Fine Arts - Experience Design & Production	School of Theater

Degree	Program Level	CIP Code (National ID)
BFA - Bachelor of Fine Arts	Undergraduate	50.0502

Program Description

Curricula for the Programs in Experience Design and Production consist of classroom studies and hands-on studio and production work. Entering BFA students are required to complete a common set of foundation courses that cover aesthetics, theory, history, literature, graphics, technology, and crafts. Transfer and upper-division undergraduates work with their mentors to create training programs tailored to each student's individual needs and interests. The curriculum for each métier area is highly individualized, with core program requirements serving as a framework for further studies customized to meet each student's goals and ambitions.

Upon graduation, successful BFA Experience Design and Production candidates will be able to:

- Demonstrate a critical understanding of the historical and cultural foundation of theatrical and arts practices, as well as knowledge of the contemporary arts landscape.
- Effectively explain their work, and to present concepts skillfully in writing and through visual or aural communication.
- Work professionally, responsibly, and collaboratively within the challenges of a variety of projects while contributing a vibrant, creative voice.
- Demonstrate a body of original work, created in the classroom and in production, which shows an expressive understanding of design for performance processes and a personal aesthetic platform upon which to build.
- A demonstrable competency in the technological principles and techniques of the practiced area of specialization, along with ambition to explore new innovative methods, materials, and outcomes.
- Demonstrate a basic knowledge of allied theatrical disciplines (scenery, costume, lighting, sound, media) promoting an awareness of the complexity of problem-solving issues each may encounter, and the dissolution of conventional hierarchies.

Free Form Requirements

Métier Requirements: BFA Experience Design and Production

- take 8 semesters of Production TDAP 395 Production
- take 8 semesters of Seminar TDAP 320 Seminar
- TAIC 100 Conversations in Contemporary Theater
- TAIC 300 Survey of World Theater-Text (required in the 2nd year)

Eight units from the following

- TFND Studio Labs (4 per semester) choose from the following:
- TFND-110D Light Lab
- TFND 110H Theatrical conventions
- TFND 110K Costume Tech: Torso Sloper
- TFND 110L Body Padding & Rigging for 3-D
- TFND 110N Their*Story
- TFND 110P Basic Sound Kit
- TFND-110Q Papier Mache Sculpture
- TFND 115B Ode to Paul Thek
- TFND 115J Where Do Good Ideas Come From?
- TFND 115K Ode to Paul Thek Part 2
- TFND 115L Substitute Objects
- TFND 125A WordRobe
- TFND 125B Alphabet City
- TFND 125C Barbeque
- TFND 125D Look At This
- TFND 125H Creative Listening
- TFND 125J Intro to Virtual Reality

- TFND 125K Epistolary Room
- TFND 125N Draw/Write/Read Sound
- TFND 125O Lost and Found Sounds
- TFND 125P Fear and (C)loathing
- TFND 125Q Research Methods for Designers
- TFND 125R Speaking Through Light
- TFND-125S Clothing and Language

TFND 195 Production Orientation

TDAP 450 Closure

TWNT 300 Winter Session (every Spring that it is offered)

Three units selected with mentor from the following: *(required in the 3rd year)*

- TAIC 305 Survey of World Theater - Performance Tactics
- TAIC 310 Arts and Activism
- TAIC 315 Art and Community Engagement

BFA Undeclared Design Specialization

Although specializations are an option (see below) , it is not required to choose one in order to complete the Experience Design and Production Program . Many designers thrive in an open curricula structure which offers the opportunity to expand one's vocabulary in the broad field of design for performance with the freedom to explore a variety of metier practices including costume, scenic, video, lighting, management, technical direction and sound. We encourage this! Any combination of these metier practices can provide a rich foundation for a future career in the performing arts, location-based entertainment, experience design, film and television and other related and (sometimes) unusual career paths.

MÉTIER REQUIREMENTS

- **Eight units from TFND Studio Labs, see full list above*

complete 15-18 units from the following Metier courses or equivalent substitutes:

- TCOS 210-211 Costume Design Methodology
- TCOS 100, 101 Costume Techniques I
- TSCE 201 Scene Design 1
- TSCE 110 Undergrad Techniques in Design
- TIMM 440 Digital Rendering or TIMM 444 Digital Drawing
- TLTG 210 Lighting Design I: The Design Process
- TSND 121 Sound/Music/Noise Design
- TMSM 100 Basic Stage Management
- TTDI 105 Stagecraft I
- *Complete 4 courses from the following list:*
- TIMM 210 Intro to Sketch up
- TSCE 301 Environments in Motion
- TSCE 302 Worlds at Play
- TCOS 362 Costume Design in Animation
- TLTG 235 Environmental Lighting
- TLTG 425 Immersive Lighting
- TIMM 315/325 AutoCAD 1 + 2
- TSND 211 Research-Based Sound

- TIMM 360 VectorWorks for Lighting/Sound
- TIMM 322 Healthcare by Design
- TIMM 230 Digital Fabrication
- TTDI 410 Parametric Drafting
- TVID 420 Creating for AR
- TVID 450 Creating for VR

- Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

BFA Costume Design Specialization

Sensitive to the art of performing, to the coordination of visual effects, to the expressions of the written and unwritten word, to the cultural anthropology of clothing, and to the techniques of manufacture, students undertake pre-professional studies in costume design, drawing and rendering, history, and related technologies.

MÉTIER REQUIREMENTS

- **Eight units from TFND Studio Labs, see full list above*
- TCOS 100, 101 Costume Techniques I + II
- TCOS 210, 211 Costume Design Methodology
- *Minimum of 2 drawing and/or digital drawing courses*

- TIMM 440 Digital Techniques
- TIMM 442 Digital Techniques II
- *Complete 4 courses from the following list:*

- TIMM 210 Intro to Sketch up
- TSCE 301 Environments in Motion
- TSCE 302 Worlds at Play

- TCOS 362 Costume Design in Animation
- TLTG 235 Environmental Lighting
- TLTG 425 Immersive Lighting
- TIMM 315/325 AutoCAD 1 + 2

- TSND 211 Research-Based Sound
- TIMM 360 VectorWorks for Lighting/Sound
- TIMM 322 Healthcare by Design
- TIMM 230 Digital Fabrication
- TTDI 410 Parametric Drafting
- TVID 420 Creating for AR
- TVID 450 Creating for VR

- Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

BFA Lighting Design Specialization

In a specialization committed to both artistry and technology, students gain a firm understanding of the lighting design process, from the development and articulation of a conceptual approach, to plot making, to the creation of the realized work onstage. They broaden their experience with additional projects in film, video, dance, and art.

MÉTIER REQUIREMENTS

Eight units from TFND Studio Labs, see full list above

- TLTG 210 Lighting Design I: The Design Process
- TLTG 215 Lighting Design 2
- TLTG 325 Environmental Lighting
- TLTG 330 Lighting the New Script
- TIMM 360 VectorWorks
- *Minimum of 2 drawing and/or digital drawing courses*
- TIMM 440 Digital Techniques
- TIMM 442 Digital Techniques II

Complete 4 courses from the following list:

- TIMM 210 Intro to Sketch up
- TSCE 301 Environments in Motion
- TSCE 302 Worlds at Play
- TCOS 362 Costume Design in Animation
- TLTG 235 Environmental Lighting
- TLTG 425 Immersive Lighting
- TIMM 315/325 AutoCAD 1 + 2
- TSND 211 Research-Based Sound
- TIMM 360 VectorWorks for Lighting/Sound
- TIMM 322 Healthcare by Design
- TIMM 230 Digital Fabrication
- TTDI 410 Parametric Drafting
- TVID 420 Creating for AR
- TVID 450 Creating for VR
- Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

BFA Scene Design Specialization

Scene design, in providing a visual support to the dramatic form, is an integral part of the theater and is woven into the fundamental philosophies of modern performance practice. Students strive for the vision and imagination of a creative artist; the ingenuity and skills of a stage artisan; and the knowledge and sense of a performance director.

MÉTIER REQUIREMENTS

Eight units from TFND Studio Labs, see full list above

- TIMM 210 Introduction to Sketch-up
- TSCE 110 Undergrad Techniques in Design
- TSCE 201 Scene Design I
- TSCE 300, 301 Special Topics in Scene Design
- *Minimum of 2 drawing and/or digital drawing courses*
- TIMM 440 Digital Techniques
- TIMM 442 Digital Techniques II
- Drafting (choose from AutoCAD, Vectorworks or other by approval)

Complete 4 courses from the following list:

- TIMM 210 Intro to Sketch up

- TSCE 301 Environments in Motion
- TSCE 302 Worlds at Play
- TCOS 362 Costume Design in Animation
- TLTG 235 Environmental Lighting
- TLTG 425 Immersive Lighting
- TIMM 315/325 AutoCAD 1 + 2
- TSND 211 Research-Based Sound
- TIMM 360 VectorWorks for Lighting/Sound
- TIMM 322 Healthcare by Design
- TIMM 230 Digital Fabrication
- TTDI 410 Parametric Drafting
- TVID 420 Creating for AR
- TVID 450 Creating for VR
- Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

BFA Sound Design Specialization

While integrating aesthetic concerns with scientific disciplines, the Sound Design program can stretch as far as each student's energy, inventions, and imagination allow. Students are urged to explore abundant projects and coursework throughout the institute.

MÉTIER REQUIREMENTS

Eight units from TFND Studio Labs, see full list above

- planned: TSND Introduction to Sound
- TSND 112 Research Based Sound
- TSND 121 Sound & Music for Scripts
- TIMM 360 VectorWorks for Lighting/Sound

Complete 4 courses from the following list:

- TIMM 210 Intro to Sketch up
- TSCE 301 Environments in Motion
- TSCE 302 Worlds at Play
- TCOS 362 Costume Design in Animation
- TLTG 235 Environmental Lighting
- TLTG 425 Immersive Lighting
- TIMM 315/325 AutoCAD 1 + 2
- TSND 211 Research-Based Sound
- TIMM 360 VectorWorks for Lighting/Sound
- TIMM 322 Healthcare by Design
- TIMM 230 Digital Fabrication
- TTDI 410 Parametric Drafting
- TVID 420 Creating for AR
- TVID 450 Creating for VR
- Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

BFA Stage Management Specialization

The BFA Stage Management specialization enables students to develop as artistic leaders and collaborative artists through project-based instruction in management, theatrical design, acting, directing, and stagecraft. Emphasis is placed on developing strong communication and critical thinking skills, broad knowledge of the professional arts environment, and proficiency in the practical skills necessary for success in a variety of professional environments.

MÉTIER REQUIREMENTS

Eight units from TFND Studio Labs, see full list above

- TMSM 101 Basic Stage Management II
- TTDI 105 Stagecraft I
- TGEN 310 Institute Acting
- TGEN 320 Institute Directing
- TACT 130 Run Crew
- TMSM 340 Theatrical Unions
- TMSM 325 Special Topics in Stage Management

Complete 4 courses from the following list:

- TIMM 210 Intro to Sketch up
- TSCE 301 Environments in Motion
- TSCE 302 Worlds at Play
- TCOS 362 Costume Design in Animation
- TLTG 235 Environmental Lighting
- TLTG 425 Immersive Lighting
- TIMM 315/325 AutoCAD 1 + 2
- TSND 211 Research-Based Sound
- TIMM 360 VectorWorks for Lighting/Sound
- TIMM 322 Healthcare by Design
- TIMM 230 Digital Fabrication
- TTDI 410 Parametric Drafting
- TVID 420 Creating for AR
- TVID 450 Creating for VR
- Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

BFA Technical Direction Specialization

With a high degree of skill and creativity, students discover ways to utilize today's changing technology. They take the lead in the creation of new art and technologies, and exhibit a level of professionalism that meets or exceeds the growing demands of the theater/entertainment industries and the field of technical direction.

MÉTIER REQUIREMENTS

Eight units from TFND Studio Labs, see full list above

- TTDI 305 Advanced Stagecraft
- TIMM 315 AutoCAD I
- TIMM 325 AutoCAD II
- TTDI 300 Fundamentals of Technical Direction
- TTDI 425 Tech Mgt Style & Technique

- TSCM 225 Statical Engineering
- ICOM301 Digital Fabrication
- TTDI 410 Parametric Drafting
- TTDI 450 Rigging

Complete 4 courses from the following list:

- TIMM 210 Intro to Sketch up
- TSCE 301 Environments in Motion
- TSCE 302 Worlds at Play
- TCOS 362 Costume Design in Animation
- TLTG 235 Environmental Lighting
- TLTG 425 Immersive Lighting
- TIMM 315/325 AutoCAD 1 + 2
- TSND 211 Research-Based Sound
- TIMM 360 VectorWorks for Lighting/Sound
- TIMM 322 Healthcare by Design
- TIMM 230 Digital Fabrication
- TTDI 410 Parametric Drafting
- TVID 420 Creating for AR
- TVID 450 Creating for VR
- Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

TEDP.MFA - Master of Fine Arts - Experience Design and Production

General

Program Title	School	
Master of Fine Arts - Experience Design and Production	School of Theater	
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0502

Program Description
The MFA degrees in Experience Design and Production require three years of full-time study.
An evaluation will be made at the end of the first year of study to determine the remainder of the student's curriculum, based on the faculty's evaluation of the student's work and the goals of the particular student. The graduate curriculum for each specialization is highly individualized, with the core requirements serving as a framework for further studies customized to meet each student's goals and ambitions.

Experience Design & Production
No Requirements

TELT.MFA - Master of Fine Arts - Exp Design & Prod - Lighting Design

General

Program Title	School
Master of Fine Arts - Exp Design & Prod - School of Theater Lighting Design	

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0502

Program Description
3-Year Program MFA Lighting Design curriculum centers on developing critical and practical skills with coursework that includes lessons in immersive lighting design, AutoCAD, digital rendering and vector works, and strategies for live performance. Students are taught how to understand the physiological and psychological effects of light in addition to other scientific principles of phenomenology. All coursework is designed to help each student help shape a distinct, original and personal voice and defining aesthetic, as evidenced in production work and professional-level Lighting Design portfolio. Lighting Design MFA candidates are required to pass a Graduation Review to complete the Program and obtain the MFA degree

Free Form Requirements

MFA Experience Design and Production with Lighting Design Specialization

MFA Experience Design and Production Course Requirements

The MFA degrees in Experience Design and Production require three years of full-time study. An evaluation will be made at the end of the first year of study to determine the remainder of the student's curriculum, based on the faculty's evaluation of the student's work and the goals of the particular student. The graduate curriculum for each program is highly individualized, with the core requirements serving as a framework for further studies customized to meet each student's goals and ambitions.

MFA Lighting Design Specialization

By the time they graduate, MFA Lighting Design students will be able to:

- Have a complete command of the theatrical lighting design process including the ability to:
 - Construct and articulate a conceptual approach and presentation skills
 - Create the required drafting, renderings and technical schedules
 - Construct budgets, schedules and contracts
 - Effectively communicate and collaborate with production teams
 - Analyze and critique performed work with cultural and historical contexts.
- Apply the ability to consider the physiological and psychological effects of light and other scientific principles of phenomenology.
- Apply knowledge of the architectural lighting design process, including immersive and environmental lighting design.
- Apply knowledge and practice with intelligent lighting, moving light consoles and other state of the art technology for use in the theater and concert stages.
- Produce original and artistic work reflected in a professional level design portfolio.

Métier Requirements

- TLTG 525 Theatrical Techniques
- TLTG 625 Environmental Lighting
- TLTG 626 Light Art and Architectural Lighting
- TLTG 725 Immersive Lighting Design
- TLTG 726 The Business of Light
- TLTG 670 Moving Light Lab/Lighting for Music
- Drafting (choose from Vectorworks, AutoCAD or other by approval)
- TIMM 640 Digital Rendering
- TSCE 510 Performance by Design
- TSCE 545 Design Methodology
- TDAP 695 D&P Production (6 semesters)
- TDAP 620 D & P Seminar (6 semesters)
- THST 500 Interpretive Strategies for Plays
- THST 501 Interpretive Strategies for Performance or equivalent electives.
- TWNT 600 Winter Session (every Spring that it is offered)

Complete 4 courses from the following list:

- TIMM 510 Intro to Sketch-up
- TSCE 501 Environments in Motion
- TSCE 502 Worlds at Play
- TCOS 660+661 Open Dress (all sections)
- TLTG 635 Environmental Lighting
- TLTG 725 Immersive Lighting
- TIMM 615 AutoCAD 1 + 2
- Immersive and Legacy Audio Mixing (*IN PLANNING*)
- TSND 511 Research-Based Sound Design
- TIMM 560 VectorWorks for Lighting/Sound
- TSCE 505 Techniques of Design
- TIMM 622 Healthcare by Design
- TIMM 608 Designing for Deep Futures
- TTDI 530 Digital Fabrication
- TTDI 710 Parametric Drafting
- TVID 600 Creating for AR
- TVID 615 Creating for VR

Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

TEMG.MFA - Master of Fine Arts - Exp Design & Production - Management

General

Program Title	School
Master of Fine Arts - Exp Design & Production - Management	School of Theater

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.1004
Program Description		
MFA Experience Design and Production Course Requirements The MFA degrees in Experience Design and Production require three years of full-time study. An evaluation will be made at the end of the first year of study to determine the remainder of the student's curriculum, based on the faculty's evaluation of the student's work and the goals of the particular student. The graduate curriculum for each program is highly individualized, with the core requirements serving as a framework for further studies customized to meet each student's goals and ambitions.		

Free Form Requirements

MFA Stage Management Specialization

Students who complete the MFA Stage Management specialization will display:

- Confidence as creative leaders who set a positive tone and energize the production process.
- The ability to foster collaboration and nourish creativity.
- The skill to communicate ideas and challenges in a way that generates creative and practical solutions.
- Master of the practical skills necessary to succeed in the professional environment.
- Mature and sophisticated interpersonal skills and a well-developed sense of self.
- Openness to new ideas and an appetite for knowledge.

Métier Requirements ***

- TMSM 500 Foundations of Stage Management I
- TMSM 501 Foundations of Stage Management II
- TMSM 540 Theatrical Unions
- TMSM 525 Special Topics in Stage Management
- TMSM 700 Stage Mgmt in Theory & Practice
- TMSM 701 Stage Mange(r): The Artistic Profession's Creative Leaders
- Tmpr 500 Foundations of Creative Producing
- Tmpr 615 The Business of Producing Performance
- Tmpr 660 Contracts/Is It Legal
- TDAP 695 D&P Production (6 semesters)
- TTDI 500 Fundamentals of Tech Direction I
- THST 500 Interpretive Strategies for Plays
- THST 501 Interpretive Strategies for Performance or equivalent elective
- TWNT 600 Winter Session (every Spring that it is offered)

***All Management specializations must complete 4 courses from the following list:

- TIMM 510 Intro to Sketch-up
- TSCE 501 Environments in Motion
- TSCE 502 Worlds at Play
- TCOS 660+661 Open Dress (all sections)
- TLTG 635 Environmental Lighting
- TLTG 725 Immersive Lighting

- TIMM 615 AutoCAD 1 + 2
- IN PLANNING Immersive and Legacy Audio Mixing
- TSND 511 Research-Based Sound Design
- TIMM 560 VectorWorks for Lighting/Sound
- TSCE 505 Techniques of Design
- TIMM 622 Healthcare by Design
- TIMM 608 Designing for Deep Futures
- TTDI 530 Digital Fabrication
- TTDI 710 Parametric Drafting
- TVID 600 Creating for AR
- TVID 615 Creating for VR

Additional Curricular Tracks Available to students enrolled in the MFA Management Specialization

MFA Production Management Specialization

Students who complete the MFA Production Management specialization will:

- Be well adapted, highly motivated individuals with a solid foundation of values, principles and philosophies.
- Have a well-developed sense of self and be able to appreciate who they are as individuals and how they interact with peers and colleagues.
- Understand how to foster collaboration and communication skills, both verbal and written.
- Understand the fundamentals necessary to "read people" and develop a modality of "engaging" to achieve the best relationship.
- Possess the skills and the flexibility to work in a wide range of disciplines, with an awareness of the field, aesthetically, politically, and globally.
- Be imbued with an understanding of the ideas and practices of leadership and management and be able to fully engage as managers in the entertainment industry in general and in project management specifically.
- Be able identify, anticipate, and take steps to prevent problems and identify possible solutions to challenges that may exist.
- Develop the technical knowledge necessary to manage a technical process with artists and craftspeople

Métier Requirements ***

- TTDI 500 Fundamentals of Technical Direction I
- Tmpr 550 Contracts
- Tmpm 635 Production Budgeting or Tmpr 615 Business of Theater
- Tmpr 660 Is it Legal? Law for the Arts or TMSM 540 Theatrical Unions
- THST 500 Interpretive Strategies for Plays
- THST 501 Interpretive Strategies for Performance or equivalent elective
- Tmpm 798 Graduate Internship
- TDAP 620 Seminar (6 semesters)

- TDAP 695 Production (6 semesters)
- TWNT 600 Winter Session (every Spring that it is offered)
- minimum 2 Technical Direction courses

***All Management specializations must complete 4 courses from the following list:

- TIMM 510 Intro to Sketch-up
- TSCE 501 Environments in Motion
- TSCE 502 Worlds at Play
- TCOS 660+661 Open Dress (all sections)
- TLTG 635 Environmental Lighting
- TLTG 725 Immersive Lighting
- TIMM 615 AutoCAD 1 + 2
- IN PLANNING Immersive and Legacy Audio Mixing
- TSND 511 Research-Based Sound Design
- TIMM 560 VectorWorks for Lighting/Sound
- TSCE 505 Techniques of Design
- TIMM 622 Healthcare by Design
- TIMM 608 Designing for Deep Futures
- TTDI 530 Digital Fabrication
- TTDI 710 Parametric Drafting
- TVID 600 Creating for AR
- TVID 615 Creating for VR

Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

MFA Producing Specialization

Students who complete the MFA Producing specialization will:

- Demonstrate mature and increasingly sophisticated leadership skills, while growing in self-awareness of their own strengths and weaknesses.
- Possess necessary practical skills, such as budgeting, marketing, grant writing, contracts and negotiation, public speaking, and facilitation.
- Exhibit creative and independent thinking, problem-solving, and use of resources.
- Have the ability to extrapolate linear information from non-linear circumstances.
- Have experienced a variety of aesthetic and practical approaches that challenge and expand their awareness of the infinite possibilities and permutations of theater making.
- Demonstrate an evolved personal aesthetic and an avid interest in new artists, audiences, and methodologies.

Métier Requirements ***

- TMAPR 500 Foundations of Creative Producing
- TMAPR 510 Arts Marketing
- TMAPR 550 Contracts
- TMAPR 615 Business of Theater
- TMAPR 630 Grant Writing and Fundraising

- TMAPR 635 Production Budgeting
- TMAPR 660 Is it Legal? Law for the Arts
- IINT 698 Graduate Internship
- TMAPR-650 Creative Producing Studio (2 semesters)
- TDAP 695 D&P Production (6 semesters)
- TDAP 620 D & P Seminar (6 semesters)
- TMSM 540 Theatrical Unions
- THST 500 Interpretive Strategies for Plays
- THST 501 Interpretive Strategies for Performance or equivalent elective
- TWNT 600 Winter Session (every spring that it is offered)

***All Management specializations must complete 4 courses from the following list:

- TIMM 510 Intro to Sketch-up
- TSCE 501 Environments in Motion
- TSCE 502 Worlds at Play
- TCOS 660+661 Open Dress (all sections)
- TLTG 635 Environmental Lighting
- TLTG 725 Immersive Lighting
- TIMM 615 AutoCAD 1 + 2
- IN PLANNING Immersive and Legacy Audio Mixing
- TSND 511 Research-Based Sound Design
- TIMM 560 VectorWorks for Lighting/Sound
- TSCE 505 Techniques of Design

TESC.MFA - Master of Fine Arts - Exp Design & Prod - Scene Design

General

Program Title	School
Master of Fine Arts - Exp Design & Prod - School of Theater Scene Design	

Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0502

Program Description

3-Year Program The Scene Design MFA curriculum allows each student to find and shape a personal artistic vision: to explore the means of expression through historical and current theory with the expressed intention of discovering new forms, theory, and means of expression. In addition, scene designers develop aesthetic sophistication through studying theory across a range of disciplines (e.g. music composition, performance theory, directing and semiotics). Students are encouraged to explore varied practices and skillsets, including performance, model

making, drafting, painting, drawing and new media. Scene Design MFA candidates are required to pass a Graduation Review to complete the Program and obtain the MFA degree.

Free Form Requirements

MFA Experience Design and Production Course Requirements The MFA degrees in Experience Design and Production require three years of full-time study. An evaluation will be made at the end of the first year of study to determine the remainder of the student's curriculum, based on the faculty's evaluation of the student's work and the goals of the particular student. The graduate curriculum for each program is highly individualized, with the core requirements serving as a framework for further studies customized to meet each student's goals and ambitions.

MFA Experience Design and Production Course Requirements for Scene Design Specialization

Students who complete the MFA Scene Design Program will be able to:

- Display a personal artistic vision: the culmination of exploration through historical and current theory with the expressed intention of discovering new forms, theory, and means of expression.
- Develop aesthetic sophistication through studying theory across a range of disciplines (e.g. music composition, performance theory, directing, and semiotics).
- Imagine all aspects of live performance as a collaborative process through collective analysis.
- Engage in self-critique and critical thinking.
- Demonstrate a diversity of ideas through interdisciplinary and collaborative practices.
- Practice an expanded means of expression, including performance practice, model making, drafting, painting, drawing, and use of new media.
- Work authentically, originally, at risk—to navigate the complexities of working within established art making structures at the same time using their voice to create new structures.

Métier Requirements

- TSCE 505 Techniques of Design
- TSCE 510 Performance by Design
- TSCE 545 Design Methodology
- TSCE 600, 601 Special Topics in Design
- TSCE 700 Open Studio
- TSCE 750 Graduate Closure
- TIMM 640 Digital Rendering or TIMM 644 Digital Drawing
- THST 500 Interpretive Strategies for Plays
- THST 501 Interpretive Strategies for Performance or equivalent elective
- TDAP 695 D&P Production (6 semesters)
- TDAP 620 D&P Seminar (6 semesters)
- TWNT 600 Winter Session (every Spring that it is offered)

Complete 4 courses from the following list:

- TIMM 510 Intro to Sketch-up
- TSCE 501 Environments in Motion

- TSCE 502 Worlds at Play
- TCOS 660+661 Open Dress (all sections)
- TLTG 635 Environmental Lighting
- TLTG 725 Immersive Lighting
- TIMM 615 AutoCAD 1 + 2
- Immersive and Legacy Audio Mixing (*IN PLANNING*)
- TSND 511 Research-Based Sound Design
- TIMM 560 Vectorworks for Lighting/Sound
- TSCE 505 Techniques of Design
- TIMM 622 Healthcare by Design
- TIMM 608 Designing for Deep Futures
- TTDI 530 Digital Fabrication
- TTDI 710 Parametric Drafting
- TVID 600 Creating for AR
- TVID 615 Creating for VR

Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

Additional Curricular Track Available to students enrolled in the MFA Scene Design Specialization

MFA Interactive Media for Performance

Students who complete the MFA Interactive Media for Performance Specialization will be able to:

- Create generative work in live situations—including, but not limited to, performance, interactive time-based visual art, and new forms of electronically-mediated narrative.
- Display a personal artistic vision and process. Explore methods of its expression, drawing from historical and current theory, with the intention of discovering new forms, theories, and means of expression.
- Demonstrate a diversity of ideas through interdisciplinary, collaborative practices and collective analysis.
- Demonstrate an advanced skill set and means of expression, including performance practice, software, hardware, drafting, drawing, and the use of new media.
- Work authentically, originally, and at risk to navigate the complexities of working within established art making structures while simultaneously striving to create new structures.

Métier Requirements

- TVID 500, 501 Integrating Video and Live Performance (two semesters)
- TVID 600 Creating for Augmented Reality
- TVID 605 Architectural Projection
- TVID 610 Video Installation
- TVID 613 TouchDesigner
- TVID 615 Creating for Virtual Reality
- TVID 515 Motion Graphics
- THST 500 Interpretive Strategies for Plays

- THST 501 Interpretive Strategies for Performance or equivalent elective
- TIMM 650 Cinema 4D
- TIMM 651 Advanced Cinema 4D
- TVID 653 Unity Game Engine
- TVID 652 Unity Game Engine: C# Programming
- TSCE 510 Performance by Design
- TDAP 695 D&P Production (4 semesters)
- TWNT 600 Winter Session (every Spring that it is offered)

Complete 4 courses from the following list:

- TIMM 510 Intro to Sketch-up
- TSCE 501 Environments in Motion
- TSCE 502 Worlds at Play
- TCOS 660+661 Open Dress (all sections)
- TLTG 635 Environmental Lighting
- TLTG 725 Immersive Lighting
- TIMM 615 AutoCAD 1 + 2
- Immersive and Legacy Audio Mixing (*IN PLANNING*)
- TSND 511 Research-Based Sound Design
- TIMM 560 VectorWorks for Lighting/Sound
- TSCE 505 Techniques of Design
- TIMM 622 Healthcare by Design
- TIMM 608 Designing for Deep Futures
- TTDI 530 Digital Fabrication
- TTDI 710 Parametric Drafting
- TVID 600 Creating for AR
- TVID 615 Creating for VR

Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

TESO.MFA - Master of Fine Arts - Exp Design & Prod - Sound Design

General

Program Title	School	
Master of Fine Arts - Exp Design & Prod - School of Theater Sound Design		
Degree	Program Level	CIP Code (National ID)
MFA - Master of Fine Arts	Graduate	50.0502

Program Description

3-Year Program The MFA Sound Design curriculum develop both theoretical and practical skills with coursework that includes lessons in creative listening, mixing and programming, music for themed entertainment and strategic approaches to sound environments. By the end of their studies, students will have a solid command of the sound design process, including developing a conceptual approach, creating the required drafting and paperwork and clearly mounting designs. All coursework is designed to help each student help shape a distinct, original and personal voice and defining aesthetic, as evidenced in production work

and professional-level Sound Design portfolio. Sound Design MFA candidates are required to pass a Graduation Review to complete the Program and obtain the MFA degree

Free Form Requirements

MFA Experience Design and Production Course Requirements The MFA degrees in Experience Design and Production require three years of full-time study. An evaluation will be made at the end of the first year of study to determine the remainder of the student's curriculum, based on the faculty's evaluation of the student's work and the goals of the particular student. The graduate curriculum for each program is highly individualized, with the core requirements serving as a framework for further studies customized to meet each student's goals and ambitions.

MFA Experience Design and Production Course Requirements for Sound Design Specialization

MFA Sound Design Specialization

Upon graduation, an MFA Sound Designer will be able to:

- Apply knowledge of current technology and standard practices used in sound for theater, film, and television.
- Read, edit, and create music in multiple styles.
- Analyze a script and put it in a historical and social context.
- Collaborate and communicate/explain ideas effectively and diplomatically.
- Explain aural symbolism—how sounds and musical styles generate images or impressions upon an audience.
- Invent new, unique ways of using technology to solve specific challenges.
- Demonstrate a complete command of the sound design process, including construction of a conceptual approach, creating the required drafting and paperwork, and clearly mounting designs.

Métier Requirements

- TSND 512 Research Based Sound Design
- TSND 530 Music, Sound Art, and Design
- TIMM 560 Vectorworks
- TSCE 510 Performance by Design
- TSCE 545 Design Methodology
- THST 500 Interpretive Strategies for Plays
- THST 501 Interpretive Strategies for Performance or equivalent elective
- TDAP 695 D&P Production (6 semesters)
- TDAP 620 D&P Seminar (6 semesters)
- TWNT 600 Winter Session (every Spring that it is offered)
- TIND 799 IND Study (2 semesters)

Complete 4 courses from the following list:

- TIMM 510 Intro to Sketch-up
- TSCE 501 Environments in Motion
- TSCE 502 Worlds at Play
- TCOS 660+661 Open Dress (all sections)
- TLTG 635 Environmental Lighting
- TLTG 725 Immersive Lighting

- TIMM 615 AutoCAD 1 + 2
- IN PLANNING Immersive and Legacy Audio Mixing
- TSND 511 Research-Based Sound Design
- TIMM 560 VectorWorks for Lighting/Sound
- TSCE 505 Techniques of Design
- TIMM 622 Healthcare by Design
- TIMM 608 Designing for Deep Futures
- TTDI 530 Digital Fabrication
- TTDI 710 Parametric Drafting
- TVID 600 Creating for AR
- TVID 615 Creating for VR

Via consultation with your mentor, suggested electives are offered within the School of Theater and throughout the Institute, subject to availability and permission of listed instructor.

MFA Experience Design and Production Course
Requirements for Technical Direction
Specialization

MFA Technical Direction Specialization

By graduation, the MFA Technical Direction student will:

- With a high degree of skill and creativity, utilize today's changing technology.
- Exhibit a level of professionalism that meets or exceeds the demands of the growing theater/entertainment industries and the field of technical direction.
- Take the lead in the creation of new art and technologies.
- Be able to respond critically and constructively, both verbally and in writing, to scripts and performances.

- Explore interdisciplinary practices and engage in multiple aspects of art making
- Demonstrate an understanding of global aesthetics and performance history.
- Work within collaborative processes, which are open, imaginative and ethically-balanced.

Métier Requirements

- TTDI 505 Advanced Stagecraft
- TTDI 510 Welding I
- TTDI 525, 526 Statistical Engineering
- TTDI 560 Technical Design
- TTDI 575 The Stagecraft of Illusion
- TTDI 500 Fundamentals of Technical Direction I
- TTDI 600 Fundamentals of Technical Direction II
- TIMM 615 AutoCAD I

Description

Course open to BFA1 Acting Program students only.
The BFA 1 Acting Studio focuses on the work of American playwrights. Through these texts students begin to define their individual processes by exploring fundamental acting techniques. They are made aware of their instrument and how to engage the richness of their imagination with particular focus given to the development of their individual creative gifts and identity. This class brings together all the first year training (voice, speech, movement, dramaturgy, etc.) in the service of this objective. Through intense text analysis and class discussion students learn to trust their choices and clarify their character work. The

primary purpose of this class is to guide actors to make organic choices on stage - with the understanding that 'Actors bring to life what is hidden under the words' (Stanislavski An Actor Prepares).

Description
This course will focus on the "moment to moment" and improvisational aspects of Capoeira (an Afro-Brazilian Martial Art). We will connect physical movement and emotional expression through the rich cultural heritage inherent to this unique art form. Through gameplay, sequence work, and physical conditioning, students will work to achieve a working knowledge and movement vocabulary allowing them to build there own unique content. Students will learn to adapt there forms and intentions to create relationships with partners and explore there individuality, while learning to read and respond to there partners own unique personality. This course is designed to guide actors to be in touch with there most primal instincts, to use body language to create a physical dialogue, and increase awareness and perception of there immediate space.

Description

Course open to BFA2 Acting Program students only. The mission of the BFA II Acting Studio is to shift the actor's attention to the world of language and heightened text. The intention is to get the language into the mouth and body of the actor using the disciplines of the text, as well as improvisation and exercises to free the actor's imagination in response to the word. Emphasis is placed throughout the year on truthful, specific, moment-to-moment way of acting using classical texts, with the aim of developing an actor who is skilled and comfortable approaching any level of text they may encounter during the course of a career in the theater. Disciplines learned in other classes (speech, voice, movement, text analysis), and the actor's creative instinct, passion, and imagination are brought together in BFA -2 Acting Studio.

Description
Course open to BFA2 students only. The Alexander Technique is a method of self-discovery, which explores how we "use ourselves" in ordinary activity - how we walk, sit, stand, breathe, speak, react to stress. Learning about our own habits allows us to gradually free ourselves of our unconscious patterns that interfere with our natural coordination and spontaneity. The actor will move

toward a state of psycho-physical well-being so important for imaginative growth and the development of his means of expression.

Description

At this point in the training the actor in the BFA Acting program has increased skills in: character development, being present and listening on stage, and spent an entire year building language technique through heightened language material. In this semester the actor reviews the work of previous years and deepens their practice.

This acting studio focuses on using the mythic imagination approach to acting. The mythic is that which is tied to the collective human story, that which inspires and grounds us as individuals but also connects us to what is age old. Myths speak to our deepest dreams, fears, and soul. In this class the actors will mine the mythic in order to connect to deep purpose in our work, finding imagination and authenticity as performers.

We will focus on material that challenges the actor to build new skills in the areas of character transformation, improv, and economy through stillness. We will investigate the Modern Classics as well as Film Noir and contemporary film material. The students will have on camera scene work for a total of four weeks during the course of the semester. The projects they work on will be chosen to respond to each actor's particular needs. Archetypes are investigated in order to imaginatively create multi-dimensional characters and range.

Description

Course open to BFA3 Acting Program students only.

This course focuses on performing the works of the modern classics such as Chekhov, Ibsen and Strindberg. We begin by analyzing the text in its depth and finding inner motive forces behind the words. Learning to convey complexity of hidden emotional world interconnected with the logic of the language is the base for our work. The actors are learning to 'commune' with each other. They are developing creative skills through various exercises. While sharing, understanding and adapting to different methods they are building up their confidence and finding personal style and force. Besides reviewing the specifics (who, where, what and why) students are encouraged to form their own ideas. Awakened imagination, learning how to use it and making brave choices is of crucial importance. Liberating their gift in a powerful and at the same time sophisticated way is the goal of this approach.

Description
Course open to BFA3 Acting Program students only.
This course is a synthesis of the material
learned in 'Voice and Body Gesture BFA1 and 2'
and its application to composition and the
creation of work. Using the dynamic model of
Meyerhold's balagan form as well as the European
Cabaret style of the turn of the 20th century
(where social commentary, debate and questioning
prevailed), we will create a piece through
process theatre. Each student must bring at least
one topic, issue or piece of work. This material
will be explored and worked on during the
semester. Both individual and ensemble performing
work will be part of the course.

Description
Course open to BFA3 Acting Program students only.
The Fall semester of the third year affords
students yet another opportunity to refine their
personal practice. The work in this course
focuses on the integration of Voice and Speech
skills in the speaking of text. Students practice
speaking poetic texts, both classical and modern.
Language techniques such as Sense Stress and
Inflections are used to enhance students'
speaking skills. Students are expected to have an
effective personal practice regimen by this
point, to have achieved proficiency and ease in
executing the elements of Good Speech as well as
acquired the ability to speak all challenging
language with clarity and excellence of sound
production. The second semester is primarily
aimed at introducing students to Accent-Dialect
technique and to further integration of Voice,
Speech and Acting Technique skills.

speaking skills. Students are expected to have an
effective personal practice regimen by this
point, to have achieved proficiency and ease in
executing the elements of Good Speech as well as
acquired the ability to speak all challenging
language with clarity and excellence of sound
production. The second semester is primarily
aimed at introducing students to Accent-Dialect
technique and to further integration of Voice,
Speech and Acting Technique skills.

Description

Course open to BFA3 Acting Program students only. This course is taught by two instructors in order to enhance the students' exposure to a broad spectrum of movement practices. The course as a whole is designed to enhance mind/body awareness and the inner/outer athleticism of the actor. By coordinating movement, breath, voice and rhythm, the course further develops the actor's ability to physically express themselves. One semester, the class requires participation in rigorous Biomechanics and psycho-physical exercises, ensemble training, mime and circus techniques. By the end of the semester, each student should be able to demonstrate a refined individual warm-up sequence for performance preparation. The other semester, the goals of the class are achieved through yoga and Open Floor Movement Practice (a conscious dance practice for building muscular and emotional intelligence, mindfulness and soulfulness). Through a lively, sweaty, full-on dance inquiry, we cultivate the forces that fuel our creativity, our connections and our ability to change/transform. The goal is to allow more freedom of expression as we engage our intuition, connect to our inspiration, and use our bodies as a tool for our imagination. This class is constructed like an intensive workshop and will alternate yoga and Open Floor work each week in a progressive, complimentary way.

Description

The integration of movement, breath and voice helps to balance body, mind and emotions. This practice is very powerful when the maximum interaction of self-healing mechanisms is achieved. In this state, it is believed that the human system is especially able to draw from the healing energies of nature and the universe. Spontaneous Practice is an excellent way to achieve this interaction. On days when the practice is vigorous, the benefits are more directed at blood, breath, and lymph circulation and the release of connective tissue. On the days when it is more quiet and flowing, the benefits are more linked to brain chemistry.

Description

This course will provide the actor with practical voice and speech tools at the end of his/her training in preparation for transition to a professional career. This course seeks to empower the actor to develop his/her own approach, regimen, and process for application of voice and speech work to character development and acting in general-including how to warm up the vocal instrument properly based on each particular actor's needs. The focus will include each actor preparing and leading the class in their own voice warm up, as well as using these skills and applying them successfully to monologues and/or scenes to integrate the voice, body, emotion and thought in performance and fine tune pieces for the actor's audition repertoire.

Course Long Title
Solo Performance Lab

Subject Code	Course Number
TACT	471

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1.5

Description
Six week course open to graduating acting students - BFA 4s and MFA 3s - only. The mission of the Solo Performance Lab is to fuel students' creation of multiple solo performance works that afford the agency, fluency, and critical authorial skills essential to contemporary artists. The Solo Performance Lab compels actors to synthesize all aspects of their training and is a launchpad into the professional sphere.

Students will create two major pieces: one based on a seminal dramatic text, and a second devised piece derived from their personal experiences and impulses. These works will be informed by 1) an intensive study of exemplary contemporary practitioners and of the multi-disciplinary history of solo expression, and 2) an excavation of their own identities, affinities, and personal histories.

The course will cover a diverse array of practices including theatre, standup comedy, drag, vaudeville, cabaret, slapstick, spoken word,

performance art, podcast, social media, photography, oratory, television, and film. Figures studied, among others, may include Kendrick Lamar, Samuel Beckett, Phoebe Waller-Bridge, Fred Astaire, Anna Devereaux Smith, Cindy Sherman, Guillermo Gomez-Pena, Nina Simone, Marina Abramovic, Charlie Chaplin, Chantal Akerman, Okwui Okpokwasili, Hannah Gadsby, Spalding Gray, Tania Bruguera, Richard Pryor, Eve Ensler, and Buddha.

Students will develop a vocabulary to discuss elements of style and storytelling, and film and edit their projects. Disciplines learned in other classes (speech, voice, movement, text analysis, etc.) over the course of their time at CalArts, as well as the actor's creative instinct, passion, and imagination are synthesized in the Solo Performance Lab.

TACT472 - Mysticism in Performance

General

Course Long Title
Mysticism in Performance

Subject Code	Course Number
TACT	472

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Artists coming of age at the sharp, waning edge of Western Industrial Capitalism, a time still very much informed by centuries of Settler Colonial erasure of heterogeneous ontologies, there is a resurgence of inquiry into and exploration of the mystical. Long derided spaces of inquiry are once again being courageously entered by artists from a range of disciplines and long dismissed artists are being "rediscovered" and their bodies of work reconsidered in more accurate contexts; from the late musician Alice Coltrane to the late visual artist Hilma af Klint, the work of self-described female artists, in particular, are reaching audiences who are now wholly receptive to these formerly ridiculed geni.

Mysticism in Performance will guide students through a research-to-creation process across an intensive semester-long laboratory. Students will first learn about the invitations, ethics, and historical challenges of exploring the unseen/the spiritual/soulful/mystical aspects of art within charged and often polarized cultural contexts. They will next do a deep dive into tenets of Afromysticism as utilized by artist-seeker-makers

Students will read and view a wide range of material including plays, performance pieces, biographical and autobiographical excerpts, recorded music, film, performance documentation, and visual art. Students will be expected to devote a significant amount of time outside class to their research. Students will also be required to schedule a series of in-depth one-on-one meetings with the instructor throughout the semester to discuss and revise their progress across the span of the semester.

Students will develop a vocabulary to discuss elements of style and storytelling, and film and edit their projects. Disciplines learned in other classes (speech, voice, movement, text analysis, etc.) over the course of their time at CalArts, as well as the actor's creative instinct, passion, and imagination are synthesized in the Solo Performance Lab.

RGATHE - School of Theater Students Only

1109 / 1264

Description

Course open to MFA1 Acting, Directing and Writing Program students only. Work continues from the fall semester, but in the second semester of Acting Studio we also explore a play or project. In the past these projects have included 'The Three Sisters', 'Orestes', 'Life is a Dream', and 'The Cherry Orchard'. The second semester's work will be presented for Theater School students and faculty at the end of the year during our 'viewings' week.

Description

Course open to MFA1 Acting Program students only. The first semester of the first year consists of a myriad of articulation exercises that lead the actor to the dexterity needed to produce vowel, diphthong and consonant sounds effectively. Developing the ear for the identification of the sounds of Spoken English is crucial during this time. Students are introduced to the International Phonetic Alphabet, to transcription, to Edith Skinner-based Speech training and to the elements and principles of Good Speech, in the Edith Skinner tradition/ Classic American Stage Speech. Extensive personal practice outside of class is expected and necessary in order for the understanding and execution of the skills to become a real tool in the creation of character speaking options. Students will be evaluated partly on the basis of evidence of their personal study and practice.

Description

Course open to MFA1 Acting Program students only. Second semester of the first year further solidifies students' knowledge and understanding of the International Phonetic Alphabet as well as their ability to transcribe and to consistently produce clean vowel, diphthong and consonant sounds. This process is rigorous and time consuming simply because students are working to expand their speaking options beyond their habitual and/or regional sounds. Extensive personal practice is required to facilitate such versatility and to achieve ease in speaking Good Speech. In addition, Students are introduced to the Challengers and a Live Microphone workshop is undertaken. Particular emphasis is given in this semester to the application of the skills to text as well as to beginning to integrate the skills with their Acting Technique.

Description

This course will examine the essential relationship between the performer and the object in theater. The animation of objects by performers is one of the most ancient of theatrical relationships. Through in-class projects, actors will have the opportunity to explore this dynamic and to learn about the historical use and contemporary use of puppets and objects as a major element in the theatrical vocabulary. A variety of forms will be examined from shadow puppets to found objects to Bunraku.

Description

Course open to MFA1 Acting Program students only.

The Alexander Technique is a method of self-discovery, which explores how we "use ourselves" in ordinary activity - how we walk, sit, stand, breathe, speak, react to stress. Learning about our own habits allows us to gradually free ourselves of our unconscious patterns that interfere with our natural coordination and spontaneity. The actor will move toward a state of psycho-physical well-being so important for imaginative growth and the development of his means of expression.

Description

Course open to MFA2 Acting Program students only.

A two-semester course focused on a classical period drama. First semester is devoted to Shakespeare and understanding of the language, its importance and clarity in the performance. Second part of the year also concentrates on language and it varies from Greeks (Aristophanes, Sophocles) to Restoration and more. Complexity of the material demands at first learning the application of fundamental acting skills. That includes enabling all acting apparatus to work in synchronicity. Attention to language in connection to breathing and adopting the characters in all their complexity. Understanding of the psychology behind the words is important as much as learning to translate that energy into the action. Dramatic and extraordinary texture of the works we are investigating is giving the students the opportunity and supports them to explore and use freely their imagination. It is not about the rules- rather, it is about expression and transformation, about power and measure.

Description

Course open to MFA2 Acting Program students only. The work in the Fall semester of this course further solidifies students' execution of Good Speech while introducing them to triphthongs, traditional pronunciations in Elizabethan language and to language techniques, such as Sense Stress and Inflections. The focus is on speaking poetic texts, both classical and modern, with clarity and specificity, in sound production and in meaning. Students are required to have gained proficiency in their execution of Good Speech by this point in their Speech training. Additionally, they are expected to have established an effective personal practice regimen and are evaluated partly on that basis.

Description

The integration of movement, breath and voice helps to balance body, mind and emotions. This practice is very powerful when the maximum interaction of self-healing mechanisms is achieved. In this state, it is believed that the human system is especially able to draw from the healing energies of nature and the universe. Spontaneous Practice is an excellent way to achieve this interaction. On days when the practice is vigorous, the benefits are more directed at blood, breath, and lymph circulation and the release of connective tissue. On the days when it is more quiet and flowing, the benefits are more linked to brain chemistry.

Description

Open to Acting Program students only.

This course is highly specialized and enrollment highly selective. Offered only at the graduate level and in the Spring, it is specifically for graduate acting students who have demonstrated the aptitude and skill necessary to teach Speech, have been identified as such by their Speech teachers and who are interested in pursuing Speech-teaching as a career. The primary aim of the course will be to help the student to develop the skills in sound production, listening, language technique and accents and dialects that are necessary to be an effective Speech instructor. Though the course does not certify the student to teach Speech, it is in-depth, practical, comprehensive, and aims to ensure that the student could teach Speech effectively were he/she to chosen to do so.

Students enrolled in this course will be required to refine their sound production and listening skills through physical practice and to develop the ability to teach language techniques and accent/dialect principles clearly through demonstration. In addition, they will be required to teach Speech to assigned students in both a class and tutorial context as well as to coach performers in an assigned performance exercise or project. Other components of the course include attending pedagogical meetings with the instructor and demonstrating applied Good American Stage Speech, Classic American Stage Speech, language techniques and Dialects and Accents as assigned. The time structure and topic sequencing of the course is necessarily flexible and dynamic and is partly determined by, not only the instructor's and students' schedules, but also on the performance production schedule of the Institute.

Description

This course will provide the actor with practical voice and speech tools at the end of his/her training in preparation for transition to a professional career. This course seeks to empower the actor to develop his/her own approach, regimen, and process for application of voice and speech work to character development and acting in general-including how to warm up the vocal instrument properly based on each particular actor's needs. The focus will include each actor preparing and leading the class in their own voice warm up, as well as using these skills and applying them successfully to monologues and/or scenes to integrate the voice, body, emotion and thought in performance and fine tune pieces for the actor's audition repertoire.

Course Long Title
Solo Performance Lab

Subject Code	Course Number
TACT	771

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1.5

Description
Six week course open to graduating acting students - BFA 4s and MFA 3s - only. The mission of the Solo Performance Lab is to fuel students' creation of multiple solo performance works that afford the agency, fluency, and critical authorial skills essential to contemporary artists. The Solo Performance Lab compels actors to synthesize all aspects of their training and is a launchpad into the professional sphere.

Students will create two major pieces: one based on a seminal dramatic text, and a second devised piece derived from their personal experiences and impulses. These works will be informed by 1) an intensive study of exemplary contemporary practitioners and of the multi-disciplinary history of solo expression, and 2) an excavation of their own identities, affinities, and personal histories.

The course will cover a diverse array of practices including theatre, standup comedy, drag, vaudeville, cabaret, slapstick, spoken word, performance art, podcast, social media, photography, oratory, television, and film. Figures studied, among others, may include Kendrick Lamar, Samuel Beckett, Phoebe Waller-Bridge, Fred Astaire, Anna Deveare Smith, Cindy Sherman, Guillermo Gomez-Pena, Nina Simone, Marina Abramovic, Charlie Chaplin, Chantal Akerman, Okwui Okpokwasili, Hannah Gadsby, Spalding Gray, Tania Bruguera, Richard Pryor, Eve Ensler, and Buddha.

Students will develop a vocabulary to discuss elements of style and storytelling, and film and edit their projects. Disciplines learned in other classes (speech, voice, movement, text analysis, etc.) over the course of their time at CalArts, as

well as the actor's creative instinct, passion, and imagination are synthesized in the Solo Performance Lab.

No Requirements

TACT772 - Mysticism in Performance

General

Course Long Title
Mysticism in Performance

Subject Code Course Number
TACT 772

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Artists coming of age at the sharp, waning edge of Western Industrial Capitalism, a time still very much informed by centuries of Settler Colonial erasure of heterogeneous ontologies, there is a resurgence of inquiry into and exploration of the mystical. Long derided spaces of inquiry are once again being courageously entered by artists from a range of disciplines and long dismissed artists are being "rediscovered" and their bodies of work reconsidered in more accurate contexts; from the late musician Alice Coltrane to the late visual artist Hilma af Klint, the work of self-described female artists, in particular, are reaching audiences who are now wholly receptive to these formerly ridiculed geni.

Mysticism in Performance will guide students through a research-to-creation process across an intensive semester-long laboratory. Students will first learn about the invitations, ethics, and historical challenges of exploring the unseen/the spiritual/soulful/mystical aspects of art within charged and often polarized cultural contexts. They will next do a deep dive into tenets of Afromysticism as utilized by artist-seeker-makers in a range of disciplines. Students will subsequently identify an artist, a tradition of practice, and/or an extant work that compels them personally (we will consider a wide range of forms); the artist, tradition or work will exemplify an impactful exploration of the mystical in practice. [Note: we will be capacious in our consideration of forms and students can root their inquiry within their specific mtiers, although they will be welcome to explore beyond them]. They will embark upon a student-led [in close collaboration with the instructor] research phase which will include presentations and discussions with the class as a whole. Finally, they will each create both a blueprint for a work at scale, and a substantively realized excerpt of the whole to be

shared.

Students will be asked to devote significant time to reading; research; compiling a project dossier; developing a project-specific generative process; and reflecting upon that process with the class in meaningful ways. Students will be asked to function as a creative brain-trust for their fellow classmates and will be assigned to small-group "teams" within the class that will be responsible for regular process & progress meetings outside of class.

Students will read and view a wide range of material including plays, performance pieces, biographical and autobiographical excerpts, recorded music, film, performance documentation, and visual art. Students will be expected to devote a significant amount of time outside class to their research. Students will also be required to schedule a series of in-depth one-on-one meetings with the instructor throughout the semester to discuss and revise their progress across the span of the semester.

The course will cover a diverse array of practices including theatre, standup comedy, drag, vaudeville, cabaret, slapstick, spoken word, performance art, podcast, social media, photography, oratory, television, and film. Figures studied, among others, may include Kendrick Lamar, Samuel Beckett, Phoebe Waller-Bridge, Fred Astaire, Anna Deveare Smith, Cindy Sherman, Guillermo Gomez-Pena, Nina Simone, Marina Abromovic, Charlie Chaplin, Chantal Akerman, Okwui Okpokwasili, Hannah Gadsby, Spalding Gray, Tania Bruguera, Richard Pryor, Eve Ensler, and Buddha.

Students will develop a vocabulary to discuss elements of style and storytelling, and film and edit their projects. Disciplines learned in other classes (speech, voice, movement, text analysis, etc.) over the course of their time at CalArts, as well as the actor's creative instinct, passion, and imagination are synthesized in the Solo Performance Lab.

Description
Survey of World Theater - Performance Tactics

Course not available to BFA1 students. This course considers significant performance techniques within their political contexts. Histories of theater, performance art, spectacle, and the performance of everyday life frame an understanding of the performing body and its relationship to the real, to cultural identity, and to shifting visions of modernity. Readings provide examples from different national contexts, and include performance texts, artist's writings, and critical scholarship.

Description
This survey course (open to BFA3-4s) will explore the work of radical collectives, community artists, guerrilla performers, and other modern

and contemporary troublemakers and active agents whose artistic practices are fundamentally committed to social justice through the arts. We will investigate theoretical and historical references as they relate to public and context-based work within and outside of institutional environments. We will explore work as it pertains to the performance arts, visual arts, writing arts, community building/organizing, and other practices that eloquently question/examine the dynamics between artists and their communities. Theory and praxis come together through participation in student-designed projects.

Description
Our class will broaden our perspective and deepen our understanding of the intersection between art, collaboration, and social change in community building and engagement. Drawing inspiration and learning from a wide range of community-based arts projects, scholarship, case studies, guests, and field trips, students will have the opportunity to explore diverse engagement strategies in the pursuit of community-centered and issue-oriented projects. This class affords students the opportunity to interact with diverse communities and professionals from various fields, and expand their skills-set of collaborative problem solving and engagement strategies through real-world interventions and projects.

TAIC355 - Radical & Diverse Fashion History

General

Course Long Title
Radical & Diverse Fashion History

Subject Code	Course Number
TAIC	355

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This new course will examine inclusive practices in fashion, costume, and dress history studies, both historical and contemporary. We will look at not only "his" story and "her" story, but "their" story and "our" story through art, photography, painting, sculpture, mixed media and social media. Waiting around the corner of many famous paintings or photographs are subjects of color, non-western subjects and LGBTQ+ subjects. This course dives into a circular and inclusive way of looking at history, and empowers students to become equitable image researchers and interpreters. Research projects will focus on society and culture as a whole, rather than at the most famous or most wealthy at the top of a pyramid. Students will learn how to find high quality fashion and dress images, how to use them in their work, and how costume designers can be advocates for diversity and equity in casting. This class investigates what belonging means, who has the power to include or exclude, and how clothing plays a role in non-verbally and symbolically transmitting crucial clues to who we are as humans and individuals, and as a result, how performance and theater can be culture changing art forms.

Credit Hours

Min Credit Hours:
3

Description
Open to students in the Theater School only. Not open to BFA1 students.
A semester long exploration of the classic Hollywood films that most consistently interest

contemporary audiences. A chance for deeper immersion in Film Noir's nightscape of private eyes, femme fatales, ironic dialogue, iconic lighting, and existential fatalism. We will view a feature film a week from Noir's classic period - 1940-1957 - and discuss each in thematic and visual detail. Notoriously difficult to define, we will examine what makes a Film Noir a Film Noir, using James Naremore's seminal book "More Than Night" as our aesthetic guide. Students will write three 5 page papers throughout the semester. Open to all Theater School graduate students and undergrads BFA 2 and above. Students from the institute might be able to enroll depending on whether Theater School students fill all available slots.

Description
Shakespeare on Stage and Screen: An exploration the major tragedies as plays, productions and films.

This course offers an in-depth study of William Shakespeare's greatest tragedies on stage and screen. The seminar will closely examine "Hamlet," "Othello," "King Lear" and "Macbeth" as plays, productions, and finally as film adaptations. Prominent scholarship on the texts and critical writing on the works in performance will be included. In addition, there will be critical and theoretical material exploring the relationship between cinema and theater. Prominent stage and screen productions will be assigned and discussed in class, including Laurence Olivier's "Hamlet," Peter Brook's "Hamlet" and "King Lear," Akira Kurosawa's "Ran" and "Throne of Blood," Grigori Kozintsev's "King Lear," Roman Polanski's "Macbeth," and Welles' "Othello." Welles' "Chimes at Midnight," a version of "Henry IV," will also be included. Students will be assigned to present an in-class introduction to one of the productions or films. Additionally, they will be assigned to write in response to questions each week on the reading and vie ing in an online class discussion

forum. A 5-7 page final essay examining one of the productions on stage or screen will also be required.

Description

Course open to Design Program students only. This a basic sewing class designed for students with little to no experience in garment construction. Students will begin the class with a shop orientation which will include the safe operation of home and industrial sewing machines, steam irons, and specialty tools of the trade.

Students will learn fabric and commercial pattern usage and explore the various materials and techniques used in the realization of costume designs, including construction techniques and fitting skills. They will also learn fitting room conduct and special garment finishing techniques.

Class content will have slight variations year to year but you can expect to complete 1 finished garment by the end of the course. There may be additional fees up to \$50.00 associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Course open to BFA students only.
This course is designed for students who have basic sewing skills and are familiar with how to use a sewing machine. This course explores creative solutions for costume modifications. Learning the art of complex alterations is a vitally important part of being a costume designer; recognizing a bad fit and how to fix it, utilizing preexisting garments in order to create a new form out of an old garment is a skill. While experimenting with reshaping preexisting garments, students will learn fitting etiquette, emergency alterations, basic men's suit jacket alterations, and some basic pattern making skills. (In other words, learning some tricks of the trade)

TCOS111 - Costume Lab: drawing

General

Course Long Title
Costume Lab: drawing

Subject Code	Course Number
TCOS	111

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1.5

Description

The primary focus is on drawing techniques used for expression and communication specific to costume design. These include how to draw the body, portraiture, cloth and also how to 'read' visual research for different era's; what details and signals to look for, how to understand clothing and its relationship to the body.

Drawing is one of the primary tools for articulating and communicating design concepts. It is also a tool for working through abstract design ideas.

Course Long Title
Costume Techniques III

Subject Code	Course Number
TCOS	150

School(s)	Program(s)
School of Theater	Experience Design and Production

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

This course is an intensive workshop in pattern drafting and draping, and serves as a prerequisite for students interested in learning advanced costume construction techniques. Prior to enrolling, students must have demonstrated skill in hand and machine sewing, and experience using commercial patterns.

We will look closely at the grain and structure of fabric, the geometry of the human body, and the ways in which those two interact. Instead of rules-based formulas for drafting pattern pieces, we will strive for an intuitive understanding of how the two-dimensional shape of the cut fabric pieces results in the three-dimensional shape of the finished garment.

Over the course of the semester, students will develop a torso sloper with sleeves, as well as a simple pants pattern. We will discuss how those basic patterns can be developed into a variety of garments, and how the basic techniques we used to create them can be adapted to pattern any three-dimensional shape.

Students should expect to spend approximately \$30 on basic sewing and drawing tools. Required tools include sharp fabric scissors, paper scissors, an 18" clear ruler, pencils, and erasers.

Description

Using theoretical projects, we work through the initial steps of creative brainstorming, design dramaturgy and research, to the sketching and pre- visualization of ideas to the final steps of presentation of a design process. Understanding how costume has evolved historically is key to understanding the role costume plays today in various performance ecologies.

The projects will focus on a wide range of design approaches for live performance from traditional drama, opera and dance to spectacle and themed entertainment. Emphasis will be placed on developing communication skills and enhance the students ability to collaborate with fellow artists in concept -creation, analysis and image making.

Description

Course open to Design & Production Programs students only.

From the styles of the early 1900's to those ushering in the new millennium, we chart the development of women's and men's clothing fashions in form, function and cultural consciousness. Wide-ranging research using paintings, photographs, periodicals, and the garments themselves allows a fast-paced examination of clothing silhouettes and prominent designers of the time. Weekly research reports and sketches, decade by decade, are required. A museum visit will be scheduled.

There may be additional fees associated with this course for supplies, books, or other materials.

Description

What this course is about:

- 1.A fluid and hybrid form produced by interplay between other fields; art, science, graphic and product design, architecture, music, politics and mass media.
- 2.Clothing that lays down a challenge to accepted norms.
- 3.Clothing, garments and body coverings that deliberately cross disciplines and cultural boundaries emerging from collaborations between individuals working in different contexts.

What this course is not about:

- 1.haute couture
- 2.a coven of tastemakers
- 3.the elite world of high fashion.
- 4.marketing and fickle trends
- 5.shock and awe tactics
- 6.the gaze

Who puts fashion in the world? designers, artists , activists, inventors, performers, manufacturers, ordinary people.

We will focus on street wear, utility clothing, masks and disguises and finally dress codes: the language of clothing and the ways fashion is used to transmit signals.

Students should be prepared to purchase unusual items for fabrication depending on the extent of the project Estimated cost between \$50.00- \$100.00

Description
the World of WearableArt, WOW, is an annual wearable art competition held in New Zealand in late September. This special topics class is dedicated to the conceptual development and hands-on fabrication of wearable art based on specific themes for the 2025 WOW competition. The competition includes entries from 23 countries and is free to enter.
<https://www.worldofwearableart.com/section-theme-years/2025>

There are 6 themes which students can select from to focus their work. Aotearoa (Indigenous New Zealand culture), Avant-garde, Open, Air, Myths and Legends and Neon. Works explored in this class are aimed toward a level of execution acceptable for submission to the competition but that is not a requirement to take the class.

Description
This new course will examine inclusive practices in fashion, costume, and dress history studies, both historical and contemporary. We will look at not only "his" story and "her" story, but "their" story and "our" story through art, photography, painting, sculpture, mixed media and social media. Waiting around the corner of many famous paintings or photographs are subjects of color, non-western subjects and LGBTQ+ subjects. This course dives into a circular and inclusive way of looking at history, and empowers students to become equitable image researchers and interpreters. Research projects will focus on society and culture as a whole, rather than at the most famous or most wealthy at the top of a pyramid. Students will learn how to find high quality fashion and dress images, how to use them in their work, and how costume designers can be advocates for diversity and equity in casting. This class investigates what belonging means, who has the power to include or exclude, and how clothing plays a role in non-verbally and symbolically transmitting crucial clues to who we are as humans and individuals, and as a result, how performance and theater can be culture changing art forms.

Description

This course is an intensive workshop in pattern drafting and draping, and serves as a prerequisite for students interested in learning advanced costume construction techniques. Prior to enrolling, students must have demonstrated skill in hand and machine sewing, and experience using commercial patterns.

We will look closely at the grain and structure of fabric, the geometry of the human body, and the ways in which those two interact. Instead of

rules-based formulas for drafting pattern pieces, we will strive for an intuitive understanding of how the two-dimensional shape of the cut fabric pieces results in the three-dimensional shape of the finished garment.

Over the course of the semester, students will develop a torso sloper with sleeves, as well as a simple pants pattern. We will discuss how those basic patterns can be developed into a variety of garments, and how the basic techniques we used to create them can be adapted to pattern any three-dimensional shape.

Students should expect to spend approximately \$30 on basic sewing and drawing tools. Required tools include sharp fabric scissors, paper scissors, an 18" clear ruler, pencils, and erasers.

Description

This course will cover advanced costume construction skills. Class content will rotate from year to year, and students may take the class more than once. Topics covered may include Stretch Fabrics, Body Padding, Mask Making, Advanced Pattern Manipulation, Millinery, Compression and Support Garments, Collars and Lapels, Bias Draping, Armor Making, and others. There may be additional fees associated with this course for supplies, books, or other materials. This course is open to students who have completed Costume Techniques III, or who have demonstrated skill in pattern drafting.

Students may be charged a course fee of up to \$50, which will cover any specialized materials needed for the course. Students will need to provide their own basic sewing, drawing and patterning tools.

Description
What this course is about:
1.A fluid and hybrid form produced by interplay between other fields; art, science, graphic and product design, architecture, music, politics and mass media.
2.Clothing that lays down a challenge to accepted norms.
3.Clothing, garments and body coverings that deliberately cross disciplines and cultural boundaries emerging from collaborations between individuals working in different contexts.

What this course is not about:
1.haute couture
2.a coven of tastemakers
3.the elite world of high fashion.
4.marketing and fickle trends
5.shock and awe tactics
6.the gaze

Who puts fashion in the world? designers, artists , activists, inventors, performers, manufacturers, ordinary people.
We will focus on street wear, utility clothing, masks and disguises and finally dress codes: the language of clothing and the ways fashion is used to transmit signals.

Students should be prepared to purchase unusual items for fabrication depending on the extent of the project Estimated cost between \$50.00- \$100.00

Description
the World of WearableArt, WOW, is an annual wearable art competition held in New Zealand in late September. This special topics class is dedicated to the conceptual development and hands-on fabrication of wearable art based on specific themes for the 2025 WOW competition. The competition includes entries from 23 countries and is free to enter.
<https://www.worldofwearableart.com/section-theme-years/2025>

There are 6 themes which students can select from to focus their work. Aotearoa (Indigenous New Zealand culture), Avant-garde, Open, Air, Myths and Legends and Neon. Works explored in this class are aimed toward a level of execution acceptable for submission to the competition but that is not a requirement to take the class.

Description
Course open to MFA 3 Costume Design Program students only.

Design students in their final semester of graduate studies complete projects from throughout their entire tenure at the school. It provides an opportunity to return to projects that were inspiring but not finished to a level that communicates fully the design. Large finished models and other expressive materials are created. Often students experience the pleasure of having more mature ideas that influence the entire work. Through the work in this course, the student is expected to complete a graduate level portfolio.

Description

Open to BFA Design Program students only.

Every learning goal of the Design program is experienced in production. Live performance experiences expose the student to a variety of aesthetic and practical approaches that challenge and expand awareness of the infinite possibilities of art-making and creativity. Students are assigned production work for credit based on mtier of interest.

Coursework is a combined experience of class instruction, hands-on skills practice and supervised lab hours dedicated to an actual production. Due to the fact that class instruction exists to supplement production, it partially shares the time slot with weekly production meetings which students assigned leadership roles will be required to attend.

This is a variable unit course. Registration is permission of instructor to determine correct unit value. Credit given to theater school designers, managers and technical directors for work in their metier on theater school projects and production. Credit varies based on

expectations of the role the student plays in the production process, both in commitment of time and responsibility.

Description

Closure is a class for graduating BFA Design and Production students.

Through a combination of individual exercises, professional materials and portfolio review, students will orient themselves toward the fields they aim to enter. Multiple faculty will contribute to feedback. Students will create and review individual resumes, bios, websites, other online presence materials. They will also dig deep into their physical portfolios, gathering, organizing, and interrogating all visual, technical and audio documentation around their work. In addition, students will do writing, field scan, and goal-setting work to situate and contextualize their post-degree activities.

Description

This course is open to the Institute by Permission of Instructor on Course Advising Day. This class considers the conceptual and practical aspects of adapting existing texts (whether from drama or literature) when using puppets or performing objects as integral elements in a theatrical work. This collaboration is essential in the development of new work for that incorporates puppets or objects, as the puppet serves a double use as both an element of the design and as a performing object/actor. While conceiving and designing these objects as a part of the dramaturgical approach, students will examine the ways in which the use of puppets can unlock a text or create a world. Through viewings and assignments, students will explore issues such as scale, doubling, ambiguity, the use of metaphor, and the relationship of actor to puppet, while examining the historical use of the performing object as an essential theatrical tool of the avant-garde.

Description

Limited to 12 students
This class considers the aesthetic, conceptual and practical aspects found at the intersection of text (whether from drama, literature, web, journalism, original texts, or other sources) when using material elements such as puppets or constructed objects as integral elements in performance. We will examine traditional / populist forms, such as humanettes, ventriloquism, and hand puppetry, picture performance, including the traditions of Punch and Judy, Blue Blouse and Constructivist performance. We will also examine contemporary work including Visual/ Performance Art, Fluxus performance, Agit Prop, digital doppelgangers, and related forms. Students will create short works in response to their engagement with these forms. Viewings of works across disciplines will be integral to these investigations, highlighting the cross-medial intersection of contemporary object performance with other forms.
While conceiving and adapting new work, using low-tech methods, students will consider the use of performing objects as a part of a unified scenographic and directorial approach. Students will examine the ways in which the use of puppets, objects, masks, and other material forms can unlock a text or create a world. Through viewings, readings, assignments, and in-class projects, students will explore issues such as scale, composition, ambiguity, manipulation/focus, and the relationship of performer to objects and puppets, while examining the historical use of performing objects as an essential theatrical tool of the avant-garde.
For their final projects, each student (or collaborative team) will propose a short object performance-based work to develop in the final 4 weeks. During this development time, class time will be allotted for work on the projects, as well as for critique of working progress. The viewings will be chosen to relate to each student's final projects. The class will culminate in a performance of works in-progress or finished works.
please add this to both:

Description
Open to students in the Theater School only. A semester long exploration of the classic Hollywood films that most consistently interest contemporary audiences. A chance for deeper immersion in Film Noir's nightscape of private eyes, femme fatales, ironic dialogue, iconic

lighting, and existential fatalism. We will view a feature film a week from Noir's classic period - 1940-1957 - and discuss each in thematic and visual detail. Notoriously difficult to define, we will examine what makes a Film Noir a Film Noir, using James Naremore's seminal book "More Than Night" as our aesthetic guide. Students will write three 5 page papers throughout the semester. Open to all Theater School graduate students and undergrads BFA 2 and above. Students from the institute might be able to enroll depending on whether Theater School students fill all available slots.

Description
For those who seek in film viewing an altered state, a weekly exploration of the ten thousand emotional gradients between ecstasy and horror. An eclectic, associational hopscotch through the length and breadth of film history in which we sample the intoxicating pleasures of narrative and experimental, silence and sound, the short and the long, the purple and the prosaic, B/W and technicolor, melodrama and realism, the maximalist

and the minimal, the overwrought and the understated, the hieroglyphic and the direct, the blunt and the mysterious.

Costume Techniques: Torso Sloper

Subject Code **Course Number**
TFND 110K

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
A beginning course, which explores the intersection of fabric and the geometry of the body. We will use a combination of draping and flat patterning techniques, with an emphasis on understanding how pattern pieces combine to create 3-dimensional geometric forms. In the process of creating a torso sloper, the student will practice fitting skills, learn construction and craft techniques such as fabric manipulation. There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.
Please note that the students will use their own bodies as models for their torso sloper. In this way, you will become familiar with your body shape first before patterning for another's body.

School of Theater Experience Design and Production

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
This course will explore techniques for sculpting costumes in 3-dimensions. Whereas most clothing relies on the human body to give it shape, sometimes a designer may seek to modify or enhance the shape of an actor's body to create a particular effect. This can be done subtly, so the audience is unaware of the change, or it can be greatly exaggerated for a comical or surreal effect. Careful planning is necessary to create a costume that achieves the desired look while remaining practical and functional.

School(s)

School of Theater

Academic Level

UG - Undergraduate

Credit Hours**Min Credit Hours:**

1

Description

Where do good ideas come from? And once we have the seed of a good idea, how do we nurture it and make it stronger? We will explore a variety of strategies for opening ourselves in ways that allow good ideas to find us, that allow us to know a good idea when we have one, and that support the process of developing that idea to its greatest potential. We will practice meditation, go for walks, do push ups, and have snacks. And then talk about it and what we noticed while we did it. We will talk about things that inspire us and reveal our personal "failure resumes". We will read about being wrong. And talk about it. And we will do our best to be right. This class is designed for students who are creatively inspired and pushing to find their voice, but secretly feel like they haven't figured it out yet. Don't worry, nobody really has. It's all a work in progress. And we will work on it together.

Credit Hours**Min Credit Hours:**

1

Description

This course focuses on the activation of found objects in performance. Manipulating the material world in real time offers limitless possibilities for artists, designers, and performance makers. Through a series of short, hands-on projects and improvisations, students will explore their roles as generative artists using found objects as vehicles for creating new forms and generating/activating content. Responding to a range of texts (whether from drama, literature, poetry, news reports, social media /online sources, original, adapted or collaged texts, students will challenge their existing ideas of what performance can be.

Objects carry a wide range of possible associations that can be investigated, heightened, subverted, or enhanced through their intentional live animation. The word animation derives from

the Latin 'anima' meaning "of air, having a spirit, living"; or "breath of air, air, soul, life". By animating objects we breathe new life into them.

Substitute Objects centers on performative work with objects, with a corollary investigation of the role of the performer in the process . Students will explore a myriad of issues concerning objects in performance, such as scale, humor, doubling, ambiguity, visibility, invisibility, and the use of metaphor, while examining the historical use of the performing objects as an essential theatrical tool of the avant-garde.

1

Description

How can we experience live art, performance and entertainment when the creators cannot be in the same physical space? Or when the audience cannot use two or more of their senses? Or when the venue is a broom closet? Inspired by the COVID-19 pandemic, we will develop new ideas and creative solutions for how live art and entertainment can be produced and consumed within specific circumstances or limitations. In teams, we will brainstorm, develop and pitch an idea for a one-time live artistic performance or experiential event to a panel of "Sharks" (ie. faculty, staff and entertainment professionals) for their "investment" and feedback. This is the CalArts version of Shark Tank!

Experience Design: Look At This

Subject Code	Course Number
TFND	125D

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

LOOK AT THIS will be an opportunity to create a shared space of engagement with art and artists across a range of art forms, whether traditional/historical, experimental/avant-garde, or popular culture forms. As artists, we are constantly engaged with making work; it's equally critical to create a space to encounter, enjoy, contemplate and be challenged by the range of work made across time and form. The class will alternate between experiencing/discussing the work that I will bring to the group, and the work or documentation that students bring in. In addition to work that you may already know, you will be researching/looking for new or unknown (to you) works, via the internet, the library, and other resources. Each student is required to share at least one work weekly. This should be a work that has affected you with unusual intensity. All forms are welcome, in whatever way they can be shared---books, films, art, records, performance documentation, field recordings, found objects, dvd/vhs/cd, film, online videos/blogs/images, newspapers, books, graphic design, recordings, etc. We will also look at excerpts from Joseph Cornell's diaries that describe his quest for daily "epiphanies". Each student will create a final project, in any form, as a response to a work seen in class. This course is open to Design and Production Foundation students through online signup, and open to the institute through permission of instructor at Course Advising Day.

Description

Disfigurement, ornamentation, modesty, transmission of signals, strong cruelties and mutilations figure prominently in the ceaseless change of body coverings. Will masks be forever linked in our minds to contagium and death forgetting their long history of association with modesty, as a welcome refuge in anonymity, a 'false' face, shame, carnival or licentiousness?

This course takes a look at body coverings, adornments, physical alterations, and the cultural differences that influence how we dress and understand the coded signals being transmitted with out words.

Description

Part of the Studio Labs group of courses, Research Methods for Designers will introduce design students to research methods and practices, including online tools, library resources, and select field work. We will explore an array of methods utilized by designers and artists, and put them into dialogue with each student's emerging design process. In each iteration of the class, the group gathered will collectively research a pre-defined arts-related topic and then generate written and visual materials, culminating in a publication.

Description

A course on how light and design is used to tell a story in a variety of environments including where we live, work and play. We will examine why different lighting schemes are used for different scenarios and how it affects our lives. We will explore how natural and artificial light can help direct people to live the life they need or wish to have. Exercises include the study of light and feeling on and off the stage, and the how and why it makes a difference. You will be guided to use your powers of observation and intuition to explore these questions and make different spaces come to life. We will concentrate on needs, narratives, and reasons.

Min Credit Hours:

1

Description

This 6 week course will focus on body language, gesture, and the ways in which clothing can enhance these methods of non-verbal communication. We will take a performance-centered approach toward design, and try to understand costuming from the point of view of the actor. Students will select a series of expressive gestures and poses, which they will distill down to their most essential elements. While exploring those gestures with their own bodies, students will conceive of costume elements that could add to the power of their non-verbal communication. Those costume elements will be mocked-up in 3-dimensions, and students will be able to experience how wearing these garments affects their movement and the feel of their physical gestures. This class is aimed at BFA1 students in the XDP program, who will be given priority when enrolling. The course is open to students from throughout the institute as space allows.

Institute Producing: Practical Skills for Creative Producing

This course is designed for students interested in independently producing their own work. The course is an exploration of producing approaches and practices and how they relate to self-produced projects. Each method explored will offer insight to the creation and presentation of self-generated work within the Institute and beyond. The course will feature guest producers and an in-class project to develop a producing plan for implementation. Methods to be explored include producing for dance, theater, music, film/video, art, events, and other creative projects.

Description

Actors, artists, musicians, dancers, and athletes are developing specialized performance skills. They think about coordination but often have a vague concept of what that is. By teaching the basics of functional anatomy and vertebrate organization, combined with increased sensory awareness and kinesthetic sensitivity, the concept of coordination takes on a new perspective and concrete steps to change the movement repertoire become apparent.

The Alexander Technique offers a clear, systematic look into the underlying principles that govern human movement. F.M. Alexander discovered a primary mechanism for achieving balance and ease in uprightness: The head leads the spine in good coordination. This "primary control" is the central mechanism. It alters the physiology of the body by creating more space. While Alexander Technique has its roots in the performing arts, it is widely accepted as an educational method that focuses primarily on changing habitual behavior. Participants learn to engage the body and mind to reduce tension in daily activities. It is this unique psycho-physical combination that has made Alexander Technique training such an important component of the practical and creative training for performing artists.

The principles and procedures of the Alexander Technique apply across all areas of daily practice and rehearsal routines, to performance and the mitigating of stage fright and health problems.

"Alexander Technique gives us all the things we have been looking for in a system of physical education: Relief from strain due to maladjustment, and consequent improvement in physical and mental health. and along with this, a general heightening of consciousness on all levels. We cannot ask more from any system of education; nor, if we seriously desire to alter human beings in a desirable direction, can we ask any less."

-Aldous Huxley on Alexander Technique

Description

Course open to BFA4 School of Theater students only, by Permission of Instructor only. Entrepreneurship: The Artist as Entrepreneur

The course will focus on learning to develop your own opportunities for work in the arts. It will address issues in both the profit and not-for-profit worlds and encompass challenges faced by performers and those who work in

production. It will cover the theatre/live performance and film/media arenas. The methods employed in this class will have little to do with turning students into business moguls; rather, the strategy is to challenge students to find their interests, set goals, and become self-directed with respect to their education and future prospects. The purpose is to foster your personal agency. Human agency is the capacity for human beings to make choices and to impose those choices on the world. In short, agency is the capacity to act in the world with confidence and consciousness.

Description
How do we speak the unspeakable? Or express what we can't yet understand? Innovation in performance disciplines has almost always been preceded by periods of personal, social, or political upheaval, requiring the artist to traverse previously uncharted realms in response. In this sense, experimental work can be understood as work that strives to recontextualize one's place within a world that is no longer/was never familiar, is possibly even hostile, violent, or otherwise unapproachable. By exploring themes of alienation, intuition, wordplay, anarchy and liberation, together we will ask: how might experimental narratives guide us through a process of unlearning traditional notions of structure, form, viewership, analysis, story and even language and, as a result, open our work to deeper realms of expression and connection? Part reading/viewing practice, part conversation space, and part generative lab, this semester-long course we will highlight narrative works by a variety of experimental writers and artists such as Kathy Acker, Anne Carson, Hilton Als, David Wojnarowicz, Suzan-Lori Parks, Sarah Kane, Michaela Coel, Nan Goldin, Gertrude Stein, Okwui Okpokwasili, Marguerite Duras, Carolee Schneemann, Virginia Woolf, and more. Centering each week around a reading and/or viewing experience, together we will engage in group discussion focused on revealing the conceptual and aesthetic strategies employed by these experimental artists, as well as

Description
A one-semester course that aims to discover what a play is, how it works and what it's for. Course objectives include:
Creating a joint vocabulary for talking about plays by interrogating the meaning and use of dramatic concepts such as 'action', 'character', 'space,' etc.
Increasing our capacity to enter into a dialogue with text (How do you listen to and question texts?).
Expanding our ability to generate an articulate and imaginative response to dramatic texts.
This course will be team-taught by three instructors. Each session will have two parts: The collective reading and discussion of the play and a subsequent, more detailed, discussion in a smaller setting, which may include writing and creative exercises. Readings will focus on ten plays and select theoretical texts ranging from Aristotle to contemporary theorists and theater artists.

Description
This seminar examines current developments in contemporary American playwriting. Our investigations will set out on a dramaturgical footing. We will analyze the structural, thematic, tonal and theatrical dimensions of salient new plays while teasing out the connections to dramatic tradition and pinpointing the distinctive quality of "newness" that each of these works presents. The course will also consider the producing challenges posed by this writing and explore how the authors of these plays are forcing institutional theaters to reassess their programming criteria. Dramatists may include Annie Baker, Young Jean Lee, Tarell Alvin McCraney, Rajiv Joseph, Brandon Jacobs-Jenkins, Anne Washburne, Samuel D. Hunter, Thomas Bradshaw, Will Eno and Suzan-Lori Parks. In addition to reading at least a play a week, students will be required to attend three productions and write three performance reports (750-1000 words each) on productions in the Los Angeles area. In addition, each student will be required to write a 10-12 page final paper assessing the oeuvre of one of the playwrights under examination this term.

students multiple ways for understanding, describing, and suggesting how subjects behave when their behavior is meant to be viewed - and, as such, understood as a way of signifying something between the observed and the observer. While we'll focus on contexts in which these exchanges take place in mediated performance spaces (the "stage", the gallery, the screen), we will also consider how performance can détourne spaces of unconscious performance into theaters. Our subjects will range from actors, athletes, vocalists, and strippers to Cary Grant's suits in North by Northwest and George Tsylin's elemental stage designs. The course includes readings, viewings, guests, group discussions, and written responses that engage strategies suggested by Suzan Lori-Parks, comic book artist Scott McCloud, and more.

Description

This survey course (open to MFAs) will explore the work of radical collectives, community artists, guerrilla performers, and other modern and contemporary troublemakers and active agents whose artistic practices are fundamentally committed to social justice through the arts. We will investigate theoretical and historical references as they relate to public and context-based work within and outside of institutional environments. We will explore work as it pertains to the performance arts, visual arts, writing arts, community building/organizing and other practices that eloquently question/ examine the dynamics between artists and their communities. Theory and praxis come together through participation in student-designed projects.

Description
Our class will broaden our perspective and deepen our understanding of the intersection between art, collaboration, and social change in community building and community engagement. Drawing upon a range of community-based art projects, scholarship, case studies, screenings, interactive games, field trips, and hands-on collaboration, the student will have the opportunity to explore a myriad of community engagement projects and strategies that utilize the visual and performing arts.

Description
The course starts with an interest in texts that, at first sight, resist dramatization--novels, short stories, poems, non-fiction. Using a variety of techniques--writing, image work, painting, performance--we examine how these texts can be explored in the theater. In the process, we investigate questions, such as 'How do you translate a particular non-dramatic text into a theatrical one?' and 'How do you use a non-dramatic text as a starting point for a theatrical piece?' During the first half of the semester we respond to the same text; the second

part of the semester provides opportunities to develop individual projects. Collaboration is strongly encouraged. Offered Alternate Years

Course Long Title
Grad Seminar: Dramaturgy

Subject Code Course Number
THST 535

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
This course will examine dramaturgy as a role or function (rather than the structural properties of a dramatic text). We will investigate how dramaturgical practice can be applied within an expanded field. Some of the questions we may look at: What is the dramaturgy's function working on an existing text, a new play, a dance piece, a film, in music theater, in relation to curatorial practice, inter-disciplinary work, new technologies? How can the dramaturg/dramaturgical activity elucidate the creative process? How can textual and visual research deepen the work? How can dramaturgy facilitate cross-cultural translation? How does dramaturgical thinking relate to critique? The course will use the work currently presented at the Institute as a touchstone for reflection. In addition, participants may bring in projects they are currently working on. As we function as dramaturgical consultants on each other's projects, we will explore the various ways in which dramaturgical thinking can stimulate the creative process.

Description

How has theater born witness to human atrocities throughout history? We will read plays that document or testify to violence and human suffering, and we will look at the work of various theater artists who have made it their mission to represent suffering. Questions we will engage include: What can theater add to the process of witnessing? How specifically do language and image function in plays that represent trauma? What kinds of witnesses are produced by various kinds of theatrical strategies? What is the political function of theater in the aftermath of violence? Readings of plays and theoretical texts by theater artists may be supplemented by readings in psychoanalysis and political ethics.

Description

This graduate seminar examines current developments in contemporary American playwriting. Our investigations will set out on a dramaturgical footing. We will analyze the structural, thematic, tonal and theatrical dimensions of salient new plays while teasing out the connections to dramatic tradition and pinpointing the distinctive quality of "newness" that each of these works presents. The course will also consider the producing challenges posed by this writing and explore how the authors of these plays are forcing institutional theaters to reassess their programming criteria. Dramatists may include Annie Baker, Young Jean Lee, Tarell Alvin McCraney, Rajiv Joseph, Brandon Jacobs-Jenkins, Anne Washburne, Samuel D. Hunter, Thomas Bradshaw, Will Eno and Suzan-Lori Parks. In addition to reading at least a play a week, students will be required to attend three productions and write three performance reports (750-1000 words each) on productions in the Los Angeles area. In addition, each student will be required to write a 10-12 page final paper assessing the oeuvre of one of the playwrights under examination this term.

Description

How do we speak the unspeakable? Or express what we can't yet understand? Innovation in performance disciplines has almost always been preceded by periods of personal, social, or political upheaval, requiring the artist to traverse previously uncharted realms in response. In this sense, experimental work can be understood as work that strives to recontextualize one's place within a world that is no longer/was never familiar, is possibly even hostile, violent, or otherwise unapproachable. By exploring themes of alienation, intuition, wordplay, anarchy and liberation, together we will ask: how might experimental

narratives guide us through a process of unlearning traditional notions of structure, form, viewership, analysis, story and even language and, as a result, open our work to deeper realms of expression and connection? Part reading/viewing practice, part conversation space, and part generative lab, this semester-long course we will highlight narrative works by a variety of experimental writers and artists such as Kathy Acker, Anne Carson, Hilton Als, David Wojnarowicz, Suzan-Lori Parks, Sarah Kane, Michaela Coel, Nan Goldin, Gertrude Stein, Okwui Okpokwasili, Marguerite Duras, Carolee Schneemann, Virginia Woolf, and more. Centering each week around a reading and/or viewing experience, together we will engage in group discussion focused on revealing the conceptual and aesthetic strategies employed by these experimental artists, as well as the connections that persist across various artists, disciplines, and histories. While not a traditional writing workshop, this course is nevertheless designed to be a fertile environment for new ideas and impulses and, ideally, will instill greater confidence in refining our own artistic practice through the process of authoring ourselves into experimental lineages that offer a new sense of belonging and creative potential.

Description
The camera has become a regular participant in theater work in a wide variety of ways. Theater Artists need to come to grips with the camera as part of their everyday reality. This production class has been designed specifically to introduce Theater School students, BFA2 & above, to the aesthetic possibilities of artist-based filmmaking.

The first half of the semester is devoted to a series of 4 exercise assignments where students encounter the building blocks of visual filmmaking. These exercises are like visual calisthenics; their restrictions and limitations challenge the students to grow the visual and formal side of their camera use and will help students deepen their understanding of composition, movement, sensitivity to light, and rhythm through editing. The second half of the

semester will be devoted to the students creation of a longer film of at least 5 minutes in a final project of their own choosing. The completed exercises and final project will be presented for in-class screening, feedback, discussion and critique. The assignments are also used as springboards into foundational aesthetic discussions about film form.

Students will be required to provide their own camera, editing program and hard drives for their projects. Consumer level versions of this equipment and software systems are completely acceptable for use.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Description
Collage: Special Concentration-- The Collage Novel

This edition of COLLAGE will be a special variant focused exclusively on the Collage Novel. Using Max Ernst's 1930's surrealist and visual classic "Un Semaine De Bonte" as our model and jump off point, students will spend the semester creating their own version of a collage novel in a medium of their choice. Students will be expected to work on their projects in class as well as at home. Class time will also be devoted to the presentation and discussion of works in progress, discussion of major issues of the collage form and to the viewing of outstanding examples of the genre in fine art, writing, music, film and theater. In general, students are encouraged to customize assignments to their specific perspective and metiers as much as possible.

Students should expect to spend up to \$200 for the purchase of materials and various texts. Open to all Theater School and Institute students, BFA 2 and above.

Toy Theater

Subject Code

TIMM

Course Number

220

School(s)

School of Theater

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:

2

Description

Toy Theatre was a popular parlor, cabaret, and salon entertainment in Europe and America in the 19th Century. Toy Theatres (also known as Paper Theater and Model Theater) were miniature replicas of actual theaters and plays performed on the stage in local theaters in London, Munich, and other cities.

Through projects, viewings, and readings, we will explore the traditional and contemporary practice of Toy Theatre through its roots in the peepshow, the diorama, and the cabinet of curiosities. We will investigate related forms such as Manga Kamishibai, a Japanese street theater form that used miniature proscenium theaters with changing illustrated boards. And we will explore the use of Toy Theater by 20th/21st Century artists, who have expanded this low-tech, highly portable and expressive form as a vehicle for abstract, personal, historical, or political performances and installations. Video and live-feed elements have expanded the possibilities of the form.

Through a series of three projects, students will design and create their own peepshows, dioramas, and Toy Theater inspired performances, either in response to a range of possible texts, or as visual theater, film, video, or installation works.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Description

One of the most ancient forms of theater, shadow puppetry has been an essential form historically in both ritual and secular theater. Shadow theater has also played an important role in the 20th century, from the legendary Chat Noir performances in Paris, to the continually evolving Indonesian Wayang, to the works of contemporary avant-garde artists, both in theater and the visual arts. This course will explore the medium of shadows through in-class viewings of theater, film, visual/installation art, photography, and graphic design that utilize shadow forms in evocative and imaginative ways. Students will work on individual and collaborative projects that explore a variety of approaches to the theatrical use of shadows.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Description
A one semester course open to all Theater School students, BFA 3 and above, who have completed Intro to Personal Filmmaking or its equivalent. The course will offer students a chance to more deeply explore the challenges and satisfactions of artist filmmaking. This course will follow a workshop structure, where students present their in-progress films to be viewed, discussed and critiqued. Students will need to be self motivated and generate projects they are passionate about. We will strive to create an atmosphere of mutual support and inspiration in which students can respond to and feed off each others choices. Students will create and work to complete several shorter films by semesters end. These can be narrative, abstract or poetic or any combination of various approaches. Students will need to supply their own cameras and editing software to make their films. Working with a camera phone is completely acceptable.

Students are required to supply their own cameras (a phone camera is acceptable), hard drives and editing software. At the high end, student's should expect to spend \$300-\$500 on hard drives and supplemental camera equipment.

Credit Hours

Min Credit Hours:
3

Description

AutoCAD Semester 1 is a project-oriented approach to learning the fundamentals of drafting with AutoCAD. This course is primarily intended for entering MFA and BFA technical direction students and scene designers, though it is open to all students as space allows. The goal of this course is to train students to facilitate visual communication between Technical Directors, Designers, Scenic Carpenters and the entire production team and will be geared toward that end. We will be working with the current versions of AutoCAD. Students will be encouraged to expand on the familiarity of the software gained in class lessons by applying it to specific projects within their metier. Students will learn to draw increasingly complex 2D objects and how to visually communicate them by the use of layouts, templates, dynamic blocks, dimensioning, scaling and sheet sets and e-transmission.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Description

Healthcare by Design operates as a dynamic, project-based partnership with Reimagine Well, in which students work directly on a project with real-world applications and public benefit, using the lens of experience design. Each iteration of the class has a partner and content focus, with past classes taking on subjects including end of life / palliative care, pediatric cancer treatment, movement-based recovery post-op for kids, on-site care environments for staff and doctors, adolescent / young adult early diagnosis and oncofertility, and non-pharmacological psychedelic experiences for PTSD. The class takes a deep dive into the subject matter, interacts with existing models and precedent work from the healthcare and experience design contexts, brings students into direct dialogue with clinicians, practitioners, healthcare organizations, patients, and non-profits, and develops a pilot in response to the challenge presented. The course is 6 weeks in length. Please contact the faculty for details on the content area and partner for this round of the course.

TIMM323 - Body Performing Nature

General

Course Long Title
Body Performing Nature

Subject Code Course Number
TIMM 323

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

Led by an architect and leading thinker in biomimicry, this workshop starts from the analysis of our own body and our skin: the organ that enables us to connect with the others. How can we, as creative artistic minds, envision our future as part of nature: poetically, technologically and materially connected? We are nature and nature is all around us. We will explore CalArts campus, observe our bodies and the living organisms around us. Working in group, we will extrapolate lessons and cues, and we will design and make a wearable artifact that will enhance and extend our

perceptions and connections to other living organisms and augment sensations and atmospheric adaptations with the ecology of the site. A prosthesis, a sculpture, a prop, an extension, that extends our "skin" and connects us with and to the other/s; with the serious yet playful intent to better understand body, space and the environment in this era of disconnect with the environment. This cross-disciplinary class embodies the rigorous spirit of experimentation intersecting learning and practice, connecting science and the arts with the intent to produce 4D experiences.

Description

This is an interdisciplinary, project-based course examining ways that creative practice can contribute to a more ecological future. In this cycle of the course, we will join a larger, multi-university initiative in cooperation with LA County, which in 2020 rolled out a very ambitious set of sustainability goals. In service of this more resilient future, students will encounter leading trends, visit with local experts and thinkers, and bring the unique flavor of CalArts to the development of pilot initiatives. Student teams will forge models of how creative practice can be brought to bear on these challenges and take steps toward implementation plans and prototypes to build a more resilient future and be directly responsive to the climate crisis in our own backyard.

The Fall 2022 version of the class will focus on oceans, water, and their role in the climate crisis in particular, and involve some time down at the Port of Los Angeles with partner organizations.

Description

This course is open to the Institute by permission of instructor on Course Advising Day. This class considers the conceptual and practical aspects of adapting existing texts (whether from drama or literature) when using puppets or performing objects as integral elements in a theatrical work. Open to all BFA students, students from different disciplines will work in tandem, selecting and analyzing texts and considering the use of puppet forms that can illuminate the text in substantial ways. This

collaboration is essential in the development of new work for that incorporates puppets or objects, as the puppet serves a double use as both an element of the design and as a performing object/actor. While conceiving and designing these objects as a part of the dramaturgical approach, students will examine the ways in which the use of puppets can unlock a text or create a world. Through viewings and assignments, students will explore issues such as scale, doubling, ambiguity, the use of metaphor, and the relationship of actor to puppet, while examining the historical use of the performing object as an essential theatrical tool of the avant-garde.

UG - Undergraduate	

Credit Hours

Min Credit Hours:
2.5

Description
Limited to 12 students
This class considers the aesthetic, conceptual and practical aspects found at the intersection of text (whether from drama, literature, web, journalism, original texts, or other sources) when using material elements such as puppets or constructed objects as integral elements in performance. We will examine traditional / populist forms, such as humanettes, ventriloquism, and hand puppetry, picture performance, including the traditions of Punch and Judy, Blue Blouse and Constructivist performance. We will also examine contemporary work including Visual/ Performance Art, Fluxus performance, Agit Prop, digital doppelgangers, and related forms. Students will create short works in response to their engagement with these forms. Viewings of works across disciplines will be integral to these investigations, highlighting the cross-medial intersection of contemporary object performance with other forms.
While conceiving and adapting new work, using low-tech methods, students will consider the use of performing objects as a part of a unified scenographic and directorial approach. Students will examine the ways in which the use of puppets, objects, masks, and other material forms can unlock a text or create a world. Through viewings, readings, assignments, and in-class projects, students will explore issues such as scale,

composition, ambiguity, manipulation/focus, and the relationship of performer to objects and puppets, while examining the historical use of performing objects as an essential theatrical tool of the avant-garde.
For their final projects, each student (or collaborative team) will propose a short object performance-based work to develop in the final 4 weeks. During this development time, class time will be allotted for work on the projects, as well as for critique of working progress. The viewings will be chosen to relate to each student's final projects. The class will culminate in a performance of works in-progress or finished works.

Art of Themed & Immersive Entertainment

Subject Code	Course Number
TIMM	405
School(s)	
School of Theater	
Academic Level	
UG - Undergraduate	

Credit Hours

Min Credit Hours:
3

Description
This course will delve deeply into themed and immersive entertainment, exploring the creative process behind developments such as theme parks and attractions, museums, leisure destinations, and immersive theater performances. Using their wide variety of artistic backgrounds, students will apply theatrical philosophies and techniques to develop projects that weave narratives and tell richly detailed stories. This class depends heavily on both personal dedication and teamwork, and will guide students to find innovative solutions within nontraditional media while pushing the boundaries of art and storytelling.

Description

Special Topics in Puppetry: Projected Objects/The Tangible Ephemeral

This laboratory class will explore the intersection of objects, miniatures, and bodies (human and artificial) with directed light and projection, in the context of performance and installation. From the magic lantern, to the early days of film, to the myriad contemporary digital video forms, light and projection have been used as aesthetic elements in the theatrical animation of objects. In this class, students will be confronted with a number of paradigms to consider, explore, and explode, such as projection through translucent objects, the use of projection within theatrical objects, the use of projection as an element of the space which the object inhabits, the nature of screens, and the integration of essentially ephemeral projection with the artifice of tangible objects and environments, and with the human body.

Note: This is a class based in aesthetics and problem solving, rather than in the technical realm. The instructor's focus will not be on teaching software or programming. The range of technical knowledge within the class will most likely be wide, and no prior technical experience is necessary. Students may work low tech, high tech, or anywhere in-between---idea and aesthetics are the focus. The laboratory nature of the class will hopefully facilitate a shared knowledge among participants.

TIMM440 - Digital Techniques for Theater Designers

General

Course Long Title
Digital Techniques for Theater Designers

Subject Code	Course Number
TIMM	440

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

An exploration of digital techniques in Photoshop and Illustrator for theater designers. Learn how to competently navigate both programs independently as well as in tandem. An examination of application techniques such as, digital painting, photo compositing and vector graphics. The techniques investigated will facilitate digital art development for theater, concept design, immersive experience design and production art.

Film/Video Pre-Production Planning

Subject Code	Course Number
TIMM	442

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

The goal of the module is to gain an understanding of the production process from a Producer, Line Producer, Production Manager and Assistant Director's point of view with an emphasis on pre- production planning and production. Through lectures, guest lecturers and selected readings, students will learn about set safety, set procedures, SAG, permits, insurance, working with animals and children, location management, production paperwork, the roles of crew members on the set and other production related information. The last month will be spent on how to breakdown, schedule and budget a script. Also, we will look at some distribution models and what genre of independent films work and why.

Description
A rotating special topics class focusing on advanced exploration of digital techniques for theater designers.

Special topic focus for Spring 2024: Digital Portfolio Development. Students will pitch and develop a digital art project that targets their individual career goals. Projects can range from: concept art, immersive design pitches, production art, etc. In addition to designing a digital art project, students will expand their skills on designing the always evolving document that is their digital portfolio. Students will get to explore layout and design for PDF portfolio, resume, website, and other pieces of professional collateral.

Description

Unity Game Engine: Programming in C#

How do I make a door open when a player walks near it? How do I get video to play when the viewer touches this button? Why doesn't this software I'm using have a tool to do what I want?

Because no one has programmed code to do that yet! You can either rely on the whims of software developers for the rest of your life - or you can learn how to create solutions to your technical problems. This course will introduce you to the fundamentals of computer programming using the Unity game engine. We will be using the C#

(pronounced: "see sharp") programming language to develop Unity Scripts - but the concepts learned will be broadly applicable to other programming languages and challenges.

Note: This is a companion class to Unity Game Engine for Interaction & VR/AR and it is strongly encouraged that you take both.

Description

Unity Game Engine: Interaction and VR/AR

The Unity game engine makes it easier than ever for you or a small team to produce stunning real-time 3D graphics that run on everything from a custom-built PC to the phone in your pocket. Realistic lighting, physics simulations, particle effects, and built-in support for a number of hardware inputs make Unity ideally suited to create room-scale Virtual Reality (VR) experiences, interactive art installations, video games, and Augmented Reality apps. You will learn the key tools and workflows of Unity by creating an environment that encourages exploration through interaction, animation, and sound design. We will also spend some class time discussing your ideas for independent projects and how they might be achieved or enhanced with Unity.

Note: This is a companion class to "Unity Game Engine: Programming in C# and it is strongly encouraged that you take both.

Description

Students must contact the teacher via email or at class signup to discuss their proposed project. geiser@calarts.edu

Performing Object Lab is an interdisciplinary laboratory for MFA students (Institute-wide) with a focus on creating original work that incorporates a strong visual component, objects,

and/or puppets. This lab is a practicum for the ongoing development of each individual artist's vision, and addresses the particular challenges of "material performance" with objects, puppets, projection, and related visual performance forms. Designed as a process-oriented lab, the class is a site for experimentation and for all aspects of the development of new work: direction, design, writing/adaptation, performance. The students will be expected to present works in progress weekly or bi-weekly, and to participate in critiques. Students are also encouraged to present their work outside of the classroom, if that makes sense to their process.

Working in a low-tech way, with an emphasis on exploring the core issues and forms which motivate each artist's work, and on investigation and process, artists will define and refine their aesthetic voices, while developing practical skills in the development of new performance works.

Weekly goals and assignments are determined for each student or collaborative team through consultation with the instructor, in response to their projects and goals. All students will participate in critiques for in-class presentations works-in-progress. Students are expected to be available for up to two weekly rehearsals outside of the main three-hour lab period, as needed.

School of Theater	Directing

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
3

Description
This class considers the conceptual and practical aspects of adapting existing texts (whether from drama or literature) when using puppets or performing objects as integral elements in a theatrical work. Open to all MFA students, students from different disciplines will work in tandem, selecting and analyzing texts and considering the use of puppet forms that can illuminate the text in substantial ways. This collaboration is essential in the development of new work for that incorporates puppets or objects, as the puppet serves a double use as both an element of the design and as a performing object/actor. While conceiving and designing these objects as a part of the dramaturgical approach, students will examine the ways in which the use of puppets can unlock a text or create a world. Through viewings and assignments, students will explore issues such as scale, doubling, ambiguity, the use of metaphor, and the relationship of actor to puppet, while examining the historical use of the performing object as an essential theatrical tool of the avant-garde.

Credit Hours

Min Credit Hours:
2.5

Description
Limited to 12 students
This class considers the aesthetic, conceptual and practical aspects found at the intersection of text (whether from drama, literature, web, journalism, original texts, or other sources) when using material elements such as puppets or constructed objects as integral elements in performance. We will examine traditional / populist forms, such as humanettes, ventriloquism, and hand puppetry, picture performance, including the traditions of Punch and Judy, Blue Blouse and Constructivist performance. We will also examine contemporary work including Visual/ Performance Art, Fluxus performance, Agit Prop, digital doppelgangers, and related forms. Students will create short works in response to their engagement with these forms. Viewings of works across disciplines will be integral to these investigations, highlighting the cross-medial intersection of contemporary object performance with other forms.
While conceiving and adapting new work, using low-tech methods, students will consider the use of performing objects as a part of a unified scenographic and directorial approach. Students will examine the ways in which the use of puppets, objects, masks, and other material forms can unlock a text or create a world. Through viewings, readings, assignments, and in-class projects, students will explore issues such as scale, composition, ambiguity, manipulation/focus, and the relationship of performer to objects and puppets, while examining the historical use of performing objects as an essential theatrical tool of the avant-garde.
For their final projects, each student (or collaborative team) will propose a short object performance-based work to develop in the final 4 weeks. During this development time, class time will be allotted for work on the projects, as well as for critique of working progress. The viewings will be chosen to relate to each student's final projects. The class will culminate in a performance of works in-progress or finished works.
please add this to both:
Note: If waitlisted, see instructor at course signup.

TIMM505 - Intro to Personal Filmmaking

General

Course Long Title

Intro to Personal Filmmaking

Subject CodeTIMM Course Number505

School(s)School of Theater

Academic LevelGR - Graduate

Credit Hours

Min Credit Hours:2

Description

The camera has become a regular participant in theater work in a wide variety of ways. Theater Artists need to come to grips with the camera as part of their everyday reality. This production class has been designed specifically to introduce Theater School students, BFA2 & above, to the aesthetic possibilities of artist-based filmmaking.

The first half of the semester is devoted to a series of 4 exercise assignments where students encounter the building blocks of visual filmmaking. These exercises are like visual calisthenics; their restrictions and limitations challenge the students to grow the visual and formal side of their camera use and will help students deepen their understanding of composition, movement, sensitivity to light, and rhythm through editing. The second half of the semester will be devoted to the students creation of a longer film of at least 5 minutes in a final project of their own choosing. The completed exercises and final project will be presented for in-class screening, feedback, discussion and critique. The assignments are also used as springboards into foundational aesthetic discussions about film form.

Students will be required to provide their own camera, editing program and hard drives for their projects. Consumer level versions of this equipment and software systems are completely acceptable for use.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Credit Hours

Min Credit Hours:2

Description

A one semester course open to all Theater School students, BFA 3 and above, who have completed Intro to Personal Filmmaking or its equivalent. The course will offer students a chance to more deeply explore the challenges and satisfactions of artist filmmaking. This course will follow a workshop structure, where students present their in-progress films to be viewed, discussed and critiqued. Students will need to be self motivated and generate projects they are passionate about. We will strive to create an atmosphere of mutual support and inspiration in which students can respond to and feed off each others choices. Students will create and work to complete several shorter films by semesters end. These can be narrative, abstract or poetic or any combination of various approaches. Students will need to supply their own cameras and editing software to make their films. Working with a camera phone is completely acceptable.

Students are required to supply their own cameras (a phone camera is acceptable), hard drives and editing software. At the high end, student's should expect to spend \$300-\$500 on hard drives and supplemental camera equipment.

Credit Hours

Min Credit Hours:2

Description

A one semester course open to all Theater School students, BFA 3 and above, who have completed the introductory course Screenwriting for the Theater Artist or its equivalent. The course will offer students a chance to more deeply explore the challenges and satisfactions of writing for the screen and really lock in the lessons learned in the intro class. This course will follow a workshop structure, where students present their in-progress drafts to be read aloud, discussed and critiqued. Students will propose, outline and work to complete several drafts of a screenplay in a film form of their choice: short, webisode, feature, tv pilot. They will need to complete a minimum of 25-30 pages of properly formatted writing by semesters end. Significant re-writing and re-working of drafts a necessity.

If a student's trial version of Final Draft has expired they will need to purchase this professional screenwriting software. With a student discount it is \$130.

General

Course Long Title
Toy Theater

Subject Code Course Number
TIMM 512

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Toy Theatre was a popular parlor, cabaret, and salon entertainment in Europe and America in the 19th Century. Toy Theatres were miniature replicas of actual theaters and plays performed on the stage.

Through projects, viewings, and readings, we will explore the traditional and contemporary practice of Toy Theatre through its roots in the peepshow, the diorama, and the cabinet of curiosities. We will explore the use of Toy Theater by 20th/21st Century artists, who have expanded this low-tech, highly portable and expressive form as a vehicle for abstract, personal, historical, or political performances and installations. Video and live-feed elements have expanded the possibilities of the form.

Through a series of three projects, students will design and create their own peepshows, dioramas, and Toy Theater inspired performances, either in response to a range of possible texts, or as visual theater, film, video, or installation works.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

TIMM513 - Shadow Puppetry

General

Course Long Title
Shadow Puppetry

Subject Code Course Number
TIMM 513

School(s)
School of Theater

Academic Level

Description

One of the most ancient forms of theater, shadow puppetry has been an essential form historically in both ritual and secular theater. Shadow theater has also played an important role in the modern theater, from the legendary Chat Noir performances in Paris, to the continually evolving Indonesian Wayang, to the works of contemporary avant-garde artists. This course will explore the medium of shadows through in-class viewings of theater, film, visual/installation art, photography, and graphic design that utilize shadow forms in evocative and imaginative ways. Students will work on individual and collaborative projects that explore a variety of approaches to the theatrical use of shadows.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Special Topics in Puppetry: Projected Objects/The Tangible Ephemeral

This laboratory class will explore the intersection of objects, miniatures, and bodies (human and artificial) with directed light and projection, in the context of performance and installation. From the magic lantern, to the early days of film, to the myriad contemporary digital video forms, light and projection have been used as aesthetic elements in the theatrical animation of objects. In this class, students will be confronted with a number of paradigms to consider, explore, and explode, such as projection through translucent objects, the use of projection within theatrical objects, the use of projection as an element of the space which the object inhabits, the nature of screens, and the integration of essentially ephemeral projection with the artifice of tangible objects and environments, and with the human body.

Note: This is a class based in aesthetics and problem solving, rather than in the technical realm. The instructor's focus will not be on teaching software or programming. The range of technical knowledge within the class will most likely be wide, and no prior technical experience is necessary. Students may work low tech, high tech, or anywhere in-between---idea and aesthetics are the focus. The laboratory nature of the class will hopefully facilitate a shared knowledge among participants.

Performing Object Lab is an interdisciplinary laboratory for MFA students (Institute-wide) with a focus on creating original work that incorporates a strong visual component, objects, and/or puppets. This lab is a practicum for the ongoing development of each individual artist's vision, and addresses the particular challenges of "material performance" with objects, puppets, projection, and related visual performance forms. Designed as a process-oriented lab, the class is a site for experimentation and for all aspects of the development of new work: direction, design, writing/adaptation, performance. The students will be expected to present works in progress weekly or bi-weekly, and to participate in critiques. Students are also encouraged to present their work outside of

the classroom, if that makes sense to their process.

Working in a low-tech way, with an emphasis on exploring the core issues and forms which motivate each artist's work, and on investigation and process, artists will define and refine their aesthetic voices, while developing practical skills in the development of new performance works.

Weekly goals and assignments are determined for each student or collaborative team through consultation with the instructor, in response to their projects and goals. All students will participate in critiques for in-class presentations works-in-progress.

Students are expected to be available for up to two weekly rehearsals outside of the main three-hour lab period, as needed.

Description

Pre-Visualization-VW/Cinema4D/3DPrint/VR for Scenic/Env Dsg:
Pre-Visualization for Scenic and related designers in a synthetic methodology, including Vectorworks, Cinema 4D animation, 3D printing, and VR pre-visualization. The Industry is evolving towards a synthetic use of groups of software to produce finished 3D models quickly that can produce the plans for construction, 3D print the physical model, Animate Pre-visualization for the Artistic team, and Program the automation/Lighting Consoles. Vectorworks is the foundation but will be taught synthetically with the others. The class will be for all advanced visual designers focused on, MFA's and advanced BFA's. Advanced students from other disciplines throughout the Institute may apply with permission from the Instructor. Students entering this class are expected to have a basic working Knowledge of Vectorworks and Cinema 4D.

This is an interdisciplinary, project-based course examining ways that creative practice can contribute to a more ecological future. In this cycle of the course, we will join a larger, multi-university initiative in cooperation with LA County, which in 2020 rolled out a very ambitious set of sustainability goals. In service of this more resilient future, students will encounter leading trends, visit with local experts and thinkers, and bring the unique flavor of CalArts to the development of pilot initiatives. Student teams will forge models of how creative practice can be brought to bear on these challenges and take steps toward implementation plans and prototypes to build a more resilient future and be directly responsive to the climate crisis in our own backyard.

The Fall 2022 version of the class will focus on oceans, water, and their role in the climate crisis in particular, and involve some time down at the Port of Los Angeles with partner organizations.

Course Long Title
Centering the Audience: Immersive Design

Subject Code	Course Number
TIMM	602

School(s)
School of Theater

Academic Level
GR - Graduate

Min Credit Hours:
3

This course focuses on the role of the audience or public in immersive design and performance. Through in-depth investigation of case studies from theater, gaming, installations, activations, and immersive journeys, the course will look at a range of frameworks, strategies, methods, and tactics for shaping individual and collective experiences. Students will apply new knowledge on embodiment, intimacy, agency, participation, interactivity, and world-building to their own short-form experiments, developed over the course of the semester, both making for and acting as audience and publics in each other's explorations.

Science forecasts that, without radical change, the world as we know it may cease to be able to support homo sapien within decades. This course will engage with guest experts in radical life extension, AI that teaches empathetic kindness, free swimming robotic replicants, and NASA inter-planetary explorers to begin to understand

some of the pioneering that will define the future of our species. From these encounters, the course will culminate in a design marathon where students work individually, or in teams, to develop and prototype concepts to meet the challenge of achieving a sustainable deep future.

This course uses the lens of Experience Design to connect student designers and artists to current thinking around deep, speculative futures.

Description

AutoCAD Semester 1 is a project-oriented approach to learning the fundamentals of drafting with AutoCAD. This course is primarily intended for entering MFA and BFA technical direction students and scene designers, though it is open to all students as space allows. The goal of this course is to train students to facilitate visual communication between Technical Directors, Designers, Scenic Carpenters and the entire production team and will be geared toward that end. We will be working with the current versions of AutoCAD (2007-09). Students will be encouraged to expand on the familiarity of the software gained in class lessons by applying it to specific projects within their metier. Students will learn to draw increasingly complex 2D objects and how to visually communicate them by the use of layouts, templates, dynamic blocks, dimensioning, scaling and sheet sets and e-transmission.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Description
Healthcare by Design operates as a dynamic, project-based partnership with Reimagine Well, in which students work directly on a project with real-world applications and public benefit, using the lens of experience design. Each iteration of the class has a partner and content focus, with past classes taking on subjects including end of life / palliative care, pediatric cancer treatment, movement-based recovery post-op for kids, on-site care environments for staff and doctors, adolescent / young adult early diagnosis and oncofertility, and non-pharmacological psychedelic experiences for PTSD. The class takes a deep dive into the subject matter, interacts with existing models and precedent work from the healthcare and experience design contexts, brings

students into direct dialogue with clinicians, practitioners, healthcare organizations, patients, and non-profits, and develops a pilot in response to the challenge presented.

General

Course Long Title
Body Performing Nature

Subject Code Course Number
TIMM 623

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
Led by an architect and leading thinker in biomimicry, this workshop starts from the analysis of our own body and our skin: the organ that enables us to connect with the others. How can we, as creative artistic minds, envision our future as part of nature: poetically, technologically and materially connected? We are nature and nature is all around us. We will explore CalArts campus, observe our bodies and the living organisms around us. Working in group, we will extrapolate lessons and cues, and we will design and make a wearable artifact that will enhance and extend our perceptions and connections to other living organisms and augment sensations and atmospheric adaptations with the ecology of the site. A prosthesis, a sculpture, a prop, an extension, that extends our "skin" and connects us with and to the other/s; with the serious yet playful intent to better understand body, space and the environment in this era of disconnect with the environment. This cross-disciplinary class embodies the rigorous spirit of experimentation intersecting learning and practice, connecting science and the arts with the intent to produce 4D experiences.

TIMM625 - AutoCAD II

General

Course Long Title
AutoCAD II

Subject Code Course Number
TIMM 625

School(s)
School of Theater

Academic Level

Description

Unity Game Engine: Programming in C#

How do I make a door open when a player walks near it? How do I get video to play when the viewer touches this button? Why doesn't this software I'm using have a tool to do what I want? Because no one has programmed code to do that yet! You can either rely on the whims of software developers for the rest of your life - or you can learn how to create solutions to your technical problems. This course will introduce you to the fundamentals of computer programming using the Unity game engine. We will be using the C# (pronounced: "see sharp") programming language to develop Unity Scripts - but the concepts learned will be broadly applicable to other programming languages and challenges.

Note: This is a companion class to Unity Game Engine for Interaction & VR/AR and it is strongly encouraged that you take both.

Description

Unity Game Engine: Interaction and VR/AR

The Unity game engine makes it easier than ever for you or a small team to produce stunning real-time 3D graphics that run on everything from a custom-built PC to the phone in your pocket. Realistic lighting, physics simulations, particle effects, and built-in support for a number of hardware inputs make Unity ideally suited to create room-scale Virtual Reality (VR) experiences, interactive art installations, video games, and Augmented Reality apps. You will learn

the key tools and workflows of Unity by creating an environment that encourages exploration through interaction, animation, and sound design. We will also spend some class time discussing your ideas for independent projects and how they might be achieved or enhanced with Unity.

Note: This is a companion class to "Unity Game Engine: Programming in C#" and it is strongly encouraged that you take both.

Course Long Title
Lighting Design I: The Design Process

Subject Code	Course Number
TLTG	210

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description

LIGHTING DESIGN 1: THE DESIGN PROCESS

Open to Theater Design and Production students only and others with permission of instructor.

A course in developing creative lighting ideas for performance. Students will develop a comprehensive lighting approach for one play, including conceiving and articulating the light idea, analysis of dramaturgy and space, possibilities of color and texture, planning and drawing the light plot, and creating support paperwork. Basic knowledge of Vectorworks and Lightwright is required.

No Requirements

General

Course Long Title
Advanced Light Lab

Subject Code	Course Number
TLTG	250

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description

Open to Theater School Design & Production students only, and other Institute students with permission of instructor. The objective of Light Lab is to explore the phenomena of light in a practical workshop setting. Through creative individual, and group projects, students will exercise control of lighting's properties (color, intensity, angle, and composition) to find creative solutions to problems typically found in performance settings. A journal of lighting observations will be kept to develop the skill of seeing and articulating light. While the lab will utilize theatrical lighting equipment, no previous knowledge or experience with such equipment is necessary.

Description
This class is open to BFA 4 lighting students who have successfully completed GrandMA3 Training TLTG-327. During the semester, students will join MFA students to conduct practical exercises in the Light Lab utilizing moving lights through programming a moving light console - the GrandMA 2, 3 or ChamSys consoles in the Light Lab. Each week, a different assignment will be given based on a musical theme given by the instructor. The students will work independently or in groups to create short moving light shows on the light lab stage using mannequins, props, backdrops, atmospheric haze and strobe lights. The objective of the class is to learn to cue to music to convey message and emotion while strengthening personal artistry through color and movement. The student must have programming ability and demonstrate a knowledge of the GrandMA3 console.

Description

Independent Producing is an exploration of the artist-driven process with emphasis on the collaborative role of the emerging creative producer. Through a series of guided lectures intended to provide valuable insight into the role of the creative producer, and classroom discussions curated to provide necessary self- reflection, the course will analyze the current creative landscape focusing on the live performance work around Los Angeles.

The class will operate through the lens of the individual artist as the main source of influence behind a project's conception, development, and actualization. Encouraging participants to create work that empowers oneself, students will be allowed to use original work, and School of Theater productions to engage with the discussions in the classroom.

The course will articulate the basics of creating & articulating a vision, devising an action plan, establishing a team, and leading a group toward its successful collective goals. We will focus on different cornerstones of the producing process including fundraising, budgeting & cash flow, developing relationships, marketing & publicity, crowdsourcing, and the leading the collaborative dramaturgical process.

The course will explore different types of producing models including the work and process of

companies such as Poor Dog Group, Wilderness, Octopus Theatricals, and Punchdrunk. The course will also introduce and familiarize students with the unique support that is available to create work through various arts service organizations such as the Network of Ensemble Theaters, Theatre Communications Group, and Fractured Atlas. The course will utilize samples from texts like A Director Prepares by Anne Bogart, The Ideal Theater by Todd London, Making Things Happen by Scott Berkun, and Julia Cameron's The Artists' Way. We will also utilize podcasts such as The Producers' Perspective (Interview with Leigh Silverman), TCG OffScript (Mark Valdez Defines Ensemble), and No Proscenium (Interview with Third Rail Projects). The course will also feature at least one guest speaker from the Los Angeles area.

TMPR505A - Cultural Policy: Theory

General

Course Long Title
Cultural Policy: Theory

Subject Code	Course Number
TMPR	505A

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description
Cultural Policy Module 1: Theory
This course is an investigation of the processes of cultural policy making and the institutions and forces that influence cultural policies. Cultural policies operate implicitly and explicitly to shape nearly every aspect of our lives, public and private. As artists and culture workers we are responsible for being knowledgeable critics of the institutions and interests that form the environment and conditions under which we practice, and for participating in shaping the future of cultural policies.

Registration Restrictions

Description
Cultural Policy Module 2: Research & Practice
Cultural policies operate implicitly and explicitly to shape nearly every aspect of our lives, public and private. As artists and culture workers we are responsible for being knowledgeable critics of the institutions and interests that form the environment and conditions under which we practice, and for participating in shaping the future of cultural policies. Building on the work of Cultural Policy Module 1, this project-based module provides a research and laboratory environment for analyzing an area of cultural policy and developing a proposed intervention or policy that relates to the student's area of creative practice. This course will deepen the investigation of the processes of cultural policy making and the institutions and forces that influence cultural policies.

Registration Restrictions
RGSMPRPD - Stage

TMPR510 - Audience Development and Marketing

General

Course Long Title
Audience Development and Marketing

Subject Code	Course Number
TMPR	510

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
Designed for graduate producing students, Audience Development focuses on all the aspects of getting a project into the public eye: digital and social media marketing, direct mail, advertising, press, and publicity. The class also considers the larger issues of audience development, institutional and project visibility, positioning within the community and the nuances of marketing the arts.

Registration Restrictions

TMPR615 - Business of Producing Performance

General

Course Long Title
Business of Producing Performance

Subject Code
TMPR

Course Number
615

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description
This course is designed to provide a survey of institutional structure, touring support organizations, and commercial business practices for the performing arts. Focused on the business of producing performance, we will discuss budgeting and marketing practices of non-profit and commercial arts organizations and will examine the structures of touring support organizations. More specifically, through case studies, reading and research, we will look at internal organizational structures to understand producing models, study the elements of effective organizational budgeting, marketing approaches for projects and small organizations, and will gain introductory knowledge of presenting, producing, and touring contracts.

UG - Undergraduate

Credit Hours

Min Credit Hours:

1

Description

Introduction to Drafting will explore the techniques, conventions and practice of mechanical drafting for design. Students will learn about drawing standards, drafting conventions and plan reading/review. Traditional hand drafting skills will be applied using CAD (vectorworks) as the primary layout tool. Students will learn key concepts including accuracy & precision, scale & proportion,

projection and perspective, line & fill types, layout, annotation and package prep. Exploring these conventions will support the design practices used in a collaborative creative process.

Descriptive Perspectives

Subject Code	Course Number
TSCE	111

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
This class will examine how the body reshapes space into an immersive environment. Our body's movements in space define our understanding of the environment we inhabit. Whether it is an indoor or outdoor space, we understand the world through our senses and in relation to spaces defined by their lines, surfaces and volumes.

Students will develop their skills in both hand and digital drawing, with a focus on understanding and drawing in perspective. Embedded in this course is also an intensive introduction to the 3D Modeling program McNeel Rhino 5.0.. Through a variety of investigations, students will enhance their understanding and perception of the interactions between objects and space(s) and the human figure and objects. They will develop the skills to graphically present ideas and represent objects necessary for a designed environment to be realized.

Students should expect to spend up to \$100 on additional course supplies.

Description

Sound/Music/Noise Design for Dramtic Scripts

Design of sound/music/noise to various types of theater scripts. In addition to plays, we may consider film, comics, visual art, dance, ritual, sound/music notation.

Activities include presentations, audio design/composition assignments, research, journaling, participation, relentless self-organizing, and egolessness. We are building a curriculum and a sound portfolio together.

Credit Hours

Min Credit Hours:

3

Description

Examination and analysis of intercultural musical aesthetics and sonic/cultural structures of meaning through the dual lenses of artistic and academic views of music, sound art, and design. In this course we examine both great and small intercultural traditions that inform music-making and sound practices (theater, dance, performance, ritual, nature, healing, mass participation, religion, commerce, identity-building). We do this in order to expand our own art praxis into an informed, inclusive art practice. We will also examine the work of modern and contemporary individual and collaborative artists in a worldwide context. By challenging basic Western assumptions about meaning, beauty, symmetry, and organization, classical and vernacular world musics and arts challenge the everyday "common sense" categories of Western ethnocentrism still lingering in American and European post-colonial society. We will also examine difficult contemporary ethical

issues such as appropriation and representation, compensation and justification. This course is intended for sound designers, filmmakers, theater designers, and visual artists (not formal musicians, although musicians will also benefit) who want to make sound/music/noise a central part of their creative practice.

Description
Special Topics in Sound Design: Live Mixing for Theater.
Starting with the script, the course will cover the breakdown, annotation, and organization necessary to create a "run script". This information can then be used to layout a console and program cues to mix a live show. The course will have a large practical component in which students will be assigned sections of a show to program and mix. With each assignment, the student is expected to improve their mixing skill and explore more advanced concepts related to dynamics, musicality, management of sound quality using EQ and compression.

Description

A intensive practical exploration of modern audio delivery systems and their various performance based applications. Students will study, research, explore, experience, and participate in the many and varied performance, art and event related audio experiences available in the greater Los Angeles area. Specific course work exploration will focus on the audio design methodology and system integration particular and unique to each event or performance. Students will expand their technical and aesthetic senses to include available acoustic environments previously unnoticed as theoretical design concepts. Participation will involve a weekly two-hour class session followed by a weekly 4-hour lab session. Both class periods and lab sessions will be held on and off campus. Students will be held responsible for their individual transportation and event-ticketing expenses as required. Consideration will be made for SOT related production schedule conflicts. Off site institutions under consideration for study will include The Los Angeles Music Center, REDCAT, Staples Center, The Kodak Theater, The Nokia Theater, The Getty Center, the Skirball Center, The Geffen Playhouse, Dodger Stadium, Angel Stadium, The Hollywood Bowl and many others.

General

Course Long Title
Practical Electronics for TDs!

Subject Code	Course Number
TTDI	211

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
This course will build a fundamental understanding of electronics and how they can be used to solve every different type of technical design task the modern TD may be tasked with. Students will learn about component identification and reading and drawing schematics, prototyping electronics and developing control systems for motors and actuators to incorporate into their technical design practice.

Students will get a strong understanding of using the Arduino platform and programming language to build one-off control systems for controlling Motors, addressable and non-addressable LED lights, sensors and much, much more.

The applications of a strong fundamental understanding of electronics and microcontrollers

are endless - from the worlds of theater, themed entertainment and technical design to those of art, sculpture and product development.

General

Course Long Title
Cable!

Subject Code	Course Number
TTDI	240

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
The world of the modern Theater Professional is powered by a myriad of cables - from delivering power, carrying video and audio signals, networking data signals, safely delivering lighting controls and everything else besides.

This course will cover a different family of cables and connectors every week - students will learn how to identify, maintain and install all of the different types of cables needed to run the modern Theater or Themed Entertainment Experience. Along with hands-on time actually making different types of cables, students will learn the fundamental concepts that govern the different types of signals each cable carries.

In the latter half of the class, students will learn to use the DMX standard to automate various different systems and solutions in the increasingly technical world of Technical Theater.

Working Metal

Subject Code Course Number
TTDI 310

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Open to Design & Production Programs students only.

Our history has been marked by it and wars have been won and lost based on who could use it and neither of these topics will be covered in this course. Most of us see metal as either a finished piece or as a raw material but how do we get from A to B? This course offers the technical training to allow students to turn raw material into a finished project. Through labs and lectures students will be shown how to use both basic and advanced hand-tools and machinery to create forms and structures whose uses can be for both

practical and purely aesthetic. Topics may include metal forming (both cold and hot), basic blacksmithing, jig and pattern design and basic metal fixture design.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

Course Long Title
Metal Form Building

Subject Code Course Number
TTDI 311

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description
This course is a culmination of two classes: Welding and Working Metal. This course is the direct application of techniques taught in these two courses using sculptural designs digitally constructed in one of several 3d modeling programs. During this class we will start by looking at sculptural forms both manmade as well as naturally occuring ones which we will brake down into shapes that can be constructed using metal working techniques. Once these shapes are broken down we will use CNC equipment to create templates for our metal patterns that will allow us to start constructing in 3d.

Course Long Title
The Stagecraft of Illusion

Subject Code Course Number
TTDI 375

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
2

Description
Open to Design & Production Programs students only.

The Stagecraft of Illusion is a hands-on exploration of the development of the large scale stage illusions that were the staple of the touring magic shows of the late 1800s and early 1900s. While this is not specifically a shop class, some shop skills are required, and a variety of skills are welcomed. Working together, students will research, design, and build variations on classic stage illusions. Functionality, aesthetic value, and stage presentation will be taken into equal consideration from inception to completion.

Description

It is part of a Technical Director's job description to constantly perform feats of impossibilities and each TD must be prepared to do so. This class is offered to BFA Technical Direction students by permission of instructor. Through case studies and hands on construction, TD's will be asked to explore

techniques, materials, abstract ideas and develop a proverbial 'bag of tricks' as well as a presentation style that will allow them to share this with each other and the world.

General

Course Long Title
Practical Electronics for TDs!

Subject Code	Course Number
TTDI	511

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours
Min Credit Hours:
2

Description
This course will build a fundamental understanding of electronics and how they can be used to solve every different type of technical design task the modern TD may be tasked with. Students will learn about component identification and reading and drawing schematics, prototyping electronics and developing control systems for motors and actuators to incorporate into their technical design practice.

Students will get a strong understanding of using the Arduino platform and programming language to build one-off control systems for controlling Motors, addressable and non-addressable LED lights, sensors and much, much more.

The applications of a strong fundamental understanding of electronics and microcontrollers are endless - from the worlds of theater, themed entertainment and technical design to those of art, sculpture and product development.

Credit Hours

Min Credit Hours:
2

Description
The world of the modern Theater Professional is powered by a myriad of cables - from delivering power, carrying video and audio signals, networking data signals, safely delivering lighting controls and everything else besides.

This course will cover a different family of cables and connectors every week - students will learn how to identify, maintain and install all of the different types of cables needed to run the modern Theater or Themed Entertainment Experience. Along with hands-on time actually making different types of cables, students will learn the fundamental concepts that govern the different types of signals each cable carries.

In the latter half of the class, students will learn to use the DMX standard to automate various different systems and solutions in the increasingly technical world of Technical Theater.

Registration Restrictions

TTDI	575

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
2

Description

Open to Design & Production Programs & Specializations students only.

The Stagecraft of Illusion is a hands-on exploration of the development of the large scale stage illusions that were the staple of the touring magic shows of the late 1800s and early 1900s. While this is not specifically a shop class, some shop skills are required, and a variety of skills are welcomed. Working together, students will research, design, and build variations on classic stage illusions. Functionality, aesthetic value, and stage presentation will be taken into equal consideration from inception to completion.

Description

Open to Design & Production Programs & Specializations students only.

Our history has been marked by it and wars have been won and lost based on who could use it and neither of these topics will be covered in this course. Most of us see metal as either a finished piece or as a raw material but how do we get from A to B? This course offers the technical training to allow students to turn raw material into a finished project. Through labs and lectures students will be shown how to use both basic and advanced hand-tools and machinery to create forms and structures whose uses can be for both practical and purely aesthetic. Topics may include metal forming (both cold and hot), basic blacksmithing, jig and pattern design and basic metal fixture design.

There may be additional fees associated with this course for supplies, books, or other materials. For more specific costs please view the syllabus or speak with the instructor.

General

Course Long Title
Metal Form Building

Subject Code Course Number
TTDI 611

School(s)
School of Theater

Academic Level
GR - Graduate

Credit Hours

Min Credit Hours:
1

Description

This course is a culmination of two classes: Welding and Working Metal. This course is the direct application of techniques taught in these two courses using sculptural designs digitally constructed in one of several 3d modeling programs. During this class we will start by looking at sculptural forms both manmade as well as naturally occurring ones which we will brake down into shapes that can be constructed using metal working techniques. Once these shapes are

broken down we will use CNC equipment to create templates for our metal patterns that will allow us to start constructing in 3d.

Description

At the conclusion of this 2-semester course, students should be capable of creating and executing an integrated media performance. Specifically, they should be able to: conceive the points and methods of integrating moving images with live action, conceive and develop effective multi-media video content, conceive and design a multi-channel integrated media performance using projection and other displays, use a workshop development style to enhance their rehearsal and development process, and use in-class media theory readings to articulate the relevance of their artistic choices. Skills we will develop include methodology and use of: live cameras, pre-recorded video content, real-time software, and other new media at the students' discretion. Students will create regular group projects interspersed with media theory readings and discussions. This course is appropriate for actors, video/filmmakers, designers, and other artists with an interest in using media in live performance and installation art. We cover all aspects of the creation and artistic process. No prior technical expertise required.

General

Course Long Title
Creating for Augmented Reality

Subject Code Course Number
TVID 420

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
Creating for Augmented Reality is a studio class with a focus on creating, developing, and experimenting with new forms of storytelling and experience creation in AR. As AR becomes increasingly present in our lives, we will explore strategies for storytelling in "open world" immersive and interactive environments by studying historical forms such as choose-your-own-adventure and looking at emerging and yet-to-be-developed rhizomatic forms. The focus of this class is the creative invention and exploration of new forms of participatory storytelling and engagement. This class should prepare students for engaging with new art-making practices in emerging interactive and immersive fields. The technological needs of the class will be supported by TVID-454 Programming for Augmented Reality, which is recommended to be taken simultaneously.

General

Course Long Title
Interactive Video Installation

Subject Code Course Number
TVID 440

School(s)
School of Theater

Academic Level
UG - Undergraduate

Credit Hours

Min Credit Hours:
3

Description
This course will prepare students to conceive and create multi-channel video installations, including: strategies for creating video content for an installation context, designing the physical environment and necessary technological systems, and executing and installing the final elements to achieve their full vision. It is a project-oriented course, however a few reading assignments will prepare students for engaging with installation art on a theoretical level and familiarize them with the current state of the field. This course is not technically focused, but some facility with software and electronics is required. At the conclusion of the course, students will conceive and execute their own unique, original video installation. The technological needs of the class will be supported by TVID-455 Real-time Interactive Tools, which is recommended to be taken simultaneously.

Description
Creating for VR is a studio class with a focus on creating, developing, and experimenting with new forms of storytelling and experience creation in VR. As VR becomes increasingly present in our homes, we will explore strategies for storytelling in "open world" immersive and interactive environments by studying historical forms such as choose-your-own-adventure and looking at emerging and yet-to-be-developed rhizomatic forms. The focus of this class is the creative invention and exploration of new forms of participatory storytelling and engagement. The technological needs of the class will be supported by TVID-453/TVID-653 Unity, which is recommended to be taken simultaneously.

Description
Unity Game Engine: Programming in C#

How do I make a door open when a player walks

near it? How do I get video to play when the viewer touches this button? Why doesn't this software I'm using have a tool to do what I want? Because no one has programmed code to do that yet! You can either rely on the whims of software developers for the rest of your life - or you can learn how to create solutions to your technical problems. This course will introduce you to the fundamentals of computer programming using the Unity game engine. We will be using the C# (pronounced: "see sharp") programming language to develop Unity Scripts - but the concepts learned will be broadly applicable to other programming languages and challenges.

Note: This is a companion class to Unity Game Engine for Interaction & VR/AR and it is strongly encouraged that you take both.

Description
The Unity game engine makes it easier than ever for you or a small team to produce stunning real-time 3D graphics that run on everything from a high-end gaming PC to the phone in your pocket. Realistic lighting, physics simulations, particle effects, and built-in support for a number of hardware inputs make Unity ideally suited to create room-scale Virtual Reality (VR) experiences, interactive art installations, video games, and Augmented Reality (AR) apps. You will learn the key tools and workflows of Unity by creating an environment that encourages exploration through interaction, animation, and sound design. We will also spend some class time discussing your ideas for independent projects and how they might be achieved or enhanced with Unity.

Credit Hours

Min Credit Hours:
3

Description

This course covers the fundamental skills required to design and build an augmented reality experience for mobile and headset applications. For the first part of the course, students will demonstrate their understanding of the limitations and applications of AR by constructing a number of short interactive experiences. In the second part of the course, students will apply previous skill sets to develop an original, cumulative AR project. All students will start by learning how to use Reality Composer to create and test simple yet engaging experiences without writing a single line of code. Students will continue to learn the development patterns needed to build AR content with Unity. Some students will learn how to apply their existing Unity and C# skill set to an AR development environment, while others may continue using Reality Composer as their primary tool. As the world of AR is ever evolving, this course will also cover new advancements in the field that won't be immediately applicable within the scope of the class, such as Geographical and Visual Positioning Systems, and Multiplayer experiences in AR.

Description

This hands-on course is designed to teach students how to create interactive experiences in both the digital and physical worlds. We begin by learning about basic interactivity principles, using introductory software and hardware for accessible, rapid prototyping suitable for all skill levels. As the course progresses, we'll explore how various advanced tools can be used to interface between the physical and digital world, allowing students to specialize for their final projects. To enhance both technical and historical understanding, we'll also study pre-existing interactive works throughout the course.

Description

Open to School of Theater students only. This a companion course to TVID -610

Real-time Interactive Tools and Techniques will give students a hands-on technical introduction to the implementation of interactive tools in the creation of next-generation immersive/responsive environments and story-based experiences. This class will specifically focus on commercially available interactive tools such as Kinect sensors, Oculus headsets, and LEAP sensors. In addition, integration between software platforms such as Unity, Jitter, and other realtime media servers will be covered. Through the study of these specific tools, students will gain a general working knowledge of motion tracking, computer vision, and interactive programming strategies. The lesson plan for this class will be coordinated with Living Room Interactive and Advanced Cinema 4D. TVID -610his

Description

WINTER SESSION offers students experiential and competency-based learning opportunities that facilitate interdisciplinary art making while supporting core learning within the métiers. Winter Session also provides a intensive, reflective space within the curriculum that allows students to integrate their métier knowledge and skills in new ways, opportunities that do not require a full semester or would not logistically be possible alongside degree-requirements. Winter Session encourages students to invest deeply in one endeavor, rather than working on many things simultaneously. In consultation with their instructor, students may choose from 5 Winter Session activities: Interschool (classes offered throughout the Institute), Winter Lab (creation and development of student generated projects), Curricular Production (expanded engagement in curricular projects), Individual or Group Research (self-guided learning in a solitary/group setting), and Skills Development/Practice (gaining and refining one's artistic practice).

Writing for Performance: Bake-Off

Subject Code

TWNT

Course Number

306

School(s)

School of Theater

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:
0.5

Description

The Bake-Off is a tool to help writers write a first draft quickly. Originally created by playwright Paula Vogel, the Bake-Off distills some essential components of artistic creation: a deadline, commitment, focus, and community. Some people have called it a method for getting out of your own way. At the top of the Writing for Performance: Bake-Off, participants will receive a "recipe" of ingredients for a new play. They will have 48-hours to write and then the full group will gather to celebrate and hear spontaneous cold readings of the new works.

Ingredients for the 2020 Writing for Performance:

Bake-Off will be solicited from faculty throughout the Institute.

Performing Costume

Subject Code

TWNT

Course Number

307

School(s)

School of Theater

Academic Level

UG - Undergraduate

Credit Hours

Min Credit Hours:
1

Description

"In order to see a painting, one must be a painting."

Sam Gilliam, 1986.

Wearing a costume can be seen as a transformative experience, that affects the wearer physically and psychologically. This workshop entitled "name?", enable students to use their bodies as a tool in their creative process, by sculpting and performing their costume works. Costumes create a "new body", whose volume influence posture, movement, interaction with other bodies as well as the perception of space. Students will be exposed to these notions, to gain a better understanding of the physical experience of wearing a costume.

The methods used in this workshop approach costumes in an experimental and multi-disciplinary way, by means of:

Visual research

An important amount of volumic research on the body, transforming the human figure into a walking sculpture, amplifying the natural silhouette (Volumic Body).

A research in movement, or how to use the volume of the costume to occupy space (Body in Space).

A complete documentation of the creative process, from fabrication to performing the costumes, in the form of photographs and/or film.
